<b>Other external influences</b>	The job market: Several seminars and discussions have been held on academic and technical content with universities and colleges that offer related specialties through collaborative mechanisms that facilitate communication between faculty and students for the purpose of developing a common vision and formulating plans for the general enhancement of academic content and, specifically, technical content.
<b>Date the description was prepared</b>	2022
Goals of Academic Program	
<p>The academic program aims to graduate students in the field of theatrical arts and prepare them for the following:</p> <ol style="list-style-type: none"> <li>1. Proficiency in working in fields that require the presentation of theatrical performances and informative and educational videos, both in educational institutions.</li> <li>2. Capability to contribute to the development of the electronic government infrastructure and assist in overcoming potential technical issues.</li> </ol>	

<b>Outcomes of required program and methods of teaching, learning, and assessment.</b>
<p>Cognitive Objectives:</p> <p>1- Acquire knowledge and understanding of the concepts of acting, directing, voice acting, as well as theatrical costumes, lighting, set design, and makeup.</p> <p>2- Prepare educational staff for the Ministry of Education and other related ministries, such as the Ministry of Culture, public institutions, and media units.</p>
<b>Methods of Assessment</b>
<p>The educational activities and assessments in the Department of Theatrical Arts include:</p> <ul style="list-style-type: none"> <li>• Small research projects.</li> <li>• Study circles.</li> <li>• Academic discussions.</li> <li>• Oral dialogues.</li> <li>• Daily, midterm, and final examinations.</li> <li>• Homework assignments.</li> <li>• Writing and presenting regular and weekly practical reports.</li> <li>• Watching and analyzing scientific, Arabic, and local theatrical performances.</li> <li>• Developing critical thinking skills.</li> <li>• Presenting global and research-related issues to encourage students to think about possible solutions.</li> <li>• Encouraging the development of scientific and research skills and motivating students to engage in critical thinking before moving on to practical aspects.</li> <li>• Examinations aimed at motivating students towards further study and increasing their scientific and technical knowledge.</li> </ul>
<b>Methods of teaching and learning</b>
<ul style="list-style-type: none"> <li>• Achieving these objectives is done through theoretical and oral testing of students, as well as classroom and laboratory activities that expose them to previous works and experiments.</li> <li>• Presenting a case study or graduation project, where students provide a description including both factual and artistic information about a specific problem, and they are asked to critique some performances or theatrical texts, diagnose the problem, and describe the correct scientific solution to stimulate students' motivation to respond.</li> <li>• Field information is obtained during summer training, as well as behavioral observations during the training period. The use of modern techniques and workshops to present and address a problem is encouraged. Students are asked to process, improve, or develop it, and they are also encouraged to take notes and engage in scheduled comparisons, for example.</li> <li>• The graduation project requires students to analyze some performances or theatrical texts, diagnose the problem, and describe the correct scientific solution to stimulate students' motivation to respond.</li> </ul>
