COLLEGE OF ADMINISTRATION AND ECONOMICS

Introduction to the Department

The Management Information Systems (MIS) major is a contemporary and evolving scientific discipline within the College of Administration and Economics, established in response to recent advancements in administrative and functional concepts. The department was founded in the academic year 2002-2003 and commenced operations as a constituent department of the College of Administration and Economics on 15 June 2002.

The department offers a comprehensive annual study plan comprising 165 credit hours, following a semester-based system. The curriculum includes a diverse range of subjects designed to equip graduates with the technical and managerial knowledge and skills necessary for analysing, designing, implementing, and managing information systems within institutions. Furthermore, postgraduate programmes are offered.

Graduates of this department possess a unique blend of administrative and technical expertise, enabling them to apply technology effectively across various fields of administrative sciences. To realise this objective, computer laboratories have been established to facilitate instruction in information technology applications, office automation systems, programming languages, and other related areas, thereby imparting essential practical skills to students.

Vision – Mission – Objectives

Vision:

To lead academic education and achieve excellence in scientific research in the field of Management Information Systems.

Mission:

To provide pioneering knowledge in management information systems that aligns with quality standards, and to prepare qualified specialists both scientifically and practically to work across various sectors.

Objectives:

1. To prepare specialists with distinguished skills in managing information systems within organizations.
2. To provide rigorous academic curricula aligned with international standards in the field of Management Information Systems.
3. To support the scholarly output of faculty members and enhance their performance across diverse academic activities.
4. To offer continuous training programmes to qualify personnel and improve their performance in both public and private sector organisations within Management Information Systems.
5. To implement national and international quality assurance and academic accreditation systems to improve educational performance.
6. To conduct scientific research that advances both theoretical and practical aspects, addressing challenges faced by organizations in the field of Management Information Systems.

Department Administration

Assistant Professor Dr Ramadan Mahmood Ramo Al-Ibrahimi

- **Head of the Department of Management Information Systems**

Lecturer Ali Samir Ali

- **Academic Programme Coordinator for the Department of Management Information Systems for Evening Studies**

Lecturer Sahn hazim najeeb

- **Academic Programme Coordinator for the Department of Management Information Systems for Morning Studies**

Department Laboratories

**Laboratory 1 - Ground Floor – Laboratory
Number LGE00723**

**Laboratory Supervisor: Assistant Lecturer Adnan
Saleh Mahmoud**

**Laboratory 2 - Ground Floor – Laboratory
Number LGE00748**

**Laboratory Supervisor: Assistant Lecturer Maher
Nouraldin Said**

Administrative Structure of the Department

Task Description

Head of Department Responsibilities: The Head of Department is responsible for managing all scientific, administrative, and financial affairs of the department, in addition to overseeing student matters. They supervise the preparation and implementation of the department's strategic plan and manage all academic and research activities. The Head ensures students' regular attendance and monitors both theoretical and practical examinations. They develop internal and external relationships for the department and oversee the provision of educational, research, administrative, and financial resources, with an emphasis on enhancing quality and improving academic outcomes.

Furthermore, the Head of Department regularly reviews the academic curricula and submits proposed updates to the Faculty Council. They arrange for visiting lecturers to deliver specialised lectures for undergraduate and postgraduate students. The Head ensures the smooth conduct of teaching and monitors faculty members' adherence to their duties. Periodic reports on departmental activities are prepared, including evaluations of research submitted for promotion and support. The Head identifies the department's needs for academic, technical, and administrative personnel, recommends annual admission plans, supervises the allocation of teaching loads, and holds regular meetings with students to assess their needs, consider their suggestions, and resolve any difficulties encountered.

Department Coordinator Responsibilities: The Department Secretary assists the Head of Department by organising departmental affairs, monitoring students' daily attendance, supervising the preparation of lecture halls with necessary supplies, and arranging timetables for classes and examinations.

Department Council: The Council collaborates with the Head of Department to oversee the educational process and departmental operations. It monitors the implementation of the academic plan as well as the development plan for academic, educational, and administrative staff.

Scientific Committee and Postgraduate Studies Committee: The Scientific Committee collaborates with the Head of Department on all academic decisions related to curriculum development, review of faculty promotions, and evaluation of research and scholarly outputs. It also addresses all matters concerning postgraduate students, including the appointment of admission examination committees, the formation of thesis

defence panels, the consideration of requests for extensions by postgraduate students, and the oversight of comprehensive examinations.

Quality Committee: The Quality Committee promotes a culture of quality and supports related activities by implementing quality standards across all aspects of departmental operations to enhance educational and instructional outcomes. It supervises assessment activities and academic accreditation processes, supports continuous quality improvement, and monitors the preparation of course and programme specifications, reports, and statistical data within the department. The committee also undertakes other tasks assigned by the Quality Assurance Unit related to quality and its application .

Examination Committee: This committee is responsible for overseeing the termly, mid-year, and final examinations for students. It organises invigilation schedules and allocates invigilators to examination halls. It receives examination questions and results from lecturers, ensuring their confidential handling and systematic organisation. The committee conducts statistical analysis of final results, determining pass and fail rates for examinees, and supervises the administration of examinations for students undertaking supplementary assessments.

Auditing Committee: Working concurrently with the Examination Committee, the Auditing Committee members verify the accuracy of marks submitted by lecturers (including the raw scores) and cross-check the recorded grades on mark sheets and examination results before their publication to students.

Graduation Projects Committee: This committee collects project proposals from lecturers, which are then organised and presented to students. Students are selected for projects based on established criteria, following which projects are officially assigned and announced. The committee monitors progress continuously and arranges panels for the discussion and defense of graduation projects.

Continuing Education and Seminars Committee: This committee is responsible for overseeing the continuing education courses conducted by departmental lecturers for various personnel in provincial institutions. It also manages the seminars and conferences organized by the department.

Guidance Committee: This committee meets with students to identify and understand the academic challenges and obstacles they face. It prepares reports based on these consultations to assist in addressing students' educational needs.

Summer Training Committee: This committee is responsible for preparing official letters related to the summer training of third-year students within various state departments. It monitors the students' progress and collects reports from students who have completed their training placements.

Media Committee: This committee manages the coverage of the department's academic and social events by producing photographic documentation and informational publications.

Timetable Committee: Members of this committee prepare the lecture timetables for undergraduate and postgraduate students for both academic semesters each year.

Information Committee: The Information Committee is responsible for electronically archiving and documenting all scientific and research activities, including seminars, symposia, conferences, training courses, and workshops. It records detailed information about these events, including topics discussed, participant names, venues, and dates, aiming to create a comprehensive and organised database. The committee prepares monthly, biannual, and annual statistics on these activities to provide accurate reports used for future planning and decision-making. Electronic archiving ensures ease of access and retrieval of data when needed, thereby enhancing organisational and operational efficiency.

Registration Committee: This committee is responsible for the admission and registration of new students at the beginning of each academic year, as well as the ongoing registration of students across all study levels. It monitors student status throughout the academic year, managing transfers, exchanges, deferrals, and other cases. The committee also prepares lists of students for all levels, organized by class groups.

Department Administration Office: This office registers all incoming official correspondence and distributes outgoing mail from the Head of Department, keeping a record of its distribution. It processes outgoing official documents and follows up on those requiring responses. The office organises incoming and outgoing correspondence into files that facilitate easy searching and retrieval.

Library: The library manages the receipt of master's theses in both electronic and printed formats from recently graduated students. It oversees the lending of master's theses, books, and scientific laser discs related to academic programs.

Department Building

The Management Information Systems Department was established in the 2002-2003 academic year to prepare graduates with combined managerial and technical backgrounds, enabling them to apply technologies effectively across various fields of administrative sciences. Currently, the department occupies a building with an area of 160 square metres (100m x 16m) and two floors, designed to meet the needs of education and scientific research. The department focuses on advanced topics in Information Technology, Management Information Systems, and Artificial Intelligence. It offers three postgraduate programmes (Higher Diploma, Master's, and Doctorate), which have reinforced the department's status as a specialised academic beacon in this field.

Department Laboratories

The Management Information Systems Department comprises laboratories dedicated to analysis, inquiry, theory testing and application, as well as transforming abstract concepts into tangible forms through specific guidelines and strategies. These laboratories offer students opportunities during practical sessions to explore methods in their specialised fields, helping them understand theoretical aspects through practical applications. The laboratories operate under the supervision of distinguished professors with extensive academic and practical expertise. Additionally, all equipment undergoes regular maintenance to ensure the provision of a sophisticated educational environment that supports academic and technical excellence.

Computer Laboratory 1

Computer Laboratory 2

The employment sectors for graduates

The employment fields for graduates of the Department of Management Information Systems include the utilisation of information and communication technologies, software, and various applications within business management and public administration sectors, such as commercial, service, and industrial companies, as well as various government agencies. The job titles issued by the Ministry of Finance, according to letter number / 6 / 9 4746 dated 29/8/2009, were allocated as outlined in the table below:

Second	Third	Fourth	Fifth	Sixth	Seventh	Degree
Senior Chief Systems Analyst	Chief Systems Analyst	Deputy Chief Systems Analyst	Senior Systems Analyst	Systems Analyst	Assistant Systems Analyst	The job title
