

# **Components of the Industrial Management Department's Strategic Framework**

**Vision:** To achieve excellence in teaching, scientific research, international publication, and community service, thereby producing highly qualified graduates who meet the demands of the industrial sector.

**Mission:** To support the strategic objectives of our college and university by focusing on the educational process, scientific research, and community engagement through diverse academic activities. This includes adopting a philosophy of continuous improvement for the quality of the department's educational processes and fostering creative initiatives to achieve high stakeholder satisfaction. Furthermore, we aim to ensure our graduates make significant contributions to the Iraqi industrial sector.

**Goals:** The Department of Industrial Management is committed to achieving the following goals:

1. **Goal One:** To provide students in the Industrial Management department with diverse, specialized knowledge at the forefront of scientific advancements and to develop their scientific research skills, thereby preparing a new generation of researchers for industrial fields and the broader industrial sector.
2. **Goal Two:** To continuously update the curriculum within the Industrial Management specialization, ensuring alignment with the educational systems approved by the Ministry of Higher Education and Scientific Research and the requirements for the department's program accreditation.

3. **Goal Three:** To establish an infrastructure that supports the practical nature of Industrial Management, including well-equipped laboratories and workshops for hands-on training of students in production, operations, quality management, and manufacturing techniques.
4. **Goal Four:** To actively encourage and support faculty members in the department to pursue higher degrees and achieve academic promotions consistently. This initiative aims to simultaneously advance the department's objectives and the personal career goals of our teaching staff.
5. **Goal Five:** To effectively address community needs by fostering a strong scientific and social integration between the Industrial Management department's efforts and community service demands, primarily through the department's outputs (e.g., student training and graduate employment).
