n method		or topic			week
ALL DESCRIPTION OF THE PARTY OF	Interactive lecture,	An overview of the	Concept of plant disease :A1	1	1

.exam 1 final exam	brainstorming, dialogue -and discussion, self learning	plant concept of disease, its definition knowledge of and , the disease and the plant host	Plant disease pathogen The -1 The breadwinner -2 Environmental factors -3	theore tical	
Short practical test1	Interactive lecture, brainstorming, dialogue and discussion, field learning training, self	Plant pathology laboratory	Identify laboratory equipment :C6 The student learned how to use a microscope, :A41 how to examine pathogens, and prepare slides	3 practic al	
Semester exam 1, final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Factors of the pathological triangle	Recognizes the disease pyramid, the disease A2 triangle, and the factors affecting it and medical history	1 theore tical	
Live discussion	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Conducting the sterilization process inside the laboratory sterilization -	The student learns about sterilization methods :CG and how to eliminate pathogens inside the laboratory	3 practic al	2
Semester exam 1, final exam	Interactive lecture, brainstorming, dialogue -discussion, self and learning	Development and detection of plant disease	Learn a brief overview of the disease history of :A3 and the each disease spreading in agricultural fields stages of development and detection of the plant .disease	1 theore tical	3
Laboratory evaluation	Interactive lecture, brainstorming, dialogue and discussion, field learning -training, self	Food environments	Identifying food media and how to prepare :A6 them	3 practic al	,
Semester test 1, final , test report	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Pathogens of plant hosts	diseases Identify the organisms that cause plant :A4 and understand the meaning of pathogenicity	1 theore tical	
Practical short test 2 direct , drawing	Interactive lecture, dialogue ,brainstorming and discussion, field training, practical -exercises, and self learning	Identify several symptoms of pathogenic causes, diagnose them within the disease, and differentiate between pathogenic causes	The student learns about different plant :A10 diseases and how to diagnose them	3 practic al	4
Semester test 1, final , test report	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Disease symptoms and signs	It explains the difference between pathological :A1 and studies the symptoms and pathological signs anatomical symptoms and apparent and pathological signs	1 theore tical	5
evaluation	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Isolation of causing organisms plant diseases	Laboratory isolation of pathogens from :A10 plant parts different	3 practic al	_

	1	1			
Short test, final test	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Basics of integrated management	attack plants Shows how pathogens :B1 mechanically and chemically and discusses the .concept of the basics of integrated management	1 theore tical	
Field assessmen and t homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -self exercises, and learning	Scientific visit	scientific visit to the fields Conduct a :D9 Horticulture stations, identifying the most important plant diseases and diagnosing them in the field	3 practic al	6
Semester exam 2, final exam	Interactive lecture, dialogue ,brainstorming -and discussion, self learning	Synthetic and chemical defences	the importance and how plants Understands :82 defend themselves through synthetic defenses and biological chemical defenses	1 theore tical	
writing a report	Interactive lecture, brainstorming, dialogue and discussion, field training, practical exercises, field project, learning-self	A scientific visit to the plastic one of houses	and inside Conduct a scientific visit to the fields :D9 and identify the most important the greenhouses plant diseases and diagnose them in the field	3 practic al	7
Semester exam 2, final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	world of insects	factors that Learn about insect science and the :A3 helped insects survive and spread	1 theore tical	
Discussion and homework	Interactive lecture, brainstorming, dialogue and discussion, field training, practical -exercises, and self learning	Insect body wall	Learn the basics about insects and their body -A1 walls	3 practic al	8
Semester exam 2, final exam	Interactive lecture, brainstorming, dialogue -and discussion, self learning	harms of Benefits and insects	the harms and benefits of insects Learn about :A4 and their economic importance	1 theore tical	
1	Interactive lecture, brainstorming, dialogue field ,and discussion training, practical -exercises, and self learning	Identify the insect's body	recognizes insect body regionsA2	3 practic al	9
Semester test2	Interactive lecture, brainstorming, dialogue -and discussion, self learning	Learn about modern methods of resistance	Master the methods of pest controlB1:	1 theore tical	
and	Interactive lecture, brainstorming, dialogue and discussion, field training, practical exercises, and self learning	Study concepts	is familiar with the concept of evolution and B1 impossibility	3 practic al	10
	Interactive lecture, brainstorming, dialogue	Learn about modern methods of	He is proficient in pest control Proficient :B2 methods	1 theore	11
