

principles of plant protection Description of the course on

: Course Name .١					
Principles of plant protection					
: Course Code .٢					
PRPP117					
Annual ; Year / Semester .٣					
2024-2024 /secondstage					
Date this description was prepared .٤					
2025/2/1					
: Available forms of attendance .٥					
My presence					
:(Number of study hours (total)/number of units (total) .٦					
units ٧.٥ practical hours / ٧ theoretical hours / ٧					
(Name of the course administrator (if more than one name is mentioned) .٧					
Dr.saddam mowafak hassan Dr.alaa mohamed hameed, IKHLAS Mohammad Noor salah					
Course objectives .٨					
<ul style="list-style-type: none"> be able to define the concept of disease and the information that must be available to know the medical history should disease and determining its ability to spread Choosing the appropriateness of the factors affecting the Differentiate between types of pathogens and know all their classifications Understanding the basics of modern planning to develop a program that explains the forms and patterns of plant diseases tween the ranks and sections of fungi according to the type of eachDistinguish be Learn about entomology and the factors that helped insects survive and spread them distinguishing between when Identify plant diseases, symptoms and signs, and what must be taken into account s A comprehensive study of the various types of control, how to diagnose each disease, and determine the controls and condition that must be observed when carrying out all instructions to carry out the control in the proper manner 					
learning strategies Teaching and .٩					
<div style="display: flex; align-items: center;">  <div> <ul style="list-style-type: none"> interactive lecture - Brainstorming - and discussion Dialogue - Field Training - Practical exercises - Field project - education -Self - </div> </div>					
Course structure .١٠					
Evaluation method	Learning method	Name of the unit or topic	Required learning outcomes	hours	the week
Semester	Interactive lecture,	An overview of the	Concept of plant disease :A1	1	1

exam	brainstorming, dialogue -and discussion, self learning	plant concept of disease, its definition knowledge of and , the disease and the plant host	Plant disease The pathogen -1 The breadwinner -2 Environmental factors -3	theore tical	
Short practical 1test	Interactive lecture, brainstorming, dialogue and discussion, field learning -training, self	pathology Plant laboratory	Identify laboratory equipment :C6 The student learned how to use a microscope, :a41 how to examine pathogens, and prepare slides	3 practi cal	
Semester ,1exam final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Factors of the pathological triangle	Recognizes the disease pyramid, the disease a2 triangle, and the factors affecting it history and medical	1 theore tical	
Live discussion	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Conducting the sterilization process inside the laboratory sterilization -	The student learns about sterilization methods :C6 and how to eliminate pathogens inside the laboratory	3 practi cal	2
Semester ,1exam final exam	Interactive lecture, brainstorming, dialogue -discussion, self and learning	Development and detection of plant disease	Learn a brief overview of the disease history of :a3 and the each disease spreading in agricultural fields stages of development and detection of the plant .disease	1 theore tical	
Laboratory evaluation	Interactive lecture, brainstorming, dialogue and discussion, field learning -training, self	Food environments	Identifying food media and how to prepare :a6 them	3 practi cal	3
Semester final ,1test , test report	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Pathogens of plant hosts	diseases Identify the organisms that cause plant :a4 and understand the meaning of pathogenicity	1 theore tical	
Practical 2short test direct , drawing	Interactive lecture, dialogue ,brainstorming and discussion, field training, practical -exercises, and self learning	Identify several symptoms of pathogenic causes, diagnose them within the disease, and differentiate between pathogenic causes	The student learns about different plant :a10 diseases and how to diagnose them	3 practi cal	4
Semester final ,1test , test report	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Disease symptoms and signs	It explains the difference between pathological :A1 and studies the symptoms and pathological signs anatomical symptoms and apparent and pathological signs	1 theore tical	
Laboratory evaluation	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Isolation of causing organisms plant diseases	Laboratory isolation of pathogens from :a10 plant parts different	3 practi cal	5

at, test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Basics of integrated management	attack plants shows how pathogens :b1 mechanically and chemically and discusses the .concept of the basics of integrated management	1 theore tical	6
Field ssessmen and t homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -self exercises, and learning	Scientific visit	scientific visit to the fields Conduct a :d9 Horticulture stations, identifying the most important plant diseases and diagnosing them in the field	3 practic al	
Semester ,2exam final exam	Interactive lecture, dialogue ,brainstorming -and discussion, self learning	Synthetic and chemical defences	the importance and how plants Understands :b2 defend themselves through synthetic defenses and biological chemical defenses	1 theore tical	7
writing a report	Interactive lecture, brainstorming, dialogue and discussion, field training, practical exercises, field project, learning-self	A scientific visit to the plastic one of houses	and inside Conduct a scientific visit to the fields :d9 and identify the most important the greenhouses plant diseases and diagnose them in the field	3 practic al	
Semester ,2exam final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	world of insects	factors that Learn about insect science and the :a3 helped insects survive and spread	1 theore tical	8
Discussion and homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Insect body wall	Learn the basics about insects and their body -a1 walls	3 practic al	
Semester ,2exam final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	harms of Benefits and insects	the harms and benefits of insects Learn about :a4 and their economic importance	1 theore tical	9
Discussion and homework	Interactive lecture, brainstorming, dialogue field ,and discussion training, practical -exercises, and self learning	Identify the insect's body	recognizes insect body regions a2	3 practic al	
Semester 2test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Learn about modern methods of resistance	Master the methods of pest control b1:	1 theore tical	10
Discussion and homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Study concepts	is familiar with the concept of evolution and b1 impossibility	3 practic al	
Final test	Interactive lecture, brainstorming, dialogue	Learn about modern methods of	He is proficient in pest control Proficient :b2 methods	1 theore	11

	-and discussion, self learning	resistance		tical	
Discussion and homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Identify insects	identifies some insectsb2	3 practical	
Final test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Learn about modern methods of resistance	the methods of pest control Master :b3	1 theoretical	
And my homework	,Interactive lecture brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Examines the mouth parts of the insect	Examines the types of mouthparts of b3 important insects and the appendages of the head region	3 practical	12
Final test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Insects that infect crops	Identify crop insects :b4	1 theoretical	
Discussion and homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Examines the insect's body parts	examines the chest and its appendages b4	3 practical	13
Short test final test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Orchard insects	garden insects Identify :B5	1 theoretical	
Short practical 3test	Interactive lecture, brainstorming , dialogue and discussion, field training, practical -exercises, and self learning	Examines the insect's body parts	Examines the abdomen and its appendages C1	3 practical	14
Short test final test	Interactive lecture, brainstorming, dialogue -discussion, self and learning	General insects	Identify general insects :b6	1 theoretical	
Field project	Interactive lecture, brainstorming, dialogue and discussion, field training, practical exercises, field project, learning-self	General insects	discusses general insects b5	3 practical	15
