Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

# Academic Program and Course Description Guide

**College of Dentistry – University of Mosul** 

#### **Introduction:**

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

#### Concepts and terminology:

<u>Academic Program Description</u>: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**Program Mission:** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

### Academic Program Description Form

University Name: University of Mosul

Faculty/Institute: College of Dentistry

Scientific Department: N/A

Academic or Professional Program Name: Dentistry

Final Certificate Name: Bachelor's Degree in Dental Surgery (B.D.S.)

Academic System: Annual

Description Preparation Date: 01 March 2025 for the 2024-2025 academic year

File Completion Date: 21 April 2025

Signature:

Head of Department Name:

Assist Prof Dr Niam Riyadh Saleem

Date: 29 April 2025

Signature

Scientific Associate Name:

Prof. Dr Ali Rajih Al-Khatib

Date: 29 April 2025

The file is checked by:

Department of Quality Assurance and University Performance

Director of the Quality Assurance and University Performance Department

Assist Prof Dr Alyaa Ismael Naser

Signature:

Admin of Quality Assurance Unit: Assist Lect. Ali Khalil Marie

Date: 29 April 2025

Approval of the Dean

#### 1. **Program Vision**

Program vision is written here as stated in the university's catalogue and website.

#### 2. Program Mission

Program mission is written here as stated in the university's catalogue and website.

#### 3. Program Objectives

The College of Dentistry was established in the academic year 1982-1983 to be another basic building block to be added to the rest of the colleges at the University of Mosul. It aims to prepare medical staff specialized in oral and maxillofacial medicine and surgery with a distinguished scientific and professional level. The college contains educational medical clinics in which students are trained. Clinically in modern clinics in all specialties and fields of dentistry (oral and maxillofacial surgery, dental industry, pediatric dentistry, preventive dentistry, orthodontics, dental treatment and periodontal diseases) and with the latest technologies. This is in addition to their teaching in various scientific and applied laboratories, and the duration of study in the college is five years.

#### 4. Program Accreditation

Does the program have program accreditation? And from which agency? No

#### 5. Other external influences

Is there a sponsor for the program?

No

7. Expected learning outcomes of the particle	7. Expected learning outcomes of the program					
A. Knowledge						
1. The student acquires comprehensive knowledge of the scientific terminology used in dentistry and the theoretical material.	1. Theoretical tests and practical tests.					
2. Familiarize the students with different types of materials and devices used in dentistry.	2. Practical laboratories tests.					
3. Enhancing the student's confidence to deal with all types of patients.	3. Practical mannequin skills tests.					
4. Developing the student's ability to deal with different therapeutic cases.	4. Clinical tests on patients.					
5. Strengthening the principle of participation students group discussions to discuss a medical condition and the method of its treatment.	5. Scientific reports and academic studies.					
6. Providing the student with complete knowledge to enable him to prepare an integrated treatment plan for the patients.	6. Clinical tests on patients.					
B. Skills						
1. Promoting professional ethics and patients' treatment approach between the graduates.	1. Clinical tests on patients.					
2. Acquirement of various therapeutic skills for the students.	2. Clinical tests on patients.					
3. Promoting the principle of continuous education to continue developing the dental profession.	3. Scientific reports and academic studies.					

C. Ethics	
1. The skill of thinking according to the	1. The student to believe in what is
student's ability (let think about thinking	tangible (the student's ability) and to
ability).	understand when, what and how he
	should think and work to improve the
	ability to think reasonably.
2. Critical thinking skill.	2. Aims to pose a problem, analyze it
	logically, and reach the solution.
3. The balance between freedom and	3. Enhances student's awareness of the
responsibility.	necessity of balance between freedom
	and responsibility, to determine the
	best treatment for the patients.
4. Decision making ability	4. Enhances student's skill of making
	the right decision for the benefit of the
	patient based on logical thinking.

#### 8. Teaching and Learning Strategies

- Giving lectures.
- Providing students with lectures on the college website.
- Educational videos.
- Utilization of projectors and digital cameras.
- Use of educational models.
- Training courses and workshops.
- Applied clinical education.
- Focused student group discussion.

#### 9. Evaluation methods

- Theoretical tests.
- Oral exams.
- Laboratory practical tests.
- Practical mannequin tests.
- Practical tests on patients.
- Scientific reports and academic studies.
- Final year research project (Fifth year).

#### 12. Professional Development

#### Mentoring new faculty members

The enrolment of our teaching staff in the teaching skills development courses held by the University of Mosul through teaching methodologies courses and teaching suitability tests.

The enrolment of our teaching staff in English and Arabic language development courses for teaching and promotion purposes organized by the University of Mosul. The enrolment of our teaching staff in computer skills and medical statistics courses to develop their skills in using modern technologies in teaching.

#### **Professional development of faculty members**

Continuously working to measure the performance level of the teaching staff and comparing it with their counterpart in similar educational institutions. Also, to evaluate the teaching staff performance continuously by logging it into integrated database that allows for proper feedback system, which ultimately contributes to the

enhancement of the educational level, that is aiming at advancing the level of quality of services provided to patients.

Organizing continuing education programs for the teaching staff and practicing dentists from other health institutions to develop their scientific, professional and research capabilities. Hence, ensuring the continuous renewal of their information and intellectual capabilities through periodic specialized discussion groups.

#### 13. Acceptance Criterion

Admission criteria include students who have a certain cumulative average according to the central admission system. Students who have the physical, mental, and social ability to manage any medical condition or practice required for study are also selected. Most dental schools require personal interviews with candidates to evaluate qualities such as the desire to help people, self-confidence, and ability to take on challenges, ability to work with people and ability to work independently.

#### 14. The most important sources of information about the program

- 1. The college and university websites.
- 2. The university guide booklet.
- 3. College books and scientific sources.

#### 15. Program Development Plan

Striving through twinning with corresponding dental colleges in prestigious universities locally, regionally and internationally to enhance the academic and scientific performance of the teaching staff and students in the college. Also, through the participation in the academic and scientific forums and meeting locally, regionally and internationally.

The continuous discussion to achieve the best benefit of the e-learning and to increase its impact on the education system to adopt it as adjunct to the traditional teaching methods. As well as, the continuous endeavour of the college to develop its teaching staff in order to advance the educational process to continue the advancement with the latest teaching methods.

Week	Hr	Required Learning Outcomes	Unit or subject name	Learning method	Evaluatio n method	
1	1	Layers of the scalp, Muscles of the scalp, Sensory Nerve Supply of the Scalp, Arterial Supply of the Scalp	Scalp	Theory lectures	Theory exam	
2	1	Venous Drainage of the Scalp, Lymph Drainage of the Scalp, Clinical Notes	Scalp	Theory lectures	Theory exam	
3	1	Eyelids, Movements of the Eyelids, Lacrimal Apparatus, Openings into the Orbital Cavity, Nerves of the Orbit	Orbital region	Theory lectures	Theory exam	
4	1	Blood and Lymph Vessels of the Orbit, Structure of the Eye, Clinical Notes	Orbital region	Theory lectures	Theory exam	
5	1	The Nose, External Nose, Nerve Supply of the External Nose, Blood Supply and Venous Drainage of the External Nose, Nasal Cavity, Nerve Supply of the Nasal Cavity, Blood Supply to the Nasal Cavity, Venous Drainage of the Nasal Cavity, Lymph Drainage of the Nasal Cavity, The Paranasal Sinuses, Drainage of Mucus and Functions of Paranasal Sinuses, Clinical Notes.	The Nasal region	Theory lectures	Theory exam	
6	1	Introduction, Branches of the Mandibular Nerve, Otic Ganglion, Clinical Notes	Mandibula r nerve	Theory lectures	Theory exam	
7	1	Skin of the Face, Muscles of the Face (Muscles of Facial Expression), Sensory Nerves of the Face.	The Face	Theory lectures	Theory exam	
8	1	Arterial Supply of the Face, venous drainage of the Face, venous drainage of the Face,	The Face	Theory lectures	Theory exam	

		Lymphatic drainage of the face, Facial nerve			
9	1	The Lips, The oral Cavity vestibule and Proper, Sensory innervation of the Mouth Hard Palate & Soft palate	Oral cavity	Theory lectures	Theory
10	1	Muscles of the Soft Palate, Palatoglossal Arch & Palatopharyngeal Arch	Oral cavity	Theory lectures	Theory exam
11	1	Muscles of the Tongue, Movements of the Tongue	The Tongue	Theory lectures	Theory exam
12	1	The temporal fossa anatomy, The infratemporal fossa, Communications, Muscles of mastication	Temporal region	Theory lectures	Theory exam
13	1	Parotid Region (Boundaries), Parotid Gland, Parotid Duct, Innervation of Parotid Gland and Related Structures	Parotid gland	Theory lectures	Theory exam
14	1	Arterial Supply, Venous Drainage, Lymph Drainage, The Buccal Pad of Fat, Clinical Notes	Parotid gland	Theory lectures	Theory exam
15	1	Boundaries, Communications and openings, Maxillary nerve, Branches from the pterygopalatine ganglion, The pterygopalatine ganglion, The veins of the pterygopalatine fossa	The Pterygopal atine fossa	Theory lectures	Theory exam
16	1	Introduction, The Articular Disk, Retro-discal Tissue, Capsule, Synovial Membrane, Ligaments, Nerve Supply, Vascular Supply	Temporo mandibula r joint	Theory lectures	Theory exam
17	1	Movements, Important Relations of the Temporomandibular Joint, Clinical Notes	Temporo mandibula r joint	Theory lectures	Theory exam
18	1	Overview, Skin of the Neck, Fasciae of the Neck,	The neck	Theory lectures	Theory exam

		Superficial Cervical Fascia, Deep Cervical Fascia, Cervical Ligaments			
19	1	Muscles of the Neck, Cervical Plexus, Bones of Neck, Blood Supply, Key Neck Muscles	The neck	Theory lectures	Theory exam
20	1	Anterior triangle, Submental triangle, Submandibular triangle	Triangles of the neck	Theory lectures	Theory exam
21	1	Carotid triangle, Muscular triangle, Posterior triangle, Thyroid gland, Blood supply & venous drainage, Nerve supply	Triangles of the neck	Theory lectures	Theory
22	1	Muscles of the submandibular region, The submandibular gland, Sublingual gland	Submandi bular region	Theory lectures	Theory exam
23	1	Muscles of the Root of the Neck, The Thoracic Duct, Main Nerves of the Neck	Root of the neck	Theory lectures	Theory exam
24	1	Cervical Plexus & Brachial Plexus, Lymph Drainage of the Head and Neck, Veins of the Head and Neck	Root of the neck	Theory lectures	Theory exam
25	1	Common Carotid Artery, Carotid Sinus, Carotid Body, External Carotid Artery	Arteries of the neck	Theory lectures	Theory exam
26	1	Internal Carotid Artery, Subclavian Arteries (3 parts), Circle of Willis	Arteries of the neck	Theory lectures	Theory exam
27	1	Nervous System, Gross Anatomy of the Brain, Parts of the Brain, Ventricular System of the Brain, The Venous Blood Sinuses (Dural Sinuses), Blood Supply of the Brain, Cranial Meninges, Dural Nerve Supply, Dural Arterial Supply Dural Venous Drainage Clinical Focus	Brain	Theory lectures	Theory
28	1	Introduction, Functional Components, Summary of cranial nerves	Cranial nerves	Theory lectures	Theory exam

	1				
29	1	Muscles of the Pharynx,	Pharynx	Theory	Theory
		Pharynx divisions, Palatine		lectures	exam

1. Course Name:

Oral Histology and Embryology

2. Course Code:

#### **206 OHISE**

3. Semester / Year:

Second year

4. Description Preparation Date:

01 March 2025

5. Available Attendance Forms:

Theoretical and practical

6. Number of Credit Hours (Total) / Number of Units (Total)

Theoretical: 60 hours, practical: 60 hours. Total units: 6

7. Course administrator's name (mention all, if more than one name)

Name: Lecturer Dr Abdulsattar Salim

Email: abdulsattarsalim@uomosul.edu.iq

8. Course Objectives

#### Course

#### - Introduction to Oral Histology.

## **Objectives**

- Knowledge about the histology of oral tissues.
- Study different stages of the development of oral cavity parts.
- 9. Teaching and Learning Strategies

## **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

#### 10. Course Structure

Week	Hr	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	Embryogenesis, ovulation, fertilization and implantation	Embryogenesis	Theory lectures	Theory exam
2	2	Bilaminar germ layer	Bilaminar germ	Theory lectures	Theory exam

3	2	Trilaminar germ layer: gastrulation and neurulation	Trilaminar germ	Theory lectures	Theory exam
4	2	Development of head and neck (pharyngeal arch, pouch and cleft	Development of head and neck	Theory lectures	Theory exam
5	2	Development of face and anomalies	Development of face	Theory lectures	Theory exam
6	2	Development of tongue and anomalies	Development of tongue	Theory lectures	Theory exam

# **Course Description – Third year**

1. Cour	se Name:				
	Prosthodontics				
2. Cour	2. Course Code:				
	301 PROS				
3. Seme	ester / Year:				
	Third year				
4. Desc	ription Preparation Date:				
	01 March 2025				
5. Avail	lable Attendance Forms:				
	Theoretical and practical				
6. Num	ber of Credit Hours (Total) / Number of Units (Total)				
Theoretical	: 30 hours, practical: 60 hours. Total units: 4				
7. Cour	se administrator's name (mention all, if more than one name)				
Name: Assi	stant Prof Luma Muthafar				
Email: Lum	na2005@uomosul.edu.iq				
8. Cour	se Objectives				
Course	- Introduction to partial dentures.				
<b>Objectives</b>					
	- Study types of clasps, major and minor connectors.				
	- Denture base materials for partial dentures.				
9. Teacl	hing and Learning Strategies				
Strategy	Theory lectures and practical laboratories.				
	<ul> <li>Educational videos and utilization of smart boards.</li> </ul>				
	<ul> <li>Use of educational models.</li> </ul>				
	<ul><li>Focused student group discussion.</li></ul>				
	rocused student group discussion.				

10. Course Structure							
Week	Hr	Required Learning Outcomes	Unit or subject name	Learni ng	<b>Evaluat</b> ion		
				method	method		
1	1	Removable partial denture (RPD), Objectives for RPD construction, Causes of teeth loss, Indications of removable partial dentures. Fixed partial denture, Indications for fixed partial denture. Dental implant therapy, Contraindications for dental implant therapy. Terminology and re-finishing	Introduction to Removable Partial Dentures	Theory lectures	Theory exam		
2	1	Need for classification Requirements of an acceptable method of classification Removable partial dentures may be classified according to the type of support Removable partial dentures may be classified according to the type of material Removable partial dentures may be classified according to the type of treatment Classification based on arch configuration Kennedy – Applegate – Fiset classification system. Applegate's rules governing the application of the Kennedy classification method	Classification of Partially Edentulous arches	Theory lectures	Theory exam		
3	1	The ideal requirements for successful removable partial denture Purposes (Objective) of Surveying the Diagnostic Cast Advantages of single path of placement (insertion) Guiding planes Dental surveyor Types of dental surveyors Parts of dental surveyor (Ney type surveyor)	Surveying	Theory lectures	Theory		

4	1	D: 11 C :		T1	T1
4	1	Principles of surveying Types of undercuts established by surveying	Surveying	Theory lectures	Theory exam
		Factors that determine and affect the path of placement (insertion) and removal of the RPD, rules of surveying			
5	1	Main components of RPD	Parts of Removable	Theory	Theory
		Major connectors; Requirements of major connectors	Partial Denture	lectures	exam
		Guidelines for design and location of major connectors Characteristics of major connectors			
6	1	SpecialStructural Requirements for	Maxillary Major	Theory	Theory
	1	Maxillary Major Connectors	Connectors	lectures	exam
		Types of Maxillary Major Connector; Single palatal bar, Single palatal strap, Anterior-posterior palatal bars, Combination anterior and		TOOLUL OS	C. C
		posterior palatal strap—type connector, Palatal plate-type connector, U-shaped palatal connector.			
7	1	Specialstructural requirements	Mandibular Major	Theory	Theory
		Types of mandibular major	Connectors	lectures	exam
		connectors; Lingual bar, Methods that			
		may be used to determine the relative			
		height of the floor of the mouth. Lingual plate (linguoplate), The			
		indications for the use of linguoplate.			
		Double lingual bar (lingual bar with			
		cingulum bar), Indications for use of			
		double lingual bar			
		Labial bar, Indications for use of labial bar			
		Characteristics and location			
8	1	Definition, Functions	Minor Connectors	Theory	Theory
		Form & location		lectures	exam
		Basic types of minor connectors;			
		Tissue stops, Finishing lines			
		Reaction of Tissue to Metallic			
		Coverage			

9	1	The purposes of the rest in general	Rests and Rest Seats	Theory	Theory
		Occlusal Rest, Extended Occlusal Rest, Interproximal Occlusal Rest, Internal Occlusal Rests, Occlusal		lectures	exam
		Rest Seat Preparation, Occlusal			
		Rests on Amalgam			
		Restorations, Occlusal Rest on			
		Crowns, Lingual Rests (Cingulum			
		Rest), Incisal Rests and Rest Seats,			
10	1	Implants as a Rest	Detention and	Theory	Theory
10	1	Direct retainers	Retention and	Theory	Theory
		Indirect retainers	Removable Partial	lectures	exam
		The extra coronal retainer (Clasp type), Component parts, Function, and position of clasp assembly parts, Factors affecting the magnitude of retention, The basic principles of clasp design	Denture Retainers		
11	1	Clasps designed without movement	Extra Coronal	Theory	Theory
		accommodation.	Direct Retainers	lectures	exam
		Circumferential (Circle or Akers)	(Types of clasp		
		clasp Ring-type clasp	assemblies)		
		Embrasure (double Akers) clasp			
		Back action clasp			
		Multiple clasps			
		Half-and-half Clasp			
		Reverse-actionclasp (Hairpin)			
		Disadvantages of circumferential			
		clasps in summary			
		Clasps designed to accommodate distal extension functional movement			
		RPI clasp, Bar-type clasp assembly,			
		RPA clasp; Akers clasp, Infra-bulge			
		clasp, Combination clasp			
12	1	Internal attachments	Intra-coronal Direct	Theory	Theory
		Precision Attachments	Retainers (Internal	lectures	exam
		Some indications for precision	Attachments,		
		attachments	Precision		
		Some of the contraindications for	Attachments		
		precision attachments  The main types of precision			
		The main types of precision attachments			
		Selection of an Attachment for a			
		Removable Partial Denture			

13	1	Stress breakers	Stress-Breakers	Theory	Theory
		Types of stress breakers		lectures	exam
14	1	The main factors influencing the	Indirect Retainers	Theory	Theory
		effectiveness of an indirect retainer		lectures	exam
		The auxiliary functions of indirect			
		retainers			
		Forms of Indirect Retainers			
15	1	Auxiliary occlusal rest	Indirect Retainers	Theory	Theory
		Lingual rest, Incisal rest	(continue)	lectures	exam
		Canine extensions from occlusal rest,			
		Cingulum bars (continuous bars) and			
		linguo-plates			
1.6	1	Modification areas, Rugae support	т 1	T1	TT1
16	1	Block-out and relief	Laboratory	Theory	Theory
		Cast preparation	procedures:	lectures	exam
		Types of block-out of master cast;	Blockout and Relief		
		Parallel block-out, Shaped block-out,			
		Arbitrary block-out, Relieving the master cast			
		Purpose of relief Sites			
		Tissue Stops			
17	1	Duplicating a stone cast	Laboratory	Theory	Theory
		Duplicating material and flask	procedures:	lectures	exam
		Impression	Duplication and		
		Refractory cast	Refractory Cast		
			Construction		
18	1	Waxing the framework Spruing	Laboratory: Wax	Theory	Theory
		General rules for spruing	Pattern	lectures	exam
		Investing the sprued pattern			
		Purpose of investment			
19	1	Burnout	Laharatam	Theory	Thoomy
19	1	Casting	Laboratory	Theory	Theory
		Casting recovery	procedures:	lectures	exam
		Finishing the framework Sprue removal	Casting and		
		Spruc removai	Finishing		

20	1	The primary function of denture base	Denture Base in	Theory	Theory
		Types of denture base according to support	RPD	lectures	exam
		Types of the denture base according to materials			
		Advantages of metal denture base			
		Disadvantages of metal denture base			
		Design consideration of denture base			
		Periodontal consideration of denture base design Types of artificial teeth			
21	1	Record bases	Record Bases,	Theory	Theory
		Types of record bases according to	Occlusion Rims,	lectures	exam
		materials constructed from it	Mounting and		
		Occlusion rims: Occlusion rims for	Arrangement of		
		static jaw relation records	Teeth		
		Occlusion rims for recording			
		functional or dynamic jaw relationship			
		record  Mounting posts on the optimilator			
		Mounting casts on the articulator Arrangement of artificial teeth to the			
		opposing cast			
		Principles that should be taken during			
		arrangement of artificial teeth			
		Laboratory procedure of arrangement teeth			
22	1	Biomechanical considerations	Biomechanics of	Theory	Theory
		Possible movements of partial	Removable Partial	lectures	exam
		dentures	Dentures		
	_	Tooth-tissue–supported prosthesis			
23	1	Tooth-supported partial denture	Biomechanics of	Theory	Theory
		Occlusal Rest Seat Preparation and	Removable Partial	lectures	exam
		Denture Movement	Dentures (continue)		
		Impact of Implants on Movements of Partial Dentures			
24	1	Difference in Prosthesis Support and	Principles of	Theory	Theory
		Influence on Design	Removable Partial	lectures	exam
		Differentiation Between Two Main Types of Removable Partial Dentures	Denture Design		
25	1	Components of Partial Denture Design	Principles of	Theory	Theory
		Implant Considerations in Design	Removable Partial	lectures	exam
			Denture Design		

26	1	1st Phase: Education of patient	Clinical Phases of	Theory	Theory		
		2nd Phase: Diagnosis, Treatment	Removable Partial	lectures	exam		
		Planning, Design, Treatment	Denture				
		Sequencing, and Mouth Preparation	Construction.				
		3rd Phase: Support for Distal Extension Denture Bases					
		4th Phase: Establishment and					
		Verification of Occlusal Relations and					
		Tooth Arrangements					
		5th Phase: Initial Placement Procedures					
		6th phase: Periodic Recall					
27	1	Acrylic removable partial dentures	Acrylic Removable	Theory	Theory		
		Appearance	Partial Dentures	lectures	exam		
		Maintenance of space					
		Reestablishment of occlusal					
		relationships					
		Conditioning of teeth and residual ridges					
		Interim restoration during treatment					
		Conditioning the patient for wearing					
		a prosthesis					
		Clinical procedure for placement					
28	1	Flexible removable partial dentures	Flexible	Theory	Theory		
		Type of material used for the flexible	Removable Partial	lectures	exam		
		denture, Support and Retention	Dentures				
29	1	Broken clasp arms	Repairs and	Theory	Theory		
		Several reasons for breakage of clasp arms	Additions to Removable Partial	lectures	exam		
		Fractured occlusal rests	Dentures				
		Distortion or breakage of other	Dentures				
		components – major and minor					
		connectors					
		Addition of a new artificial tooth to					
		a RPD					
30	1	Repair by soldering Components of CAD/CAM system	Digitally Designed	Theory	Theory		
	1	Types of Digital Scanner	& Fabrication	lectures	exam		
		Digital RPD Framework Design (step	Process of RPD				
		by step)	Framework Using				
		Digital Fabrication Process	CAD/CAM System

Theoretical: 60 hours, practical: 60 hours. Total units: 6

7. Course administrator's name (mention all, if more than one name)

Name: Assistant Prof Dr Shahbaa Khalil Email: shahbaa\_khal@uomosul.edu.iq

### 8. Course Objectives

#### Course

## **Objectives**

- Introduction to pathology.
- Knowledge about the pathology of oral diseases.
- Study different pathological conditions.
- Causes and prevention of pathological conditions.

## 9. Teaching and Learning Strategies

## **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

## 10. Course Structure

1. Course Name:

Preclinical Fixed Prosthodontics

2. Course Code:

#### **309 PFP**

3. Semester / Year:

Third year

4. Description Preparation Date:

01 March 2025

5. Available Attendance Forms:

Theoretical and practical

6. Number of Credit Hours (Total) / Number of Units (Total)

Theoretical: 30 hours, practical: 60 hours. Total units: 4

7. Course administrator's name (mention all, if more than one name)

Name: Assit Lecturer Amjad Loqman Shehab

Email: dentamjad@uomosul.edu.iq

8. Course Objectives

#### Course

- Introduction to fixed prosthodontics.

- **Objectives** Study the principle of fixed prosthesis attachment and support.
  - Study teeth preparation required for fixed prosthodontics.
  - Practical hand-on on teeth preperation.
  - 9. Teaching and Learning Strategies

#### Strategy

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

# Course Description – Fourth year Course Description Form

# 1. Course Name: Periodontology 2. Course Code: 401 PERI 3. Semester / Year: Fourth year

4. Description Preparation Date:

01 March 2025

5. Available Attendance Forms:

Theoretical and practical

6. Number of Credit Hours (Total) / Number of Units (Total)

Theoretical: 30 hours, practical: 90 hours. Total units: 5

7. Course administrator's name (mention all, if more than one name)

Name: Lecturer Dr Gayath Abdulbarry Al-Jawadi

Email: ghayathaljawady@uomosul.edu.iq

#### 8. Course Objectives

# Course Objectives

- Introduction to periodontics.
- Study the aitiology of periodontal disease.
- Study the principle of hand instruments, grasping and support.
- Study the principles of manual scaling and polishing.

#### 9. Teaching and Learning Strategies

#### **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

#### 10. Course Structure

Week	Hr	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	1	Terms & definitions frequently used in periodontology	Definitions	Theory lectures	Theory exam
2	1	Anatomy of the periodontium	Anatomy	Theory lectures	Theory exam

3	1	Oral mucosa: Gingiva	Oral mucosa:	Theory	Theory
		Macroscopic features: Marginal gingiva, Attached gingiva, Interdental papilla. Microscopic features: Oral epithelium, Sulcular epithelium, Junctional epithelium, Epithelial connective tissue interface. Gingival connective tissue (gingival fibers and cellular elements) Gingival sulcus and gingival crevicular fluid Blood Supply, Lymphatics, and Nerves Clinical features of gingiva in health and diseased gingiva: Color, Physiologic pigmentation, Size, Contour, Shape, Consistency, Texture, Position	Gingiva	lectures	exam
4	1	Periodontal ligaments (PDL)	Periodontal	Theory	Theory
		Cellular elements Ground substance Development of principal fibers of PDL Functions of periodontal ligaments: Physical functions, Formative and Remodeling Function, Nutritional and sensory functions. Clinical consideration	ligaments	lectures	exam

5	1	Cementum: Definition	Anatomy of the	Theory	Theory
	1	Function of cementum	periodontium	lectures	
		Classification of cementum:	periodontium	lectures	exam
		Acellular afibrillar cementum,			
		Acellular extrinsic fiber			
		cementum, Cellular mixed			
		stratified cementum, Cellular			
		intrinsic fiber cementum			
		Development and mineralization			
		of cementum			
		Cementoenamel junction			
		Cementodentinal junction			
		Thickness of Cementum in			
		response to physiologic and			
		pathologic conditions, Normal			
		thickness			
		Cemental aplasia,			
		Hypercementosis, Ankylosis			
		neoplastic and nonneoplastic			
6	1	Alveolar process: Definition,	Anatomy of the	Theory	Theory
		Function of alveolar process,	periodontium	lectures	exam
		Parts of the alveolar process,		rectares	Cham
		Alveolar bone proper, An			
		external plate of cortical bone			
		Cancellous trabeculae or spongy			
		bone			
		Basal bone			
		Anatomic division of the			
		alveolar process: Interproximal			
		bone, Inter radicular bone			
		Radicular bone: Composition of			
		the bone, Cellular elements,			
		Organic components, Inorganic			
		components			
		Haversian system or Osteon			
		Periosteum and Endosteum			
		Remodeling of alveolar bone			

7	1	Classification of periodontal	Classification of	Theory	Theory
,	1	diseases and conditions (2017)	periodontal	lectures	
		Reasons for classification	disease	lectures	exam

8. Course Objectives

#### Course Objectives

#### A. Cognitive Objectives

- Structuring and programming information in a way that enables the student to comprehend and enhance knowledge regarding both theoretical and practical aspects.
- Providing essential information and treatment steps.
- B. Skill-Based Objectives Specific to the Course
  - Training students on the process of tooth preparation according to the types of fillings.
  - Teaching students how to perform fillings and root canal treatments on extracted teeth fixed in acrylic.
- C. Affective and Value-Based Objectives
  - Preparing the student practically in terms of applying the acquired knowledge to treat patients' teeth.
- 9. Teaching and Learning Strategies

# Strategy

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

#### Clinical Part

The students are required to complete the following restorations:-

First term clinic (90 hours) – 6 hr/week

a. Amalgam Restorations

Class I, Class II

b. Composite (tooth colored) Restorations

Class III, or Class IV

c. mid examination class I on patient

Second term clinic (90 hours) – 6 hr/week

a. Amalgam Restorations

Class I, Class II

b. Composite (tooth colored) Restorations

Class III, or Class IV

C.preclinic root canal treatment on extracted tooth

d. final examination class II on patient

#### 11.Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

11 Cc	nirce	Evaluation	•	

#### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

12.Learning and Teaching Resources	
Required textbooks (curricular books, if any)  Main references (sources)	Cawson's Essentialis of oral pathology & oral medicine(ninth edition) by E.W.Odell  Cawson's Essentialis of oral pathology &
Wall Telefelices (sources)	oral medicine(ninth edition) by E.W.Odell
Recommended books and references (scientific journals, reports)	Oral & maxillofacial pathology(fourth edition)by Neville,Damm,Allen & Chi Oral pathology (fourth edition)by Soames & Southam Rosai & Ackerman's surgical pathology(tenth edition) by Juan Rosai Also many important case reports published in dental journals
Electronic References, Websites	Cawson's Essentialis of oral pathology & oral medicine(ninth edition) by E.W.Odell

1. Course Name:		
	Prosthodontics	

2. Course Code:

#### **406 PROS**

3. Semester / Year:

Fourth year

4. Description Preparation Date:

01 March 2025

5. Available Attendance Forms:

Theoretical and practical

6. Number of Credit Hours (Total) / Number of Units (Total)

Theoretical: 30 hours, practical: 90 hours. Total units: 5

7. Course administrator's name (mention all, if more than one name)

Name: Lect Dr Inas Aziz Mohammed

Email: inasjawad2016@uomosul.edu.iq

#### 8. Course Objectives

# Course

Educating and training students on the proper scientific principles and Objectives methods for treating patients, including the use of modern materials and techniques in the fabrication of complete and partial dentures.

9. Teaching and Learning Strategies

#### **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

#### 10. Course Structure

#### Clinical Part

The students are required to complete the following requirements:-

First term clinic (45 hours) – 3 hr/week

- a. Impression for partially edentulous patient
- b. Impression for edentulous patient

Partial Denture

c. Bounded partial denture

Second term clinic (45 hours) – 3 hr/week

a. Complete Denture

#### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

#### 12.Learning and Teaching Resources

Required textbooks (curricular books, if any)	Carr and Brown. McCracken's Removable Partial Prosthodontics, 13th edition2016 by Elsevier, Inc. Zarb, Hobkirk, Eckert, Jacob et al. Prosthodontic treatment for edentulous patients: Complete dentures and implant-supported prostheses.13th edition 2013 by Mosby, Elsevier Inc. Phoenix, Cagna, DeFreest. Stewart's Clinical Removable Partial Prosthodontics, 4th edition, 2008 Quintessence Publishing Co, Inc.

Referral of patients to the	
periodontist	

### Clinical part

#### 4 h/week (120 h/year)

- Recording medical and dental history
- Patient's education and motivation
- Oral hygiene instructions (OHI)
- Recording periodontal indices:
  - Bleeding on probing (BOP)
  - Plaque index (% of plaque)
  - Probing pocket depth (PPD)
  - Clinical attachment loss (CAL)
- For periodontitis cases, determination of bone loss level by radiograph or clinically
- Diagnosis according to classification of periodontal disease and conditions (2017)
- Non-surgical periodontal therapy (manual/ultrasonic scaling, root planing) and removal of all plaque retentive factors
- Referral of cases that potentially requiring surgical therapy
- Maintenance and follow-up after 3 months

#### **Requirements:**

- Recording periodontal indices and diagnosis (min= 15)
- Non-surgical periodontal treatment:
  - Scaling (min=8)
  - Root planning (min= 3 teeth)

Periodontal surgery assistant (one case optional)

#### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

## 12.Learning and Teaching Resources

Required textbooks (curricular books, if any)	Mcdonald and avery's dentistry for child and adolescent 2022 by Elsevier Hand book of pediatric dentistry (Cameron) Mosby
Main references (sources)	
Recommended books and references (scientific journals, reports)	
Electronic References, Websites

## **Course Description Form**

Electronic References, Websites

1. Course Name:
Oral Surgery
2. Course Code:

503	<b>OSUR</b>

3. Semester / Year:

Fifth year

4. Description Preparation Date:

01 March 2025

5. Available Attendance Forms:

Theoretical and practical

6. Number of Credit Hours (Total) / Number of Units (Total)

Theoretical: 30 hours, practical: 180 hours. Total units: 8

7. Course administrator's name (mention all, if more than one name)

Name: Lecturer Dr Dhafar Almela Email: tkdalmela@uomosul.edu.iq

8. Course Objectives

## Course

- Introduction to clinical oral surgery

**Objectives** - Study the advanced minor oral surgery operation.

- Study the principle of impact tooth extraction.

- Study the bone fracture (skull, maxilla, mandible ... etc).

9. Teaching and Learning Strategies

### **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

### 10. Course Structure

## Theoretical Part

Week	Hr	Required Learning Outcomes	Unit or	Learning	Evaluation

Clinical requirements (6 hrs / week)

The students are required to complete the following restorations:-

a. Amalgam Restorations

Class I, Class II, Compound and complex restorations.

b. Composite (tooth colored) Restorations

Class I, Class II, Class IV, and Class V.

- c. Fixed prosthesis including crown and bridge work.
- d. Endodontic treatment for anterior teeth and premolars.
- e. Seminars

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

### 12. Learning and Teaching Resources

8. Course Objectives

### Course

- Introduction to clinical orthodontics

**Objectives** - Study the advanced orthodontic treatment techniques.

- Study the principle of fixed orthodontics.
- Study the manufacturing of removable orthodontics
- 9. Teaching and Learning Strategies

### **Strategy**

- Theory lectures and practical laboratories.
- Educational videos and utilization of smart boards.
- Use of educational models.
- Focused student group discussion.

	1	se Objectives					
Course		- Introduction to research methodology					
Object	ives	- Study the statistics					
		- Study the principle of medical research ethics					
		- Study the academic writing and research planning					
9. Teaching and Learning Strategies							
Strateg	<b>gy</b>	- Theory lectures	and practical lab	oratories.			
		- Educational videos and utilization of smart boards.					
<ul> <li>Use of educational models.</li> </ul>							
	<ul><li>Focused student group discussion.</li></ul>						
10. Course Structure							
Theoretical Part							
Week	Hr	Required Learning	Unit or subject	Learning	Evaluation		
		Outcomes	name	method	method		
1	1	Statistics	Statistics	Theory lectures	Theory exam		

2	1	Statistics	Statistics	Theory lectures	Theory exam
3	1	Statistics	Statistics	Theory lectures	Theory exam
4	1	Medical research ethics	Medical research ethics	Theory lectures	Theory exam
5	1	Medical research ethics	Medical research ethics	Theory lectures	Theory exam
6	1	Biosafety	Biosafety	Theory lectures	Theory exam
7	1	Biosafety	Biosafety	Theory lectures	Theory exam
8	1	Designing research	Designing research	Theory lectures	Theory exam
9	1	Designing research	Designing research	Theory lectures	Theory exam
10	1	Designing research	Designing research	Theory lectures	Theory exam
11	1	Citation in academic writing	Citation in academic writing	Theory lectures	Theory exam
12	1	Citation in academic writing	Citation in academic writing	Theory lectures	Theory exam
13	1	Citation in academic writing	Citation in academic writing	Theory lectures	Theory exam
14	1	Planning a research protocol	Research protocol	Theory lectures	Theory exam
15	1	Planning a research protocol	Research protocol	Theory lectures	Theory exam

### Practical part

Research project dissertation – writing and presentation

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

# 12.Learning and Teaching Resources Required textbooks (curricular books, if any) Main references (sources) Recommended books and references (scientific journals, reports...) Electronic References, Websites
