Module Objectives	Teaching ethics and ethical concepts to the agricultural engineer. Teaching the ethical rules of professional ethics and clarifying the ethics of agricultural engineering.
Module Learning Outcomes LOs	The student should be able to: LO#1: Know general concepts of morality and moral philosophies. LO#2: Learn the concept of occupational ethics and ethical rules in the agricultural engineering profession. LO#3: Respect the laws and regulations related to agricultural engineering projects. LO#4: Bear ethical responsibilities in the fields of the agricultural engineering profession.
Indicative Contents	Indicative content includes the following. Theoretical Ethical and professional ethics, which are moral philosophies, ethica rules in agricultural engineering. It includes distributing titles on agricultural professional ethics to students to give seminars on them. Total hrs = 63 = SSWL - (Exam hrs) = 63-3 = 60 hrs (Time table hrs x 15 weeks)

	Learning and Teaching Strategies
Strategies	Interactive lecture, Brainstorming Dialogue and discussion Assigning reports Quizzes Presentation of examples of professional, ethical cases in the field of scientific specialization by students and received in discussion seminars.

	Final Exam	2hr	50% (50)	16	All
Total assessment		,	100% (100 Marks)		

	Delivery Plan (Weekly Syllabus)
	Material Covered
Week 1	Introduction to professional ethics and its importance in agricultural engineering
Week 2	Basic ethical theories in the profession Integrity and scientific honesty in agricultural research
Week 3	The agricultural engineer's commitment to environmental responsibility
Week 4	Professional interaction with society and the public
Week 5	Positively dealing with conflicts of interest
Week 6	Ethics of agricultural experiments and research
Week 7	Mid-term Exam
Week 8	Ethics of agricultural experiments and research
Week 9	Confidentiality and data protection
Week 10	Compliance with laws and instructions in agricultural engineering
Week 11	Cooperation and teamwork in agricultural projects
Week 12	Combating professional corruption in agricultural engineering
Week 13	Continuous learning and self-development in an ethical context
Week 14	Assessing commitment to professional ethics: strategies and tools
Week 15	Ethics of innovation in agricultural engineering
Week 16	Preparatory week before the final Exam

	Delivery Plan (Weekly Seminar, Syllabus)				
	Material Covered				
Week 1	Pesticide use and its impact on the health of farmers and consumers				

Week 2	Crop price manipulation: the ethics of trade in agriculture
Week 3	Agricultural labour exploitation: workers' rights and working conditions
Week 4	The impact of industrial agriculture on biodiversity: is there ethics?
Week 5	Unsustainable agricultural practices: responsibility to future generations
Week 6	Marketing genetically modified products: transparency and ethics
Week 7	Water management in agriculture: the right to water and fair distribution
Week 8	Climate change and agriculture: ethical challenges for farmers
Week 9	Agriculture in protected areas: a balance between protection and production
Week 10	Agricultural research ethics: the limits of experiments on living organisms
Week 11	Unfair distribution of support allocated to farmers and its impact on small projects
Week 12	The impact of agriculture on local communities: benefits versus risks and ethical challenges
Week 13	Ethics in Cash Crop (traded as international trade) Farming and its impact on Food Security
Week 14	Modern technologies in agriculture: are we prepared to bear their ethical consequences
Week 15	Organic agriculture: ethical challenges in promotion and practice

Mod	ule Aims, Learning Outcomes and Indicative Contents
Module Objectives	1- To going on studying the English language in special the scientific language. 2- Widening student mind about scientific and literature English vocabularies. 3- Helping the students to think and write in English the scientific reports.
Module Learning Outcomes LOs	The student should be able to: LO#1: Gets to know simple sentences, Present Simple, Past simple and Future. LO #2: Gets to know formation of negative sentences and questions in the present and past tense. LO#3: Expresses in writing the active and passive forms in writing scientific reports. LO#4: He chooses appropriate punctuation marks when writing scientific texts in his specialty.
Indicative Contents	Indicative content includes the following. Theoretical Enriching the student with knowledge related to the parts and types of speech, parsing marks and their tools, knowledge of punctuation tools, and choosing the appropriate style and verbs for preparing scientific reports in the specialty in a correct scientific manner. Total hrs = 32 = SSWL - (Exam hrs) = 32-2= 30 (Time table hrs x 15 weeks)

	Learning and Teaching Strategies
	Interactive lecture, Brainstorming
	Dialogue and discussion
	Assigning reports
Strategies	4. Quizzes
	5. Show examples for writing scientific reports in the correct formats.

أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية	
أهداف المادة	 تعريف الطلاب بأساسيات الحاسوب، بما في ذلك مكونات الحاسوب، أنظمة التشغيل، والبرمجيات الأساسية.

الدراسية	 تعليم الطلاب كيفية جمع وتحليل البيانات باستخدام برامج مثل Excel أو برامج التحليل الإحصائي، وانشاء المستندات باستخدام معالج النصوص وانشاء العروض التقديمية.
	 تعزيز مهارات البحث على الإنترنت وكيفية استخدام الموارد الإلكترونية في البحث العلمي.
	 4. استخدام أدوات الحاسوب لتعزيز مهارات التواصل والتعاون بين الطلاب، مثل استخدام البريد الإلكتروني ومنصات التعلم عبر الإنترنت.
	LO#1: تحديد وشرح مكونات الكمبيوتر ووظائفها الأساسية.
مخرجات	LO#2: تحليل البيانات الزراعية باستخدام برنامج Excel وتقديم النتائج من خلال مستندات وعروض تقديمية منظمة جيدًا.
التعلم للمادة الدراسية	LO#3: تقييم مصداقية المصادر عبر الإنترنت عند إجراء البحوث العلمية.
	4#LO#4: يجب أن يكون الطلاب قادرين على استخدام أدوات الكمبيوتر لتعزيز التواصل مع الأقران، مثل البريد الإلكتروني ومنصات التعلم عبر الإنترنت.

	استراتيجيات التعلم والتعليم	
	التعلم العملي: أن تكون المحاضرات تطبيقية منتظمة حبث يمكن الطلاب تطبيق المعرفة النظرية بشكل مباشر. ستعزز التمارين العملية مثل إنشاء المستندات، تحليل البيانات باستخدامExcel ، واستكشاف مشكلات الحاسوب الشائعة وحلها من استيعاب المهارات وفهمها.	•
Strategies	التعلم القائم على المشاريع: تعيين مشاريع جماعية، يتعين على الطلاب فيها تطبيق الأدوات التي تم تعلمها مثل (Excel و PowerPoint) لحل المشكلات الزراعية الواقعية. على سبيل المثال، يمكنهم تحليل البيانات الزراعية وعرض نتائجهم. يشجع هذا التعاون والتفكير النقدي وحل المشكلات.	•
	التعلم المدمج: دمج التعليم الحضوري مع الموارد والمنصات الإلكترونية. واستخدم أدوات التعليم الإلكتروني، مثل مقاطع الفيديو التعليمية والإختبارات القصيرة والمنتديات النقاشية، لتقديم دعم إضافي خارج الفصل. يمكن للطلاب التعلم بالوتيرة التي تناسبهم مع تعزيز ما تعلموه في الصف.	•
	المناقشة والتعلم من الأقران: أدراج منافشات جماعية وأنشطة مراجعة الأقران. على سبيل المثال، بعد المحاضرة العملية، نشجع الطلاب على تقديم حلولهم أو مشاريعهم أمام الصف وتقديم ملاحظات ليعضهم البعض. يعزز ذلك المشاركة والتفكير الثقدي ومهارات التواصل.	•

	المنهاج الاسبوعي للمختبر				
	Material Covered				
Week 1	مقدمة في الحاسوب: مفاهيم الأجهزة والبرامج ومكوناتها؛ مفهوم الحوسية والبيانات والمعلومات؛ تطبيقات تكتولوجيا المعلومات والاتصالات؛ توصيل أجهزة الإدخال والإخراج والأجهزة الطرفية بوحدة المعالجة المركزية.				
Week 2	مكونات الحاسوب: أجزاء الحاسوب، أجزاء الأجهزة، أتواع الذاكرة، مكونات وحدة المعالجة المركزية الأساسية، منافذ الحاسوب، الحاسوب الشخص، الحاسوب الشخص، (المعزات والأنواع).				
Week 3	نظام التشغيل وواجهة المستخدم الرسومية: نظام التشغيل، أساسيات أنظمة التشغيل الشائعة، واجهة المستخدم، استخدام تقنيات الماوس؛ استخدام الرموز الشائعة، شريط الحالة، استخدام القائمة واختيار القائمة، مفهوم المجلدات والدلائل، فتح وإغلاق النوافذ المختلفة؛ إنشاء اختصارات:				
Week 4	معالجة النصوص: أساسيات معالجة النصوص؛ فتح وإغلاق المستندات؛ إنشاء النصوص ومعالجتها؛ تنسيق النص؛ التعامل مع الجداول: التدفيق الإملائي، إعداد اللغة والمرادفات.				
Week 5	تحرير المستندات: تحرير فكرة مشروع زراعي باستخدام برنامج Word واستخدام كافة أوامر البرنامج وتعليماته مع التطبيق العملي.				
Week 6	البدء في استخدام برنامج :Excel تنسيق ورقة العمل، العمل بالصيغ والوظائف، العمل بالمخططات.				
Week 7	Midterm Exam				
Week 8	جدول البيانات: أساسيات جدول البيانات؛ التعامل مع الخلايا والصيغ والوظائف؛ تحرير جدول البيانات، طباعة جدول البيانات.				
Week 9	برنامج إكسل في التحليل الإحصائي: جمع البيانات الزراعية، تنظيم البيانات في إكسل، الدوال الاساسية في التحليل الإحصائي، إنشاء الرسوم البيانية، كيفية قراءة النتائج الإحصائية، تقديم النتائج بطريقة مفهومة				
Week 10	مثال عملي على تحليل بيانات زراعية باستخدام إكسل.				
Week 11	برامج العروض التقديمية: أسا <mark>سيات ب</mark> رامج العروض التقديمية؛ إنشاء العروض التقديمية؛ إعداد الشرائح وتقد <mark>يمها؛</mark> عرض الشرائح؛ أخذ نسخ مطبوعة من العروض التقديمية/المطبوعات.				
Week 12	إنشاء عرض تقديمي فكرة مشروع زراعي باستخدام برنامج PowerPoint مع جميع أوامر البرنامج وتعليماته وتطبيقه عمليًا.				
Week 13	مقدمة إلى الإنترنت ومتصفحات الويب: أساسيات شبكات الكمبيوتر، شبكةLAN ، شبكةWAN ، مفهوم الإنترنت وتطبيقاته، الاتصال بالإنترنت، شبكة الويب العالمية، برامج تصفح الويب، محركات البحث، فهم عناوينURL ، اسم المجال، عنوان. IP				
Week 14	الاتصالات والبريد الإلكتروني: أساسيات البريد الإلكتروني، الحصول على حساب بريد الكتروني، إرسال واستقبال رسائل البريد الإلكتروني، الوصول إلى رسائل البريد الإلكتروني المرسلة، استخدام رسائل البريد الإلكتروني، التعاون في المستندات.				
Week 15	استكشاف أخطاء الكمبيوتر واصلاحها: تحديد وحل مشكلات الأجهزة والبرامج الشائعة التي يواجهها مستخدمو الكمبيوتر، تقنيات استكشاف الأخطاء واصلاحها الأساسية والأدوات اللازمة لتشخيص المشكلات وحلها.

Module Aims, Learning Outcomes and Indicative Contents						
Module Objectives	 To develop the Agricultural student's ability to imagine projections and their models. Exercising hand movement in engineering drawing to complete quick sketches. This course deals with the theory of Orthographic Projection and the basic subject of isometric drawing. To teach students engineering drawings using the AutoCAD program, which includes both theoretical lectures and labs. 					
Module Learning Outcomes	LO#1: Absorbing all the engineering characteristics of an object or a product in a clear manner. LO#2: Know the tools used in engineering drawing and how to use them correctly, LO#3: Understand and apply the basics of engineering processes. LO#4: Conclude projections and isometrics for each geometric figure and recognize its dimensions.					

Indicative content includes the following.

Part A: Engineering Drawing Basics and Tools

- Introduction and Definition of Engineering Drawing
 Engineering Drawing Tools and Their Uses Explanation of Sheet Dimensions, Information Table, and Letter Writing. • Types of Lines and Basic Geometric Operations: Introduction to different types of lines (continuous, dashed, center lines) and their specific uses in drawings. Performing basic geometric operations such as measuring, dividing, and marking. . Arcs and Tangents: Defining and drawing arcs and tangents in engineering drawings, including field applications. [20 hrs.]
- Classwork: Practical Applications of Previous Topics Hands-on practice applying learned techniques (lines, arcs, sheet setup) [4 hrs.]

Part B: Engineering Projections and Operations:

- Engineering Projections: Understanding projection techniques, especially orthographic projections. Learning how to project an object's views from different angles. • Mid-term Exam: Assessment covering the topics learned in Part A and initial projection skills. • Deducing the Third Projection Based on Two Projections: Skill development in visualizing and drawing the third projection when given two views of an object, [12 hrs.]
- Classwork: Practical Applications of Deducing the Third Projection: Applying concepts learned in projection drawing. [4 hrs.]

Part C: Advanced Drawing Techniques and CAD Software

- Drawing Engineering Perspective (Isometric): Introduction to isometric drawing techniques. Drawing objects in isometric view for accurate 3D representation. • Review of Isometric Engineering Perspective: Revisiting the principles of isometric drawing and its application in technical drawings. Understanding the connection between isometric drawings and orthographic projections. [8 hrs.]
- Introduction to Computer-Aided Drawing (CAD): Overview of computer-aided drawing. emphasizing its importance in modern engineering. Introduction to software tools like AutoCAD and SolidWorks, including their hardware components and versions. • AutoCAD Interface and Main Commands: Learning the basic interface of AutoCAD, including the drawing and modification toolbar. Explanation of key commands and their uses. • Drawing Simple Geometric Shapes Using AutoCAD: Hands-on practice with AutoCAD to draw basic geometric shapes. [12 hrs] Total hrs = 63 = SSWL - (Exam hrs) = 63 - 3 = 60 hr (Time table hrs x 15 weeks)

Learning and Teaching Strategies

1. Lecture-based Teaching:

Explaining concepts and demonstrating tools, techniques, and software in real time allows students to observe the process before applying it.

2. Hands-on Practice: Strategies

Indicative

Contents

- Lab Sessions: Providing practical sessions where students use drawing tools and software like AutoCAD or SolidWorks to develop their skills.
- Guided Exercises: Offering step-by-step instructions to complete tasks such as drawing

isometric views or projections.

3. Interactive Class Discussions:

Question and Answer Sessions: Actively engage students in discussions where they can ask
questions and clarify doubts about topics like projection techniques or CAD tools.

4. Assessment and Evaluation:

 Project-based Assessments: Assigning projects requiring students to apply the concepts they've learned, like creating detailed engineering drawings using manual and softwarebased techniques.

	Delivery Plan (Weekly, Syllabus)				
	Material Covered				
Week 1	Introduction and definition of engineering drawing				
Week 2	Engineering drawing tools and their uses, knowing types of pens used, Drawing board layout				
Week 3	Explanation of sheet dimensions, information table, and letter writing				
Week 4	Types of lines, their applications, and basic geometric operations				
Week 5	Arcs and tangents				
Week 6	Classwork: Practical applications of previous topics				
Week 7	Engineering projections				
Week 8	Mid-term Exam				
Week 9	Deducing the third projection based on the other two				
Week 10	Classwork: Practical applications of deducing the third projection				
Week 11	Drawing engineering perspective (isometric)				
Week 12	Review of isometric engineering perspective and its relation to deducing the third projection				
Week 13	Introduction to the importance of computer-aided drawing and the types of software used for engineering drawing, such as AutoCAD and SolidWorks, including their components and versions.				
Week 14	Introduction to the AutoCAD interface and main commands: (Drawing toolbar and its uses, modification toolbar and its uses).				
Week 15	Drawing simple geometric shapes using AutoCAD.				
Week 16	Preparatory week before the Final Exam				

	Material Covered					
Week 1	Familiarization with different drawing tools, including pens, and setting up the drawing board layout.					
Week 2	Practice drawing sheets according to standard dimensions, setting up an information table and writing technical letters.					
Week 3	Identify different line types and execute basic geometric operations (e.g., drawing straig lines, circles).					
Week 4	Practice drawing arcs and tangents using drawing tools.					
Week 5	Consolidate skills by applying learned techniques (lines, arcs, tangents) in a project of assignment.					
Week 6	Start drawing orthographic projections of simple objects, projecting different views.					
Week 7	Assessment based on skills acquired in previous weeks, focusing on projections, lines, ar geometric operations.					
Week 8	Visualize and draw the third projection based on two given views.					
Week 9	Work on exercises that reinforce the ability to deduce the third projection, applying this different objects.					
Week 10	Learn to draw isometric projections, emphasizing proper axis alignment and scaling.					
Week 11	Review and reinforce isometric drawing techniques and their connection to orthographi projections.					
Week 12	Introduction to AutoCAD and SolidWorks; learning the basic interface, including drawing and modification toolbars.					
Week 13	Practice using the AutoCAD interface, focusing on drawing commands (e.g., lines, circles) a modification commands (e.g., trim, extend).					
Week 14	Create simple geometric drawings using AutoCAD, including 2D shapes like squares rectangles, and circles.					
Week 15	Work on exercises that reinforce the ability to Create simple geometric drawings usin AutoCAD.

	To enable students to acquire proficiency in performing differential calculus
Module Objectives	 operations. In the field of calculus, the fundamental methodologies used to examine and describe functions are limits, derivatives, and integrals. Students will use these tools to address application problems across a wide range of disciplines, including physics, biology, business, and economics.
Module Learning Outcomes	LO#1: The student uses understanding and of the basic concepts of engineering mathematics. LO#2: The student can develop his mental abilities when solving exercises. LO#3: The student can make connections with information mental abilities when solving exercises to reach a solution and benefit from it in other transactions.
Indicative Contents	Indicative content includes the following. Theory and Tutorial: The focus will be on logarithms - the natural logarithm [SSWL=4 hrs], and applications and solutions will be taken for problems in the exponential function - the trigonometric function - trigonometric facts - complex angles [SSWL=4 hrs], and then the focus will be on differential calculus - derivative laws - derivatives from higher orders such as the equation of the straight line (tangent and perpendicular) and the derivative of trigonometric functions and the derivative of exponential functions derivatives of logarithmic functions with applications on the derivative (velocity and acceleration) and applications on the derivative (points of inflection) and in hours [SSWL=24 hrs], then moving on to integration calculations - integration laws definite integration and focusing on integration methods - integration by algebraic substitution - integration by parts and integration methods - integration by partial fractions and in hours [SSWL=12 hrs], then the focus will be on important applied aspects such as finding the area under the curve - the approximate method - by integration calculations and finding the area between two curves With applications of volume of a rotating body and numerical integration Trapezoidal rule and number of hours [SSWL=16 hrs]. [SSWL=16 hrs] Trapezoidal rule Total hrs = 63 = SSWL - (Exam hrs) = 63 - 3 = 60 hr (Time table hrs x 15 weeks)

Mo	odule Aims, Learning Outcomes and Indicative Contents
Module Objectives	Developing farm management among rural individuals Developing a sense of responsibility towards the family and the rural community Promoting positive attitudes of rural people towards agriculture, love of work, and use of modern technologies Hoproving the marketing aspects of rural producers using modern technologies.
Module Learning Outcomes LOs	The student should be able to: LO#1: Know the general concepts of transferring agricultural engineering technologies. LO#2: Determines appropriate means to mobilize farmers in their love of work, development, and selection of agricultural engineering technologies. LO#3: Suggest appropriate technologies for agricultural engineering projects. LO#4: Bear ethical responsibilities in the areas of transferring agricultural engineering technologies.
Indicative Contents	Indicative content includes the following. Theoretical Developing the correct management skills to transfer and adopt agricultural technologies in the precise specialty and identifying appropriate means to guide the rural community to adopt modern and specialized technologies in the field of agricultural engineering, as well as identifying the types of technologies and how to employ them to develop work in the field of agricultural engineering sciences and methods of transferring them to society to reach high production and quality. Practical application The most important modern technologies in the field of agricultural engineering will be addressed, the most important reasons for their lack of spread will be discussed, and solutions will be put forward for adopting these technologies.

	Delivery Plan (Weekly Syllabus)	
	Material Covered	
Week 1	Introduction to agricultural extension and technology transfer	
Week 2	Elements of technology transfer and adoption process	
Week 3	Factors that determine adoption rates and adopter categories	
Week 4	Opinion leaders and agents of change	
Week 5	Analyze farmers' needs	
Week 6	Guidance methods (training and education methods)	
Week 7	Mid-term Exam	
Week 8	Transfer of agricultural technologies: concept and methods	
Week 9	Challenges facing the transfer of agricultural technologies	
Week 10	Using communication and media in agricultural extension	
Week 11	Innovating and adapting to modern agricultural techniques	
Week 12	Evaluation and follow-up of extension and technology transfer programs	
Week 13	Cooperation between agricultural extension workers and the local community	
Week 14	Applications of smart technologies in agricultural extension	
Week 15	Tools for measuring effectiveness in technology transfer and extension	
Week 16	Preparatory week before the final Exam	

Delivery Plan (Weekly Practical Syllabus)

Reviewing modern technology and discussing the most important means of transferring and adopting it by farmers, as well as the obstacles and treatments that ensure adoption:

	Material Covered
Week 1	Vertical Farming: A technique that uses vertical spaces to grow crops, increasing productivity and reducing land use.
Week 2	Smart Irrigation: Advanced irrigation systems that rely on sensors to monitor soil moisture and distribute water efficiently.
Week 3	Precision Agriculture: The use of technology to analyze agricultural data and improve crop management.
Week 4	Greenhouses: Creating protected environments to enhance crop growth and shield them from harsh weather conditions.
Week 5	Hydroponics: Growing plants in a water solution instead of soil, which reduces water use.
Week 6	Genetic Engineering: The use of genetic engineering to develop disease-resistant and drought-tolerant crops.
Week 7	Mobile Applications: Tools that help farmers manage their farms, such as tracking crops and weather.
Week 8	Agricultural Robots: The use of robots to perform tasks such as planting and harvesting.
Week 9	Remote Sensing Technology: Used to monitor crop health and track changes in the agricultural environment.
Week 10	Biological Control: The use of living organisms to control pests and diseases instead of chemical pesticides.
Week 11	Artificial Intelligence (AI): The application of AI technologies to analyze agricultural data and improve production.
Week 12	Nanotechnology: The use of nanomaterials to improve soil quality and enhance fertilizer effectiveness.

Week 13	Geographic Information Systems (GIS): Used to analyze geographic data and improve agricultural land planning.
Week 14	Organic Farming: Agricultural techniques that rely on the use of natural materials instead of chemicals.
Week 15	Drones: Used for monitoring crops, collecting data, and spraying pesticides.

Co-requisites module	None	Semester

Module Objectives	1- Knows statistics and its types, and differentiates between descriptive statistics and inferential or inferential statistics 2- Explains what descriptive variables are, and recognizes the difference between a sample and a population 3- Organizes and draws a frequency distribution table and identifies its parts 4- Organizes a relative frequency distribution table and ascending and descending summation 5-Finds the arithmetic mean – and recognizes the properties of the arithmetic mean 6- Works on how to find the range, mean deviation, variance, and standard deviation
Module Learning Outcomes	LO#1: Is able to compile and classify data, and present it with tables and graphics LO#2: Is able to calculate descriptive statistics of numerical data. LO#3: Can build hypothesis and test the hypothesis, and can make a statistical deduction. LO#4: Can build relation between the data using statistics and make interpretations on them in order to make decisions.
Indicative Contents	Enriching the student with knowledge regarding the conduct and benefit of the agricultural statistical process, and learning how to measure the measurement of centering, mediation and correlation and how to employ them in the field of agricultural engineering sciences and techniques for implementing integration correctly to reach quantity and quality Total hrs = 125 = SSWL - (Exam hrs) = 125-3= 122 (Time table hrs x 15 weeks)

	Material Covered				
Week 1	Introduction to the nature of statistics and the most important sections of statistics - the nature of data and statistical symbols				
Week 2	The nature of statistical data - the difference between quantitative and descriptive variables, with examples of each type				
Week 3	The difference between society and sample with mathematical examples				
Week 4	Tabular and Graphing - Frequency Distribution Table - How to Create Classes and Find Class Length				
Week 5	Clustered Distributions - Descending Cumulative Frequency Distribution Table - Frequency Curve - Graph of Cumulative Frequency Distribution Table				
Week 6	Measures of mediation and centering - arithmetic mean - geometric mean				
Week 7	Measures of centering and centering - harmonic mean - squared mean - median - mode				
Week 8	Measures of dispersion or variation - range - mean deviation - variance and standard deviation				
Week 9	Measures of dispersion or variation - the most important properties of variation or standard deviation - standard error - standard score				
Week 10	Principles of probability theory - factorial - permutations - combinations - random experiment				

Week 11	Discrete Probability Distributions - Binomial Distribution - Properties of Binomial Distribution
Week 12	Hypothesis Testing - Statistical Hypothesis - Null Hypothesis - Alternative Hypothesis
Week 13	Types of Error - General Steps in Hypothesis Testing
Week 14	T-test - Z-test
Week 15	Simple Correlation and Regression - Correlation Coefficient
Week 16	Preparatory week before the final Exam

	Delivery Plan (Weekly Syllabus)			
	Material Covered			
Week 1	The natural of statistical data			
Week 2	The natural of statistical data			
Week 3	Statistical symbol			
Week 4	Graphical represent and display of data			
Week 5	Graphical represent and display of data			
Week 6	Measures of mediation and centering			
Week 7	Measures of mediation and centering			
Week 8	Measure of dispersion or different			
Week 9	Measure of dispersion or different			
Week 10	Midterm exam			
Week 11	Probability theory

Co-requisites module	None	Semester	

Mod	ule Aims, Learning Outcomes and Indicative Contents
	 The student gains a basic understanding of the food marketing system in the country.
	The student describes the agricultural marketing chain.
	 The student identifies various economic principles and how they relate to agricultural marketing.
Module Objectives	 The student discusses consumer demand and the impact of marketing on consumer demand.
	The student discusses specialty products and value-added products.
	The student understands the importance of agricultural cooperatives.
	The student describes the structure of agricultural marketing.
	8. The student develops a marketing plan for an agricultural product

Module Learning Outcomes	The student should be able to: LO#1: Explain the basic marketing functions of buying, selling, transportation, storage, financing, standardization, pricing, and risk bearing. LO#2: Apply economic principles to the marketing of agricultural products. LO#3: Identify alternatives in the marketing of agricultural commodities/products. LO#4: Study the structure of agricultural markets.
Indicative Contents	Part A - Circuit Theory Developing the correct management skills for agricultural marketing in the precise specialization and determining the appropriate means for marketing agricultural products in the fastest time, highest marketing efficiency and lowest costs, and working to transport agricultural commodities through good and fast transportation methods to ensure transportation in the fastest times because agricultural crops are susceptible to rapid spoilage if they are not transported and stored in storage methods. Various types, and work on packing agricultural products in glass, cardboard, plastic or wooden boxes. The most important modern means of shopping will be discussed, such as electronic marketing via the Internet. Students will also be taught how to shop practically by visiting wholesale marketing places and teaching students how a merchant or broker works in shopping. Total hrs = 32 = SSWL - (Exam hrs) = 32 - 2 = 30 hr (Time table hrs x 15 weeks)

Module Aims, Learning Outcomes and Indicative Contents

Module Objectives	Understand the concept of sustainable development and its various dimensions. Analyze the impact of environmental and social changes on achieving sustainability. Study the role of government policies and innovation in supporting sustainable development. Raise awareness of the importance of achieving social justice within the goals of sustainability.
Module Learning Outcomes	LO#1: How sustainability considerations can actually be embedded within an individual's and community's day to day activities and decision-making processes. LO#2: How existing sustainable development tools and methods can be adjusted/fine-tuned accordingly, and how to design sustainability performance metric to assess the impact on community's sustainable development. LO#3: How to design feedback systems that can readjust the pathways of processes and procedures to ensure success in implementing sustainable development initiatives. LO#4: How to empower communities set sustainability targets using appropriate metrics.
Indicative Contents	The theoretical and cognitive foundation of the concept of sustainable development will be developed and an experiential understanding of emerging global challenges for sustainable environmental and community governance systems will be gained through theoretical lectures in the fifteen weeks. By focusing on seminars related to sustainable development and simulating successful country experiences, the capacity of communities and students will be enhanced and their research role and development in establishing the necessary information links and feedback loops within the system will be raised to allow system actors to have a sound understanding of developing sustainable solutions. This will enable visualization of the different factors that affect sustainability and proposing an action plan for building sustainable communities. Total hrs = 62 = SSWL - (Exam hrs) = 62-2= 60 (Time table hrs x 15 weeks)

Veek 14	Global Challenges Facing Sustainable Development
Veek 15	The Future of Sustainable Development
Veek 16	Preparatory week before the final Exam

	Delivery Plan (Weekly Seminars Syllabus)
	Material Covered
Week 1	Analysis of environmental challenges and opportunities in sustainable development.
Week 2	Analyzing the role of technology in supporting sustainability.
Week 3	Workshop on sustainability applications in local projects.
Week 4	Netherlands: Circular farming in the dairy sector, reusing animal waste for energy and bioplastics, using bioreactor technology integrated with IoT sensors
Week 5	 Smart Pastures project in Mongolia, rotational grazing systems based on satellit monitoring, to restore 15% of degraded pastures annually

Week 6	 Intensive Rice Project in Madagascar, implementing SRI (System of Rice Intensification) to increase production by 50% while saving water in a geography: highland areas in Antananarivo 				
Week 7	 Smart Sustainable Farms in Ethiopia, integrating conservation agriculture with drought early warning systems: to increase crop resilience by 40% in Tigray regions. 				
Week 8	Brazil: Low Carbon Agriculture Model (ABC Program), reducing methane emissions by 38% through integrated livestock waste management				
Week 9	 China: Loess Plateau Rehabilitation, largest ecological restoration project (35,000 km²), using terraced terraces + water harvesting + selective afforestation. 				
Week 10	 Jordan: "Water Rationing" project, micro-drip irrigation technology with big data analysis, by reducing water consumption by 70% in vegetable cultivation. 				
Week 11	 Zambia: Conservation agriculture with FAO, zero tillage + permanent mulch + crop rotation, to increase maize production by 120% in 5 years 				
Week 12	 "Palm Oasis" project in Morocco, combating desertification through solar drip irrigation systems. 				
Week 13	 African Drylands Program (Senegal), cultivation of salt-resistant sorghum with fog harvesting, to reduce rural youth migration by 55% 				
Week 14	 "Integrated Farming" project in the Niger Delta, fish farming with rice cultivation in the same water body, to increase income by 300% while improving biological fertility 				
Week 15	Project presentations and discussions on feasibility and conclusions. •

Mod	ule Aims, Learning Outcomes and Indicative Contents
Module Objectives	Introducing students to the basics of the Arabic language. Also breaking the barrier of shyness and increasing their confidence inside and outside the classroom. Engaging them in short discussions where they can write or express themselves orally. Improving their reading, writing, listening and speaking skills as students, and strengthening students' literary ability to appreciate the styles of the language and realize its beauty. . 1

Module Learning Outcomes	The student should be able to: LO#1: Create a full awareness of the correct use of Arabic grammar in writing and speaking. LO#2: Students will improve their ability to speak Arabic in terms of fluency and comprehension. LO#3: Students will review the grammatical forms of Arabic and use these forms in specific communicative contexts, which include: classroom activities, homework, reading texts, and writing. LO#4: Students will enhance their ability to write short paragraphs and summaries using a process approach
Indicative Contents	Indicative content includes the following. Theoretical Introduction to communication in general and the Arabic language in particular, with an introduction to word categories (parts of speech) in Arabic {4 hours}. Explanation of each part of speech in Arabic such as nouns, pronouns, verbs, adjectives, adverbs, prepositions, conjunctions and conjunctions {16 hours}. Basic skills in learning Arabic: reading and writing are gradually introduced over the past weeks {6 hours}. The last part is dedicated to some error correction and feedback sessions {4 hours}. -Total hrs = 32 = SSWL - (Exam hrs) = 32 - 2 = 30 hr (Time table hrs x 15 weeks)

Prerequisite module	None	Semester	
Co-requisites module	None	Semester	

Module Objectives	This Module introduces students to the principles and applications of informatics in agriculture. Students will learn to utilize information technology, data analysis, and decision-support systems to enhance agricultural productivity while ensuring sustainable practices
Module Learning Outcomes LOs	The student should be able to: LO#1. Understand the Role of IT in Agriculture and Forestry LO#2. Identify Key Digital Technologies for Modern Farming and Forestry LO#3. Recognize Foundational Concepts in Data Security and E-Commerce Explore Future Innovations in Agricultural Informatics
Indicative Contents	The Agricultural Informatics module links information technology with agriculture emphasizing modern tools such as IoT, GIS, AI, and big data to improve productivity and sustainability. It encompasses data management, precision farming, remote sensing, and decision support systems. Students acquire hands-on experience with GIS mapping, IoT configurations, and AI models, preparing them to address challenges like resource efficiency climate adaptation, and food security through innovative, data-driven approaches. This module equips graduates to deploy advanced solutions in agriculture for a sustainable future.

	Delivery Plan (Weekly Syllabus) المنهاج الاسبوعي النظري	
	Material Covered	
Week 1	Introduction to Agricultural Informatics	
Week 2	Agricultural Data Management Systems (ADMS)	
Week 3	Internet of Things (IoT) in Agriculture	
Week 4	Machine Learning and Artificial Intelligence in Agriculture	
Week 5	Decision Support Systems (DSS) in Agriculture	
Week 6	Using Drones in Agriculture	
Week 7	Data Analysis in Agriculture	
Week 8	Mid-term Exam	
Week 9	Blockchain Technology and Food Traceability	
Week 10	Mobile Applications in Agricultural Extension	
Week 11	Forest Monitoring and Desertification Control Using Remote Sensing	
Week 12	Agricultural Machinery Management and Robotics: Self-Driving Tractors	
Week 13	E-Commerce in the Agricultural Sector	
Week 14	Data Security and Protection in Smart Agriculture	
Week 15	The Future of Agricultural Informatics: Prospects and Innovations	
Week 16	Preparatory week before the final Exam	

	Delivery Plan (Weekly Projects Syllabus)				
	Material Covered				
Week 1	Discussion on Agricultural Informatics Applications in Iraq.				
Week 2	Designing a Simple Database for a Virtual Farm				
Week 3	Using Spreadsheets for Yield Analysis				
Week 4	Automated Pest and Disease Detection Using AI Algorithms				
Week 5	Setting up a Simple Soil Monitoring Device Using Local Tools and Creating a Simple Irrigation DSS Model Using Excel				
Week 6	Aerial Drone Surveys and Spectral Image Analysis				
Week 7	Simulating GPS Use for Agricultural Mapping and Creating a Local Agricultural Map Using GIS				
Week 8	Simulating Crop Tracking from Farm to Market				
Week 9	Prototyping a Mobile Application for Agricultural Extension				
Week 10	Designing a Simple Prototype of a Manual Robot				
Week 11	Building a Small Greenhouse Using Local Materials				
Week 12	Developing an E-Commerce Marketing Plan for an Agricultural Product				
Week 13	Applications of Data Security in Smart Farming				
Week 14	The Future and Innovations in Agricultural Informatics				
Week 15	Final Project Presentations that present practical projects addressing local agricultural challenges focusing on feasible technology-based solutions.
