

## Course description of crop diseases

|  |   |
|--|---|
|  | .1 Course Name  |
|  | crop diseases   |
|  | .2 Course Code  |
|  | CRDI363   |
|  | .3 Annual : Year / Semester   |
|  | 2024-First semester/third stage/2023  |
|  | .4 Date this description was prepared   |
|  | 2024/2/1  |
|  | .5 Available forms of attendance  |
|  | In Class  |
|  | .6 (of study hours (total)/number of units (total Number  |
|  | unit 3.5 / hours75  |
|  | .7 (Name of the course administrator (if more than one name is mentioned  |
|  | Dr. Raghad Nayef Mahidi<br>M. M. Saleh Ahmed Issa   |
|  | .8 Course objectives  |
| <ul style="list-style-type: none"> <li>• The learner should be able to define the concept of disease and the information that must be available to know the medical history</li> <li>• Choosing the appropriateness of the factors affecting the disease and determining its ability to spread</li> <li>• Differentiate between types of pathogens and know all their classifications</li> <li>• Understanding the basics of modern planning to develop a program that explains the forms and patterns of plant diseases</li> <li>• Distinguishing between classes and sections of fungi according to the type of each class</li> <li>• Familiarity with the information the teacher needs and what is available to him to master his work</li> <li>• Identify plant diseases, symptoms and signs, and what must be taken into account when distinguishing between them</li> <li>• A comprehensive study of the various types of control, how to diagnose each disease, and determine the controls</li> <li>• and conditions that must be observed when carrying out all instructions to carry out the control in the proper manner</li> </ul> |   |
|  | .9 Teaching and learning strategies   |
|   | <ul style="list-style-type: none"> <li>- Interactive lecture</li> <li>- Brainstorming</li> <li>- Dialogue and discussion</li> <li>- Training Field</li> <li>- Practical exercises</li> <li>- Field project</li> </ul> |

## Course structure .10

| Evaluation method                     | Learning method  | Name of the unit or topic                                     | Required learning outcomes   | hours         | the week |
|---------------------------------------|--|---|--|---------------|----------|
| Semester exam 1, final exam           | Interactive lecture, brainstorming, dialogue and discussion, self learning   | An overview of the plant concept of disease                   | Identify diseases that spread in agricultural fields :a1   | 1 theoretical | 1        |
| Short practical test1                 | Interactive lecture, brainstorming, dialogue and discussion, field learning -training, self                          | Laboratory and equipment                                      | Gets acquainted with the laboratory and all laboratory equipment :c3                             | 3 practical   |          |
| Semester exam 1, final exam           | Interactive lecture, brainstorming, dialogue and discussion, self learning   | The importance of field crops                                 | Recognizes the economic importance of field crops and their relationship to diseases :a2         | 1 theoretical | 2        |
| Direct drawing                        | Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning | Laboratory working conditions                                 | Familiar with all laboratory safety conditions when conducting laboratory experiments :c6        | 3 practical   |          |
| Semester exam 1, final exam           | Interactive lecture, brainstorming, dialogue and discussion, self learning   | Knowledge of diseases and their history                       | Get to know a brief history of each disease spreading in agricultural fields :a3                 | 1 theoretical | 3        |
| Field evaluation                      | Interactive lecture, brainstorming, dialogue and discussion, field learning -training, self                          | Isolation and diagnosis of pathogens                          | Isolate the pathogens to be diagnosed :a2  | 3 practical   |          |
| Semester test 1, final test report    | Interactive lecture, brainstorming, dialogue and discussion, self learning   | The presence of pathogens pathogenicity and Koch's hypotheses | Identify the organisms that cause plant diseases :a4 and understand the meaning of pathogenicity | 1 theoretical | 4        |
| Practical short test 2 direct drawing | Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning | Optical microscopes in laboratories                           | Examine pathogens using optical microscopes :a1  | 3 practical   |          |
| Semester test 1, final test report    | Interactive lecture, brainstorming, dialogue and discussion, self learning   | Symptoms and signs of disease in plant families               | Explains the difference between pathological symptoms and pathological signs :a5                 | 1 theoretical | 5        |
| Field evaluation                      | Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self          | Pathological causes their relationship and to girls           | explains the most common pathogens that lead to losses b6  | 3 practical   |          |

|                             |  |  |  |               |    |
|-----------------------------|--|--|--|---------------|----|
| Short test, final test      | Interactive lecture, brainstorming, dialogue -and discussion, self learning  | Environmental Health                     | Explains the concept of plant pathology and its b1 environmental health relationship to                | 1 theoretical | 6  |
| Direct drawing and homework | Interactive lecture, dialogue ,brainstorming and discussion, field training, practical -exercises, and self learning           | Agricultural food media                  | prepares different food mediaa7  | 3 practical   |    |
| Semester exam 2, final exam | lecture, Interactive brainstorming, dialogue -and discussion, self learning  | Epidemiology of diseases                 | Familiarizes with the most important factors affecting the epidemiology of diseases :b2                | 1 theoretical | 7  |
| Field project               | Interactive lecture, brainstorming, dialogue discussion, field and training, practical exercises, field project, learning-self | Laboratory diagnosis of diseases         | Identify the mechanism of laboratory diagnosis :a2 of pathogens  | 3 practical   |    |
| Semester exam 2, final exam | lecture, Interactive brainstorming, dialogue -and discussion, self learning  | The importance of pathogens              | Master the importance of pathogens and their :b3 relationship to plant health and environmental health | 1 theoretical | 8  |
| Direct drawing and homework | Interactive lecture, brainstorming, dialogue field ,and discussion training, practical -exercises, and self learning           | Symptoms, signs, and life cycles         | describes the most common symptoms of plant c2 diseases  | 3 practical   |    |
| Semester exam 2, final exam | Interactive lecture, dialogue ,brainstorming -and discussion, self learning  | Spread of pathogens in the environment   | Understands the importance of the spread of b4 pathogens in agricultural fields                        | 1 theoretical | 9  |
| Direct drawing and homework | Interactive lecture, brainstorming, dialogue field ,and discussion training, practical -exercises, and self learning           | Taking samples from plant parts and soil | Proficient in the process of taking samples from c5 plant parts and soil                               | 3 practical   |    |
| Semester test2              | Interactive lecture, brainstorming, dialogue -discussion, self and learning  | Modern diagnostic methods                | Masters the importance of diagnosing plant b5 diseases by all modern means                             | 1 theoretical | 10 |
| Direct drawing and homework | Interactive lecture, brainstorming, dialogue and discussion, field training, practical -self exercises, and learning           | Preparing laboratory slides              | Purification of pathogens and preparation of c1 laboratory slides                                      | 3 practical   |    |
| Final test                  | Interactive lecture,   | The importance of                        | demonstrates the great importance of studying c1   | 1             | 11 |

|   |   |  |   |                      |    |
|---|---|--|---|----------------------|----|
|   | brainstorming, dialogue<br>-and discussion, self<br>learning  | insect vectors                                   | insect vectors of pathogens   | theore<br>tical      |    |
| Direct<br>drawing<br>and<br>homework    | Interactive lecture,<br>brainstorming, dialogue<br>and discussion, field<br>training, practical<br>-exercises, and self<br>learning           | Field visits                                     | conducts a field visit <sup>d7</sup>  | 3<br>practic<br>al   |    |
| Final test                              | Interactive lecture,<br>brainstorming, dialogue<br>-and discussion, self<br>learning  | How to transmit<br>disease and injury            | control the suggests an appropriate method to <sup>c2</sup><br>carrier of diseases and how to transmit and infect<br>them           | 1<br>theore<br>tical |    |
| Direct<br>drawing<br>and<br>homework    | Interactive lecture,<br>brainstorming, dialogue<br>and discussion, field<br>training, practical<br>-exercises, and self<br>learning           | Sterilization methods                            | Evaluating the effectiveness of some : <sup>e4</sup><br>sterilization methods   | 3<br>practic<br>al   | 12 |
| Final test                              | Interactive lecture,<br>brainstorming, dialogue<br>-and discussion, self<br>learning  | Integrated control                               | suggests Explains an ideal control program and : <sup>c3</sup><br>an optimal method for disease management and<br>control           | 1<br>theore<br>tical |    |
| Direct<br>drawing<br>and<br>homework    | Interactive lecture,<br>brainstorming, dialogue<br>and discussion, field<br>training, practical<br>-exercises, and self<br>learning           | Methods of<br>protecting field crops             | He is familiar with the most important : <sup>b1</sup><br>protect agricultural agricultural methods used to<br>crops from infection | 3<br>practic<br>al   | 13 |
| ,Short test<br>final test               | Interactive lecture,<br>brainstorming, dialogue<br>-and discussion, self<br>learning  | Discussion panel                                 | panel discussions on the critical He leads : <sup>d1</sup><br>importance of the spread of plant diseases and how<br>to control them | 1<br>theore<br>tical |    |
| Short<br>practical<br>test <sup>3</sup> | Interactive lecture,<br>brainstorming, dialogue<br>and discussion, field<br>training, practical<br>-exercises, and self<br>learning           | Artificial infection of<br>laboratory plants     | pathogenicity by artificially Learn how to prove <sup>a2</sup><br>infecting tested plants   | 3<br>practic<br>al   | 14 |
| ,Short test<br>final test               | Interactive lecture,<br>brainstorming, dialogue<br>-and discussion, self<br>learning  | Disease risks to<br>human health                 | Identify health risks, their impact on human <sup>e1</sup><br>health, and the impact of negligence on public<br>health              | 1<br>theore<br>tical |    |
| Field<br>project                        | Interactive lecture,<br>brainstorming, dialogue<br>and discussion, field<br>training, practical<br>exercises, field project,<br>learning-self | Diagnosing<br>pathological<br>symptoms and signs | difference between pathological explains the <sup>b1</sup><br>symptoms and pathological signs                                       | 3<br>practic<br>al   | 15 |
