# Academic Program and Course Description Guide

2024

## **Introduction:**

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

#### Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**<u>Program Mission:</u>** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

**Program Objectives:** They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

#### **Academic Program Description Form**

University Name: ...Mosul.....

Faculty/Institute: .. College of Education for Pure Sciences.......

Scientific Department: .. Department of Chemistry....... Academic or Professional Program Name: ...Bachelor......

Final Certificate Name: ... Bachelor of Chemistry......

Academic System: ...Annual......

#### 1. Program Vision

- 1- The department seeks to provide an appropriate scientific environment and develop the level of education at the undergraduate and postgraduate levels.
- 2- 2- Achieving the pioneering role of the department by contributing to scientific progress and keeping up to date with all new.

#### 2. Program Mission

The department's mission is to graduate high-level educational cadres capable of working in the country institutions and be supportive of the development of society.

#### 3. Program Objectives

- 1 Preparing and training teachers, researchers, and chemical experts by emphasizing teaching on developing the areas (cognitive, skillful, and emotional) in all branches of chemistry.
- 2 Planning, implementing, evaluating and developing educational chemistry curricula and teaching methods.
- 3 Training students/teachers to practice continuous self-learning skills to continue academic and professional growth in the field of chemistry.
- 4 Improving the laboratory skills of students/teachers through their preparation and practice of various chemistry experiments.
- 5 Encouraging students to conduct scientific studies and research in the field of chemistry and its teaching methods, which are derived from global societal reality, and employ them in developing the science of chemistry.

#### 4. Program Accreditation

Does the program have program accreditation? And from which agency? No

#### 5. Other external influences

Is there a sponsor for the program? Ministry of Higher Education/ University of Mosul

#### 6. **Program Structure**

| Program Structure           | Number of<br>Courses | Credit hours | Percentage | Reviews* |
|-----------------------------|----------------------|--------------|------------|----------|
| Institution<br>Requirements | 8                    | 20           | 10.75      | Basic    |
| College Requirements        | 11                   | 40           | 21.5       | Basic    |
| Department<br>Requirements  | 24                   | 128          | 68.8       | Basic    |

| Summer Training | 1 | 4 | 2.15 | Application in Schools |
|-----------------|---|---|------|------------------------|
| Other           |   |   |      |                        |

<sup>\*</sup> This can include notes whether the course is basic or optional.

| 7. Program l | Description  |                               |             |           |

| 8. Expected learning                               | outcomes of the program  |
|--|--|
| Knowledge  |  |
| Recruiting teachers                                | Scientific, professional and technical recruiting with a high standard of cultural and proficiency |
| Recruiting Scientific researchers                  | Achieving the basic principles of scientific research and teaching                                 |
| Reinforcement of Scientific co-<br>operation       | Via training courses, workshops and symposia   |
| Post-graduate studies opportunities                | Through accomplishing scientific material and scientific teaching methods                          |
| Skills   |  |
| Teaching skills                                    | Acquiring basic skills of teaching fields of chemistry   |
| Scientific research skills                         | Developing scientific research in chemistry and teaching methods fields                            |
| Sustainable development skills                     | Preservation of state resources from delpletion in all fields                                      |
| Practical skills                                   | Developing student skills in the laboratory  |
| Ethics   |  |
| Developing ethics and useful attitudes             | In accordance with religion and habits and costumes  |
| Developing attitudes towards teaching job          | To face current challenges and developing overall education system                                 |
| Establishing the principles of teaching            | To limit toe abuse of their responsibilities in scientific and education fields                    |
| Disclosing the importance of science in human life | The great role of chemistry in people life.  |

#### 9. Teaching and Learning Strategies

Theoretical and practical lecture, conversation and discussion, problem solving, performing practical experiment, project and application in school

#### 10. Evaluation methods

Quizzes, practical semester exam, mid and final exam in first and second turn, preparing reports and homework.

#### 11.Faculty

| <b>Faculty Members</b> |
|------------------------|
|------------------------|

| Academic Rank       | Specializat | ion  | Special<br>Requirements<br>/Skills (if<br>applicable) |  | Number of staff | of the teaching |
|---------------------|-------------|--|---|--|-----------------|-----------------|
|                     | General     | Special  |   |  | Staff           | Lecturer        |
| Professor           | Chemistry   | Inorganic, industrial, teaching methods, educational, and physical chemistry, and biochemistry.  |   |  | 6               |                 |
| Assistant professor | Chemistry   | Organic, inorganic, synthetic, analytical and physical chemistry, teaching methods, educational psychology, educational sciences and biochemistry. |   |  | 31              |                 |
| Lecturer            | Chemistry   | Organic, inorganic, synthetic, analytical and physical chemistry, teaching methods, educational psychology, educational sciences and biochemistry. |   |  | 34              |                 |
| Assistant lecturer  | Chemistry   | Organic, inorganic, synthetic, analytical and physical chemistry, teaching methods, educational psychology, educational sciences and biochemistry. |   |  | 11              |                 |

#### **Professional Development**

#### **Mentoring new faculty members**

Using recent scientific references, teaching films, training ciurses and workshops

#### Professional development of faculty members

Proving new references for the library, participating in specialized training courses

#### 12. Acceptance Criterion

Central admission through the ministry of higher education

Central admission guide, electronic site of the department and internet

## 14.**Program Development Plan**

Updating the content of the program according to new references

#### 1. Course Name: Practical analytical chemistry

University of Mosul / College of Education for Pure Sciences / Department of Chemistry

#### 2. Course Code:

#### EDCH24 M1021

#### 3. Semester / Year:

The second semester of the academic year 2023-2024

#### 4. Description Preparation Date:

2/9/2023

#### 5. Available Attendance Forms:

Daily working hours

#### 6. Number of Credit Hours (Total) / Number of Units (Total)

36 hours for each section, 6 hours for the first stage, Chemistry Department Two units....three hours

#### 7. Course administrator's name (mention all, if more than one name)

Name: Assistant Teacher Noor Mazin Ibrahim

Dr. Sobhe Mohsen Jarallah

Assistant Teacher Hind Shaker Mahmoud

Email: noormazin81@uomosul.edu.iq

#### 8. Course Objectives

#### **Course Objectives**

- Learn about quantitative analysis methods.....
- Identify ways to express chemical concentration...
- Learn about gravimetric analysis and the gravimetric factor.....
- Learn about volumetric analysis and its types of reactions
- Identify separation methods and devices used

#### 9. Teaching and Learning Strategies

#### **Strategy**

#### A. Definition of the course

Analytical chemistry is one of the branches of chemistry and is defined as the chemical method by which elements and substances are detected, methods of separating them, and knowledge of the components of those substances in a mixture of them, in addition to quantitative estimation of these components.

#### B. Subject-specific skills

- The student acquires knowledge of chemistry, the periodic table, and chemical elements
- Providing the student with advanced knowledge of the chemistry of solutions, chemical equilibrium, and the law of mass action
- Providing the student with knowledge of volumetric analysis and types of clarification
- The student acquires knowledge of weight analysis and the weight factor
- The student acquires knowledge of spectroscopy, Berlambert's law and its analytical applications

#### 10.Course Structure

| Week | Hours | Required Learning<br>Outcomes                                      | Unit or subject name   | Learning method | Evaluation method                       |
|------|-------|--|--|-----------------|---|
| 1    | 2     | Gain insight into how to maintain oneself and laboratory equipment | Laboratory security and safety precautions                   | practical       | Homework                                |
| 2    | 2     | Gain a general knowledge of chemistry and preparation of compounds | A general introduction to analytical chemistry and its types | practical       | An exam, a daily activity, and homework |
| 3    | 2     | Gain knowledge of  | Preparation of solid   | practical       | An exam, a daily                        |

|    |   | how to prepare a liquid substance                              | and liquid compounds   |           | activity, and homework  |
|----|---|--|--|-----------|---|
| 4  | 2 | Gain knowledge about Christification                           | Decontamination and its conditions   | practical | An exam, a daily activity, and homework                                     |
| 5  | 2 | Gain knowledge of correction methods                           | volumetric<br>methods clarification  | practical | An exam, a daily activity, and homework                                     |
| 6  | 2 | Gain knowledge about the conditions                            | Standard conditions for primary and secondary materials                                      | practical | An exam, a daily activity, and homework                                     |
| 7  | 2 | Gaining knowledge<br>about the colors of<br>circles signs in   | Indicators of acidity and -basicity evidence of neutrality                                   | practical | An exam, a daily activity, homework, and writing a report                   |
| 8  | 2 | Gain knowledge of how sodium carbonate is prepared practically | Experiment 1- Preparing sodium carbonate and calculating the standard of hydrochloric acid   | practical | An exam, a daily activity, homework, and writing a report                   |
| 9  | 2 | Gain knowledge of how to find focus                            | Experiment 2- Calculating the standard of sodium hydroxide by plating with hydrochloric acid | practical | An exam, a daily activity, homework, and writing a report on the experiment |
| 10 | 2 | Gain knowledge of how to calculate concentration               | Experiment 3-<br>Calculating the<br>standard of acetic<br>acid                               | practical | An exam, a daily activity, homework, and writing a report the on experiment |
| 11 | 2 | Gain knowledge of how to estimate a                            | Estimate a mixture of  | practical | An exam, a daily activity, homework, and                                    |

|    |   | mixture   | sodium carbonate<br>and sodium<br>hydroxide            |           | writing a report on the experiment  |
|----|---|---|--|-----------|---|
| 12 | 2 | Gain knowledge of how to estimate a mixture     | Determine the mixture of carbonates Sodium bicarbonate | practical | An exam, a daily activity, homework, and writing a report on the experiment |
| 13 | 2 | Gain knowledge of how to estimate chlorine ions | for method chloride ion determination                  | practical | exam, a daily An activity, homework, and writing a report on the experiment |
| 14 | 2 | Gain knowledge of how to estimate iron          | Determination of iron using potassium permanganate     | practical | An exam, a daily activity, homework, and writing a report on the experiment |
| 15 | 2 | Gain knowledge of how to estimate iodine        | Determination of iodine using sodium thiosulfate       | practical | An exam, a daily activity, homework, and writing a report on the experiment |

# 11.Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

# 12.Learning and Teaching Resources

# Subject Teacther Assistant Teacher Noor Mazin Ibrahim

- 1. Course Name: Theoretical Organic Chemistry / First Stage Department Chemistry
- 2. Course Code: EDCH23M10131
- 3. Semester / Year: 2024- 2023
- 4. Description Preparation Date: 1/9/2023 -81/8/2024
- 5. Available Attendance Forms: in person electronic classes
- 6. Number of Credit Hours (Total) / Number of Units (Total) 2 hours per lecture / 7 units
- 7. Course administrator's name (mention all, if more than one name)

Name: Name:. Dr. Ghufran Thanoon Siddiq / Email: gsadeek @uomosul.edu.iq Name.D. neam Hazem Salim / Email: d.n3malmola@uomosul.edu.iq

#### 8. Course Objectives

#### **Course Objectives**

- The student learns the importance of organic chemistry, its branches, the composition of compounds, and methods of preparing them
- 1. Students are introduced to the subject of organic chemistry and its role in understanding the principles of modern chemistry and its daily uses.
- 2. How to use this knowledge in daily life and link it to other scientific phenomena
- 3. It makes students of colleges of education for pure sciences feel the value of the chemistry subject and how they deal with the students of the university
- 4- Performing their work in research laboratories
- 5. Urging students to perform their duties not only as teachers, but also in other state

departments.....

#### 9. Teaching and Learning Strategies

Strategy

Theoretical lecture, dialogue and discussions, presenting examples and solving problems, homework,

Daily activity of students and recording contributions for ea male and female student.

#### 10. Course Structure

8. Course Objectives

| Course Objectives | 1 - principle of inorganic chemistry,               |
|-------------------|---|
|                   | Electronic structure symbol terms, quantum No. and  |
|                   | Classification of periodic table.                   |
|                   | 2 – Periodic properties of atoms                    |
|                   | 3- Type of bonds (ionic compounds)                  |
|                   | 4 - Bond theories (covalent bonds).                 |
|                   | 6 – Hybridization and geometry of simple compounds. |

#### 9. Teaching and Learning Strategies

**Strategy** 

buildind graduates' skills students to know the inorganic chemistry through the lecture, discussions, home works and examinations.

#### 10. Course Structure

| Week | Hours | Required Learning<br>Outcomes   | Unit or subject name             | Learning method           | Evaluation method |
|------|-------|---------------------------------|----------------------------------|---------------------------|-------------------|
| 1,2  | 2x2=4 | Acquire knowledge of<br>Subject | Principle of inorganic chemistry | Lecture and<br>Discussion | Oral questions    |

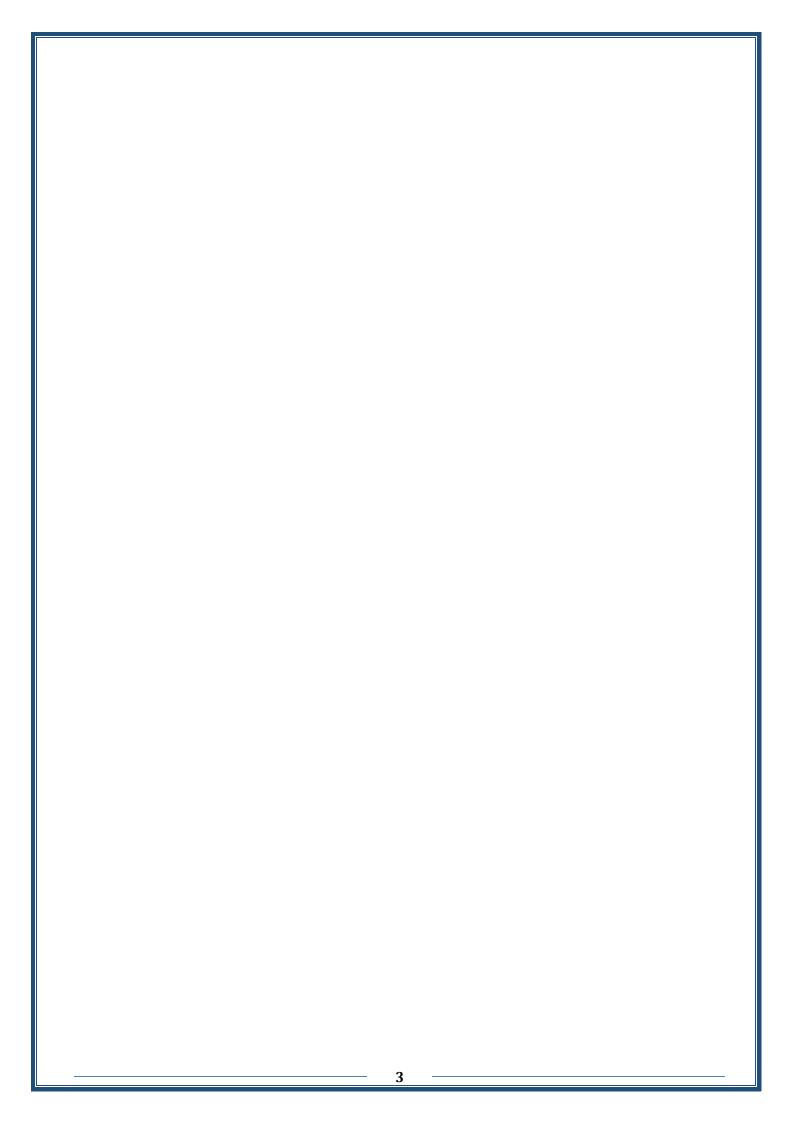

| 3,4   | 2x2=4 | Acquire knowledge                            | Principle of inorganic chemistry                   | Lecture  | Discussions                           |
|-------|-------|--|--|--|---------------------------------------|
| 5,6   | 2x2=4 | Learning principle of<br>Orbital shapes      | Symbol terms and shape<br>Of orbitals.             | Lecture . discussion With the help of Different Facilitate | Short<br>examination and<br>home work |
| 7,8   | 2x2=4 | Acquire knowledge<br>Concerning Symbol terms | Symbol terms and shape<br>Of orbitals              | Symbol terms   | Oral questions                        |
| 9,10  | 2x2=4 | Periodic table                               | Periodic table                                     | Lecture  | Oral questions                        |
| 11,12 | 2x2=4 |  | Periodic table                                     | Electronic<br>Configuration                                | Lecture and<br>Discussion             |

| 8. Course objectives                      | <u> </u>  |
| Objectives of the study subject           | For the student to become familiar with the concept of educational psychology and its areas of interest and student to know the meaning of educational objectives, classify them, and transform them into educatobjectives.  That the student understands the meaning of memory, it nature, and its role in teaching.  For the student to recognize the importance of motivation the field of educational psychology  The student gets to know the meaning of the transfer of learning effect and its educational applications  For the student to recognize and understand the meaning the concept and its relationship to scientific thinking and creative thinking  For the student to know the meaning of feedback, its typ and its importance to the teacher.  The student gets to know the theories of education and the educational applications.  The student understands the factors affecting learning.  The student gets to know the skills and habits and how the acquire them and benefit from them in learning. |
| 9. Teaching and learning strategies       |   |
| The strategy                              | Method of solving problems Cooperative learning method  |

- 2. Course Code: EDBI24F101
- 3. Semester / Year: 2023-2024
- 4. Description Preparation Date: 1.9.2023
- 5. Available Attendance Forms: Attendance and electronic course
- 6. Number of Credit Hours (Total)/Number of Units (Total): 6hrs and 4 unites
- 7. Course administrator's name (mention all, if more than one name)

Name: Assist. Pro. Dr. Ibrahim Faris Ali (ibrahimfali@uomosul.edu.iq)

Name: Dr. Mona Omar Mohammed (mona.omar@uomosul.edu.iq)

Name: Lect. Shireen Yaseen Kasim (<a href="mailto:shireen@uomosul.edu.iq">shireen@uomosul.edu.iq</a>)

Name: Ekhlass Kalifa Hamed (ekhlasshamid@uomosul.edu.iq)

Name: Assist. Lect. Maya Ibrahim Jasim

Name: Assist. Lect. Zahra Hazim

### 8. Course Objectives

Course Objectives

1. Identify the basic principles of biology
2. Identify the practical applications of biology

9. Teaching and Learning Strategies

Strategy Theoretical and practical lectures, dialogues and discussions.
Solving problems, conducting scientific experiments, reporting, and daily assignments

#### 10. Course Structure

| Week | Hours | Required       | Unit or subject          | Learning method   | <b>Evaluation method</b> |

1. Course Name: programing 2. Course Code: EDCH24 M1051 3. Semester / Year: 2023/2024 4. Description Preparation Date: 1/9/2023 5. Available Attendance Forms: Daily shift 6. Number of Credit Hours (Total) / Number of Units (Total) 30Hours / 2 Units 7. Course administrator's name (mention all, if more than one name) Name: mazin salim mohammed Email: mazinsalm@uomosul.edu.iq 8. Course Objectives **Course Objectives** Identify the component of computer. Know the tasks of task bar. **Identify computers operating systems** See the internet using. Identify computer network types. Getting know of internet browser. 9. Teaching and Learning Strategies Strategy The method of lecturing is discussing and asking question's with student 10. Course Structure Week Hours **Required Learning** Learning **Evaluation** Unit or subject name **Outcomes** method method 2 Components The computer and its ba the lecture the daily 1 of components Computer monthly exams

## 8. Course Objectives

#### Course Objectives

- Understand concepts such as system, equilibrium, reversible processes, state and status functions, and path-functions.
- Use the Equations of State.
- Apply the First Law and the Second Law of Thermodynamics to closed systems.
- Apply the First Law and the Second Law of Thermodynamics to solve problems relating reversible and irreversible processes for ideal gases.
- Understand different processes (isothermal, adiabatic, isobaric, isontropic).
- Calculate the changes in properties of the system from the PVT data, the Equations of S ta and the heat capacity data.
- Understand the vapor liquid equilibrium and apply the simple
- thermodynamic models.
- Use variables such as fugacity and fugacity coefficients, activity and activity coefficients more rigorous calculations.
- Apply the models to real chemical reactions and phase changes.

## 9. Teaching and Learning Strategies

### **Strategy**

- Teaching and learning methods: lecture, dialogue, discussion, examples, practi laboratory, and information available online.
- Evaluation methods: monthly exams, homework, and students' daily activities (data preparation and recording of participation for each male and female student).

| 10. Course Structure |           |  |   |                               |  |

#### 8. Course Objectives

### **Course Objectives**

- 1-Learning the basic principles of physical chemistry (thermodynamic) and it applications linked to other scientific phenomena.
- 2-illustrating the importance of physical chemistry in daily life.
- 3-Improving students' practical skills by engaging them in lab work which contributes to enhancing their scientific mentality to search, investigate, exploit think towards creativity.
- 4-Developing some positive activities and attitudes such as objectivity, scientif honesty, improving handy skills, teamwork, respecting others' opinions, and maintaining equipment.
- 5-Preparing students to work as teachers in schools or other research or industrial institutions after graduation.
- 6-Utilizing the students' scientific knowledge in a way that helps th troubleshoot life problems.

## 9. Teaching and Learning Strategies

#### **Strategy**

Following the attendance in the laboratory, where a short theoretical idea about the experiment is given, and then the practical part of the experiment is elaborated upon, where students are distributed into groups to conduct the experiment, draw results, and prepare laboratory reports including the name and date of the experiment, the theory of the experiment, the practical part, then the results and discussion.

## 10.Course Evaluation

The assessment marks are as follows:

- mid year exam 4 marks
- end of year exam 6 marks
- laboratory work 10 marks (5 marks for commitment and laboratory work, 5 marks for quizzes and weekly reports)

| and weekly reports)   |  |
|---|--|
| 11.Learning and Teaching Resources                          |  |
| Required textbooks (curricular books, if any)               | 1- A book of practical experiments in Arabic<br>2- Practical Physical Chemistry 2019   |
|   | In addition to some practical scientific publications  |
| Recommended books and references (scient journals, reports) | The most important requirements are the methodological book, lectures given in the laboratory, and conducting practical experiments                  |
|   | While explaining or conducting the experiment, it is possible to link the results and practical procedures to daily life https://almerja.net.reading |

1. Course Name:

Organic Chemistry "Second Stage" Theoretical

2. Course Code:

EDCH24M2031

3. Semester / Year:

2023-2024

4. Description Preparation Date:

1-9-2023

5. Available Attendance Forms:

Presence

6. Number of Credit Hours (Total) / Number of Units (Total)

2 hours per week / 7 units

7. Course administrator's name (mention all, if more than one name)

Name: Dr. Shaimaa Samir Ismaeel

Email: dr.shaimaasamir83@uomosul.edu.iq

Name: Dr. Hussein Yousif Ridha

Email: husseinyossif83@uomosul.edu.ig

8. Course Objectives

#### **Course Objectives**

- Identify some chemical compounds such as carboxylic acids, name them, properties, methods of preparation, and interactions.
- 2. Knowledge of compounds derived from carboxylic acids, such as esters, acid chlorides, anhydrides, and others, methods of preparation, and some of their reactions.
- 3. Identifying aldehydes and ketones, their names, physical properties, preparation, and reactions.
- 4. Identifying amine compounds, their properties, how to name them using regular and

common methods, and knowing the methods of their preparation and reactions.

- 5. Identify the names and properties of phenolic compounds, methods of preparing them, and some of their important reactions
- 6. Identify aryl halides compounds, learn about preparation methods and their effectiveness towards nucleophilic and electrophilic substitution, and compare them to alkyl halides.

## 9. Teaching and Learning Strategies

#### **Strategy**

- Providing the student with the necessary skills to learn the method of scientific
  thinking that helps him obtain scientific knowledge and transform that into
  behavior followed in solving scientific problems.
- The skill of completing equations for the preparation of organic compounds and their reactions
- Knowing the importance of these compounds and materials in the pharmaceutical industries

This can be achieved by

- Discussion
- ask questions
- lecture

## 10. Course Structure

3. Semester / Year: 2024-2023

4. Description Preparation Date: 1/9/2023

5. Available Attendance Forms: In presence

6. Number of Credit Hours (Total) / Number of Units (Total) 30 hour

7. Course administrator's name (mention all, if more than one name)

Name: Rana R. Abed , Fadya Jalal Ahmed

Email: ranaalbustani@uomosul.edu.iq

### 8. Course Objectives

#### **Course Objectives**

- 1- That the student be able to memorize the symbols of the elements in the correct format
  - 2-The student understands how the electronic distribution of elements and determines the oxidation state
- 3-The student should identify each group, its characteristics, and its location on the periodic table
- 4-The student will learn how to prepare gaseous elements, detect them, and know their properties
- 5- The student should distinguish between metals, non-metals, and metalloids in terms of properties and importance
- 6-The student should write balanced equations describing the interactions of each group
  - 7- Utilizing the student's scientific knowledge and preparing him to be a pioneering teacher in his field of work through understanding the academic subject
  - 8-Utilizing the student's scientific knowledge and preparing him to be a pioneering teacher in his field of work through understanding the academic subject

## 9. Teaching and Learning Strategies

#### 1-Knowledge and understanding

Recognizing the subject of inorganic chemistry and its parts and how this science developed to become of the most important branches of chemistry and a basic pillar of its direct connection to modern scientific applications.

#### 2- Skills related to the subject

Recognizing the basic concepts of inorganic chemistry How to benefit from it and link it to daily phenomena. Providing the student with the necessary skill in employing the acquired knowledge to be a pillar in the understanding process for the purpose of applying it in the practical aspect and communicating it correctly to the students. Providing the student with knowledge i the field of chemistry, as it is possible for the student to transform this knowledge into action when the situation requires a specific response to solve a problem.

#### 3- Teaching and learning methods

Teaching and learning methods: lecture, dialogue, discussion And presenting examples , exams and tests, writing and discussing reports, practical laboratory, and information available on the Internet

#### 4-Thinking skills

Asking questions during the lecture, for the purpose of attracting students and the ability to answer them. And linking inorganic chemistry topics to what is happening. In the environment in which students live, and the possibility of benefiting from it to facilitate life and enjoy scientific and technological achievements.

Ask questions and search for the latest developments in chemistry, especially with regard to medical

#### 5-Evaluation methods

Methods Evaluation: monthly exams, homework, students' daily activity, writing reports and quizzes, daily preparation, and recording participation for each male and female student by taking t

## 10. Course Structure

| Week | Hours | Required<br>Learning<br>Outcomes | Unit or subject name                       | Learning method | Evaluation method   |

## 1. Course Name:

Developmental Psychology/ Stage 2

2. Course Code

#### EDCH24M2071

3. Term / Year

First and Second Semester/2024

4. Description Preparation Date:

1/9/2023

## 5. A. Available Attendance Forms

Daily working hours (in presence)

6. Number of Credit Hours (Total) / Number of Units (Total)

There are two groups A,B (each group consists of three divisions ), that is, the number of hours both groups per week = 6.....Down below the

Month=6\*4 weeks=24 hours

## 7. Course administrator's name (mention all, if more than one name)

Name: Eng. Eng. Maysa Mohammed Qasim ... Email Maisaa.mohammed@uomosul.edu.iq

#### 8. Course Objectives

## Objectives of the course :

Part no. (1)

- Introducing the student to the meaning of developmental psychology.
- Identify the most important stages of growth in modern curricula.
- Clarifying the stages of development in the world
- Learn about the general principles of the growth process.
- Addressing the issue of the child's dietary technology.
- Identify the types of superfoods that children eat.
- Comparing the stages of development.
- Recognize the importance of social relations in the adolescent individual.

Section II:

- Recognize the concept of developmental psychology.
- Recognize the importance of developmental psychology.
- Clarifying the most important fields and studies related to developmental psychology.
- Explaining the phenomenon of changes that occur in the adolescent.
- Introducing the student to the meaning of growth various changes

Intellectual, physical and functional.

- Detection of factors affecting the growth process.

- Giving examples of the developmental process that is related to theories.
- Giving experiments on the process of growth perception, reincarnation and imitation.
- Clarifying the most important factors affect intelligence.

## 9. TEACHING AND LEARNING STRATEGIES

Strategy lecture, discussion and dialogue, Google classroom, problem-solving, Advanced lecture, cooperative learning, educational gar brainstorming, questioning.

## 10. 10. Course Structure

1. Course Name:

Secondary education/second stage/ chemistry department

2. Course Code:

EDCH24 M2081

3. Semester / Year:

First, second, third and fourth semester/2024

4. Description Preparation Date:

1/9/2023

5. Available Attendance Forms:

Daily work (attendance)

6. Number of Credit Hours (Total) / Number of Units (Total)

There are two groups A and B (each group consists of two divisions). Each group has two hours: 2 \* 4 = 8 hours per week, 8 \* 4 = 32 per month.

7. Course administrator's name (mention all, if more than one name)

Name: Rana Khattab Omar

Email: rana.khatta@uomosul.edu.iq

8. Course Objectives

#### **Course Objectives**

- Helping the student to identify the school and institutional system and the importance of secondary education.
- Students gain knowledge of educational supervision, its goals and methods, ancient and modern.
- Students gain theoretical experience of secondary education systems by being exposed to a group of global experiences for this stage.
- It develops in the student the skill of planning and organizing the lesson and applying scientific steps in managing educational work within the educational institution
- The student's awareness that educational work revolves around the patterns of educational administration, which are (authoritarian, democratic,
- and permissive).
- Helping the student identify the elements, components, and goals of educational administration.
- Helping the student become familiar with the educational innovations present in Iraq.
- Identifying the secondary stage, its objectives, conditions for admission, and types of exams.
- Identify the duties of the school principal and the duties

| that he has to | perform. |
|----------------|----------|
|----------------|----------|

• Identifying central and decentralized educational administration and their advantages and disadvantages.

## 9. Teaching and Learning Strategies

## **Strategy**

Lecture, discussion and dialogue, educational platform Google classroor problem solving, developed lecture, reciprocal teaching, golden stormin questioning.

Name: Noor Hazim Mohammedthalji Email: noorsaeed@uomosul.edu.iq

8. Course Objectives

### **Course Objectives**

- 1- learn Students about the topic of kinetic chemistry practically and its role in understanding modern chemistry by find the value of reat constant and half-life time .
- 2- How to use this knowledge in daily life and link it to other scientific phenomena
- 3- Makes students of colleges of education for pure sciences feel the value of practical kinetic chemistry and connect it with theoretical study and how to combine these two studies to be performed effectively with school students after graduation it facilitates understanding of chemistry.
- 4- Practicing their competencies as school teachers.
- 5- Learn students can their work in research researcher scientific
- **6-** Students demand to perform their duties not only as teachers, but also in other state departments.
- **7-** Utilizing the student's scientific knowledge in a way that helps him face life problems in the field of research

### 9. Teaching and Learning Strategies

#### **Strategy**

Providing the student with knowledge in the field of kinetic chemistry, both practically and theoretically, It is possible for the student to transform this knowledge into action when the situation requires a specific response to solve a problem, and this is what is observed in conducting scientific research.

Providing the student with skills not only in kinetic chemistry, but also in other sciences and employment

The knowledge acquired is a foundation for understanding how calculate the rate of reaction and Factors affecting it natural and industrial products related to chemistry

| 1  | $\boldsymbol{\alpha}$ | 4    | . 4   |

| 8. Course Objectives  |

# Course Objectives • Training students on laboratory work • Teaching students about the dangers of chemicals • Teaching students about laboratory equipment and glassware • Teaching students to write reports and interpret practical data • Providing students with practical skills • Students learn to link theoretical and practical experiences • The student learns experiences that are directly related to daily life•

# 9. Teaching and Learning Strategie

#### Strategy

- a. Definition of the course
- ullet It is one of the practical courses within the requirements for obtaining a bachelor's degree in chemistry
- B Subject-specific skills
- Providing the student with scientific and practical skills within laboratory work Teaching and learning methods
- Combined (in person + electronic) Evaluation methods
- (Writing reports + daily and monthly exams)
- C- Thinking skills
- Teaching students to interpret practical data and its relationship to the experiment and the flow of the reaction

Teaching and learning methods

• Built-in

**Evaluation** methods

- Oral exams and short written exams
- D General and transferable skills (other skills related to employability and personal development).
- $\bullet$  Developing the student's chemical personality as a researcher and preparing him as a future chemistry teacher

# 10. Course Structure

| Week | Hours | Required | Unit or subject name | Learning | Evaluation |

# 8. Course Objectives

#### **Course Objectives**

- Teaching students how cells function.
- Teaching students about the nature of biomolecules (carbohydrates, proteins, lipids, nucleic acids), their estimation, and detection.
- Differentiating between compounds and biomolecules.
- Enzymes and how to deal with them.
- Mutations and how they occur.

# 9. Teaching and Learning Strategies

#### Strategy

Giving the lectures and can use of all capabilities available in the classroom. The method of discussion and conclusion is also followed, and intellectual questions are asked as assignments.

#### 8. Course Objectives

#### **Course Objectives**

- 1. Teaching students how to deal with the laboratory and chemical substances
- 2. Teaching laboratory students how to write reports for practical experiment
- 3. The student learns how to detect life compounds
- 4. Estimating life cycles spectroscopically
- 5. Distinguish between compounds and life molecules
- 6. Enzymes and how to deal with them
- 7. Estimation of enzymatic activity spectrophotometrically

#### 9. Teaching and Learning Strategies

#### Strategy

Following the attendance in the laboratory, where a short theoretical idea about the experiment is given, and then the practical part of the experiment is elaborated upon, where students are distributed into groups to conduct the experiment, draw results, and prepare laboratory reports including the name and date of the experiment, the theory of the experiment, the practical part, then the results and discussion..

|   | daily life   |  |

- 1. Course Name: Organic/theoretical chemistry, third stage
- 2. Course Code: EDCH24 M3031
- 3. Semester / Year: 2023 -2024
- 4. Description Preparation Date: 1/9/2023 31/8/2024
- 5. Available Attendance Forms: daily attendance
- 6. Number of Credit Hours (Total) / Number of Units (Total) 45 Hours / 7 Units
- 7. Course administrator's name (mention all, if more than one name)

Name: Dr. Anwar Abdulghani / Dr. Amena Alyas

Email: amenaaltee79@uomosul.edu.iq

#### 8. Course Objectives

- Course Objective 1. Introducing the student to the types of organic compounds
  - 2. The student acquires knowledge of methods for preparing compounds
  - 3. The student's knowledge of the ways in which organic compounds interact
  - 4. The student acquires knowledge of the acidic and basic properties of organic compounds
  - 5. Familiarize the student with the form of organic compounds in vacuum
  - 6. The student learned the intermediate compounds of reactions and the ways in which the mechanics of reactions work
  - 9. Teaching and Learning Strategies

#### Strategy

#### a. Definition of the course

- The course for the third stage is concerned with homogeneous and heterocyclic organic compounds, which include many of the compounds
- Preparation of homogeneous and bonded cyclic compounds and their reactions
- Preparation of heterocyclic compounds and their reactions
- Study of stereochemistry and the distribution of molecules in vacuum
- Study of acidity and basicity of organic compounds
- Study of effective mediators

# **B** - Subject-specific skills

• Skill in preparation methods

- Compound interactions skill
- Know the importance of organic compounds in the pharmaceutical industries
- The skill of recognizing how compounds exist and their shape in a vacuum

# C- Teaching and learning methods

- lecture
- Discussion
- ask questions

# D - Thinking skills

• Linking reactions together to prepare compounds and their reactions

# **E** - Evaluation methods

- Homework
- Daily exams
- Mid-year exam, final exam
- Student participation

| 8. Course Ob   | ectives  |  |  |  |  |
| <b>Course Objectives</b>   | 1. Introduce the student to Coordination chemistry and Coordination compound   |  |  |  |  |
|  | 2. The student explains the importance of Coordination chemistry in variou   |  |  |  |  |
|  | fields 3. The student will gain an understanding of the correct chemical compositi   |  |  |  |  |
|  | and nomenclature of the Coordination compound through  |  |  |  |  |
|  | Explanation provided   |  |  |  |  |
|  | 4. Get to know about the most important theories that have addressed the chemical structure of Coordination complexes  |  |  |  |  |
|  | 5. Knowledge of the types of Coordination and geometric shapes of  |  |  |  |  |
|  | Coordination complexes   |  |  |  |  |
| 6. The student learned the methods of preparing various Coordination |  |  |  |  |  |
|  | compounds and conjuging examples for them  |  |  |  |  |
|  | compounds and conjuring examples for them 7. Distinguishing the types of isomers and how to separate them  |  |  |  |  |
|  | compounds and conjuring examples for them 7. Distinguishing the types of isomers and how to separate them  |  |  |  |  |
|  | 7. Distinguishing the types of isomers and how to separate them  |  |  |  |  |
|  | 7. Distinguishing the types of isomers and how to separate them  nd Learning Strategies  |  |  |  |  |
| Strategy 1   | 7. Distinguishing the types of isomers and how to separate them  nd Learning Strategies  - Definition of the course  |  |  |  |  |
| Strategy 1   | 7. Distinguishing the types of isomers and how to separate them  nd Learning Strategies - Definition of the course Coordination chemistry, a field within the science of   |  |  |  |  |
| Strategy 1   | 7. Distinguishing the types of isomers and how to separate them  nd Learning Strategies  - Definition of the course Coordination chemistry, a field within the science of chemistry concerned with the study of  |  |  |  |  |
| Strategy 1 *   | 7. Distinguishing the types of isomers and how to separate them  Ind Learning Strategies  - Definition of the course Coordination chemistry, a field within the science of chemistry concerned with the study of compounds in terms of their properties and methods of |  |  |  |  |
| Strategy 1 *   | 7. Distinguishing the types of isomers and how to separate them  nd Learning Strategies  - Definition of the course Coordination chemistry, a field within the science of chemistry concerned with the study of  |  |  |  |  |

ions

It is surrounded by a group of molecules or ions called ligands. 2-subject-specific skills

- \* The student gained theoretical experience with the role and importance of the classes of the course in our daily life
- \* Gain experience in distinguishing between correct and incorre nomenclature and chemical composition consistency
- 3. teaching and learning methods
- \* Theoretical lectures, dialogue, discussion, presentation of examples, e-learning classroom platforms
- , zoom, meet, Fcc, youtube
- \* Use PowerPoint slides and pdf for lectures
- \* Guide the student to the sources on which the lectures were organized
- \* Guide the student to the websites within the curriculum to benefit from them Evaluation methods
- \* Annual and semi-annual examinations
- \* Monthly exams
- \* Quick exams (Quiz)
- \* Homework assignments and reports
- \* Daily activity of students (daily preparation and registration o participation for students )
- \* Electronic participation and exams on e-learning platforms
- 4-thinking skills
- \* How to benefit from the vocabulary of the material in everydal life by linking it to reality and the environment in which we live and through

Laboratory work

- \* Ask questions during the explanation to attract students 'attention and the possibility of their answers to them
- \* Search for the latest developments regarding Coordination chemistry
- 5-teaching and learning methods
- \* Theoretical lectures, dialogue, discussion, giving examples, e-learning platforms classroom, zoom, Meet, Fcc, youtube
- \* Use PowerPoint slides and pdf for lectures
- \* Guide the student to the sources on which the lectures were organized
- \* Guide the student to the websites within the curriculum

to benefit from them

- 6. evaluation methods
- \* Annual and semi-annual examinations
- \* Monthly exams
- \* Quick exams (Quiz)
- \* Homework assignments and reports
- \* Daily activity of students (daily preparation and registration o participation for students )
- \* Electronic participation and exams on e-learning platforms
- 7-general and transferable skills (other skills related to employability and personal development)
- \* The student gains experience in how to obtain the appropriate installation

# 1. Course Name:

Scientific research methodology

2. Course Code:

#### EDCH24M3021

3. Semester / Year:

#### 2023-2024

4. Description Preparation Date:

# 1/9/2023-31/8/2024

5. Available Attendance Forms:

Presentation theory lecture, classroom attendance

6. Number of Credit Hours (Total) / Number of Units (Total)

Total (60) / 4 Units

7. Course administrator's name (mention all, if more than one name)

Name: lecturer Dr. Rawaa daoud sulaiman Email: rawa-daoud2004@uomosul.edu.iq

# 8. Course Objectives

| Course Objectives | Knowing the history of science publishing and understand the publishing movement stages, knowing the scientific research |
|-------------------|--|
|                   | concept.   |
|                   | Knowing the methods of recording scientific products and   |
|                   | comparing.   |
|                   | Knowing the methods of scientific research and their tools.  |
|                   |  |

| 9. Teaching and Learning Strategies |  |
|-------------------------------------|--|
| Strategy                            | Theoretical lecture, talk and discussions, |
|                                     | problem solving, performing practical      |
|                                     | experiments, reports and homework          |

#### 1. Course Name:

Counseling and Mental Health/ Stage III

2. Course Code

#### EDCH24M3141

3. Term / Year

First and Second Semester/2024

4. Description Preparation Date:

#### 1/9/2023

5. A. Available Attendance Forms

Daily working hours (in presence)

6. Number of Credit Hours (Total) / Number of Units (Total)

There are two groups A,B (each group consists of three divisions ), that is, the number of hours both groups per week = 6.....Down below the

Month=6\*4 weeks=24 hours

# 7. Course administrator's name (mention all, if more than one name)

Name: Eng. Eng. Maysa Mohammed Qasim ... Email Maisaa.mohammed@uomosul.edu.iq

# 8. Course Objectives

| <b>Objectives</b> | of | the | course | : |
|-------------------|----|-----|--------|---|
|-------------------|----|-----|--------|---|

Part no. (1)

- Introducing the student to the meaning of counseling mental health.
- Clarify the most important stages that exist counseling.
- Learn about modern trends in educational guidance guidance.
- Identify the most important educational applications.
- Comparison between CBT and REBT.
- Clarify the most important secrets.
- Identifying the emergence of psychological toxins at level of the individual.
- Do notaddress the subject of suspicion amoindividuals.
- Identify the most important principles and procedu that underpin

On it is the theory of behavior modification.

- Detailed explanation of the theories of counseling. Section II:
- Learn about the concept of counseling.
- Clarifying educational guidance and guidance in gene in

Schools and their association with theories.

- Giving examples of counseling and mental health wit a theory

Psychometric Analysis.

- Giving examples of counseling for the hearing

| visual impaired.  |
|---|
| - Clarifying the concept of counseling, its importa     |
| andcharacteristics.                                     |
| - Identify the most important principles and procedures |
| which they are based                                    |
| Theory in Behavior Modification                         |
| - Detailed explanation of the theories of counseling.   |

# 9. TEACHING AND LEARNING STRATEGIES

| Strategy | lecture, discussion and dialogue, Google classroom, problem-solving,   |
|----------|--|
|          | Advanced lecture, cooperative learning, educational games, brainstormi |
|          | questioning.   |

1. Course Name:

Physical chemistry/optional

2. Course Code:

#### **EDCH24 M3101**

3. Semester / Year:

The first semester and the second semester/2024

4. Description Preparation Date:

1/9/2023

5. Available Attendance Forms:

Daily

6. Number of Credit Hours (Total) / Number of Units (Total)

 $(2 \times 15 = 30)$  study hours + 2 hours monthly exam + daily and final exams.

7. Course administrator's name (mention all, if more than one name)

Name: Raed Tareg Ghanem

Email: raedtareq1979@uomosul.edu.iq

8. Course Objectives

| Course Objectives | Students learned about the topic of physical     |
|-------------------|--|
|                   | chemistry and its role in understanding the      |
|                   | principles of molecular interactions and         |
|                   | chemical bonding and its importance              |
|                   | Students learn about the topic of adsorption and |
|                   | its importance                                   |
|                   | Students learned about the theory of activated   |
|                   | complexes and activation energy                  |

9. Teaching and Learning Strategies

**Strategy** 

Lecture, dialogue, discussion, and giving examples

| Week | Hours | Required Learning        | Unit or subject    | Learning    | Evaluation     |
|------|-------|--------------------------|--------------------|-------------|----------------|
|      |       | Outcomes                 | name               | method      | method         |
| 1    | 2     | The acquisition of       | Introduction to    | theoretical | Exam and       |
|      |       | knowledge                | physical chemistry |             | daily activity |
|      |       | In the field of physical |                    |             |                |
|      |       | chemistry and an         |                    |             |                |
|      |       | introduction to some     |                    |             |                |
|      |       | basic concepts related   |                    |             |                |
|      |       | to the branches of       |                    |             |                |

|    |   | chemistry   |   |             |                         |
|----|---|---|---|-------------|-------------------------|
| 2  | 2 | Gaining knowledge of<br>the types of chemical<br>interactions and<br>knowing their strength<br>and<br>interconnectedness. | Chemical interactions and their types                       | theoretical | Exam and daily activity |
| 3  | 2 | Gain knowledge of the types of molecular interactions   | Types of molecular interactions                             | theoretical | Exam and daily activity |
| 4  | 2 | Gain knowledge in the specifications of polar and nonpolar molecules  | the specifications of<br>polar and nonpolar<br>molecules    | theoretical | Exam and daily activity |
| 5  | 2 | Gaining knowledge in<br>Vander Waals<br>Interventions   | Vander Waals<br>Interventions                               | theoretical | Exam and daily activity |
| 6  | 2 | Gain knowledge in<br>examples of<br>Vanderwaals<br>interactions   | Examples of van der<br>Waals interferences                  | theoretical | Monthly exam            |
| 7  | 2 | Gaining knowledge of<br>hydrogen bond<br>interactions and their<br>types  | Hydrogen bond interactions and their types                  | theoretical | Exam and daily activity |
| 8  | 2 | Gain knowledge in ion-ion interactions  | Ion-ion interactions  | theoretical | Exam and daily activity |
| 9  | 2 | Gaining knowledge in London Interventions   | London Interventions<br>(London Forces)                     | theoretical | Exam and daily activity |
| 10 | 2 | (London Forces)   | Examples of London interferences (London forces)            | theoretical | Exam and daily activity |
| 11 | 2 | Acquiring knowledge in the Born-Haber cycle   | The Born-Haber cycle  | theoretical | Exam and daily activity |
| 12 | 2 | Gaining knowledge of electrostatic attraction and its types   | Electrostatic attraction and its types                      | theoretical | Monthly exam            |
| 13 | 2 | Acquiring knowledge in solving mathematical questions of the Born-Haber cycle   | Solve mathematical<br>questions of the Born-<br>Haber cycle | theoretical | Exam and daily activity |
| 14 | 2 | Gain knowledge of an introduction to the concept of adsorption  | Introduction to the concept of adsorption                   | theoretical | Exam and daily activity |
| 15 | 2 | 1   | Types of adsorption (physical and chemical                  | theoretical | Exam and daily activity |
| 16 | 2 |   | Factors affecting adsorption                                | theoretical | Exam and daily activity |
| 17 | 2 | Gaining knowledge of the types of isotherms   | Langmuir isotherm with applied examples                     | theoretical | Exam and daily activity |
| 18 | 2 |   | Freundlich isotherm with applied examples                   | theoretical | Monthly exam            |

| 19 | 2 |  | Isotherm Timken with applied examples   | theoretical | Exam and daily activity |
|----|---|--|---|-------------|-------------------------|
| 20 | 2 | Gain knowledge in<br>types of adsorption<br>kinetics   | Pseudo-first order<br>adsorption kinetics<br>with applied examples                                | theoretical | Exam and daily activity |
| 21 | 2 |  | Pseudo-second order<br>adsorption kinetics<br>with applied examples                               | theoretical | Exam and daily activity |
| 22 | 2 |  | Adsorption kinetics<br>from the implicit<br>molecular diffusion<br>model with applied<br>examples | theoretical | Exam and daily activity |
| 23 | 2 | Gain knowledge in activated complex theory and activation  | Activated complex theory and activation energy  | theoretical | Monthly exam            |
| 24 | 2 | energy   | Factors affecting activation energy   | theoretical | Exam and daily activity |
| 25 | 2 | Gaining knowledge of the thermodynamic   | Thermodynamic functions of activation   | theoretical | Exam and daily activity |
| 26 | 2 | functions of activation  | Application of activated complex theory to adsorption   | theoretical | Exam and daily activity |
| 27 | 2 | Gaining knowledge of linking the relationship between the velocity constant and the equilibrium constant | Connect the relationship between the velocity constant and the equilibrium constant               | theoretical | Exam and daily activity |
| 28 | 2 | Gain knowledge of the mechanics of the   | Mechanics of the adsorption process   | theoretical | Exam and daily activity |
| 29 | 2 | adsorption process   | Solve some problems related to the adsorption process   | theoretical | Monthly exam            |

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc First semester monthly exam 5%. Daily preparation 2%. Daily exam 3%. Mid-year 25%. Second semester monthly 5%. Second exam 60%.

2. Course Code:

#### EDCH24 M4021

3. Semester / Year:

2023-2024

4. Description Preparation Date:

1/9/2023

5. Available Attendance Forms:

Regularity

6. Number of Credit Hours (Total) / Number of Units (Total)

48 Hours

7. Course administrator's name (mention all, if more than one name)

Name: Dr. zeenz zuhair salih <u>zeenz.2020@uomosul.edu.iq</u>

Dr. Nagham Nazem Habib Dr. Rawa Abdel Aleem

Lina Adel Saber Nour Mazen Ibrahim Tamara Abdel Salam

## 8. Course Objectives

#### **Course Objectives**

- The student will be familiar with modern analytical devices and how to work with them
- To learn how to train organic compounds or ions using interactive Uses and various appropriate devices
- Distinguish the different spectroscopic methods for estimating organic compounds and ions

### 9. Teaching and Learning Strategies

#### **Strategy**

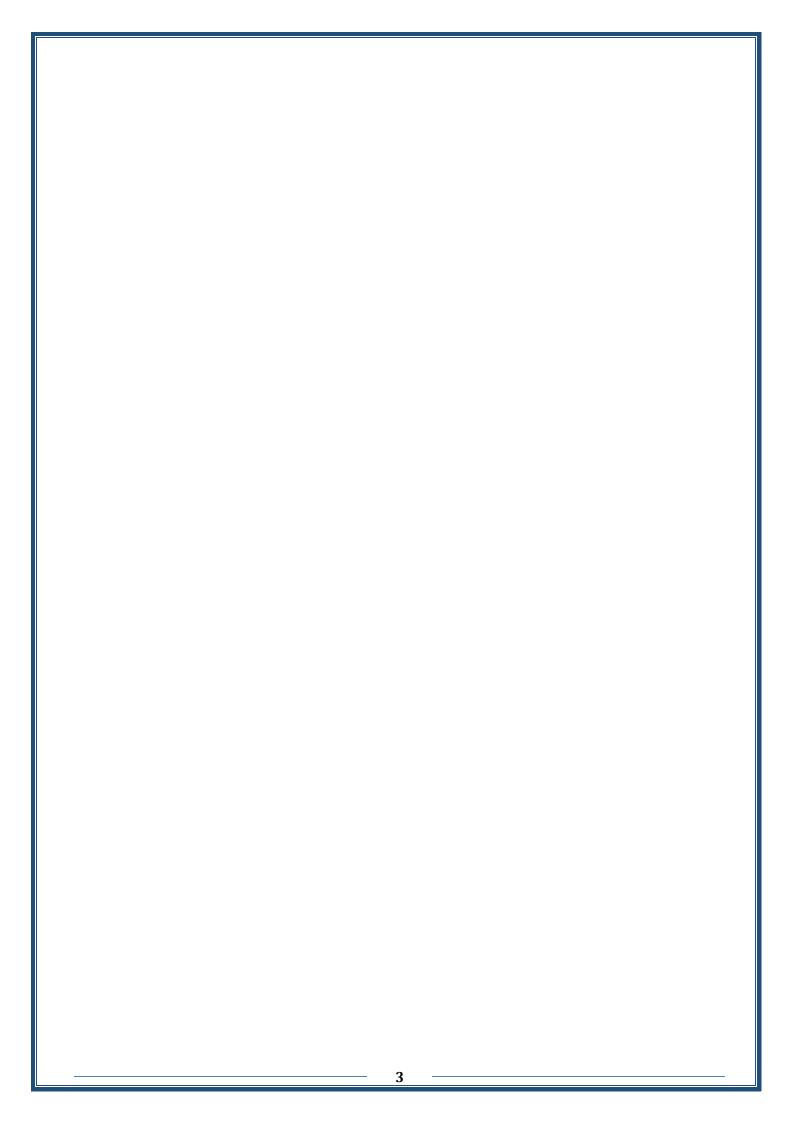

Cooperative learning strategy
Practical simulation demonstration

| Week | Hours | Required Learning Outcomes           | Unit or subject      | Learning        | Evaluation       |

#### 8. Course Objectives

#### **Course Objectives**

- •Introducing the student to the subject of practical organic diagnosis in general
- •Introducing the student to the laboratory equipment and tools he uses
- •Informing the student about the danger of chemical materials and how to deal with them safely
- •Introducing the student to the basic steps for diagnosing an organic compound
- •Introducing the student to how to diagnose a compound laboratory and using chemical tests.

#### 9. Teaching and Learning Strategies

#### Strategy

•Working in the laboratory by diagnosing an unknown compound and using special detec •Linking scientific material between theory and practice

#### 1. Course Name:

Organic diagnosis /fourth stage /Chemistry Department

2. Course Code:

#### EDCH24F4041

#### 3. Semester / Year:

#### 2023-2024

### 4. Description Preparation Date:

#### 1/9/2023 - 31/8/2024

#### 5. Available Attendance Forms:

Regular attendance

#### 6. Number of Credit Hours (Total) / Number of Units (Total)

2 hours per week / 40 total / 7 units

# 7. Course administrator's name (mention all, if more than one name)

Name: Hadil Samir. Aziz

Email: Hadilsamir1977@uomosul.edu.iq

Name: Intisar Qahtan Mahmood

Email: mahmood intisar@uomosul.edu.iq

#### 8. Course Objectives

#### **Course Objectives**

Introducing the student to organic diagnostics and how to diagnose organic compounds

Introducing the student to the infrared spectrum and how to interpret the spectrum of organic compounds

Introducing the student to the devices used to measure the infrared spectrum

Introducing the student to the ultraviolet spectrum and how to calculate wavelengths. Introducing the student to how to diagnose organic compounds using NMR spectroscopy and what the device used is made of

Introducing the student to how to solve problems to find the unknown compound.

#### 9. Teaching and Learning Strategies

#### **Strategy**

Theoretical lecture, discussion, homework, presenting examples and questions and solving them.

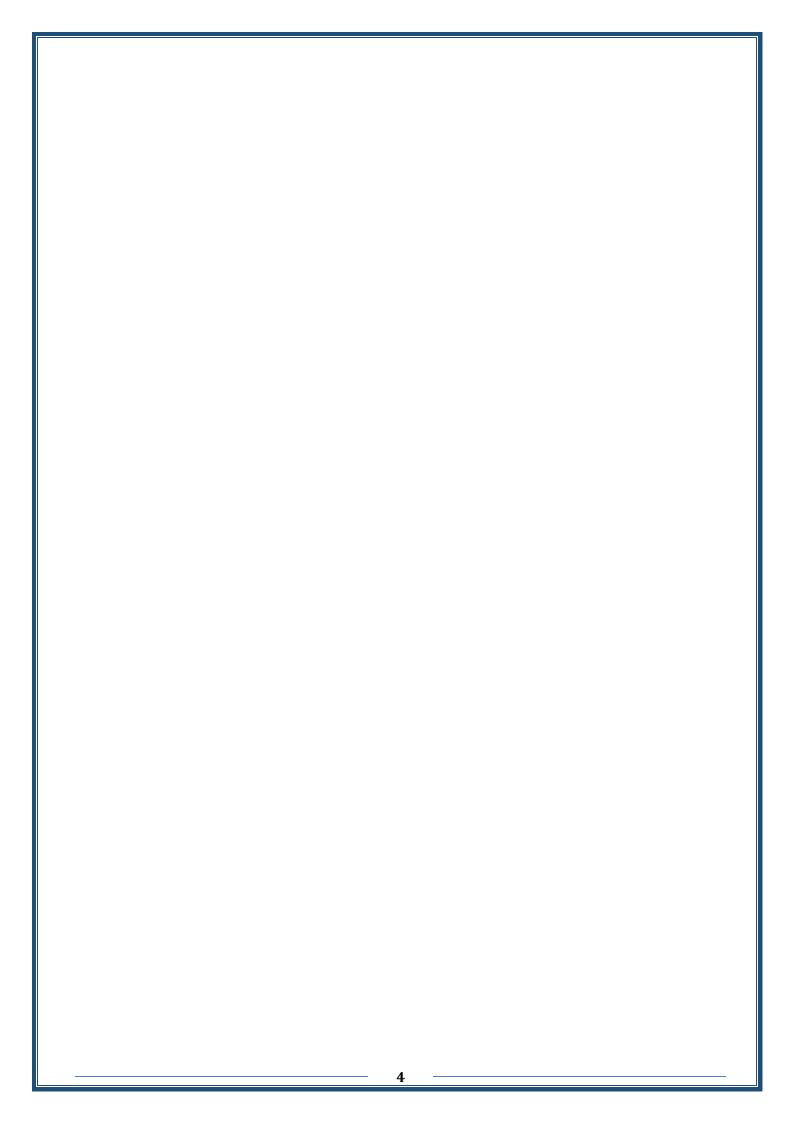

| Week | Hours | Required Learning   | Unit or subject name                                       | Learni<br>ng<br>method | Evaluation<br>method       |
|------|-------|---|--|------------------------|----------------------------|
| 1    | 2     | Knowledge of spectrum science   | General introduction to spectrum                           | Lecture                | discussion                 |
| 2    | 2     | Definition of infrared spectrum   | Infrared spectrum  | Lecture                | Discuss and solve examples |
| 3    | 2     | Know the most important effective groups  | Spectrum data analysis                                     | Lecture                | Daily exam                 |
| 4    | 2     | me information about the location of absorption bands of aromatic rings             | Aromatic rings   | Lecture                | homework                   |
| 5    | 2     | Some information about the location of absorption bands for carbonyl compounds      | Carbonyl compounds   | Lecture                | discussion                 |
| 6    | 2     | Factors affecting the stretching frequency of the carbonyl group                    | Carbonyl compounds   | Lecture                | discussion                 |
| 7    | 2     | Absorption bands for carboxylic acids and their derivatives                         | Carboxylic a<br>and t<br>derivatives                       | Lecture                | Oral questions             |
| 8    | 2     | Expected absorption bands for amine compounds and their derivatives                 | Amines and r compounds                                     | Lecture                | Solve<br>examples          |
| 9    | 2     | Expected absorption bands for ethers and phenols                                    | Ethers and phenols   | Lecture                | discussion                 |
| 10   | 2     | Interpreting the spectra of different compounds                                     | General Review   | Lecture                | Daily exam                 |
| 11   | 2     | Spectra of the ultraviolet spectrum   | Electronic transfers                                       | Lecture                | discussion                 |
| 12   | 2     | The effect of ultraviolet radiation on organic compounds                            | UV spectrum for organic vehicles                           | Lecture                | discussion                 |
| 13   | 2     | The effect of sequence, solvent, and vacuum obstruction on the ultraviolet spectrum | Factors affecting packages in the UV spectrum spectrum     | Lecture                | discussion                 |
| 14   | 2     | Introducing the student to the basics of these rules                                | Wood-widow rules<br>for the wavelength of<br>the debts     | Lecture                | Solve<br>examples          |

### 8. Course Objectives

| Course Objectives | 1-Clarifying the concept of polymers and plastics                       |
|-------------------|---|
|                   | 2- Comparison of types of polymers based on different classifications.  |
|                   | 3- Description of different types of polymers, their specifications and |
|                   | applications.   |
|                   | 4- Describe the techniques and mechanisms used to produce plastics      |
|                   | 5- Identifying dyes and how they work.                                  |
|                   | 6-Identify polymeric fibers, their types and applications               |
|                   | 7- Polymeric applications in various fields                             |
|                   | 8- The mechanism of action of soap and detergents and their production  |
|                   | methods   |

| 8. Course Objectives  |  |  |  |  |
| Course Objectives 1. Teaching students how a living cell works  |  |  |  |  |
| 2. Metabolism of carbohydrate, fats, proteins, and amino acids are catabolism and anabolism.  |  |  |  |  |
| 3. How to obtain energy   |  |  |  |  |
| 4. Forms of bio-energy  |  |  |  |  |
| <ul><li>5. Nucleic acid replication and transform of genetic information</li><li>6. Mutations, how they occur, and the possibility of avoiding them</li></ul> |  |  |  |  |
| 9. Teaching and Learning Strategies   |  |  |  |  |
| Strategy Giving the lectures and can use of all capabilities available in the classroom.  |  |  |  |  |
| The method of discussion and conclusion is also followed, and intellectual  |  |  |  |  |
| questions are asked as assignments.   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |

| weeks | Hours | Required learning outcomes  | Name of the unit/course or subject   | Teaching method | evaluation<br>method               |
|-------|-------|---|--|-----------------|------------------------------------|
| 1     | 2     | The concept of life energy  | Bio-energy, its transmission and transformations, energy and living organisms, enthalpy, entropy, and free energy.   | Lecture         |                                    |
| 2     | 2     | Knowledge of important biological compounds   | Phosphate compounds with high and low energy.  | Lecture         |                                    |
| 3     | 2     | The role of some important energy compounds   | Oxidation and reduction reactions, reduction potential - activation energy.  | Lecture         |                                    |
| 4     | 2     | Learn about the concept of metabolism in the body   | The role of ADP and ATP in transferring phosphate energy.  | Lecture         |                                    |
| 5و 6  | 4     | Learn important system pathways   | Transferring energy as a reduced power.  | Lecture         |                                    |
| 7و 8  | 4     | Completion of the concept of the metabolic pathway  | Definition of metabolism, digestion of carbohydrates in the mouth, stomach and small intestine, absorption of carbohydrates.   | Lecture         |                                    |
| 9     | 2     | Important biochemical cycles  | <ul> <li>Tricarboxylic acid cycle (Krebs cycle).</li> <li>General features of the course.</li> <li>Sources of fueling the Krebs cycle.</li> <li>Organizing the Krebs cycle.</li> <li>Clyoxyaltide cycle.</li> </ul>  | Lecture         |                                    |
| 10و11 | 4     | - The pentose/phosphate sugar pathway (phosphogluconate pathway) - The importance of the sugar pentaphosphate pathway.  Important secondary metabolic pathways  - Electron transfer and oxidative phosphorylate components that participate in the process of electron transfer and oxidative phosphorylate - Energy transformations in aerobic and anaeroxidation of sugar: the energy resulting from total oxidation of glucose |  | Lecture         | Quizzes<br>and<br>monthly<br>exams |
| 12    | 2     | Energy transfer between components in the cell  | <ul> <li>Entry of cytoplasmic NAD-H into mitochondria.</li> <li>Mallet shuttle.</li> <li>Glycerol phosphate shuttle</li> <li>Glycogenolysis - glucose generation and regulation.</li> <li>Synthesis of lactose and sucrose from glucose pyridine diphosphate.</li> </ul> | Lecture         |                                    |
| 13    | 2     | Lipds   | <ul> <li>Functions of fats, digestion and decomposition of fats.</li> <li>Oxidation of fatty acids, beta oxidation, oxidation of fatty acids with an individual number of carbon atoms.</li> </ul>   | Lecture         |                                    |
| 14و15 | 4     | The concept of biosynthesis of lipids   | <ul> <li>Steps in the biosynthesis of fatty acids, elongation of fatty acids</li> <li>Biosynthesis of triglycerides.</li> <li>Biosynthesis of phosphorylated glycerides.</li> </ul>  | Lecture         |                                    |
| 16و17 | 4     | Cholesterol compounds<br>that are important in life<br>and the relationship<br>between metabolic<br>pathways  | <ul> <li>Biosynthesis of sterol compounds and regulation of the cholesterol biosynthesis process.</li> <li>The life processes of ketone bodies.</li> <li>The relationship between carbohydrate metabolism and fat metabolism</li> </ul>                                  | Lecture         |                                    |
| 18و19 | 4     | What are proteins and how are they digested?  | - Digestion and absorption of protein Amino acid metabolism, amino acid transfer,  | Lecture         |                                    |

|        |   |  | amino group transfer, deletion of the amino group, deletion of the carboxyl group.  - The biological catabolism of the carbon skeletons of amino acids by the Krebs cycle.  - Genetic reductases for catabolism of some amino acids (phenylalanine and thyrosine).  - Elimination of excess nitrogen and the urea cycle.  - Biosynthesis of non-essential amino acids: |         |
|--------|---|--|--|---------|
| 20و 21 | 4 | Amino acids and their role in life processes in the living cell                | glutamic acid, ketamine, proline, alanine, aspartic acid, asparagine, thyrosine, and serine.  - Biosynthesis of the essential amino acids methionine, isoleucine, tryptophan, and histidine.  - Biological composition of porfarin.  - Biosynthesis of creatine and creatine.  | Lecture |
| 22     | 2 | Nucleic acids and their role in transmitting genetic information and mutations | -Deoxyribose DNA and molecular genetics - Chromosomes and genes (definition and functions) and definition of chromatin. DNA replication, the mechanism of DNA replication, breakage and repair   | Lecture |
| 23     | 2 | The concept of mutations   | <ul> <li>Genetic mutations and the factors that cause them.</li> <li>Reproduction of genetic information and the biological composition of RNA.</li> <li>The central principle of heredity and genetic function.</li> </ul>  | Lecture |
| 24     | 2 | Protein construction   | <ul><li>Biosynthesis of protein , the necessary basic materials.</li><li>Activation of amino acids on transfer RNA.</li></ul>  | Lecture |
| 25     | 2 | Protein construction and biological regulation                                 | <ul><li>Steps to build protein.</li><li>Regulating protein biosynthesis.</li><li>Protein synthesis inhibitors</li></ul>  | Lecture |

The grade is distributed out of 100 as follows: 25 marks for the mid-year exam / then 60 marks for the end-of-year exam / the teacher's grade within the lecture is 15 marks, 5 of which are commitment and perseverance, 5 are daily exams, and the last 5 are given as an activity and motivation to the students, including discussion and preparation, in addition to completing some homework.

3. Term / Year

First and Second Semester/2024

4. Description Preparation Date:

#### 1/9/2023

5. A. Available Attendance Forms

Daily working hours (in presence)

6. Number of Credit Hours (Total) / Number of Units (Total)

There are two groups A,B (each group consists of three divisions ), that is, the number of hours both groups per week = 6.....Down below the

Month=6\*4 weeks=24 hours

7. Course administrator's name (mention all, if more than one name)

Name: Eng. Eng. Maysa Mohammed Qasim ... Email Maisaa.mohammed@uomosul.edu.iq

### 8. Course Objectives

| <b>Objectives</b> | of | the | course | : |
|-------------------|----|-----|--------|---|
|-------------------|----|-----|--------|---|

Part no. (1)

- 1- Introducing the student to the meaning of measurem and evaluation.
- 2-Identifying the most important measure and achievem tests.
- 3. Clarify the relationship between measurement, evaluat and testing.
- 4-Identifying the specification table.
- 5-Clarifying the types of achievement tests.
- 6-Identifying the most important determinants of knowled goals.
- 7. Comparison of target types.
- 8. Draw a diagram showing my cognitive goals?
- 9. Classification of behavioral purposes.
- 10-Learn the basic rule of writing behavioral purposes. Section II:
- 1- Learn about the concept of measurement and evaluation
- 2- Clarify the specification table.
- 3- Give examples of the specification table associated we the objectives
- 4- Cognitive and its characteristics.
- 5- Give examples of ease and difficulty.
- 6- Recognize the importance of measurement achievement tests which is related to students' abilities, tendencies, readiness.
- 7- Classification of achievement tests.

|  |       |   | 8- Detailed explanation attachments Illustrative models o            | _                  | ation table with so             |  |
|--|-------|---|--|--------------------|---------------------------------|--|
| 9. TEACHING AND LEARNING STRATEGIES  |       |   |  |                    |                                 |  |
| Strategy lecture, discussion and dialogue, Google classroom, problem-solving, Advanced lecture, cooperative learning, educational games, brainstorm questioning. |       |   |  |                    |                                 |  |

2. Course Code:

EDCH24 M4141

3. Semester / Year:

1<sup>st</sup> & 2<sup>nd</sup> semesters – 2023/2024

4. Description Preparation Date:

1/9/2023

- 5. Available Attendance Forms:
- 6. Number of Credit Hours (Total) / Number of Units (Total) 72 Hour
- 7. Course administrator's name (mention all, if more than one name)

Name: Prof. Mahmood Abdul-Salam Al-Hafidh, Dr. Waad Ghanim

Email: dr.mahmood.hafidh@uomosul.edu.iq

#### 8. Course Objectives

The course aims to make the student able to:

- 1. Helping the student to identify the components of the school and institutional system, and the integrated interaction between these components .
- 2. Gain a true understanding of his abilities and professional qualities, and work to develop them to the greatest extent possible.
- 3. Linking theory and application by putting into practice what the student learned in the theoretical aspect of the courses studied at the college.
- 4. Testing the extent to which the student teacher and trainee masters the scientific subject he is teaching and training in, and the extent of his ability to develop it during the education and training process and thus increase understanding of the subject of specialization.
- 5. Respecting the teaching profession and the services related to it, appreciating its employees, and forming positive attitudes towards it .
- 6. Helping the student to acquire the professional competencies that will enable him to perform his work successfully in the field of personal qualities, teaching, training, evaluating student growth, and diversity in educational activities that interest students.

#### 9. Teaching and Learning Strategies

Strategy

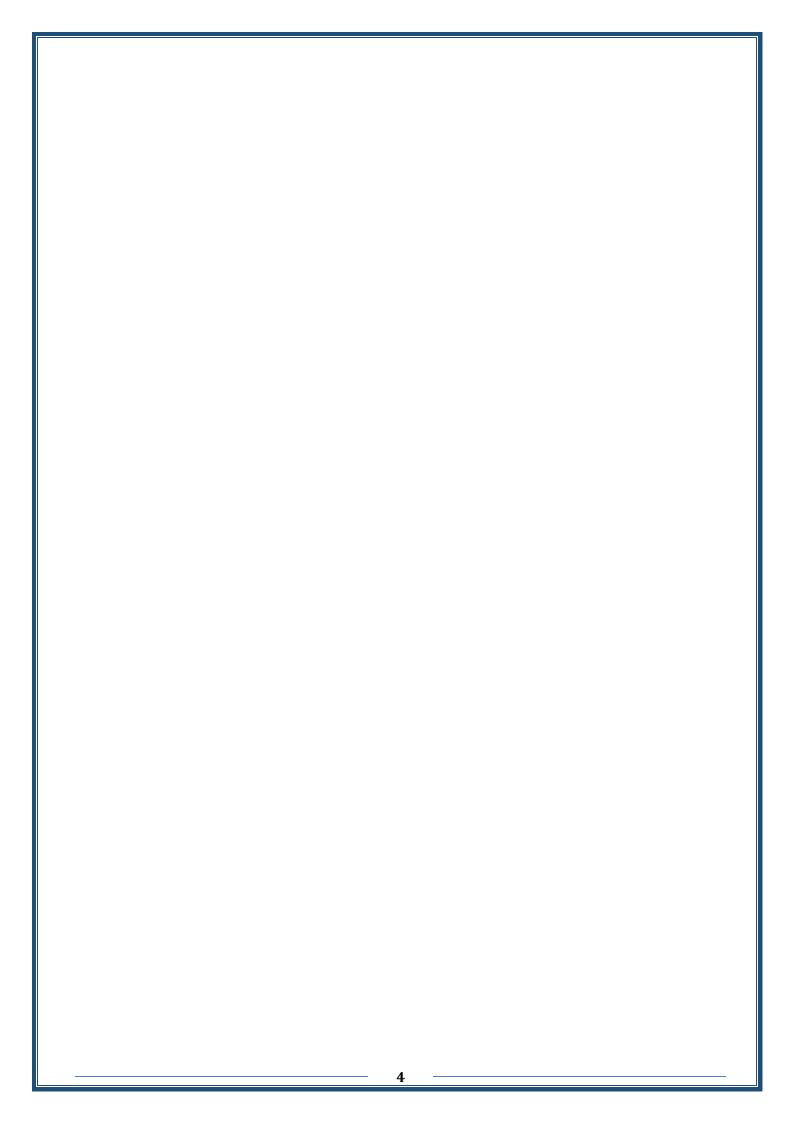

Discussion and brainstorming strategies are combined, as well as cooperative learning and problem solving using appropriate examples.

| Week | Hours                                  | Required Learning<br>Outcomes | Unit or subject name      | Learning<br>method  | Evaluation method |

| G OIL                | Email: <u>drmohammadalhusseiny@uomosul.edu.iq</u>   |  |  |  |  |  |  |
| Course Object        | <u>tives</u>  |  |  |  |  |  |  |
| Course<br>Objectives | 1. Identify the principles and basics of the English language in terms of grammar, translation, pronunciation, spelling, and their relationship to the sciences of chemistry.                           |  |  |  |  |  |  |
|                      | 2. Introducing students to the topics that will benefit them in their specialty (chemistry), in terms of  |  |  |  |  |  |  |
|                      | chemical terminology and topics, as well as writing and translating chemical research, to be a basis for them after graduation or when they complete their postgraduate studies (Master's and Ph.D.).   |  |  |  |  |  |  |
|                      | 1- Teaching and Learning Strategies   |  |  |  |  |  |  |
| Strategy             | This semester is known as a theoretical course that provides undergraduate students with  |  |  |  |  |  |  |
|                      | information and concepts about the English language and the extent of its application and benefit in  |  |  |  |  |  |  |
|                      | the specialty (chemistry), so that it enables students to confront and understand practical problems while translating and writing articles and scientific research into and from the English language. |  |  |  |  |  |  |
|                      | Subject-specific skills are:  |  |  |  |  |  |  |
|                      | 1- Providing the student with scientific knowledge in the English language and the extent of its  |  |  |  |  |  |  |
|                      | application and benefit in the specialty (chemistry).  While evaluation methods include short tests, in addition to dialogues, discussions, and a semester  |  |  |  |  |  |  |
|                      | exam.   |  |  |  |  |  |  |

While thinking skills are achieved through:

- 1- Asking deductive, indirect, and enrichment questions that push the student to think and discuss.
- 2- Urging students to link the topic to their specialization.

As for general and transferable skills (other skills related to employment and personal development): the optimal use of general theoretical principles and concepts in the English language and their relationship to chemistry.

| Week | Hours | Required<br>Learning<br>Outcomes                                    | Unit or subject name   | Learning method        | Evaluation method  |
|------|-------|---|--|------------------------|--|
| 1    | 2     | Acquire knowledge in the field of the English language.             | Irregular verbs, Parts of speech, and paragraph on the topic (The difference between ethanol and methanol).  | A theoretical lecture. | Short exams, scientific discussion, direct dialogue, and homework. |
| 2    | 2     | Acquire knowledge in the field of the English language.             | Irregular verbs, The sentence in English, and paragraph on the topic (Water purification).                   | A theoretical lecture. | Short exams, scientific discussion, direct dialogue, and homework. |
| 3    | 2     | Acquire<br>knowledge in the<br>field of the<br>English<br>language. | Irregular verbs, The statement: Sentence and Phrase, and paragraph on the topic (Quantum chemistry).         | A theoretical lecture. | Short exams, scientific discussion, direct dialogue, and homework. |
| 4    | 2     | Acquire<br>knowledge in the<br>field of the<br>English<br>language. | Irregular verbs, Helping and Auxiliary Verbs, and paragraph on the topic ( <b>The WOOD</b> ).                | A theoretical lecture. | Short exams, scientific discussion, direct dialogue, and homework. |
| 5    | 2     | Acquire<br>knowledge in the<br>field of the<br>English<br>language. | Irregular verbs, Wh-/How questions, Tag question, and paragraph on the topic (Schiff bases and Azo dyes).    | A theoretical lecture. | Short exams, scientific discussion, direct dialogue, and homework. |

# University of Mosul\ College of Education for Pure Science\ Department of Chemistry

### **Course Description Form**

#### 1. Course Name:

### 4<sup>th</sup> Class, Quantum Chemistry

2. Course Code:

#### **EDCH24 M4031**

3. Semester / Year:

1\9\2023-30\6\2024

4. Description Preparation Date:

1\9\2023

5. Available Attendance Forms:

#### **Class Attendance**

6. Number of Credit Hours (Total) / Number of Units (Total)

#### 24 Hours

7. Course administrator's name (mention all, if more than one name)

Name: Prof Assis, Dr. Ahmed M. Sadoon

Email: ams95@uomosul.edu.iq

8. Course Objectives

#### **Course Objectives**

- 1. Some basic concepts and foundations of Classical mechanics
- 2. Coordinate systems, complex numbers, acceptable wave functions,

Newton's law of motion

- 3. Reasons of quantum mechanics appearance.
- 4. Black body radiation, the photoelectric effect, spectral lines of atoms, Rutherford-Bohr model of atoms
- 5. Basics of quantum mechanics
- 6. Assumptions of quantum mechanics, orthogonality and harmonicity,
- Schrödinger equation, particle in a box, harmonic oscillator
- 7. Applications of the Schrödinger equation

#### 9. Teaching and Learning Strategies

#### **Strategy**

#### 1. Definition of the course

Quantum chemistry is considered one of the important and necessary courses to understand the theoretical physical foundations of chemical reactions and helps develop students' understanding of how to understand chemical reactions by linking three sciences: chemistry, physics, and mathematics.

#### 2. Subject-specific skills

Quantum chemistry provides a rare opportunity to understand and explain many natural phenomena and understand the theoretical foundations of the concept of binding an electron to an atom.

#### 3. Thinking skills

Thinking about how to benefit from the vocabulary of matter and linking scientific materials to the foundations of quantum chemistry in daily life.

#### 4. General and transferable skills

How to link the subject of quantum chemistry to explain natural and physical phenomena in a scientific manner and on precise theoretical mathematical foundations

#### 5. Teaching and learning methods

- 1. Discussion, analysis and mathematical derivations
- 2. Daily assignments, daily and monthly exams, a mid-year and final exam

### 3. The lecture style

### **6. Evaluation methods**

Sudden daily exams, monthly exams, attendance and class interaction

| 1   | 0 | ). ( |    | _  |   |   | ~ ~ | C | ۱. |   |   | _ | ۷. |   |     |

- 1. Course Name: Analytical chemistry/Elective
- 2. Course Code: EDCH24M4071
- 3. Semester / Year: 2023-2024
- 4. Description Preparation Date: 1/9/2023
- 5. Available Attendance Forms: Class, classroom
- 6. Number of Credit Hours (Total) / Number of Units (Total) 30 Hours
- 7. Course administrator's name (mention all, if more than one name)

Name: Mohamed Yahya dhamra Al-mashaykhi Email: mohameddhamra@uomosul.edu.iq

#### 8. Course Objectives

#### **Course Objectives**

- Learn about analytical chemistry and quantitative analysis methods
- Learn about volumetric analysis and its types of reactions
- Identify methods for calculating direct and indirect titrations used in volumetranalysis
- Estimating the number of negative and positive ions by titrations
- Estimation of a specific ion within a mixture
- Identify the statistical methods used in evaluating analytical methods

#### 9. Teaching and Learning Strategies

#### **Strategy**

Theoretical and practical lecture, dialogue and discussions, problem solving, conducting practical experiments, reports and daily assignments

| Week   | Hours   | Required Learning<br>Outcomes                         | Unit or subject name                   | Learning method | Evaluation method |
|--------|---------|---|--|-----------------|-------------------|
| First  | AN Hour | Learning about classification of analytical chemistry | classification of analytical chemistry | Lecture         | Quizzes           |
| Second | AN Hour | Learning about Volumetric analysis                    | Volumetric analysis and its types      | Lecture         | Quizzes           |
| Third  | AN Hour | Learning about Calculations in Volumetric analysis    | Calculations in volumetric analysis    | Lecture         | Quizzes           |
| Fourth | AN Hour | Learning about calculation of concentrations          | Calculation of concentration           | Lecture         | Report            |

| Fifth      | AN Hour | Learning how Calculate concentration directly              | Calculate concentration directly             | Lecture | Quizzes |
|------------|---------|--|--|---------|---------|
| Sixth      | AN Hour | Learning about calculations of Indirect concentration      | Calculate concentration indirectly           | Lecture | Quizzes |
| Seventh    | AN Hour | Learning about Determination of positive ions by Titration | Determination of positive ions by Titration  | Lecture | Quizzes |
| Eighth     | AN Hour | Learning about Determination of negative ions by Titration | Determination of negative ions by Titration  | Lecture | Quizzes |
| Ninth      | AN Hour | Learning about solved problems                             | Solved problems in volumetric analysis       | Lecture | Quizzes |
| Tenth      | AN Hour | Learning about solved problems                             | supplement                                   | Lecture | Quizzes |
| Eleventh   | AN Hour | Ability to figure out ion in mixture                       | Determination of positive ion in the mixture | Lecture | Quizzes |
| Twelfth    | AN Hour | Ability to figure out ion in mixture                       | Determination of negative ion in the mixture | Lecture | Quizzes |
| Thirteenth | AN Hour | Ability to solve problems                                  | Statistics Used in chemistry                 | Lecture | Quizzes |
| Fourteenth |         | Ability to solve problems                                  | Statistical evaluation                       |         |         |
| Fifteenth  | AN Hour | Exame  | Exame  | Lecture | Exame   |

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

| 12.Learning and Teaching Resources |
|------------------------------------|
|------------------------------------|

| $\mathcal{E}$                 |  |

Name:qaidar salim jarjees

Email: qaidarsalim406@uomosul.edu.iq

#### 8. Course Objectives

#### **Course Objectives**

- 1- The student will be familiar with the basics of choosing chemical reactions
- 2- The student's knowledge of chemical technology
- 3- Identify the types of chemical manufacturing processes
- 4- The student's knowledge of catalysts, their various types, and the catalytic processes sed u in industry
- 9. Teaching and Learning Strategies

#### Strategy

The lecture and discussion methods are combined

2. Course Code: 4111

3. Semester / Year: 2023-2024

4. Description Preparation Date: 1/9/2023 - 31/8/2024

5. Available Attendance Forms: in presence

6. Number of Credit Hours (Total) / Number of Units (Total) 36 / 2

### 7. Course administrator's name (mention all, if more than one name)

Name: Dr. Akram Abdulqader Mohammed Email: akramsaleem22@uomosul.edu.iq

#### 8. Course Objectives

- 1)Reminding the students of the Importance of the main and inner Transition elements and their distinctive Properties.
- 2)The student obtains knowledge of the Electronic configuration of the various Types of transition elements and their Different oxidation states.
- 3)The student gains knowledge in the magnetic and spectral properties for transition elements and their compounds.

- 4) In order for the student to gain information about the different applications of transitional elements in various aspects of life.
- 5) The ability to differentiate Between lanthanides and actinides And the differences between them And the main transition elements.
- 6) obtaining knowledge in the Coordination numbers of lanthanides

9. Teaching and Learning Strategies

#### **Strategy**

- 1)In-person lectures(enhanced by means of explanation)
- 2) Continuous discussion with students.
- 3) Presenting problems, collecting solution with students and thinking to determine the correct one.
- 4) Ask questions which are available in references.
- 5) Preparing the student to recall his mental reserves related

To the new subject.
6) Connecting learning to the aspects of life.
