

The vision

Excellence in teaching, scientific research and community services with high qualification outputs among the identical department

The mission

Continuing to support the strategy of our college & university in focusing on the educational process and community services our department will work to adopt the philosophy of continuous improvement of the department's management process quality and achieve an appropriate level of satisfaction for all stakeholders and looking forward to make important contributions of graduates in the Iraqi industry

The goals

1. .focus on the quality of education in field of industrial management.
2. .Prepare the student scientifically to work in various organizations through the selection of qualified human resources and appropriate of laboratories.
3. .Commitment to the quality of the educational process and work to develop it

The Plans

Plans derived from the mission and strategy are based on four pillars of the educational processes

1. The lecturer

to upgrade to advanced scientific promotion within three professors until 2021

2. .The student

To improve the the quality of lectures using teaching tools, from the academic year(2018-.2019) and for all the open study programs in our department (Bachelor& post graduate)

3. The infrastructure

:The plan to implement this pillar is:

Completing the classrooms in terms of including all instruments and comprehensively during the academic year 2019-2020, with seven halls for the undergraduate level and four halls for the four post graduate programs

4. .the Curriculum

Developing the implementation of curricula and vocabulary in line with the Ministry's
:directions in terms of

- A. Complet of the four-classes courses within the academic year 2019-2020.
- B. Beginning to adopt the curriculum system starting from the academic year 2019-2020 for the first class.
