## **Introduction**

The educational program is a coordinated and structured set of courses that encompasses a range of procedures and learning experiences, systematically organized into course components. Its primary objective is to develop and enhance graduates' skills, enabling them to meet the requirements of the labor market. The program is subject to annual review and evaluation through internal and external quality assurance mechanisms, including processes such as the external examiner system.

The academic program description provides a concise overview of the program's key features and its courses, highlighting the skills that students are expected to acquire in alignment with the program's objectives. The significance of this description lies in its role as a fundamental requirement for obtaining program accreditation. It is prepared by faculty members under the supervision of the scientific committees within academic departments.

This second edition of the guide presents an updated description of the academic program, incorporating revisions to the terminology and structure of the previous edition in response to recent developments in the Iraqi higher education system. These updates include both the traditional formats of academic programs (annual and semester systems) and the adoption of a unified academic program description in accordance with the Department of Studies letter No. TM3/2906 dated 03/05/2023, particularly for programs implementing the Bologna Process as a framework for their operation.

In this context, it is essential to emphasize the importance of preparing accurate descriptions of academic programs and courses to ensure the effective and efficient implementation of the educational process.

## **Concepts and Terminology**

### **Academic Program Description:**

A concise summary outlining the program's vision, mission, and objectives, including a clear specification of the intended learning outcomes in accordance with defined learning strategies.

### **Course Description:**

A brief summary of the key features of a course and its expected learning outcomes, demonstrating the extent to which students benefit from the available learning opportunities. It is derived from the academic program description.

### **Program Vision:**

An aspirational statement reflecting the future ambitions of the academic program, aiming to be advanced, inspiring, motivating, realistic, and applicable.

**Program Mission:**

A concise statement that defines the program's goals and the activities required to achieve them, while identifying its developmental directions and pathways.

**Program Objectives:**

Specific, measurable, and observable statements that define what the academic program intends to achieve within a defined timeframe.

**Curriculum Structure:**

The set of all courses and study units included in the academic program in accordance with the approved educational system (semester, annual, or Bologna Process), including both compulsory and elective components at the levels of the Ministry, University, College, and Department.

**Learning Outcomes:**

An integrated set of knowledge, skills, and values acquired by students upon successful completion of the academic program. Each course must define its learning outcomes in a manner that aligns with and supports the overall program objectives.

**Teaching and Learning Strategies:**

The approaches and methods employed by faculty members to facilitate and enhance student learning. These strategies include structured plans and activities—both in-class and extracurricular—designed to achieve the intended learning outcomes of the program.

**1. 1. Program Vision**

1. Preparing artists equipped with broad knowledge and a scientific and artistic approach to thinking and analysis, in order to serve the nation and meet the requirements of comprehensive national development through achieving a balanced advancement in both the theoretical and practical aspects of the arts.
2. Contributing to the development of creative professional talents capable of enriching civil society with exemplary artistic works that enhance specialized knowledge in artistic creativity and visual expression.

**2. Program Mission**

1. To develop and refine students' talents and motivations, while providing them with a solid foundation of scientific and artistic knowledge.
2. To foster a spirit of creativity and innovation among students throughout their studies and beyond, through workshops, seminars, and continuous support for talented individuals.
3. To encourage artistic experimentation and creative potential, contributing to students' development and growth through active participation in departmental activities such as festivals, art exhibitions, and related events.

### 3. Program Objectives

1. To prepare qualified artists capable of assuming national responsibility and occupying artistic positions across various governmental and institutional sectors
2. To develop a balanced and integrated artistic personality in students—intellectually and behaviorally—by enhancing their talents and fostering creativity and innovation, while drawing on both cultural heritage and contemporary global developments
3. To provide scientific and technical services and consultations in the field of fine arts and contribute to their development, in a manner that reflects and promotes the civilization of Mesopotamia while aligning cultural values with modern perspectives

### 4. Program Accreditation

Not available.

### 5. Other External Influences

#### Labor Market:

A number of seminars and discussions have been conducted with universities and colleges offering similar specializations. These activities are based on collaborative mechanisms that facilitate communication between faculty members and students, aiming to establish a shared vision and develop plans to enhance both academic and artistic content.

### 6. Program Structure

Program Structure	Number of Courses	Credit Units	Percentage	Comments
Institutional Requirements	9	18	21.43%	
College Requirements	8	16	19.05%	
Department Requirements	21	48	50%	
Summer Training	—	—	—	
Other	—	—	—	

*Comments may include whether the course is core or elective.*

### 8. Expected Learning Outcomes

#### Knowledge

Understanding the historical development of art, familiarity with art movements and schools, knowledge of aesthetic theories, critical thinking in art, awareness of the role of art in society and culture, engagement with global cultures, and knowledge of artistic techniques, materials, composition, design, and modern technologies.

#### Skills

Technical and artistic skills including mastery of drawing techniques, composition and design, creativity and innovation, experimentation, and continuous development.

#### Values

Professional and ethical commitment, appreciation of cultural and artistic heritage, social responsibility, environmental awareness, lifelong learning, and teamwork.

### 9. Teaching and Learning Strategies

#### Teaching and Learning Strategies

- Lectures:**  
 Provide a solid theoretical foundation that supports the development of students' knowledge and intellectual abilities.
- Practical Workshops and Studios:**  
 Offer hands-on experiences that enhance students' technical and artistic skills, while reinforcing the fundamental principles required for executing practical projects in accordance with safety standards.
- Training and Applied Projects:**  
 The Department of Fine Arts emphasizes transforming theoretical and practical knowledge into applied artistic projects, where students present outcomes of their learning through annual exhibitions and artistic activities.

## 10. Assessment Methods

### Assessment Methods

- Short research projects
- Seminars
- Scientific discussions
- Oral presentations and dialogue
- Daily, mid-term, and final examinations
- Homework and assignments
- Preparation and submission of periodic and weekly reports
- Analysis and critique of international, Arab, and local art exhibitions

### Skills Assessment

- Presenting research problems and proposing appropriate solutions
- Encouraging critical thinking and inquiry-based learning
- Enhancing students' motivation through continuous assessment
- Using objective tests to evaluate knowledge, comprehension, and application

### Types of Questions:

- True/False questions
- Multiple-choice questions
- Oral interview questions
- Completion questions

### Practical Assessment Includes:

- Understanding core concepts
- Applying knowledge to analyze data and solve problems

### General and Transferable Skills

- Promoting teamwork and collaboration
- Developing communication skills through artistic presentations
- Enhancing adaptability in practical and creative environments

## 11. Faculty

### Faculty Members

Academic Rank	Specialization	Sub-specialization	Notes	Staff	Lecturers
Lecturer	Fine Arts	Painting		1	
Assistant Professor	Fine Arts	Painting		4	
Lecturer	Fine Arts	Painting		8	
Assistant Lecturer	Fine Arts	Painting		2	1
Assistant Lecturer	Fine Arts	Sculpture			1
Lecturer	Performing Arts	Stage Direction			1
Assistant Professor	Islamic Arts	Manuscripts		1	
Assistant Professor	Manuscript Studies	Textual Criticism		1	
Assistant Lecturer	English Language	Applied Linguistics			1
Assistant Lecturer	Computer Science	Computer Science		1	
Assistant Lecturer	Mathematics	Pure Mathematics			1
Assistant Lecturer	Earth Sciences	Geochemistry		1	
Lecturer	Arabic Language	Literature			1
Lecturer	Public Law	Administrative Law			1
Lecturer	Political Science	International Relations			1
Assistant Lecturer	English Language	English Language			1

### Professional Development

#### Orientation of New Faculty

New, visiting, and part-time faculty members are guided through structured orientation processes at both institutional and departmental levels.

#### Faculty Development

The Department of Fine Arts is committed to continuous improvement and quality enhancement in education and learning outcomes. Key initiatives include:

- Continuous training programs and workshops
- Encouraging participation in conferences, seminars, and exhibitions
- Supporting faculty in achieving higher academic and administrative ranks
- Providing updated academic resources and references
- Ensuring availability of office facilities and internet access

## 12. Admission Standards

The Department of Fine Arts follows the official admission system regulated by the Ministry of Higher Education and Scientific Research.

Applicants are admitted through:

### 1. Direct Admission:

Graduates of Art Institutes, preparatory schools (scientific, applied, literary), vocational schools (agriculture, commerce, industry), applied arts schools, tourism institutes, and gifted students programs.

### 2. Central Admission:

Students admitted through the national centralized admission system.

## 13. Key Sources of Information

- Official curriculum approved by the Ministry of Higher Education and Scientific Research
- Recommendations of quality assurance and accreditation committees
- Specialized academic references
- Faculty expertise and professional experience

#### **14. Program Development Plan**

The Department of Fine Arts adopts a systematic and continuous approach to developing its academic program in alignment with institutional goals and labor market requirements. The development plan includes the following:

- Evaluating both general and specific objectives of the program and ensuring their alignment with the vision and mission of the college and university.
- Reviewing and updating learning outcomes to ensure comprehensive coverage of cognitive, skill-based, and value-oriented competencies required for students.
- Assessing graduates' performance in the labor market and measuring the extent to which their skills correspond to market needs.
- Identifying areas requiring development, whether related to curriculum content, teaching methodologies, or academic and artistic activities.
- Periodically reviewing curricula to ensure alignment with modern technologies, contemporary artistic trends, and evolving labor market demands.
- Updating learning outcomes to incorporate emerging competencies such as digital art practices, advanced art criticism, and innovative approaches in visual arts production.
- Establishing specialized committees comprising faculty members, academic experts, and labor market representatives to actively contribute to program development.
- Integrating new trends in visual arts into the curriculum, including digital art, environmental art, and experimental artistic practices.
- Adopting modern teaching strategies such as project-based learning, studio-based practice, workshops, and digital learning environments.
- Enhancing assessment methods by incorporating continuous evaluation, practical projects, and critical artistic analysis, rather than relying solely on traditional examinations.
- Organizing training programs and workshops for faculty members to improve their use of modern teaching technologies and methodologies.
- Documenting all modifications made to the program and submitting them to the relevant academic authorities for approval.
- Strengthening collaboration with local and international artistic communities through exhibitions, workshops, and cultural events that enable students to engage with professionals and apply their skills in real-world contexts.

#### Course Objectives .8

,The aim of studying the hamza (glottal stop) is to equip students with the ability to write and spell correctly developing this skill according to spelling rules and connecting language materials to all its branches. Language is a means of communication, translating ideas, fostering understanding, and facilitating interaction among members of society in all spheres of life. Similarly, the study of literary arts and theatrical texts aims to provide a cohesive and interconnected literary form, as well as to familiarize students with the elements of these arts. This helps students .learn, increases their receptiveness to lessons, and cultivates their artistic and aesthetic appreciation

#### Teaching and learning strategies .9

The Arabic language holds great importance in Arab culture, heritage, and literature; it is considered part of Arab civilization and is one of the languages that has maintained its theoretical presence. It has a rich linguistic and grammatical history. This has made its value prominent in art, literature, and speeches, as it is a key to communication between peoples.

Course Structure .10

<b>8- Course Objectives</b>					
Course objectives The course aims to equip the student with the technical skills to create ceramic works, to familiarize them with the ....tools and materials used, and to introduce them to different types of clay					
<b>9- Teaching and learning strategies</b>					
strategy			Practical application in ceramics laboratories		
<b>10- Course Structure</b>					
Week	Hours	Required learning outcomes	Unit or topic name	Learning method	Evaluation Method
1	4		Creating a cone-shaped artwork	The method lies Learning through Direct implementation	
2	4		Make a pencil case using one of the methods we learned in the first chapter: ropes, ribbons , sheets		
3	4		Training the student to create regular , decorative , girly vase shapes		

4	4		The student created an artistic shape and decorated it with . botanical motifs		
5	4		Training the student to make several types of molds		
6	4		Create an artistic shape using a ball mold		
7	4		The student created an artistic piece: a spherical vase with .botanical decoration		
8	4		Make a vase using one of the methods we've discussed previously, combining several . different techniques		
9	4		The student was tasked with making a vase by combining the .action of a ball with some ropes		
10	4		Creating a small mural by drawing on clay		
12	4		Create a simple mural by adding .raised shapes to the artwork		
13	4		He created more than one art form .of different sizes		
14	4		The student was tasked with .making a vase using sheet metal		
15	4		Making a vase using sheets		
1	4		First semester exam		
2	4		Making models using ribbons		
3	4		Completing the work of the models		
4	4		Making a vase using sheet metal and ropes		
5	4		Completing the vase's work		
6	4		Creating murals with artistic themes		
7	4		Completing the mural work		
8	4		Completing the mural work		
9	4		Making a vase with added sculptural shapes		
10	4		Completing the vase's work		

11	4		Making a set of teacups		
12	4		Continuation of the work		
13	4		Making different models		
14	4		Working on the electric wheel		
15	4		exam

**Course Objectives .8**

<b>Course objectives</b>	<p>Teaching basic English grammar rules for building simple sentences -1.</p> <p>2- Increasing the vocabulary of everyday words to enable the student to talk about themselves and their surroundings</p> <p>.Developing basic listening and conversation skills to interact with others easily -3</p> <p>Enhancing confidence in communicating in English and gaining a strong foundation for -4</p> <p>.subsequent levels</p>
--------------------------	---

**Teaching and learning strategies .9**

<b>strategy</b>	<p>.first phase helps students expand their ability to communicate in everyday situations</p> <p>Additionally, it helps Arabic-speaking students adapt to the English alphabet and improve their pronunciation skills.</p> <p>It also contributes to teaching students English language skills and developing them through .modern study</p> <p>of students' general and professional skills, such as skills related to employability and .personal development in the English language</p> <p>.It also contributes to preparing a student with good skills in English writing and reading</p> <p>It contributes to the development of conversation in the English language by listening to some .everyday situations and turning them into assignments</p>
-----------------	---

**Course Structure .10**

<b>Week</b>	<b>Hours</b>	<b>Required learning outcomes</b>	<b>Unit or topic name</b>	<b>Learning method</b>	<b>Evaluation Method</b>
1	2		Grammar: Basic sentence structure, present simple tense, present continuous tense, past simple tense, articles, prepositions, possessive adjectives, and conjunctions.	Interactive learning through activities	,Oral assessment, short tests and term tests
2	2		2- Vocabulary: Basic everyday vocabulary (eg, colors, numbers, family members, basic descriptions, common objects), as well as greetings and basic expressions.	Interactive learning through activities	,Oral assessment, short tests and term tests
3	2		3- Speaking and Listening: Practice through basic conversations and dialogues.	Interactive learning	,Oral assessment, short tests and term tests

			<b>Focus on greetings, introductions, simple questions, and answers about personal information.</b>	<b>through activities</b>	
<b>4</b>	<b>2</b>		<b>4- Reading and Writing: Simple texts on familiar topics, such as personal information, daily routines, and simple descriptions.</b>	<b>Interactive learning through activities</b>	<b>,Oral assessment, short tests and term tests</b>
<b>5</b>	<b>2</b>		<b>5- Grammar: Past continuous tense, simple future tense, comparatives and superlatives, countable and uncountable nouns, basic modals (can, could, would, should), and simple relative clauses.</b>	<b>Interactive learning through activities</b>	<b>,Oral assessment, short tests and term tests</b>
<b>6</b>	<b>2</b>		<b>6- Vocabulary: More everyday vocabulary (eg, food, clothes, jobs, hobbies, time, and dates), as well as useful expressions for everyday situations.</b>	<b>Interactive learning through activities</b>	<b>,Oral assessment, short tests and term tests</b>
<b>7</b>	<b>2</b>		<b>7- Speaking and Listening: More complex conversations and dialogues. Focus on expressing likes/dislikes, preferences, routines, and plans.</b>	<b>Interactive learning through activities</b>	<b>,Oral assessment, short tests and term tests</b>
<b>8</b>	<b>2</b>		<b>8- Reading and Writing: More complex texts on familiar topics, such as personal experiences, opinions, plans, and narratives.</b>	<b>Interactive learning through activities</b>	<b>,Oral assessment, short tests and term tests</b>
<b>9</b>	<b>2</b>		<b>What a wonderful world</b>	<b>Interactive learning</b>	<b>,Oral assessment, short tests and term tests</b>

				through activities	
10	2		What a wonderful world	Interactive learning through activities	,Oral assessment, short tests and term tests
11	2		Wonders of the modern world	Interactive learning through activities	,Oral assessment, short tests and term tests
12	2		Wonders of the modern world	Interactive learning through activities	,Oral assessment, short tests and term tests
13	2		13- Hot verbs/ takes, put, telephone conversation	Interactive learning through activities	,Oral assessment, short tests and term tests
14	2		14- Language focus/going to	Interactive learning through activities	,Oral assessment, short tests and term tests
15	2		EXAM1	Interactive learning through activities	,Oral assessment, short tests and term tests
16	2		Doing the right thing	Interactive learning through activities	,Oral assessment, short tests and term tests
17	2		Doing the right thing	Interactive learning through activities	,Oral assessment, short tests and term tests
18	2		Likes and dislikes	Interactive learning through activities	,Oral assessment, short tests and term tests
19	2		19- Exaggeration and understanding	Interactive learning	,Oral assessment, short tests and term tests

				through activities	
20	2		20 Answering the exercises 19,20,21,22	Interactive learning through activities	,Oral assessment, short tests and term tests
21	2		21- Frequency adverb	Interactive learning through activities	,Oral assessment, short tests and term tests
22	2		22-Reading comprehension skills	Interactive learning through activities	,Oral assessment, short tests and term tests
23	2		23- Countable and uncountable	Interactive learning through activities	,Oral assessment, short tests and term tests
24	2		24-Peer writing (why writers use peer writing)	Interactive learning through activities	,Oral assessment, short tests and term tests
25	2		25- Regular and irregular	Interactive learning through activities	,Oral assessment, short tests and term tests
26	2		26- Risking life and limb/ auxiliary model 2	Interactive learning through activities	,Oral assessment, short tests and term tests
27	2		27- Possessive forms	Interactive learning through activities	,Oral assessment, short tests and term tests
28	2		28- In your dream/ expressions with if	Interactive learning through activities	,Oral assessment, short tests and term tests
29	4		29- Some, any, a lot, a lot of	Interactive learning	,Oral assessment, short tests and term tests

				through activities	
30	4		30- Revision	Interactive learning through activities	,Oral assessment, short tests and term tests

Asst. Lect. Mohammed Tahseen Jamal <a href="mailto:mohammed.m@uomosul.edu.iq">mohammed.m@uomosul.edu.iq</a>					
<b>Course objectives</b>					
The course aims to provide the student with knowledge of the material of sculpture and the methods and techniques used in creating prominent and three-dimensional works of art, as well as for aesthetic and creative purposes that .benefit the student in knowing how to employ the material in artistic productions					
<b>Teaching and learning strategies</b>					
<b>Course structure</b>					
Week	Hours	Required learning outcomes	Unit or topic name	Learning method	Evaluation Method
1	4		introduction to the importance of . the art of sculpture	My work presence	In-person practical exam
2			The importance of materials and .raw materials in sculpture		
3			.Types of sculpture		
4			How to prepare and purify clay .for sculpting		
5			Create a flat, three-dimensional surface from clay with . dimensions: 2cm x 20cm x 30cm		
6			Make a regular rectangular prism .cube from clay		
7			Making regular geometric balls and cylinders from clay material .in different sizes		
8			. regular geometric shapes		
9			A sculpture of the nose only, made .of clay, measuring 20 cm in length		

10			A sculpture of the ear only, made .of clay and measuring 20 cm		
11			A schematic study of lead .deficiency in the palm of the hand		
12			A life-size relief carving of a hand .on a raised clay surface		
13			Sculpting a model of a hand using .clay		
14			Review and preparation for the .first semester exam		
15			Second semester exam		
16			Introduction to sculpting .materials in the second semester		
17			Study and drawing of the Al- .Hadbaa lighthouse		
18			A relief sculpture of the Al-Hadba .minaret		
19			A sculpture of the Al-Hadba .minaret		
20			.Study and drawing of metal coins		
21			.A relief carving of a metal coin		
22			Study and drawing of types of .metal medals		
23			A relief sculpture of a circular medallion with a diameter of 25 .cm made of clay		
24			A prominent profile of a man's .face was carved from clay		
25			A prominent profile carving of a .woman's face made of clay		
26			Sculpt a side view of a child's face .from clay		
27			Sculpting a side view of an old .man's face from clay		
28			Sculpted head of a man ( portrait )		
29			Review and prepare for the .second semester exam		
30			Second semester exam

<b>8.Course Objectives</b>	
Course Objectives	<p>Providing the student with knowledge and knowledge of planning methods and methods used in it through training according to academic study</p> <p>Providing him with the skill of planning, which is useful for him to carry out academic planning work</p> <p>And for aesthetic and creative purposes by employing this article in the implementation of its artistic productions.</p>
<b>9.Teaching and Learning Strategies</b>	
Strategy	<p>1-Send photos and video tutorials for planning methods to increase the student's understanding of different methods In planning and various working techniques.</p> <p>2- Giving extracurricular duties to students to increase their skill abilities.</p>
<b>10.Course Structure</b>	

<b>Week</b>	<b>Hours</b>	<b>Required Learning Outcomes</b>	<b>Unit or subject name</b>	<b>Learning method</b>	<b>Evaluation method</b>
4		Planning	presence /practical	Through his performance in lectures as the material is practical and then through exams	

**Chapter One**

1			Explain the meaning of the art of planning.		
2			Identify practical planning requirements and their uses.		
3			Explain the planning process and prepare the pens (cutting angle) and the types of paper used for planning.		
4			Training the student on the relationships of the shape of lines.		
5			Practice planning variations of a cubic geometric shape.		
6			Practice planning variations of a cubic geometric shape.		
7			Show emotion in the line.		
8			Fabric layout with a pyramidal geometric shape.		
9			Statement of the aesthetic values of the line.		
10			Examination of the above.		

11			Practice training on how to keep the layout clean.		
12			The practice of training on how to fill shadowed areas with a pencil		
13			Sketching irregular geometric shapes with lighting.		
14			Training the student not to distort the sketch by erasing with their hand		
15			First semester exam.		
<b>Chapter Two</b>					
16			Reviewing the training of the student on the relationships between the shapes of lines.		
17			Training the student on continuous, curved, broken, geometric, and random lines.		
18			Training the student on the subject of the jar and how to start sketching it in a simplified way.		
19			Training the student on the relationships between the types of lines and the type of object being drawn.		
20			Sketching a geometric shape with a still life.		
21			Sketching a traditional shape with fabric.		

22			An exam on the previous topics.		
23			Sketching a geometric shape with a traditional shape and illustrating the study of shadow and light.		
24			An intensive study on how to sketch fabric while considering the varying degrees of shading intensity.		
25			A study of shapes from daily life.		
26			A sketch study of a building outside the college.		
27			Sketching of previous topics.		
28			A study of a collection of flowers in a vase with a simplified approach to sketching.		
29			Review and preparation for the second semester exam.		
30			Second semester exam.		

#### Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

Practical exam first semester 45%

Duties 5%

Practical exam second semester 45%

Duties 5%

## Second Stage Course Descriptions

<b>Course Name</b>
Computer Science and Artificial Intelligence Curriculum/Second Stage
<b>Course code</b>
FAPL0202
<b>Semester/Year</b>
First and Second Semesters / 2026-2025
<b>Date this description was prepared</b>
2025/9/1
<b>Available forms of attendance</b>
In-person / Online (via the Classroom platform)
<b>Number of study hours (total) / Number of units (total)</b>
hours: 1 hour theory + 2 hours practical / Number of units (2) 3
<b>.Name of the course coordinator (if there is more than one, please mention it)</b>
:NameAsst. Lect. Ammar Ahmed Othman : Emailammar@uomosul.edu.iq

### Course objectives

Enhancing basic understanding of computers and artificial intelligence -11

Demonstrating computational thinking and problem-solving skills -2

Understanding artificial intelligence applications -3

Developing practical skills -4

Promoting digital culture -5

### Teaching and learning strategies

The strategy for teaching the perspective course is based on an integrated approach that balances the theoretical and applied aspects, in line with the requirements of fine arts programs, and directly serves to develop drawing skills among second-stage students, as perspective is presented as a fundamental constructive tool in organizing pictorial space and dealing with depth and relative relationships within the artwork

The teaching is based on clarifying the basic concepts of geometric perspective through organized explanations supported by illustrations, linking them to practical applications in drawing, which contributes to enhancing visual and analytical understanding among students, and ensures the transfer of knowledge from the theoretical framework to conscious artistic practice

The practical activities are carried out according to a gradual educational sequence, starting with drawing simple geometric shapes according to one-point and two-point perspective, then progressing to dealing with more complex compositions in a way that enhances the student's ability to build the artistic composition correctly from a perspective point of view, while maintaining the expressive dimension of the work

The analysis of selected examples of artworks in classical and contemporary painting is also employed to demonstrate the methods of using perspective in constructing pictorial space, and to show the possibilities of employing or consciously modifying it in a way that serves the artistic vision

Learning outcomes are measured through continuous assessment of practical performance, applied exercises, and graphic projects, with a focus on the extent to which cognitive and skill-based competencies related to constructing perspective space, adjusting proportions, and integrating perspective with graphic composition have been achieved.

### Course structure

Week	Hours	Required learning outcomes	Unit or topic name	Learning method	Evaluation Method
1		Knowledge and understanding Technical skills Using basic software	The concept of networks and their importance in resource exchange	Practical + Theoretical	Practical ,assessment theoretical ,assessment and direct observation
2			Types of networks according to geographical scope(PAN, LAN, MAN, WAN)		
3			,Basic network components (devices, servers (routers, switches		

4			<b>Network security fundamentals and data protection principles</b>		
5			<b>:Network security technologies Firewalls and Encryption</b>		
6			<b>Authentication and methods of combating viruses and malware</b>		
7			<b>Understanding common network threats (eavesdropping and security vulnerabilities)</b>		
8			<b>Network Troubleshooting</b>		
9			<b>Checking the network configuration(IP address, Default Gateway)</b>		
10			<b>The concept of e-commerce and website security standards</b>		
11			<b>Electronic banking and digital payment systems</b>		
12			<b>Banking services: ATMs and electronic payment cards</b>		
13			<b>Mobile banking applications and SMS ( Short Message Service)</b>		
14			<b>Reviewing the material before the exam</b>		
15			<b>First semester final exam</b>		
16			<b>Regular computer maintenance and system updates</b>		
17			<b>Checking device performance(RAM, CPU) and storage management</b>		
18			<b>Data backup and system performance optimization</b>		
19			<b>Diagnosing and resolving common hardware malfunctions</b>		
20			<b>Software problems: System slowdown and application crashes</b>		
21			<b>Definition of Artificial Intelligence(AI) and its objectives</b>		
22			<b>History of artificial intelligence and its stages of development</b>		
23			<b>Artificial intelligence approaches: Thinking and acting like humans</b>		
24			<b>Artificial intelligence approaches: Thinking and acting rationally</b>		

25			Artificial Intelligence Technologies: Expert Systems		
26			Artificial Neural Networks		
27			Artificial intelligence in art, creativity, and human identity		
28			AI ethics: bias, transparency, and privacy		
29			Reviewing the material before the exam		
30			Second semester final exam

<b>Course Name:</b>
Colors/ Second Stage
<b>Course Code:</b>
FAPL0205
<b>Semester / Year:</b>
First and second semesters 2025-2026
<b>Description Preparation Date:</b>
2025/9/1
<b>Available Attendance Forms:</b>
My presence
<b>Number of Credit Hours (Total) / Number of Units (Total)</b>
hours 8    number of units: 2
<b>Course administrator's name (mention all, if more than one name)</b>
Name: Assistant Professor Mohammed Dhunoun Saleh Al-Zubaidi
Email: <a href="mailto:alzbydy1977@uomosul.edu.iq">alzbydy1977@uomosul.edu.iq</a>
<b>Course Objectives</b>
<p>Introducing the student to the history of oil painting in terms of materials, tools and basic techniques.</p> <p>To provide the student with practical knowledge of primary and neutral colors, and how to mix them and generate new colors.</p> <p>Training the student to draw with simple three-dimensional objects (cube, sphere, cone) using neutral color gradients and values.</p> <p>To enable the student to understand and apply the concepts of color boxes, warm and cool colors, dark and light colors.</p> <p>Developing the student's skills in building still life compositions from simple and complex elements.</p> <p>Enhancing the student's ability to observe and analyze color relationships and the effect of light and shadow.</p> <p>Preparing the student to move to advanced levels in academic drawing by establishing aesthetic awareness and technical control of oil paints.</p>
<b>Teaching and Learning Strategies</b>
<p>.1        For introductory theory lectures: to explain the basic concepts of color and the history of materials and tools</p> <p>.2        Demonstrations : The instructor demonstrates practical steps to the students to explain how to mix and use the tools.</p> <p>.3        .Practical training in the studio: through carrying out individual exercises on models and still life</p> <p>.4        Classroom discussions: to link the theoretical aspect with practical application through an open dialogue with students</p> <p>.5        Critical Reviews : Discussing students' work individually and collectively to diagnose strengths and weaknesses</p>

- .6 .Homework assignments: such as preparing small color studies or preliminary sketches of still life
- .7 Self-learning and research: Encouraging the student to consult theoretical and technical sources to enhance his experience

Visual visits : Examining original paintings or high-quality copies to study their color treatments.

#### Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method

<b>Course objectives</b>
<b>.1 To introduce students to the basic concepts and principles of geometric perspective and its importance in .representing three-dimensional objects and spaces</b>

- .2 To enable students to understand the scientific rules for constructing perspective and its relationship to the horizon line, the point of view, and vanishing points
- .3 To equip students with the skills to apply different types of geometric perspective (one vanishing point perspective, two vanishing points perspective, and three vanishing points perspective)
- .4 Developing students' ability to draw geometric shapes and architectural masses according to correct perspective principles
- .5 Developing visual analysis skills and the ability to perceive depth and spatial dimension in artistic compositions
- .6 Linking the theoretical aspect with practical application through exercises and artistic projects based on observation and analytical study
- .7 Promoting the use of geometric perspective as a structural and aesthetic organizing tool in artistic and design works
- .8 Preparing students to use geometric perspective with academic awareness in advanced technical courses and creative projects

#### Teaching and learning strategies

The strategy for teaching the perspective course is based on an integrated approach that balances the theoretical and applied aspects, in line with the requirements of fine arts programs, and directly serves to develop drawing skills among second-stage students, as perspective is presented as a fundamental constructive tool in organizing pictorial space and dealing with depth and relative relationships within the artwork

The teaching is based on clarifying the basic concepts of geometric perspective through organized explanations supported by illustrations, linking them to practical applications in drawing, which contributes to enhancing visual and analytical understanding among students, and ensures the transfer of knowledge from the theoretical framework to conscious artistic practice

The practical activities are carried out according to a gradual educational sequence, starting with drawing simple geometric shapes according to one-point and two-point perspective, then progressing to dealing with more complex compositions in a way that enhances the student's ability to build the artistic composition correctly from a perspective point of view, while maintaining the expressive dimension of the work

The analysis of selected examples of artworks in classical and contemporary painting is also employed to demonstrate the methods of using perspective in constructing pictorial space, and to show the possibilities of employing or consciously modifying it in a way that serves the artistic vision

Learning outcomes are measured through continuous assessment of practical performance, applied exercises, and graphic projects, with a focus on the extent to which cognitive and skill-based competencies related to constructing perspective space, adjusting proportions, and integrating perspective with graphic composition have been achieved

<b>Term/Year .3</b>
First and second semesters of the 2025-2026 academic year
<b>Date this description was prepared: 1/9/2025 .4</b>
<b>Available attendance formats .5</b>
In-person/Theoretical nature of the course
<b>Total number of study hours / Total number of units .6</b>
Theory (2) hours per week / (2) two units 2
<b>Name of the course coordinator ( if there is more than one, please state it) and their academic title .7</b>
: Name: M. Dr. Zeina Hamidi Nayef, Email <a href="mailto:zena.homede1990@uomosul.edu.iq">zena.homede1990@uomosul.edu.iq</a>
<b>Course Objectives .8</b>
Language is a means of communication, translating ideas, fostering understanding, and facilitating interaction among members of society in all spheres of life. Similarly, the study of literary arts and theatrical texts aims to provide a cohesive and interconnected literary form, as well as to familiarize students with the elements of these arts. This aids in learning, enhances students' receptiveness to lessons, and cultivates their artistic and aesthetic .appreciation
<b>Teaching and learning strategies .9</b>
The Arabic language holds great importance in Arab culture, heritage, and literature because it is considered part of Arab civilization. It is one of the languages that has maintained its theoretical presence. It has a rich linguistic and grammatical history. This has made its value prominent in art, literature, and speeches, as it is a key to .communication between peoples
<b>Course Structure .10</b>

<b>Week</b>	<b>Hours</b>	<b>Required learning outcomes</b>	<b>Unit or topic name</b>	<b>Learning method</b>	<b>Evaluation Method</b>

**Course Objectives .8**

The course aims to provide the student with knowledge of the composition of large paintings executed with acrylic , oil or different materials, the process of combining the selected elements in terms of form and color and discovering innovative means to produce artistic achievements that develop artistic taste and contribute to .developing the student's innate sense

**Teaching and learning strategies .9**

strategy

Students are tasked with creating a complete mural project, from concept and design to execution, which develops their planning, organizational, and teamwork skills. This is further enhanced through critique and artistic discussion, helping students refine their critical .thinking and improve their artistic performance

The student is encouraged to learn independently and ,experiment with the use of materials and techniques in addition to solving technical problems related to space, surface and color, which contributes to building an integrated artistic experience and a mature creative ability that is appropriate to the requirements of the .educational stage

**Course Structure .10**

Course objectives

Developing the ability to complete an integrated artistic project that reflects the student's artistic identity and his own vision in the field of drawing.

- Employing the theoretical knowledge and applied techniques that the student has acquired during the years of study in a complete artistic work.
- Enhancing technical research and critical analysis skills through the preparation of a theoretical study to accompany the project.

Demonstrate high technical proficiency in using diverse materials, methods and techniques in drawing.

Developing the ability to plan and implement the project in stages according to a clear methodology that includes the idea, the study, the experiment, and the final output.

- Enhancing creative thinking and innovation in addressing artistic topics in a contemporary style.

Preparing the student to integrate into the artistic and professional environment by presenting and discussing the project before a specialized scientific committee.

Developing presentation and communication skills , and defending the idea and artistic content of the project.

Teaching and learning strategies

Project-

Based Learning : This involves assigning the student to complete an integrated art project that goes through the stages of idea, planning, implementation, and presentation.

Individual supervision and direct discussion

periodic monitoring of student progress by the instructor, and provision of technical and scientific guidance .,

Dialogue and Art Criticism(Critique):

Presenting and discussing works collectively to develop the ability to analyze and critique and exchange experiences among students.

- -Self

learning encourages the student to research and explore different artistic experiences and schools to support his project.

- : Presentations

The student presents his project idea and its implementation stages to his colleagues or a specialized committee to develop presentation and communication skills.

**Practical**

experimentation involves using diverse materials and techniques to achieve the best technical treatment for the project.

- Continuous

feedback : Providing periodic feedback that helps the student develop the work and improve the level of achievement.

**Course structure**

Week	Hours	Required learning outcomes	Unit or topic name	Learning method	Evaluation Method
1			Introduction to the nature and characteristics of the subjects		
2			Creating a project idea (realistic)		
3			Creating preliminary outlines for the project topic		
4			Discussing the initial plans with the students		
5			Creating a preliminary plan for each student's project		
6			Enlarge the chart on the board		

7			<b>Distributing colors across blocks and shapes to serve the theme</b>		
8			<b>Monitoring the progress of the work by the supervising professor</b>		
9			<b>Discussion of errors and modifications to the board</b>		
10			<b>Applying the project to a large board measuring 120 x 100</b>		
11			<b>Supervisor's follow-up on the stages of completion</b>		
12			<b>tracking</b>
