Program Educational Objectives (PEOs)

B.Sc. Program in Computer Engineering

The B.Sc. Program in Computer Engineering, including its various components, has been reviewed and developed through a series of successive meetings. The Program Educational Objectives (PEOs) of the B.Sc. Program in the Department of Computer Engineering are as follows:

1. Graduates will possess the engineering knowledge and skills necessary to advance their careers in the field of computer engineering.

2. Graduates will apply creative and innovative knowledge to meet the needs of society.

3. Graduates will establish themselves as competent practicing engineers in the field of computer engineering.

4. Graduates will demonstrate a strong commitment to continuous lifelong learning and the pursuit of advanced education. Graduates will uphold the principles of academic integrity and scholarly ethics by maintaining academic credibility and authenticity, avoiding plagiarism, fabrication, falsification, and other forms of academic misconduct, demonstrating originality in their academic and research work, appropriately acknowledging and citing sources, respecting intellectual property rights and copyright, and adhering to recognized ethical standards in research, education, and professional practice.
