	Description	ر جرــــي
The vision of the Department of Forestry Sciences focuses on developing the realistic and	Description	
environmental environment from global climate changes that have cast their shadows on most		
countries of the world, especially Iraq, which suffers from a fragile phenomenon as it is located		
within the regions of Somalia and the semi-sugarcane of the phenomenon of global warming		
and climate changes are declining in an increase that the green leaf of the trees could not see		
the department in preparing technical cadres from the department's graduates who can be		
relied upon in extensive afforestation operations on correct scientific foundations in choosing		
species according to the characteristics of the site.
