

**University of Mosul
College of Science
Chemistry Department**

Graduates Outcomes:

1. Prepare students intellectually and scientifically to fully cope with the modernized technology, which is perhaps one of the department's most essential goals.
2. The department is eager to help students improve their research techniques and acquaint them with software and technology while they do their studies.
3. Show that they are familiar with the core ideas behind the various fields of chemistry, such as organic, inorganic, physical, analytical, petrochemistry, and biochemistry.
4. Demonstrate knowledge of certain chemical subjects at the cutting edge of research.
5. Recognize the ideas that underpin the actual chemistry experiments and data.
6. Work in the spirit of professional ethics.
