Learning and Teaching Strategies	
Strategies	<p>1. Lecture-based Teaching:</p> <ul style="list-style-type: none"> Explaining concepts and demonstrating tools, techniques, and software in real time allows students to observe the process before applying it. <p>2. Hands-on Practice:</p> <ul style="list-style-type: none"> Lab Sessions: Providing practical sessions where students use drawing tools and software like AutoCAD or Solid Works to develop their skills. Guided Exercises: Offering step-by-step instructions to complete tasks such as drawing isometric views or projections. <p>3. Interactive Class Discussions:</p> <ul style="list-style-type: none"> Question and Answer Sessions: Actively engage students in discussions where they can ask questions and clarify doubts about topics like projection techniques or CAD tools. <p>4. Assessment and Evaluation:</p> <ul style="list-style-type: none"> Project-based Assessments: Assigning projects requiring students to apply the concepts they've learned, like creating detailed engineering drawings using manual and software-based techniques.

Grading Scheme			
Group	Grade	Marks %	Definition
Success Group (50 - 100)	A – Excellent	90 - 100	Outstanding Performance
	B - Very Good	80 - 89	Above average with some errors
	C – Good	70 - 79	Sound work with notable errors
	D – Satisfactory	60 - 69	Fair but with major shortcomings
	E – Sufficient	50 - 59	Work meets minimum criteria
Fail Group (0 – 49)	FX – Fail	(45-49)	More work required but credit awarded
	F – Fail	(0-44)	Considerable amount of work required

Note: Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
