Course objectives .8
• y of the antiquities of ancient Iraq during the period from the fall of the ancient city of Babylon in the year 539
- tional rule in ancient Iraq until the entry of Iraq under the banner of Islamic conquest in the BC and the end of
- adisiyah in the year 636 AD / 14 AH. The study includes the antiquities of ancient Iraq during the -Battle of Al
• nian occupation. 331 BC, the Seleucid occupation 311 BC, Achaemenid occupation in 539 BC and the Maced
Parthian occupation 126 BC, and finally the Sassanian occupation 227 AD. The beginning was the definition
- ollowed with the local of the origins of the peoples occupying Iraq and the method of administration and policy
• ppulation. After that, a number of cities were chosen as selected models during this period, such as the city of
Babylon, Seleucia, and Hatra. Discussing the most important architectural and architectural elements and the
- ortant artistic and decorative styles that emerged during this period, as well as building methods and most imp
building materials, with a study of city planning and their defensive fortifications, as well as temples, palaces,
aq through the occupier, and how to deal with them and their mixing of tombs and other styles that entered Ir
.ancient Iraqi elements

Teaching and learning strategies

Explanation through the meeting, lecture in person, with the use of some electronic teaching to clarify maps of archaeological sites and plans for buildings, both religious data show, ,methods urged students to follow recent publications of books and sources related to the He .and civil archaeological specialty, transfer previous experiences to specialists, and follow up on workshops, ancient languages, ,seminars, and conferences related to the archaeological and cultural field excavations, and museums, while giving them the opportunity to hear their own viewpoints and the . extent of their readiness to work in the archaeological field after completing their studies

1. Course Name:	1. Course Name:				
Archaeological Survey and GIS					
2. Course Code:					
3. Semester / Year:					
Semester 2/2024-2	2025				
4. Description Prepara	ition Date:				
01/02/2025					
5. Available Attendance	e Forms:				
Time and place speattendance	ecified according to the department's weekly schedule / f				
6. Number of Credit Ho	ours (Total) / Number of Units (Total)				
45 hours					
7. Course administrator's name (mention all, if more than one name)					
Name: Dr. Abeer A. Mohamad Email: abeer.allaf@uomosul.edu.iq					
8. Course Objectives					
Course Objectives	 Remote Sensing Fundamentals Understanding the basic principles of remote sensing. Identifying the foundations, techniques, and applications of remote sensing in archaeology. Studying remote sensing data sources, such as satellite images and aerial photographs, and their use in archaeological surveys. Analyzing satellite imagery to detect archaeological sites and 				

assess their conditions.

2. Fundamentals of Geographic Information Systems (GIS)

- Understanding GIS concepts and their importance in documenting and analyzing archaeological data.
- Studying GIS components, including spatial layers, coordinates, projections, and geospatial databases.

3. Practical Applications Using ArcGIS

- Familiarizing with the ArcGIS interface and its essential tools.
- Learning how to input and process archaeological data within ArcGIS.
- Developing skills in creating and drawing spatial layers related to archaeological sites.
- Creating archaeological databases that include site information, images, and topographic surveys.
- Enhancing data management skills and linking them to digital archaeological information.

4. Production of Thematic Archaeological Maps

- Learning to design and produce accurate archaeological maps using ArcGIS.
- Creating thematic maps illustrating the geographical distribution of archaeological sites and their relationship to the surrounding environment.

9. Teaching and Learning Strategies

Strategy

- Active Learning: Encourages students to participate in educational activities rather than passive reception.
- **Project-Based Learning:** Involves students in practical projects that enhance research and critical thinking skills.
- Collaborative Learning: Promotes teamwork and idea exchange among students to solve problems.
- **Problem-Based Learning:** Engages students in analyzing real-world problems and finding solutions.
- **Technology-Enhanced Learning:** Utilizes digital tools and online platforms to improve the learning experience.
- **Self-Directed Learning:** Encourages students to manage their learning based on their abilities and interests.
- **Inquiry-Based Learning:** Sparks curiosity through questioning and research to seek answers.
- **Blended Learning:** Combines traditional and online education to create a comprehensive learning experience.

10. Co	10. Course Structure						
Week	Hours	Required Learning Outcomes	Unit Or Subject Name	Learning Method	Evaluation Method		
1	3	Understand the importance of Geographic Information Systems (GIS) and remote sensing in archaeology.	Introduction to Archaeological Survey and GIS	Lecture + Discussion	Short quiz + Participation in discussion		
2	3	Learn the fundamentals of remote sensing and its data sources.	Introduction to Remote Sensing	Lecture + Practical Examples	Short report on remote sensing applications		
3	3	Understand types of sensors and satellite image analysis in archaeology.	Remote Sensing Data Sources	Practical Demonstration + Data Analysis	Satellite image analysis of an archaeological site		
4	3	Apply image analysis techniques to identify archaeological sites.	Analysis of Satellite Images for Archaeological Sites	Practical Training in Image Analysis	Submission of a practical report		
5	3	Understand the fundamentals of GIS and its role in archaeological research.	Introduction to GIS	Lecture + Practical Exercises	Theoretical test		
6	3	Learn GIS components such as layers, coordinates, and databases.	GIS Components	Practical Training + Real-world Case Studies	Analytical worksheet + Exam		
7	3	Learn how to use the ArcGIS interface and its basic tools.	ArcGIS Interface and Tools	Hands-on Workshop	Practical test		
8	3	Create spatial layers and input archaeological data into ArcGIS.	Creating and Drawing Spatial Layers	Practical Software Training	Practical exercise		
9	3	Design and manage spatial databases for archaeological sites.	Creating Archaeological Databases in GIS	Workshop + Hands-on Training	Mini project for database management		
10	3	Conduct spatial analysis to extract archaeological insights.	Spatial Analysis in GIS	Practical Applications + Case Study	Submission of an analytical report		

11	3	Produce archaeological maps using ArcGIS and customize layers and symbols.	Producing Archaeological Maps Using ArcGIS	Applied Workshop	Practical test
12	3	Analyze the spatial distribution of archaeological sites and create thematic maps.	Creating Thematic Maps for Archaeological Sites	Practical Training + Data Analysis	Midterm exam
13	3	Apply acquired knowledge in a practical project to analyze an archaeological site.	Practical Applications of ArcGIS	Group Project + Academic Guidance	Project presentation
14	3	Evaluate archaeological sites using remote sensing and GIS data.	Using Remote Sensing for Archaeological Site Assessment	Case Study + Analysis of Real Data	Submission of final report
15	3	Comprehensive review of course concepts and tools, along with knowledge assessment.	General Course Review	Review + Q&A Session	Final comprehensive exam

11. Course Evaluation

No.	Assessment Type	Score	Details
1	Daily Quizzes	10	Several short quizzes conducted throughout the semester.
2	Practical Applications	10	Evaluation of performance in the lab and use of ArcGIS software.
3	Midterm Exam	20	A theoretical and practical exam covering fundamental concepts and applications.
4	Semester Work	40	Total of daily quizzes, practical assessments, and midterm exam.
5	Final Exam	60	A comprehensive final exam covering all course topics (theoretical).
6	Final Total	100	The final grade obtained by the student in the course.

importance of Islamic jurisprudence in organizing plans, structures, and emerging issues, as well as what Islamic law stipulates in rulings between disputants over housing, structures, services, and crops.

9. Teaching and learning strategies:

Strategy

The course aims to familiarize students with the provisions and conditions of Islamic jurisprudence regarding construction, in terms of legislation pertaining to building boundaries, incidents, and city plans, with regard to harm based on the teachings of the Islamic religion (no harm nor reciprocating harm) and the prohibition of transgression, as stipulated in the Qur'anic verses, the hadiths of the Prophet, and the Sunnah, as well as what was discussed and approved by jurists and opinion leaders such as Ibn al-Rami, who worked as a builder and was a contemporary of some of the jurists of his time in the seventh century AH, as stated in the book Al-Ahkam Al-Sultaniyyah by Abu Ya'la, and the book of Islamic Architecture Jurisprudence.

10. Course structure:

week	Hours	Required learning outcomes	Name of unit/course or topic	Teaching method	Evaluation method
Tuesday	1	Understanding and summarizing the material	The role of jurisprudence in urban planning	In- presence	Discuss and ask questions
Wednesday	1	Understanding and summarizing the material	The role of jurisprudence in organizing cities and distributing plans	In- presence	Discuss and ask questions
Tuesday	1	Understanding and summarizing the material	Road organization	In- presence	

Wednesday	1	Understanding and summarizing the material	Ruling on encroachment on roads	In- presence	
Tuesday	1	Understanding and summarizing the material	Neighborhood rights	In- presence	
Wednesday	1	Understanding and summarizing the material	The judgment between two men's houses	In- presence	
Tuesday	1	Understanding and summarizing the material	Ruling on planting wood in a neighbor's house	In- presence	
Wednesday	1	Understanding and summarizing the material	The ruling on lending a plot of land to two men	In- presence	
Tuesday	1	Understanding and summarizing the material	The harm of smoking and the ruling on it	In- presence	
Wednesday	1	Understanding and summarizing the material	Harmful effects of scorpions	In- presence	
Tuesday	1	Understanding and summarizing the material	Who built a stable	In- presence	
Wednesday	1	Understanding and summarizing the material	The harm of looking through windows and doors	In- presence	
Tuesday	1	Understanding and summarizing the material	Light ports and rooftops	In- presence	
Wednesday	1	Understanding and summarizing the material	Supervision of the place on the house	In- presence
