

## **Datatab**

DATAtab is a free online platform for statistical data analysis. It has been developed in Austria since 2019 by a team of statistics and data science experts. The website supports a wide range of statistical tests, such as the t-test, ANOVA, chi-square test, linear and logistic regression, analysis of variance, survival analysis, reliability analysis, principal components analysis (PCA), and nonparametric tests such as the Mann-Whitney test and Wilcoxon test

## **Khan Academy**

**Khan Academy** offers a comprehensive and free course in statistics and probability. The course includes simplified video lessons, articles, and interactive exercises that help learners grasp concepts such as data analysis, probability, distributions, statistical inference, and regression. It is designed to be easy to follow and progressively structured, making it an excellent choice for self-paced learning at any level

## **StatQuest**

StatQuest breaks down complicated Statistics and Machine Learning methods into small, bite-sized pieces that are easy to understand. StatQuest doesn't dumb down the material, instead, it builds you up so that you are smarter and have a better understanding of Statistics and Machine Learning.
