

University of Mosul

College of Science

Biology Department

Educational Goals:

The Department of Biology aims to:

1. Study all biological sciences in all their details and conduct their applications in the society in theory and science with real service delivery of tangible benefit.
 2. Preparation of scientific staff at the primary and higher levels to work in the medical, health, agricultural, food, petroleum, pharmaceutical and environmental fields and all other biological branches.
 3. Provide students with scientific experience in all technologies, equipment, experiments, and methods of understanding and solving problems that can be used in their theoretical and applied studies.
 4. Deliver to students the academic and applied information on the biological sciences and their various trends and disciplines.
 5. Feed institutions and the mixed and private sectors (medical, industrial and laboratory institutions) with primary and higher specialized employers to work in this field.
 6. Research and study of all new biological sciences, keeping pace with scientific developments in this field and incorporating them into the curriculum.
 7. Implementation of practical and basic research in various life sciences.
 8. Contributing to advisory services, training, short courses and solving scientific problems facing development plans.
