

Course Description Form

| | |
|---|--|
| 1. Course Name: | Plant Anatomy |
| 2. Course Code: | PLAN215 |
| 3. Semester / Year: | 2024-2025 |
| 4. Description Preparation Date: | 2025 /2/1 |
| 5. Available Attendance Forms: | in person |
| 6. Number of Credit | |
| Hours 2 theoretical + 3 practical (5) / Number of Units (3.5) | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Lecturer Doctor Ahmed Abd-AlRaheem Mohammed | Assist Lecturer Sahar Ali Khalow |
| Email: Ahmed79@uomosul.edu.iq | Sahar_khalw@uomosul.edu.iq |
| 8. Course Objectives | |
| <p>Enabling the student to understand and comprehend what is related to plant physiology and its relationship to other sciences</p> <p>Enabling the student to know the most important scientific methods in learning about plant physiology</p> <p>Enabling the student to become familiar with the concept of plant physiology</p> <p>Enabling the student to be able to investigate plant cells and all phenomena related to plant physiology</p> <ul style="list-style-type: none"> • The student can explain all aspects of plant life through plant physiology | |
| 9. Teaching and Learning Strategies | |
| <ul style="list-style-type: none"> - Interactive lecture - Brainstorming - Dialogue and discussion - Field Training | |

- Practical exercises
- Field project
- Self-education

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|---------------|--|---|---|-----------------------------|
| 1 | 2 Theoretical | Introduction to Plant Tissue Anatomy | A1: Identify the parts of plant and animal cells B2: Enumerates the cell types A2: Describes the components of plant and animal cells A4: Compares plant and animal cells A2: Describes prokaryotic and eukaryotic cells A4: Compares prokaryotic and eukaryotic cells A1: Describes the primary wall of the cell A4: Compares simple and braided pits | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Microscope and compound microscope | A2: The student learns about microscopes, their types, and the structure of the microscope A2: The student learns how to prepare slices for the purpose of examination, such as onion slices | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 2 | 2 Theoretical | The living contents of the cell | A1: Identify living components in cells A2: Describes the most plausible structure of the plasma membrane A2: Describes the endoplasmic reticulum, Golgi apparatus, and their functions, and determine the function of each component of the cell. | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Plant Cells | B3: Make sections of the plant cell B1: Viewing ready-made plastids from the cell wall | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 3 | 2 Theoretical | Supplement the living contents of the cell | A1: Recognizes the nucleus and its components, in addition to its functions, and distinguishes between DNA and RNA A1: Identify plastids and their components A2: Defines the function of each type of plastid | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |

| | | | | | |
|---|---------------|--|--|---|-----------------------------|
| | | | <p>A1: Learn about mitochondria, their structure and function</p> <p>A2: Determines the function of mitochondria</p> <p>A1: Recognizes spherical bodies, microbodies, and microtubules</p> <p>A2: Determines the function of the remaining components of the cells</p> | | |
| | 3 Practical | Cellular division | <p>A2: The student learns about the importance of cell division</p> <p>B2: The student explains the stages of division</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 4 | 2 Theoretical | Non-living contents in the plant cell | <p>A1: Identify the vacuole, and its membrane structure, and determine its function</p> <p>A1: Identify the types of starch granules and their composition</p> <p>A1: Learn about proteins and oils and their functions</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Plant tissue- Tissue Meristematic | <p>A2: The student learns about plant tissues and preparing slides</p> <p>About types of plant tissues</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 5 | 2 Theoretical | Plant tissues (meristematic or generative tissues) | <p>A1: The student learns about the types of tissues that are involved in plant structure</p> <p>A1: Knows about meristematic tissues</p> <p>A1: The student learns about the types of primary and secondary meristematic tissues</p> <p>A4: Compares primary and secondary meristematic tissues</p> <p>A1: The student learns about the locations of meristematic tissues and the nature of the resulting growth</p> <p>A3: Displays the divisions of meristematic tissues and the nature of their growth</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Permanent tissues | <p>A1: The student is introduced to the types of permanent tissues</p> <p>C3: Watch ready-made slides about the types of plant tissues</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 6 | 2 Theoretical | Plant tissues (permanent tissues) | <p>A1: The student knows permanent tissues</p> <p>A2: Defines the types of simple and complex permanent tissues and gives examples of them</p> <p>A2: Defines simple permanent tissues and gives examples</p> <p>A1: The student learns about the characteristics, functions,</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |

| | | | | | |
|---|---------------|--|--|---|-----------------------------|
| | | | and types of parenchymal, collinear, and sclerenchyma tissues. A4: Compares the characteristics of parenchymal, collinear, and sclerenchyma tissue types | | |
| | 3 Practical | Plant tissues - connective tissues | A2: The student learns about skinning the skin of various types of plants to observe the epidermal cells, stomata, and guard cells. | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 7 | 2 Theoretical | Epidermis texture | A1: The student knows the texture, structure, and functions of the epidermis A3: Shows the types of cells that make up skin tissue A3: The student describes the stomata and lenticels A3: The student explains the structure and parts of the stomatal system B2: The student enumerates the components of the stomatal system C2: Explains the mechanics of opening and closing stomata | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Discussing reports and following up on drawings | Discussing student reports | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 8 | 2 Theoretical | Non-secretory epidermis appendages and periderm tissue | A1: Identify the highest types of skin tags A1: Identify the tissue of the periderm and cork cambium and the factors affecting its activity A2: Determines the factors affecting the activity of cork cambium A2: The student determines the function of cork cells and the locations of their formation | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Plant tissues – transporter tissues | A2: The student learns about ready-made slices of xylem and phloem | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 9 | 2 Theoretical | Structures of transporter tissue | A1: The student learns about the types of transporting tissues in plants A1: Identify the structure of xylem B2: List the components of xylem A1: Identify the types of wood in plants and the reasons for the formation of each type A4: Compares the components of xylem between endosperms and gymnosperms | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |

| | | | | | |
|----|---------------|---|--|---|-----------------------------|
| | | | <p>A1: The student knows the texture of the bark</p> <p>B2: List the components of phloem tissue</p> <p>A1: Identify the types of bark in plants and the reasons for the formation of each type</p> <p>A4: Compares the components of phloem texture between encapsulated and gymnosperms</p> | | |
| | 3 Practical | Vascular bundles | A2: The student learns about the structure of xylem, phloem, cork tissue, and cork cambium, with a ready-made slide note about the lenticels. | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 10 | 2 Theoretical | Anatomical structure of the root | <p>A1: Identify the anatomical structure of each root area</p> <p>B2: Enumerate the different root zones</p> <p>A1: Identify the root tip and its growth zones</p> <p>A1: Identify the layers that make up the anatomical section of the root</p> <p>A1: Identify the anatomical structure of the roots of monocotyledons and dicotyledons</p> <p>A1: Identify the development of lateral and adventitious roots in plants</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Plant tissues - secretory tissues | A2: The student learns about the types of secretory tissues | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 11 | 2 Theoretical | The internal structure of the Stem | <p>A1: Identify the anatomical structure of modern stems and their regions</p> <p>A2: Describes the tissues covering the stem</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Root anatomy | A2: The student learns about preparing slides of root zones, in addition to cross-sections of dicot and monocot roots. | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 12 | 2 Theoretical | Completing the internal structure of the stem | <p>A1: Identify the stem layers of dicotyledons</p> <p>A1: Recognizes stem layers in monocotyledons</p> <p>B4: Compares the stem tissues of monocotyledons and dicotyledons</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Stem anatomy | A2: The student learns how to prepare slides about the stem areas | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 13 | 2 Theoretical | Anatomy of a leaf | <p>A1: Identify the types of tissues in the dicotyledonous leaf</p> <p>A1: Learn about the anatomical structure of the</p> | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |

| | | | | | |
|----|---------------|--|---|---|-----------------------------|
| | | | leaf blade of a dicotyledon leaf A2: Determines the types of leaf blade tissue in monocots and dicotyledons | | |
| | 3 Practical | Anatomy of a leaf | A2: The student learns about making superficial sections of the epidermis of a plant leaf and observing ready-made slides of cross-sections of the leaves. | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 14 | 2 Theoretical | leaf anatomy | A1: Identify the types of tissues in monocot leaves A1: Identify the anatomical structure of the leaf blade A2: Identifies the types of leaf blade tissue in monocots | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Discussing report and following up on drawings | Discussing student reports | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| 15 | 2 Theoretical | Anatomy of a flower | A1: Learn about the anatomical components of flower tissue A2: Identify the anatomical components of flower tissue | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |
| | 3 Practical | Prepare slices | B3: Prepare a set of slides requested by the subject teacher to acquire practical skills | Interactive lecture, brainstorming, dialogue and discussion, self-learning, | semester test 1, final test |

11. Course Evaluation

| seq | Evaluation methods | Evaluation date (week) | Grade | Relative weight % |
|-----|----------------------------|----------------------------------|-------|-------------------|
| 1 | Report 1 | fourth week | 2.5 | 2.5 |
| 2 | Report 2 | fifth week | 2.5 | 2.5 |
| 3 | Short test (1) | sixth week | 2 | 2 |
| 4 | Quiz Short test (2) | fourteenth week | 2 | 2 |
| 5 | Quiz Short test (3) | fifteenth week | 1 | 1 |
| 6 | Semester test (1) | sixth week | 7.5 | 7.5 |
| 7 | Semester test (2) | eleventh week | 7.5 | 7.5 |
| 8 | Final theoretical test | Final semester exams | 40 | 40 |
| 9 | Practical field project | fifteenth week | 5 | 5 |
| 10 | Field evaluation | third and fourth week | 2 | 2 |
| 11 | Short test (1) | first week | 1 | 1 |
| 12 | Quiz Short test (2) | fourth week | 0.5 | 0.5 |
| 13 | Quiz Short test (3) | fourteenth week | 2.5 | 2.5 |
| 14 | Live drawings and homework | Weeks 6, 8, 9, 10, 11, 12 and 13 | 2.5 | 2.5 |
| 15 | Final practical test | Final semester exams | 2 | 2 |
| | Total | | 100% | 100% |

12. Learning and Teaching Resources

| | |
