# **Course Description Form**

#### 1. Course Name:

Arabic language (1)

2. Course Code:

#### **ARB**009

3. Semester / Year:

2023-2024 first class

4. Description Preparation Date:

1-9-2023

5. Available Attendance Forms:

The lecture is in person

6. Number of Credit Hours (Total) / Number of Units (Total)

30 hours | 30 hours

7. Course administrator's name (mention all, if more than one name)

Name: Nadia Fadel Ali Hussein Al-Afandi

Email:nadia.fadil@uomosul.edu.iq

## 8. Course Objectives

#### **Course Objectives**

Enabling students with Arabic language skills and issues at all levels: phonetic, morphological, grammatical, semantic, and written

The Arabic language is the language of communication and understanding between people and it is the language

The mother develops the student's linguistic outcome. The Arabic language gives the student the skills of expressing in classical Arabic towards their Arabic language related to religion and Arab heritage.

## 9. Teaching and Learning Strategies

#### Strategy

Teaching and learning strategies depend on the existence of a study plan developed by the teacher and its importance lies in the development of scientific

thinking, in addition to its reliance on dialogue and discussi that enriches the linguistic outcome of students.

# 10. Course Structure

Week	Hours	Required Learning	Unit or subject name	Learning	Evaluation
		Outcomes		method	method
1	2	Under stand the topic of the unit	Greet and get to know each other	Theoretical and practical examples	Daily attendance, daily exams, semester exams and assignments
2	2	Under stand the topic of the unit	Arabic sentence, sections of sentence, actual sentence, nominal sentence, With daily assignment of five nominal sentences and five verb sentences.	Theoretical and practical examples	Daily attendance, daily exams, semester exams and assignments
3	2	Under stand the topic of the unit	Review the students in the previous lecture and then explain the types of effects in the Arabic language, how to differentiate between them and how to express them.	Theoretical and practical examples	Daily attendance, daily exams, semester exams and assignments
4	2	Under stand the topic of the unit	Identify the beginner and the news, and indicate how to know the beginner and the news and the sign of their expression, and write applications on the subject on the board and the participation of students in solving it	Theoretical and practical examples	Daily attendance, daily exams, semester exams and assignments
5	2	Under stand the topic of the unit	Statement of the types of beginner and types of news and identify each type and the way to differentiate between them and their expression with the mention of applications for each type, at the end of the lecture a daily exam with an introduction to Surat Al-Kahf	Theoretical and practical examples	Daily attendance, daily exams, semester exams and assignments

## 8. Course Objectives

## Course Objectives

- Through studying this course, the student will learn about the importance of accounting, its basic concepts, and how to use accounting records and books.
- How to perform the budget equation in the event of an increase or decrease in assets on both sides of the equation Liabilities and equity
- Use of single registration in small establishments
- How the accounting and documentary cycle works, including recording in the general journal and posting to Ledger and balance records and preparing the trial balance....

## 9. Teaching and Learning Strategies

#### Strategy

- Lecture (indoctrination)
- Discussion
- Questions and answers
- Preparing reports and assignments
- Oral and written questions

# 10. Course Structure

Week	Hours	Required Learning	Unit or subject name	Learning	Evaluation
		Outcomes		method	method
1-2	6	The theoretical intellectu framework of accountin	O	Lecture v discussion dialogue	Evaluation of individual assignments
3-5	9	Use single constraint	Learn about the use of single entry method in a small facility and how to determine the financial position of the facility	Lecture with group discussions among students	Oral tests assignments
6-9	12	Use double entry and accounting records	Learn how to record accounting entries using the double entry method and how to record them in the general journal	lecture	Self-learning written tests
10-12	9	Budget equation and nature of accounts	Identify the assets, liabilities, and property rights of the facility and how to deal with increases and decreases for both sides of the budget	lecture	Written tests
13-15	9	Accounting Cycle	Identify the stages of the accounting cycle, from recording in the general journal, transferring to the ledger, balance, and preparthe trial balance	lecture	Written tests

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

#### 8. Course Objectives

#### **Course Objectives**

- Enabling students to acquire knowledge in the field of financial and banking sciences in the field of financial management
- Developing and activating the creative and applied capabilities of students in various financial and banking fields.

- Developing the knowledge
   partnership between the department
   and the labor market.
- Keeping pace with scientific development in the field of financial and banking sciences with regard to financing, investment, and dividends
- Contributing to the graduation of specialized cadres with diverse skills according to the requirements of the labor market
- Cognitive objectives.
- A1 Providing students with knowledge of all program
   specializations
- Developing mental abilities by expanding the cognitive horizon for all program specializations
- A3-The ability to analyze problems
- A4- Applying theoretical concepts,
   rules, mathematical laws, and
   financial calculations related to the
   subject

- A5- Giving students the ability to
   link financial and banking variables
- A6- Evaluating and judging applied cases
- Skills objectives of the program
- B1 The ability to discover
   problems and solve them in modern
   ways
- B2 Using real-life examples and matching them with theoretical studies
- B3 Developing capabilities to use modern technologies in financial and banking sciences

#### 9. Teaching and Learning Strategies

#### Strategy

- Lecture with discussions
- A blackboard to solve applied problems
- -questions and answers
- Preparing reports according to approved vocabulary

### 8. Course Objectives

• Teaching students financing methods and learning about financing policies, and what are the appropriate tools and methods to reach the optimal financing mix.

### 9. Teaching and Learning Strategies

The teaching and learning strategy for the subject of corporate finance often includes a combination of theoretical knowledge, practical application, case studies and practical exercises. Below are details of the typical strategies used:

- **Lectures:** Traditional lectures are often used to introduce basic concepts, theories and frameworks related to corporate finance.
- Case Studies: Real-life case studies are used to illustrate the application of investment principles in practical scenarios.
- **Simulation exercises:** Financial management simulations provide students with the opportunity to manage the finances of virtual companies in simulated market environment.
- Guest Speakers: Can provide invited guest speakers from the finance industry.
- **Group Projects**: Collaborative group projects enable students to work together to analy investment opportunities.
- **Research assignments**: Assignments that require students to conduct research on corporate financial management topics.
- Interactive Discussions: Interactive discussions and debates encourage students to critically evaluate different investment strategies, theories, and perspectives. This promot active participation and enhances their ability to express and defend their views.

• **Continuous assessment**: Regular tests, assignments and presentations are used to continually assess student learning and understanding. This allows teachers to provide timely feedback and support to students throughout the course.

#### 8. Course Objectives

- Providing students with a comprehensive understanding of various types of financial risks, including market risk, non-systematic risks, credit risk, liquidity risk, and operational risk.
- Equipping students with the necessary skills to assess and measure financial risks using quantitative techniques such as standard deviation, variance, and beta coefficients for measuring systematic risk.
- Risk Mitigation Strategies: To educate students about various strategies for mitigating financial risks, including hedging techniques, options, diversification, and insurance.

## 9. Teaching and Learning Strategies

The teaching and learning strategy for the financial risk management subject typically involves a combination of theoretical knowledge, practical application, case studies, and interactive activities. Here's a breakdown of the common strategies used:

- Lectures: Traditional lectures are utilized to introduce fundamental concepts, theories, and frameworks related to financial risk management. These lectures may cover topics such as types of financial risks, risk assessment techniques, risk measurement methodologies, and risk mitigation strategies.
- Case Studies: Real-world case studies are employed to illustrate the application of financial risk management principles in practical scenarios. Analyzing case studies helps students understand how financial risks manifest in different contexts and industries and how organizations manage these risks effectively.

- Simulation Exercises: Financial risk management simulations provide students with the opportunity to apply theoretical concepts and decision-making skills in simulated risk scenarios. These exercises allow students to experience the complexities of risk management in a controlled environment and develop critical thinking and problem-solving abilities.
- Group Projects: Collaborative group projects allow students to work together to analyze and solve risk management challenges. These projects may involve conducting risk assessments, developing risk management plans, or designing strategies to mitigate specific financial risks. Group projects foster teamwork, communication skills, and peer learning.
- Continuous Assessment: Regular quizzes, assignments, and assessments are used to gauge students' understanding of key concepts and their ability to apply risk management techniques. Continuous assessment provides feedback to students and instructors, identifies areas for improvement, and reinforces learning objectives throughout the course.

### 8. Course Objectives

- Understanding Investment Principles: Grasp the core concepts of investing, including risk, return, diversification, and the time value of money.
- **Portfolio Management Skills:** Develop proficiency in selecting, evaluating, and monitoring investment options across various asset classes.
- Risk Management and Mitigation: Learn strategies to assess and mitigate investment risk, utilizing hedging techniques and derivatives.
- **Application of Financial Theories:** Apply financial theories to construct investment portfolios that meet specific objectives and adapt to changing market conditions.

### 9. Teaching and Learning Strategies

The teaching and learning strategy for the investment portfolio subject often involves a combination of theoretical knowledge, practical application, case studies, and hands-on exercises. Here's a breakdown of the typical strategies used:

- **Lectures**: Traditional lectures are often used to introduce fundamental concepts, theories, and frameworks related to investment portfolio management. These lectures may cover topics such as asset classes, risk and return, portfolio theory, and investment strategies.
- Case Studies: Real-world case studies are utilized to illustrate the application of investment principles in practical scenarios. Analyzing case studies helps students understand how investment decisions are made in different market conditions and contexts.

- **Simulation Exercises**: Investment portfolio simulations provide students with the opportunity to manage virtual investment portfolios in simulated market environments. These exercises allow students to apply theoretical concepts, make investment decisions, and experience the consequences of their choices in a risk-free setting.
- **Guest Speakers**: Inviting guest speakers from the finance industry, such as portfolio managers, investment analysts, or financial advisors, can provide valuable insights into current market trends, industry practices, and career opportunities in investment management.
- **Group Projects**: Collaborative group projects enable students to work together to analyze investment opportunities, construct diversified portfolios, and present their findings to the class. This fosters teamwork, critical thinking, and communication skills.
- **Research Assignments**: Assignments requiring students to conduct research on specific investment topics, such as individual stocks, bonds, mutual funds, or alternative investments, help deepen their understanding of the subject matter and develop their research skills.
- **Interactive Discussions**: Interactive discussions and debates encourage students to critically evaluate different investment strategies, theories, and perspectives. This promotes active engagement and enhances their ability to articulate and defend their viewpoints.
- Continuous Assessment: Regular quizzes, tests, assignments, and presentations are used for continuous assessment of student learning and comprehension. This allows instructors to provide timely feedback and support to students throughout the course.

### **Course Description Form**

1. Course Name:

Management Accounting

2. Course Code:

**FBB 17** 

3. Semester / Year:

First Semester / 2023-2024

4. Description Preparation Date:

1/September /2023

5. Available Attendance Forms:

Classroom/e-learning

6. Number of Credit Hours (Total) / Number of Units (Total)

Two hours per week / 1 units

7. Course administrator's name (mention all, if more than one name)

Name: omar zuher ezalden

Email: OMARZUHER@uomosul.edu.iq

#### 8. Course Objectives

- Providing students with a comprehensive understanding of the concepts and objectives of managerial accounting, including cost classifications and estimates, analysis of the relationship between cost, volume and profit (break-even point), and appropriate costs and revenues for making managerial decisions.
- Providing students with the necessary skills to recognize the nature of the data provided by managerial accounting, financial accounting, and cost accounting and the differences between them.
- Identify the most important characteristics that must characterize the information provided by management accounting and the nature of administrative problems and decisions according to their degree of complexity and frequency.

#### 9. Teaching and Learning Strategies

- tatadaman astiratijiat altadris waltaealum limawdue jayid aladariati, wamazij min almaerifat waltatbiq aleamalii wadirasat alnashat walnashat altijari. fima yali tafasil altafasil almushtarikat almustakhdamati:
- dirasat alhalati: yatimu aistikhdam aldirasat alhalat alwaqieiat litawdih tatbiq almabadi al'asasiat aladariat fi sinariwhat aleamaliati. yusaeid fi tahlil dirasat alhalat altulaabiat ealaa fahm kayfiat aldiqat aladariat watahdid altakalif almulayimat wakayfiat 'iidarat almuasasat bishakl faeali.
- tamarin almuhakaati: darurat muhakaat tasnifat altakalif lilmuhasabat aladariat almukhtalifat alraghabat almatlubat almafahim al'asasiat wamaharat al'iibdae fi sinariwhat almuhakaati. wahadhih hi almubadarat altatawueiat litajribat almakhatir fi biyat mutanawieat lilraqabat waltafkir walqudrat ealaa hali almashakil bishakl jidhriin .

- Group tasks: Multi-task collaborative group work to analyze the challenges facing the management of formal institutions. These projects may include conducting cost-benefit financial analyses, and determining appropriate costs and revenues in devising appropriate and favorable preferences from alternatives. Contribute to teamwork projects, communication skills and peer learning.
- Continuous assessment: The following tests, assignments and assessments are used to familiarize students with basic concepts and their abilities to apply good management. Continuous evaluation ensures teachers' wishes, identifies periods of improvement, and reinforces learning goals throughout treatment.

#### 10. Course Structure

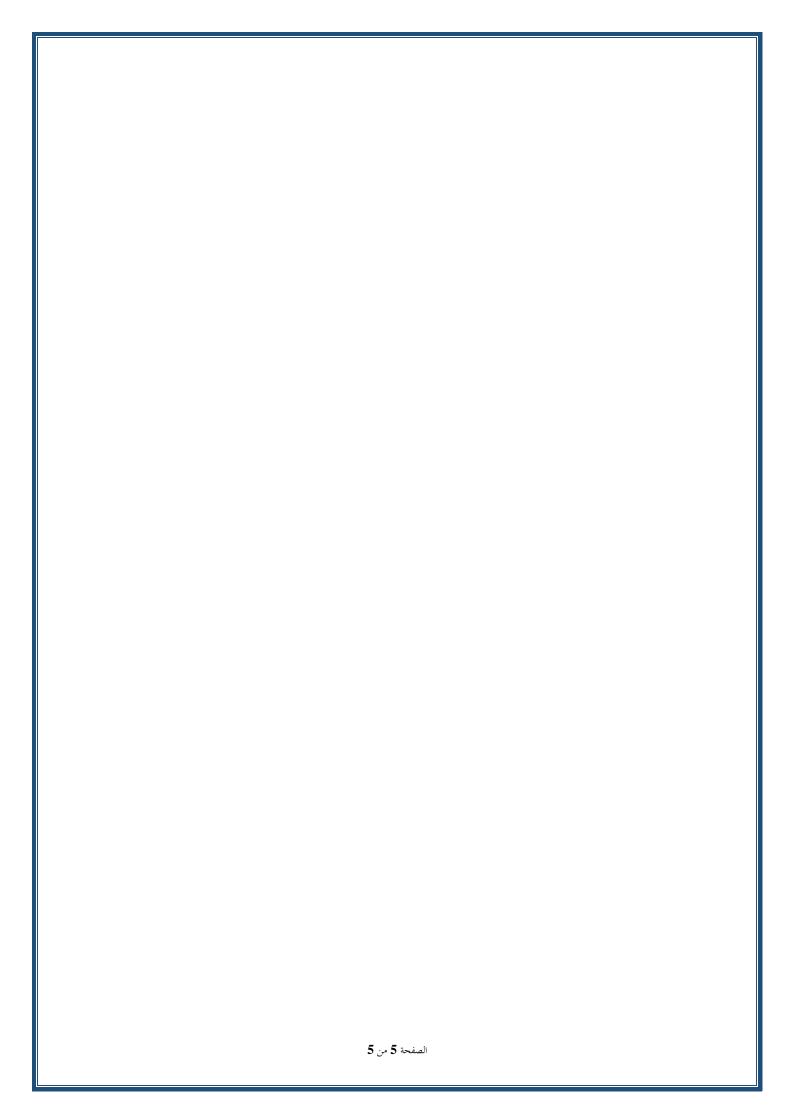

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
WCCK	Hours	Outcomes	name	method	method
1-2	6	<ul> <li>Identify the concept of management accounting and its importance.</li> <li>The main objectives of management accounting.</li> <li>The nature of the data provided by financial accounting, management accounting, and cost accounting and the differences between them.</li> <li>The most important characteristics, nature of administrative problems and decisions and their degree of complexity</li> <li>The extent to which accounting models are used in the administrative decision-making process</li> </ul>	Managerial accounting concepts and objectives	Case study	Evaluation of individual assignments
3-4	3	<ul><li>. • Define what is meant by the term costs.</li><li>• Identify the types of costs</li></ul>	Cost classifications and estimation	Case study	Oral exams
5-6	6	. • Costs according to their behavior and classifications	Classification of costs according to their behavior	Lecture	Self-learning

		• Explaining cost drivers and types of cost drivers			
7-8	6	The concept of appropriate and inappropriate costs for making administrative decisions.  • The difference between standard costs and actual costs  • Cost estimates  • The most important methods and measurement used in estimating costs	Cost classifications and managerial decision making	Case study	Written exams
9-10	6	What is meant by the break-even point, its purpose, and how to calculate it.  • How to represent the break-even point graphically.  • How to calculate the sales volume necessary to achieve the target profit  • Margin of safety, margin of safety ratio, and the meaning of each.	Analysis of the relationship between cost, volume and profit (breakeven point)	Lecture	Group and individual assignments evaluation
12-11	6	Operating leverage and its uses  • Point of similarity of costs and their uses  • Change in variable and fixed costs and selling price at the break-even point	Analysis of the relationship between cost, volume and profit (breakeven point)	Discussion	Oral exams
13-14	6	Stages of making the appropriate decision	Costs and revenues appropriate for	Lecture	Written exams

		<ul> <li>Decisions on internal manufacturing or purchasing from abroad</li> <li>Decisions related to sales at the point of separation or additive manufacturing</li> <li>Special offer decisions</li> <li>Decisions to add or close a department or production line</li> </ul>	making administrative decisions		
15	6	Solving exercises  • Costs and revenues appropriate for making administrative decisions .	Discuss, analyze and solve additional examples	Lecture	Presentation assessment

#### **Course Description Form**

1. Course Name:

Banking audit and control/1

2. Course Code:

**ACB** 111

3. Semester / Year:

Chapter one 2023 - 2024

4. Description Preparation Date:

1/9/2023

5. Available Attendance Forms:

Classroom/e-learning

6. Number of Credit Hours (Total) / Number of Units (Total)

2 / two hours per week / 2 units

7. Course administrator's name (mention all, if more than one name)

Name: Amir Hazem Abdul Rahman Email: Amer hazem@uomosul.edu.iq

#### 8. Course Objectives

#### Course Objectives

- Through studying this course, the student will become familiar with internal auditing, its nature and objectives
- The requirements for the qualification and impartiality of the auditor, as well as the etiquette and conduct of the internal audit profession in the bank

Also learn about operational auditing, financial auditing, and the independence efficiency of operational auditors

- As well as the types of operational auditing and the stages of the operational auditing process in banks
- Identify external auditing, its objectives, types, similarities and differences between auditing
- Internal and external
- Identify the general standards for auditing
- Identify external audit reports, their importance, characteristics and types
- 9. Teaching and Learning Strategies

#### Strategy

- Lecture (indoctrination)
- •Discussion
- Questions and answers
  Preparing reports and assignments
  Oral and written questions

#### 10. Course Structure

Week	Hours	Required Learning	Unit or subject name	Learning	Evaluation
		Outcomes		method	method
1-3	6	internal audit	Internal audit, its nature and objectives The requirements for the qualification impartiality of the auditor, as well as etiquette and conduct of internal audit profession in bank.	Lecture v discussion dialogue	Evaluation of individual assignments
4-6	6	Operational audit	Operational audit, financial audit, independe and competence of operational auditors As well as the types operational auditing, the stages of the operational auditing process in banks, and etiquette of conduct of internal auditor	Lecture with group discussions among students	Oral tests assignments
7-9	6	External audit	External audit, its objectives, types, similarities and differences between internal and external audit	lecture	Self-learning written tests
10-11	4	General standards for auditing	Learn about the general auditing standards and field work standards	lecture	Written tests
12-14	6	External audit reports	External audit reports, their importance, elements, characteristics types	lecture	Written tests

#### 8. Course Objectives

- Providing students with a comprehensive understanding of the concepts and objectives of managerial accounting, including cost classifications and estimates, analysis of the relationship between cost, volume and profit (break-even point), and appropriate costs and revenues for making managerial decisions.
- Providing students with the necessary skills to recognize the nature of the data provided by managerial accounting, financial accounting, and cost accounting and the differences between them.
- Identify the most important characteristics that must characterize the information provided by management accounting and the nature of administrative problems and decisions according to their degree of complexity and frequency.

#### 9. Teaching and Learning Strategies

- The teaching and learning strategy for the subject of management accounting usually involves a combination of theoretical knowledge, practical application, case studies and interactive activities. Below are details of the common strategies used:
- Lectures: Traditional lectures are used to present basic concepts, theories and frameworks related to management accounting concepts. These lectures may cover topics such as pricing decisions, capital budgets, planning budgets and control systems, and determining total cost systems.

• Group tasks: Multi-task collaborative group work to analyze the challenges facing the management of formal institutions. These projects may include conducting cost-benefit financial analyses, and determining appropriate costs and revenues in

- devising appropriate and favorable preferences from alternatives. Contribute to teamwork projects, communication skills and peer learning.
- Continuous assessment: The following tests, assignments and assessments are used to familiarize students with basic concepts and their abilities to apply good management. Continuous evaluation ensures teachers' wishes, identifies periods of improvement, and reinforces learning goals throughout treatment.

10. Course	10. Course Structure				
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1-2	6	Factors affecting the pricing decision  Costs and pricing decisions in the long term  Pricing products using costs as the basis for pricing	Using costs in pricing decisions	Case study	Evaluation of individual assignments
3-4	3	The expected volume of demand when choosing the appropriate price • Use costs as a basis for pricing • Target price and target costs • The product life cycle and its impact on the pricing decision	Pricing decisions	Case study	Oral exams
5-6	What is meant by capital budgets and their types  • Methods of evaluating capital projects  • The net present value method and the basis on which capital projects are based  • Profitability index method as a method for evaluating capital projects		Capital budgets	Lecture	Self-learning

7-8	6	The internal rate of return method and how to use it  • The recovery method and the basis on which it is based  • Discounted payback period method  • Accounting rate of return method  • Economic value added method	Capital budgets	Case study	Written exams
9-10	6	Cash flows and the process of evaluating capital budgets • Income taxes and capital budgets • Written exam	Additional factors related to capital budgeting decisions	Lecture	Group and individual assignments evaluation
12-11	6	Determine the nature and objectives of discretionary budgets	Planning budgets and control systems	Discussion	Oral exams
13-14	6	Statement of the comprehensive budget and the flexible budget  • The role of the human element in the process of preparing budgets  • Systems for determining total costs	Planning budgets and costing systems	Lecture	Written exams
15	6	• Solving exercises • A written test	Discuss, analyze and solve	Lecture	Presentation assessment
