

Course Description Form

1. Course Name:	
Statistical	
2. Course Code:	
STAT109	
3. Semester / Year:	
٢٠٢٣/٢٠٢٤ Second semester (Spring)	
4. Description Preparation Date:	
1/2/2024	
5. Available Attendance Forms:	
Attended	
6. Number of Credit Hours (Total) / Number of Units (Total)	
75 hours including 2 Theoretical + 3 Practical / 3.5 Unit	
7. Course administrator's name (mention all, if more than one name)	
Name: Dr. Zaid Mohammed Talal Alhabbar Email: zaid.alhabbar@uomosul.edu.iq	
8. Course Objectives	
<ul style="list-style-type: none"> • Knows the science of statistics and its types, and also differentiates between descriptive statistics and inferential or inferential statistics • Explains what descriptive variables are and recognizes the difference between a sample and population • Organize and draw a frequency distribution table and identify its parts • Organizes a table of relative frequency distribution and ascending and descending grouping • He finds the arithmetic mean - and learns about the properties of the arithmetic mean • Works on how to find the range, mean deviation, variance, and standard deviation • Distinguish the difference between permutations, combinations and a random experiment • Expresses the components of discrete probability distributions • Identify the statistical hypothesis, the null hypothesis, and the alternative hypothesis and compare the types of error • Learn about the T-test and the Z-test and the difference between them • Learn how to perform the chi-square test steps • Learn about correlation, regression, correlation coefficient, regression, and the properties of each 	
9. Teaching and Learning Strategies	
<p>Theoretical:</p> <ul style="list-style-type: none"> • Interactive lecture • Brainstorming • Dialogue and discussion • Assigning tasks and reporting • The student is assigned to 	<p>Practical</p> <ul style="list-style-type: none"> • Assigning group work to reveal leadership skills • Assigning tasks and a report for each lecture

prepare reports based on his own diligence and prepared for discussion with the students

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2 Theoretical + 3 Practical	A1: Knows the science of statistics and its types, and also distinguishes between descriptive statistics and inferential statistics A7: Differentiate between descriptive and inferential statistics, as the most important statisticians in the twentieth century remember	Theoretical: Statistics, its definition and types Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
2	2 Theoretical + 3 Practical	A2: Explains what descriptive variables are and recognizes the difference between a sample and population A8: Compares quantitative variables and descriptive variables It also distinguishes between the population and the sample, giving examples of each	Theoretical: The nature and types of statistical data Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
3	2 Theoretical + 3 Practical	C1: Organize and draw a frequency distribution table and identify its parts B2: Organizes a frequency distribution table and identifies its components. He also experiments with finding the ascending and descending group frequencies	Theoretical: tabular presentation and graphical representation Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
4	2 Theoretical + 3 Practical	C2: Organizes table the relative frequency distribution and ascending and descending grouping B3: Calculates the	Theoretical: Types of frequency distribution tables and how to draw them	Theoretical: auditory methods Style of writing on the blackboard	Short exams, assignment of duties, discussions

		arithmetic mean, geometric mean, and harmonic mean. It also determines the squared mean, median, and mode.	Practical: Solve mathematical exercises on the topic	Direct dialogue style Practical: Assigning tasks and reporting	
5	2 Theoretical + 3 Practical	B1: Finds the arithmetic mean - and learns about the properties of the arithmetic mean C6: The range law, mean deviation, variance of the mean deviation, and standard deviation are applied to the classified and unclassified data	Theoretical: Measures of concentration or mediation Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
6	2 Theoretical + 3 Practical	C3: Works out how to find the range, mean deviation, variance, and standard deviation C7: Explains probability theory for random experiment, sample space, and mutually exclusive events with solving examples	Theoretical: measures of dispersion or difference Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
7	2 Theoretical + 3 Practical	C4: Distinguish the difference between permutations, combinations and a random experiment B4: Explains the variables of the binomial distribution law	Theoretical: Principles of probability theory Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
8	2 Theoretical + 3 Practical	C5: Expresses the components of discrete probability distributions C8: Explains the null hypothesis and the alternative hypothesis and compares them	Theoretical: Piecewise probability distributions Practical: Solve mathematical exercises on the topic	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
9	2 Theoretical	A3: Recognizes the	Theoretical:	Theoretical:	Short exams,

	+ 3 Practical	<p>statistical hypothesis, the null hypothesis, and the alternative hypothesis - compares the types of error</p> <p>B5: Shows the T test “T-test” and shows the Z test “Z-test”</p>	<p>Hypothesis testing</p> <p>Practical: Solve mathematical exercises on the topic</p>	<p>auditory methods</p> <p>Style of writing on the blackboard</p> <p>Direct dialogue style</p> <p>Practical: Assigning tasks and reporting</p>	<p>assignment of duties, discussions</p>
10	2 Theoretical + 3 Practical	<p>A4: Learn about the T-test and the Z-test and the difference between them</p> <p>B6: Enumerate the types of applications of chi-square</p>	<p>Theoretical: Hypothesis testing</p> <p>Practical: Solve mathematical exercises on the topic</p>	<p>Theoretical: auditory methods</p> <p>Style of writing on the blackboard</p> <p>Direct dialogue style</p> <p>Practical: Assigning tasks and reporting</p>	<p>Short exams, assignment of duties, discussions</p>
11	2 Theoretical + 3 Practical	<p>A5: Learn how to perform the chi-square testing steps</p> <p>B7: Explains the simple connection, and reinforces it with examples</p>	<p>Theoretical: Chi-square distribution</p> <p>Practical: Solve mathematical exercises on the topic</p>	<p>Theoretical: auditory methods</p> <p>Style of writing on the blackboard</p> <p>Direct dialogue style</p> <p>Practical: Assigning tasks and reporting</p>	<p>Short exams, assignment of duties, discussions</p>
12	2 Theoretical + 3 Practical	<p>A6: Learn about correlation, regression, correlation coefficient, regression, and the properties of each</p> <p>B8: Explains the nature of the distribution of F. It also explains the relationship between the distributions of Z, T, and F and the distinction between each of them</p>	<p>Theoretical: simple correlation and regression</p> <p>Practical: Solve mathematical exercises on the topic</p>	<p>Theoretical: auditory methods</p> <p>Style of writing on the blackboard</p> <p>Direct dialogue style</p> <p>Practical: Assigning tasks and reporting</p>	<p>Short exams, assignment of duties, discussions</p>
13	2 Theoretical + 3 Practical	<p>D1: Training on how to apply statistics in designing agricultural experiments</p> <p>D2: Organize a report on the statistics topics studied and learn how to</p>	<p>Theoretical + practical: report and discussion</p>	<p>Theoretical: auditory methods</p> <p>Style of writing on the blackboard</p> <p>Direct dialogue style</p>	<p>Short exams, assignment of duties, discussions</p>

		apply statistics in agricultural sciences		Practical: Assigning tasks and reporting	
14	2 Theoretical + 3 Practical	E1: Visit to the Statistics Department with the aim of learning about the most important statistical processes and how to implement E3: The student assumes some problems in agricultural fields and laboratories and how to develop statistical solutions	Theoretical + practical: A field visit to the Department of Statistics - University of Mosul	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions
15	2 Theoretical + 3 Practical	E2: Visit to the Mathematics Department with the aim of learning about the most important statistical operations and how to implement them E3: The student assumes some problems in agricultural fields and laboratories and how to develop statistical solutions	Theoretical + practical: A field visit to the Department of Mathematics - University of Mosul	Theoretical: auditory methods Style of writing on the blackboard Direct dialogue style Practical: Assigning tasks and reporting	Short exams, assignment of duties, discussions

11. Course Evaluation

	Evaluation methods	Evaluation date (week)	Degree	Percentage weight %
١	Report 1	Fourth week	2.5	2.5
٢	Report 2	Fifth week	2.5	2.5
٣	Short test (1) Quiz	Sixth week	2	2
٤	Short test (2) Quiz	Fourteenth week	2	2
٥	Short test (3) Quiz	Fifteenth week	1	1
٦	Semester test (1)	Sixth week	7.5	7.5
٧	Semester test (2)	Eleventh week	7.5	7.5
٨	Final theoretical test	Final semester test	40	40
٩	Practical field project	The fifteenth week	5	5
١٠	Field evaluation	Third and fifth week	2	2
١١	Practical short test (1) Quiz	First week	1	1
١٢	Short practical test (2) Quiz	Fourth week	0.5	0.5
١٣	Short practical test (3) Quiz	Fourteenth week	1	1
١٤	Live drawings and homework	Weeks 6, 8, 9, 10, 11, 12 and 13	5.5	5.5
١٥	Final practical test	Final semester test	20	20
	Total	100	Degree	Percentage weight %

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Introduction to statistics
Main references (sources)	Principles of statistics
Recommended books and references (scientific journals, reports...)	Statistics book and methods of statistics
Electronic References, Websites
