

## Vision, mission, and goals of the accountancy department

### 1. Vision

The accountancy department is looking forward to be a leader in the accounting field throughout getting new skills in three main aspects: accounting learning, scientific accounting research, and serving the community.

### 2. Mission

The mission of the department can be seen through providing a suitable environment which meet the business requirements for both accounting profession and auditing profession in Iraq. This can be achieved through preparing accountants and auditors who are able to be compete in local and international environment.

### 3. Goals

The accountancy department has different goals. Firstly, the department seeks to enhance the quality of accounting learning for undergraduate and postgraduate studies. The department also attempts to create an appropriate education environment that encourages students for creativity and innovation in the accounting field. Furthermore, it aims to serve the business community and being active in solving the problems are facing by the Iraqi organisations. Finally, the accountancy department tries to use the Artificial Intelligence in developing accounting systems to improve the quality of accounting education.
