

# **Course Description Form**

## 1. Course Name:

Design and Analysis of Agricultural Experiment

2. Course Code:

#### DAAE302

3. Semester / Year:

2024 - 2025

4. Description Preparation Date:

1/9/2024

5. Available Attendance Forms:

In- person + Online

6. Number of Credit Hours (Total) / Number of Units (Total)

75 hours / 3.5 units

7. Course administrator's name (mention all, if more than one name)

Name: Zakariya Bader Fathi / Nawaf Jassim Mohammed Email: zakria-bader@uomosul.edu.iq

8. Course Objectives

## **Course Objectives**

- Enable the student to understand, comprehend and identify the types of designs used in agricultural experiments.
- Selection of results after analysis to reach superior coefficients.
- Identify the types of tests that are performed before and after the experiment

# 9. Teaching and Learning Strategies

#### **Strategy**

- Interactive lectures.
- Dialogue and discussion.
- Brainstorming.
- Reports and homework.
- Scientific visits.

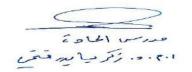

## 10. Course Structure

Week	Hours	Code	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	Theoretica 1 (2)	A1	symbols – mediation measures – dispersion measures – hypothesis testing	General statistical review	Interactive lecture and brainstorming, dialogue, and discussion	Quiz

	Practical (3)	B5 Statistical Codes - Solving Questions About review General statistical review General statistical review brainstorming, dialogue, and discussion		brainstorming, dialogue, and	Quiz	
2	Theoretica 1 (2)	B1	Types of experiments - Basic rules for designing experiments - Experimental error and confiscation - How to choose an experimental design for any experiment - Methods to be followed in scientific experiments - One-factor experiments with random experimental designs	definitions Full random design, complete random sectors, and Latin square	Interactive lecture and brainstorming, dialogue, and discussion	Quiz
	Practical (3)	definition of experimental in agricultural brainstorm		Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
3	Theoretica 1 (2)	C1	Design definition - advantages and disadvantages - planning for experimentation and randomly distributing transactions	Complete Randomized Design (CRD)	Interactive lecture and brainstorming, dialogue, and discussion	Quiz
	Practical (3)	В6	Advantages and disadvantages of CRD design- drawing a design diagram-solving questions about the design	Complete Randomized Design (CRD)	Interactive lecture and brainstorming, dialogue, and discussion	Quiz
ļ	Theoretica 1 (2)	C2	How to collect and analyze data statistically – estimating the components of variance	Equation of the mathematical model and estimation of its components	Interactive lecture and brainstorming, dialogue, and discussion	Quiz
	(3)		Mathematical Model Equation - How Field Data Is Collected - How Variance Components Are Estimated	Variance Components	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Homework
	Theoretica 1 (2)	D1	Definition of design - its advantages and disadvantages - planning for the experiment and distributing coefficients randomly - equation of the mathematical model and estimating its components	Randomized Complete Design	Interactive lecture and brainstorming, dialogue, and discussion	Quiz
	Practical (3)	C7	Advantages and disadvantages of RCDB design - equation of the mathematical model - solving direct and indirect questions about the design	Randomized Complete Design	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Homework
	Theoretica 1 (2)			1st Exam		
	Practical (3)	В7	Solve questions about contrast components-Solve questions about missing viewing-Solve questions about estimating the relative efficiency of sector design compared to random design  Variation Components — Estimating Missing observation Values — Estimating the Relative Efficiency of Design  Variation Components — Estimating Missing odiscussion  Estimating the Relative Efficiency of Design		1 <sup>st</sup> Exam	
	Theoretica 1 (2)			Latin Square Design	Quiz Homework	

			estimating its components - How to collect data and analyze it statistically				
	Practical (3)	В8	Advantages and disadvantages of LSD Design - How to draw an experiment diagram using Latin square design	LSD Latin Square Design	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
8	Theoretica 1 (2)	A2	Identify the different designs used in field experiments	Visit the Field Crops Department Research Station to learn about the designs used in the experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Homework	
	Practical (3)	C8	Practical Application at the Field Crops Department Experiment Station	Visit the field crops research station to learn about the designs used in agricultural experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
9	Theoretica 1 (2)	C3	Types and conditions of use of any of them - Test by the Dont method - Test in a way with less significant difference - Test by Duncan method Multi-range	of comparisons between averages of transactions	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
	Practical (3)	D5	Solving examples of using the Donut method - solving examples of using the LSD method - solving questions about using the Duncan method	of testing and comparing averages	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Homework	
10	Theoretica 1 (2)	D3	How to Calculate the Relative Efficiency of LSD Design - Estimating the Lost Viewing Value of LSD Design	efficiency and lost viewing of LSD design	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Report	
	Practical (3)	C9	Advantages and disadvantages of factor experiments - drawing a diagram of factor experiments - what are factor coefficients and what is the interaction between factors	first part of factorial experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
11	Theoretica l (2)	В3	Definition of factorial experiments - their benefits - disadvantages - equation of the mathematical model - diagram of the factor experiment	first part of factorial experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz Report	
	Practical (3)	D6	Solving Questions About Factor Experiments Using CRD Design - Solving Questions About Factor Experiments Using RCBD Design - Solving Questions About Factor Experiments Using LSD Design	second part of factorial experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
12	Theoretica l (2)	C4	the interaction between factors through the analysis of variance table and graph	second part of factorial experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
	Practical (3)	В9	How to collect data - what is data - data tabulation - analyze data statistically	collection and analysis statistically	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
13	Theoretica 1 (2)	B4	Interaction graph - representation of factor coefficients by symbols - usefulness of interference between factors	Interaction in factor experiments	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	
	Practical (3)	A4	Writing the anova table for factorail experiments with more than two factors - drawing the interaction between factors graphically	Interaction between factors through Anova table and graph	Interactive lecture and brainstorming, dialogue, and discussion	Quiz	

14	Theoretica 1 (2)	C5	Definition - benefits - reasons for its use - how implement experiments with two workers according to split-plot w the three designs mentioned above		Split-pl	ot Experiments	Interactive lecture brainstorming, di discussion		2 <sup>nd</sup> Exam	
	Practical (3)	A5	Advar with t solvin split-p	ntages of experiments he split-plot system - ag questions about blot experiments - as for using split-plot	Split-pl	ot Experiments	Interactive lecture and brainstorming, dialogue, and discussion		2 <sup>nd</sup> Exam	
15	Theoretica l (2)	D4	meası	eation on taking arements of traits and ng them in tables		take ements of traits them in tables	Interactive lecture brainstorming, di- discussion	alogue, and		
	Practical (3)	measi		cation on taking arements and placing in tables	measure in the fi	w to take Interactive lectur brainstorming, di discussion traits em in tables				
11.0	Course E	valuati	on							
	Evaluation methods			Evaluation date (v	week)	Degree	e Percentage v		ge weight	
1	Report 1			Fourth week		2.5		2.5		
2	Report 2			Fifth week		2.5		2.5		
3	Short test (	1) Quiz		Sixth week		2	2			
4	Short test (	2) Quiz		Fourteenth week		2 2		2	2	
5	Short test (3) Quiz			Fifteenth week		1		حامعة الموصل )		
6	Semester test (1)			Sixth week		7.5		7.5		
7	Semester test (2)			Eleventh week	eventh week 7.5		7.5			
8	Final theoretical test			Final semester tes	st	40 40		40		
9	Practical field project			The fifteenth wee	k	5 5				
10	Field evalu	ation		Third and fifth we	eek	2		2		
11	Practical short test (1) Quiz			First week		1	1			
12	Short practical test (2) Quiz			Fourth week		0.5		0.5		
13	Short practical test (3) Quiz			Fourteenth week		1 1				
14	Live drawings and homework			Weeks 6, 8, 9, 10 and 13				5.5		
15	1			Final semester test		20			20	
	Total 100					100%
