Update of the Vision, Mission, and Objectives of the College of Arts – University of Mosul According to the governmental program of the Ministry of Higher Education and Scientific Research

2023-2022

Our Vision:

Global leadership and academic excellence through our knowledge, culture, and values in linguistic, philosophical, social, media, and digital studies.

Our Mission:

Preserving our culture, values, and identity is the foundation of our commitment to education, learning, scientific research, and community service. Our college strives to develop fundamental and advanced academic programs in various humanities disciplines according to globally and regionally recognized standards. This contributes to preparing competent graduates who can support their communities in linguistic, philosophical, social, media, and digital fields.

Additionally, our college aims to acquire and provide the necessary scientific capabilities and infrastructure for applied research and knowledge innovation using modern technologies. This is done in light of a commitment to human, ethical, and professional values, fostering active partnerships with global, regional, and local institutions, preserving national identity, promoting peace, and engaging with nations.

Our Objectives:

1. Enhancing the ranking of the University of Mosul and position it among global classifications by continuing to produce and publish high-quality research in international databases, reflecting our leadership and excellence.

2. **Innovating, develop, and continuously update undergraduate and postgraduate academic curricula according to advancements in our college's fields of knowledge, ensuring academic accreditation.**

3. **Empowering academically and professionally distinguished faculty members in all disciplines, including rare specializations.**

4. **Preparing competent graduates with knowledge, skills, and cultural awareness that enhance their intellectual and professional abilities to meet labor market demands. Additionally, foster student talents, develop them, and refine their skills.**

5. **Addressing societal issues by promoting and marketing applied and future-oriented research in various fields, as well as developing our scientific journals to join international databases.**

6. **Adopting modern quality systems in higher education within institutional and methodological accreditation programs to improve university performance.**

7. **Implementing electronic governance to enhance administrative and academic procedures, ensuring the modernization of tasks within the organizational structure.**

8. **Seeking and diversify financial resources to maximize societal benefits from the college's assets.**

9. **Developing a comprehensive learning environment that encourages students, faculty, and administrative staff to innovate and create.**

10. **Integrating human, ethical, and professional values into the curriculum, instilling these principles in college members to foster cooperation, citizenship, responsibility, and social awareness.**

11. **Strengthening social responsibility and community service initiatives through partnerships, consultancy development, improvement of continuing education programs, support for information institutions, and encouragement of volunteer work.**

12. **Providing summer training programs for students in various state institutions to equip them with practical skills.**

13. **Transitioning the Adab Al-Rafidain Journal to electronic publishing and develop it scientifically for inclusion in international databases.**

Governmental Program of the Ministry of Higher Education and Scientific Research

Main Component (Vision):

- **Entering global rankings.**

Key Components (Mission and Objectives):

1. **Focus on graduates' career development.**

2. **Keep pace with global curriculum advancements.**

3. **Support authorship and translation initiatives.**

4. **Develop infrastructure.**

5. **Emphasize applied research.**

6. **Developing Practical Skills: Provide training and practical opportunities for students to enhance their practical skills in translation and linguistic communication.**

7. **Focus on Technology: Integrate modern technology into education and scientific research to improve the efficiency of the educational process and develop students' skills in using the latest technological tools.**

8. **Community Service: Offer consulting and training services to the local community in the fields of linguistics and translation**
