

Vision, Mission, Objectives, and Policy of the Department

Vision of the Department:

Excellence in teaching, scientific research, international publication, and community service with highly qualified graduates aligned with the industrial sector.

Mission of the Department:

To support our college and university's strategy by focusing on the educational process, scientific research, and community service through continuous education activities. We aim to adopt a philosophy of continuous improvement in the quality of the department's management process, stimulate creative initiatives to achieve high satisfaction among stakeholders, and make significant contributions to the Iraqi industry through our graduates.

Expected Outcomes:

Contribute to the intellectual development in the field of Industrial Management, aligning with the goals of the industrial and service sectors and staying up-to-date with the latest advancements.

Enhance the quality of education in Industrial Management, preparing graduates to actively contribute to the industrial sector, considering educational and social dimensions.

Improve the efficiency and qualifications of department staff to engage in global research, ensuring the excellence of the educational process.

Activate the department's role in serving the community through seminars, workshops, discussions, continuous education courses, consultancy contracts, and humanitarian activities.

Embrace the philosophy of continuous improvement in the quality of the department's educational process.

Strategies:

Stimulate curriculum updates to align with the latest advancements in Industrial Management by learning from globally distinguished departments.

Encourage faculty members to publish in international journals and collaborate with foreign researchers on applied research and global conferences.

Foster collaboration with government and private organizations (industrial and service) through scientific workshops, joint seminars, and continuous education courses provided by the department's professors.

Encourage faculty members to obtain higher academic degrees and titles through development programs and participation in international conferences, including online workshops and seminars.

Adopt the philosophy of continuous improvement in all department activities related to training, scientific research, and community service.

Attract outstanding graduates as human resources to support the department's continuous improvement goals in education and research.

Establish partnerships with government and private entities to fund some of the department's activities, such as seminars and scientific workshops.

Department Policy:

The Industrial Management Department at the College of Management and Economics, Mosul University, commits to adopting the philosophy of continuous improvement in the quality of its management processes. It aims to achieve a satisfactory level of stakeholder satisfaction and make significant contributions to the Iraqi industry by focusing on the quality of education in the field of Industrial Management. This commitment includes preparing students both academically and practically for employment in organizations through the selection of qualified human resources and the provision of suitable labs and workshops. This is achieved by implementing an effective quality management system in accordance with international standards.
