

Vision, mission and goals

College of Law - University of Mosul

2025-2026

Vision

The development of knowledge in the field of legal studies and scientific research, in and achieving continuous accordance with program accreditation standards competitiveness and innovation in providing scientific and practical services that meet and contributing to the achievement of the Sustainable the needs of the labor market Development Goals in general and Goal 16 in particular

Mission:

The college of law begins in its understanding of its scientific and educational mission of the person whom God has honored for the sincere endeavor to elevate his position through recognition and the sanctity of the right and its importance and defense and the obligations that arise from it. With this understanding, the college is based on a full awareness of the importance of establishing a methodology for dealing with the general framework of the human being that represents the goal, basis and focus of legal activity. This, in fact, is to establish an educated generation who believes in its scientific and practical mission and enjoy an effective academic qualification in the field of legal sciences within frameworks to meet the priorities of the labor market And the relentless pursuit of sustainable peace, establishing justice and building strong institutions.

Goals :

- Supplying society with graduates and holders of advanced degrees specialized in various fields of legal sciences.
- Activating the role of the governmental program in the College of Law to achieve its objectives, embodied in enhancing the quality of scientific and administrative performance of the College as part of supporting the national project for quality in Iraqi universities.
- Supporting renewable scientific capacities, innovation, and academic creativity, and advancing the scientific reality of public and private law colleges through joint cooperation agreements with them. Activating the scholarship program for rare and important legal specializations.
- Sustaining the developmental process of the scientific and research capabilities of the College's staff.
- Applying comprehensive quality standards in accordance with academic accreditation criteria.
- Establishing and investing in partnerships with the private sector to create employment opportunities for graduates.
- Developing the capabilities of faculty members and students in the field of e-learning as a complementary aspect of traditional education.
- Striving to contribute to the inclusion of Iraqi universities in international rankings—through, among other measures, the implementation of the Bologna Process—and encouraging faculty members to play an active role on international research platforms through the production of distinguished scholarly contributions in the field of law.
- Expanding scientific and cultural cooperation with international institutions, research centers, civil society organizations, and other social sectors.
- Working towards achieving sustainable development characterized by peace and good governance.
