## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. Introduction of information about laboratory safety</li> <li>2. Tools and machines example microscope</li> <li>3. Cell measurement</li> <li>4. Animal taxonomy</li> <li>5. Introduction of cell, types of cell ,structure of cell</li> <li>6. Animal tissues</li> <li>7. Animal anatomy</li> <li>8. Types of cell division</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<p>The students learn how to use the microscope and exam the slides and how to find the measurement of cell</p> <ol style="list-style-type: none"> <li>2. The students know the type of cell and how distinguish between two types of cells and know the higher structure of cell organs.</li> <li>3. the students can distinguish between types of tissues and and know the function &amp; site &amp; types of cell for each tissue</li> <li>4. the students know cell cycle and can distinguish between two types of cell division. and when occurs each type</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction to zoology and other biological science. Branches of Zoology. Characteristics of living things .Structure and Function of Cells. Theory of the cells [10 hrs]</p> <p>Basics nutrition, Classification of carbohydrates,. lipids and proteins. Cell cycle. Phases of cell cycle. Classification of Animal kingdom.[18hrs]</p> <p>Physiology of Digestion system. Functions of the Digestive System. Nervous Regulation of the Digestive System. Function of Stomach. Regulation of Gastric Secretion. Pancreas. Gall Bladder. Small Intestine. Large intestine. Classification of Animal kingdom.. Parazoa. Porifera [18hrs]</p> <p>Eumetazoa.Cnidaria, Platyhelminthes .Nematoda, Mollusca [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>General safety instructions in the laboratory..Tools and machines example microscope..Cell measurement.Introduction of cell, types of cell ,structure of cell. Animal taxonomy. Animal tissues [18 hrs]</p> <p>Animal tissues.Types of cell division.[18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: An introduction to the study of Physiology of the body. Definition of body systems and understands how this system work under normal conditions. Definition of the techniques uses to estimation of body parameters. Study the disorders of this systems physiology and study the diseases results from disorders in homeostats. The relationships between the different body systems. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.
-------------------	--

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	108	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	7.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	92	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	6.1
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>200</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Introduction to zoology and other biological science
Week 2	Branches of Zoology Characteristics of living things
Week 3	Structure and Function of Cells
Week 4	Theory of the cells
Week 5	Basics nutrition, Classification of carbohydrates,
Week 6	lipids and proteins
Week 7	Cell cycle
Week 8	Phases of cell cycle
Week 9	Classification of Animal kingdom
Week 10	Classification of Animal kingdom
Week 11	Parazoa
Week 12	Porifera
Week 13	Eumetazoa
Week 14	Cnidaria, Platyhelminthes
Week 15	, Nematoda, Mollusca

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: General safety instructions in the laboratory.
Week 2	Lab 2: Tools and machines example microscope.
Week 3	Lab 3: Cell measurement

<b>Week 4</b>	Lab 4: Introduction of cell, types of cell ,structure of cell
<b>Week 5</b>	Lab 5: Introduction of cell, types of cell ,structure of cell
<b>Week 6</b>	Lab 6: Animal taxonomy
<b>Week 7</b>	Lab 7: Animal taxonomy
<b>Week 8</b>	Lab 8: Animal taxonomy
<b>Week 9</b>	Lab9: Animal tissues
<b>Week10</b>	Lab 10: Animal tissues
<b>Week 11</b>	Lab 11: Animal tissues
<b>Week 12</b>	Lab 12: Animal tissues
<b>Week 13</b>	Lab 13: Animal tissues
<b>Week 14</b>	Lab 14: Types of cell division
<b>Week 15</b>	Lab 15: Types of cell division

### Learning and Teaching Resources

#### مصادر التعلم والتدريس

	Text	Available in the Library?
<b>Required Texts</b>	Guyton, A. and Hall, J.E. (2016). "Text book of physiology". 11 <sup>th</sup> ed. Elsevier Saunders. China.	Yes
	Barrett, K.; brooks, H.; Boitano, S. and Barman, S. (2010). "Ganong's review of Medical Physiology". 23 <sup>th</sup> edition. McGraw Hill Companies. New York	Yes
<b>Recommended Texts</b>	Ghia, CL. (2013). A Textbook of Practical Physiology. Jaypee Brothers Medical Publishers (P) Ltd.; 8th edition.	no
<b>Websites</b>	<a href="https://www.nature.com/subjects/animal-physiology">https://www.nature.com/subjects/animal-physiology</a> <a href="https://www.sciencedirect.com/topics/agricultural-and-biological-sciences/animal-physiology">https://www.sciencedirect.com/topics/agricultural-and-biological-sciences/animal-physiology</a>	

### Grading Scheme

#### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors

	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX – Fail</b>	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F – Fail</b>	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>1. Students will understand the structures and purposes of basic components of analytical chemistry</p> <p>2. Students will understand how these cellular components are used to generate and utilize energy in cells</p> <p>3. Students will understand the cellular components underlying mitotic cell division.</p> <p>4. Students will apply their knowledge of cell biology to selected examples of changes or losses in cell function. These can include responses to environmental or physiological changes, or alterations of cell function brought about by mutation .</p>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ul style="list-style-type: none"> <li>- Explain the basic structure of cells</li> <li>- Identify the function and organization of the various organelles in eukaryotic cells</li> <li>- Describe intracellular trafficking of macromolecules Discuss endocytosis and exocytosis</li> <li>- Describe compartmentalization of cells, structure and function of cell organelles, the cytoskeleton ,transport across cell membranes.</li> <li>- Discuss key biological processes in cells and their regulation</li> <li>- Evaluate the important biological processes in cells.</li> <li>- Conduct laboratory practicals, collect data, interpret and discuss results.</li> <li>- Utilize immune fluorescence microscopy for monitoring sub cellular trafficking of proteins</li> </ul>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction of cell biology, define of the analytical chemistry function of analytical chemistry , analytical chemistry theory, protoplasm theory .Types of analytical chemistry.</p> <p>The chemistry of the analytical chemistry .</p> <p><u>Part B – Practical labs</u></p> <p><u>Qualitative analysis , Quantitative analysis ,Gravimetric analysis Volumetric analysis</u></p>

## Learning and Teaching Strategies

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<ol style="list-style-type: none"><li>1- Introduce students to the importance of general principles in physics by explaining (The SI Units, Quantities, Displacement, Distance, Scalar &amp; Vector Quantities, Motion, Velocity, Speed, Acceleration, Kinematic equations, a Freely Falling Body, Projectile Motion, laws of Newton's of motion, and Friction, nature of light, physical optics, reflection and refraction).</li><li>2- Enabling students to distinguish between Vectors quantities and Scalar quantities and the motion of the body at constant Velocity and constant Acceleration with Kinematic equations, Freely falling body, Projectile Motion, Newton's Laws of Motion, and Friction and light laws.</li><li>3- Develop students' knowledge about the most important mechanics in (Scalar &amp; Vector quantities, Displacement, Distance, Velocity, Acceleration, Kinematic equation, the Freely Falling body, Projectile motion, Newton's Laws of Motion, and Friction).</li><li>4- Accustom students to linking the theoretical side of the module with the daily practical life of the student, by giving him examples related to ordinary life.</li><li>5- Study the (Scalar quantities &amp; Vector quantities) properties by studying the sum, subtract, Scalar product &amp; Vector product.</li><li>6- Study the Displacement, and (Motion of the body) at constant Velocity &amp; acceleration, and the Kinematic equations.</li><li>7-Enabling the student to know the basic concepts of a Freely Falling body, Projectile Motion, Newton's Laws of Motion, and Friction.</li><li>8- Overall, the aim of a module is to provide students with powerful tools for understanding and analyzing Classical Mechanics properties.</li></ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"><li>1-Properties of Mechanics: Mechanics are classified into Two important essential branches which are namely kinematics and Dynamics.</li><li>2- Kinematic: This is the branch of mechanics that studies the motion of a body without regard to the cause of that motion. which include the study of average velocity and a constant velocity of a moving body, average acceleration and constant acceleration of a moving body, Instantaneous velocity, and instantaneous acceleration of a moving body.</li><li>3- The Three Kinematic equations of motion which describe the motion of body with initial velocity and final velocity, instant of time (t), displacement, and acceleration of a moving body.</li><li>4- The Freely Falling Body: which describe the body that is moving freely under the influence of gravity, where it is assumed that the effect of air is negligible.</li><li>5- Projectile Motion: which describe of an object is simple to analyze if we make two assumption: (1) the free-fall acceleration is constant over the range of motion and is directed downward, and (2) the effect of air resistance is negligible, and study Horizontal Range, Maximum Height of Projectile and time of flight of the projectile.</li><li>6- Dynamic: is the branch of mechanics concerned with the forces that change or produce the motion of bodies. the foundation of dynamics is Newton's Laws of motion (First, Second and Third Law).</li></ol> <p>Another type of Dynamic is the Friction which is divided in two type the first is (Force of Static Friction) and the second is the (Force of Kinetic Friction).</p>

	<p>7- Introduction to properties of light.</p> <p>8- Types of reflection:  External reflection: This happens when it is (<math>n &gt; 1</math>), that is, when the light falls from the medium of the lowest light density to the medium of the highest light density (for example, "when light falls from the air towards the water).  Internal reflection: This happens when it is (<math>n &lt; 1</math>), that is, when light falls from the medium with the highest light density to the medium with the lowest light density (from glass to the air).</p>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>This course introduces the use of Chemical, physical methods in the study of biological systems:  Scope of Biophysics, Fundamentals of Biophysics, interaction of light With matter, Chemical Forces, Diffusion and Brownian motion, Viscosity, Light Scattering Small - Molecule Solutes: hydrophiles, hydrophobes, large Hydrophobic Solutes and Surface, Aqueous Environment of the Cell, State of Water in bio-structures &amp; its significance, phsico Chemical Techniques to Study Biophysics (Introduction, Physical Aspects, of Hearing) (The Ear, Elementary acoustics, Theories of hearing), Optical defects of the eye, Neural aspects of Vision, Chemical equilibriums in biological systems, Bioenergy</p>

<p style="text-align: center;"><b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم</p>	
<p><b>Strategies</b></p>	<p><b>Conceptual Understanding:</b> Start by providing an overview of nature of the light, and Help students understand how this principles and methods are used to analyze and interpret data in these areas. Use real-world examples and case studies to illustrate the significance of optics techniques.</p> <p><b>Problem-Solving Practice:</b> Include problem-solving activities and assignments that require students to apply this theory to practical scenarios. Present them with real or simulated data and challenge them to analyze and interpret the information using appropriate optics techniques. This will develop their problem-solving skills and reinforce their understanding of the subject matter.</p> <p><b>Supplemental Resources:</b> Recommend supplementary resources such as textbooks, research articles. Encourage students to explore these resources to gain a deeper understanding of the subject matter. Provide a curated list of recommended readings and online tools to support their learning.</p> <p><b>Assessment and Feedback:</b> Regularly assess students' understanding through quizzes, tests, or projects. Provide constructive feedback to guide their learning and address any misconceptions. Consider incorporating formative assessments to gauge understanding before major evaluations, allowing for timely intervention and support.</p> <p><b>Collaboration and Discussion:</b> Foster collaboration among students by organizing group discussions, case studies, or problem-solving sessions. Encourage them to share their perspectives, ideas, and experiences related to nature of the light. This collaborative environment promotes active learning, critical thinking, and knowledge sharing.</p>

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Clarification of basic information about the basic vocabulary of the curriculum and how to use it in the anatomy of plants in practice.</li> <li>2. Teaching students how to prepare different plant tissue sections. Conducting histological comparisons between different aggregates.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. 1. Students became able to understand nature of higher plants tissues.</li> <li>2. 2. Helping students to identify plants tissues.</li> <li>3. 3. Encourage the students to improve skills of plant anatomy and proteins and understanding how to distinguish between amino acids</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Botany. Parts of Plant. Plant cell. Plant Cell Structures and Organelles. A cell wall. Plant tissue [10 hrs] Permanent tissue. Meristematic tissue[12 hrs] Plasma membrane structure. Protoplast properties. Cell division(mitosis and meiosis . [10 hrs] Nutrition and food chain. Nutrition and food chain. Energy flow. [3 hrs]  <u>Part B – Practical labs</u>  Plant form . Plant function. plant cell. The cell wall. Living components of plant cell . Types and functions of plastids. Non-living components. :types of starch grains. Non-living components [18 hrs] types of crystals. Plant Tissues, Meristematic tissues.. Apical M.T., Lateral M.T. Intercalary M.T.. Permanent tissues. Dermal tissue, Parenchyma tissues, Collenchyma ,T.. Sclerenchyma T. , Fibers, Sclerides.. Vascular tissues : The Xylem , The phloem [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Various techniques were used such as. Data show , Microscope, Posters , Samples of plants keep in alcoholic solution . Students do study the following fields: Higher Plants structures. Anatomy procedures. Learning compositions of plant tissues. Comparison between monocots and dicots tissues. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

### Module Objectives

أهداف المادة الدراسية

#### DESCRIPTION

##### The Systematic Identification of Organic Compounds

A comprehensive introduction to the identification of unknown organic compounds, Identifying unknown compounds is one of the most important parts of the study of chemistry. From basic characteristics such as melting and/or boiling point to more complex data generated through cutting-edge techniques, the range of possible methods for identifying unknown organic compounds is substantial. The utility of a research reference which compiles known techniques and characteristics of possible compounds is clear. The Systematic Identification of Organic Compounds provides such a reference, designed to teach a hands-on approach in the chemistry lab. It takes readers step-by-step through the process of identifying an unknown compound and elucidating its structure from infrared, nuclear magnetic resonance, and mass spectra in addition to solubility characteristics, melting point, boiling point, and classification tests. The result is an essential overview for advanced chemistry students looking to understand this exciting area of laboratory work. Readers of the ninth edition of The Systematic Identification of Organic Compounds will also find:

- A detailed chapter on safety, personal protection equipment, chemical storage, safety data sheets, and other safety concerns
- Questions at the end of each chapter designed to facilitate and reinforce progression, keyed to a companion website for instructors
- Tables of known compounds including data relevant for identification

- Companion website with structural problems from experimental data for students to practice how to reason and solve, The Systematic Identification of Organic Compounds is a useful reference for advanced undergraduates and graduate students studying organic chemistry, organic spectroscopy, and related subjects **Chemical properties:** Structural isomers would have the **same chemical property** if they have the **same functional group(s)** in their structural formula.\*, This effectively means that only **functional group isomers** would have different chemical properties., As you have learnt in Preliminary HSC Chemistry, a different functional group provides a **distinctive** chemical property to the molecule to undergo certain chemical reactions.

**Physical properties**The following guidelines will help you compare the melting and boiling points between different isomer molecules. As you will explore with polymers which is part of the last Inquiry Question in Module 7, you learn that molecules (e.g. isomers) that exhibit a **less branched** (or linear) structural formula have a **higher** melting and boiling point. Therefore, you would expect the more chain branching that a molecule exhibits, the lower its melting and boiling point will be.

This is because chain branching prevents the isomers from packing their carbon chains closely together and, thus, the intermolecular forces (e.g. dispersion

	<p>forces) between them would be weaker. As we have explored in Preliminary HSC Chemistry, intermolecular forces play an important role in governing the melting and boiling point of molecules. As for functional group isomers, the isomers have different functional groups allowed differing extent of chain branching (thus affecting dispersion forces) and maybe different degree of dipole-dipole and hydrogen bonding. Therefore, their melting and boiling point (physical property) may vary. <b>Example:</b> Alcohols (- OH) and carboxylic acids (- COOH) have different melting and boiling points due to different functional groups.</p>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ul style="list-style-type: none"> <li>• Module content:, • Some organic chemistry fundamentals, basic concepts and terminology, Naming and classification of organic compounds, Basic reactions of alcohols, ethers and carbohydrates, Natural polysaccharides: modification and utilization in various applications, Group work (including presentation and evaluation of the other group works): Preparation of biofuels from biomass, Preparation of adsorbents from starch, Novel method for preparation of 5-hydroxymethylfurfural from biomass or Preparation of bio-plastics from biomass, Learning outcomes: After completing organic chemistry module student should be able to: identify and draw organic compound, provide the IUPAC name for some organic compounds, classify alcohols, explain the properties of alcohols and ethers discuss the reactions of alcohols and ether, recognize functional groups that are present in monosaccharides, classify carbohydrates to mono- di, oligo- and polysaccharides</li> <li>identify the structural difference between following polymers: amylose, amylopectin, cellulose and glycogen, • discuss the basic reactions of monosaccharides • discuss the reactions of starch and cellulose such as hydrolysis, esterification and, etherification • know how and why to use biomass in different applications • In addition to comprehend to the theory, the idea of the project work is to enhance group-working skills, social skills, planning skills, the ability to explore information and interpret found information, presentation and reporting skills, responsibility taking and knowledge about the biomaterial applications., Learning activities and teaching methods:</li> <li>• 30 hours on-line working / independent self-study. Teacher and student contact will be mainly through distance-learning tools (E.g. Adobe Connect meetings and discussion forums). Dail, Remarks:</li> <li>• • An intensive study period that will be carried out where an in-depth study of one of the goals of the course will be done including workshops and hands-on applications of theory.</li> <li>• learning objectives, tasks and pace guide are given on Canvas learning platform: Learning can be</li> <li>• tested by doing daily exercises.</li> </ul>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following. <u>Part A – Theoretical lectures</u> <b>Second Course:</b> Introduction, bonds, hybridization, physical properties and molecular structure , <b>alkanes and cycloalkanes-</b> nomenclature, stereochemistry, conformational analysis, and an introduction to synthesis- hydrogenation of alkenes and alkynes, reduction of alkyl halides, reduction of carbonyl compounds, decarboxylation, [10 hrs]</p>

	<p>Melting point and boiling point of organic compound</p> <p>Revising of Systematic identification of organic compounds</p> <p>Studying the element test and classification of organic compounds [8 hrs]</p> <p>Assorting the compounds on groups of solubility and detect the suitable solvent</p> <p>Studying the Functional groups tests Grignard reagents, Wurtz reaction, Corey- House synthesis. <b>Alkene, Alkadiene, Alkyne</b>- nomenclature, Reactions and synthesis- elimination, dehydrohalogenation, Zaitsev's and Hofmann's rules, dehydration of alcohols, E1-E2 reaction, rearrangements, debromination, syn addition, anti addition, Markovnikov's rules, mechanism, oxidation-<i>Hydroboration-oxidation</i>, epoxidation of alkenes.[3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>. Physical constant, A group of 4 students measured melting and boiling points of some unknown compounds using lab apparatus.</p> <p>Element test presentation and lab work, A group of 4 students identify presence or absence elements in some unknown compounds using organic solvents and reagents. [18 hrs], Solubility test presentation and lab work, A group of 4 students identify solubility of some unknown compounds using organic solvents., First Quiz , Functional groups tests presentation and lab work, Week 5&amp;6 a group of 4 students identify presence or absence of functional groups of some unknown compounds using chemical solvents and reagents. Second Quiz, Each student individually identifying an unknown based on the information and experience gained in the 1, 2, 3, 4, 5&amp;6 training weeks. 6 weeks are specified to complete identifying with using organic chemistry literature.[18 hrs</p>
--	---

<b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم	
<b>Strategies</b>	<p><b>Course Outcomes:</b> The student will learn how to identify an organic compound systematically.</p> <p><b>Weekly Teaching Plan:</b> In the first week there will be a general presentation about the course and how to behave in the lab. Except for the first 4 weeks all</p>

	<p>the remaining weeks involve lab. work only.</p> <p><b>Students Behaviour in Class:</b> Keen to learn, friendly and cooperative</p> <p><b>Computer Usage:</b> search for compounds in dictionary.</p> <p><b>Teaching Techniques:</b> Student learn how to use test tube reactions techniques.</p> <p><b>Suggestions:</b> An attempt to combine the two methods used to identification of organic compounds, which is the chemical method and the spectroscopic method</p>

	<b>Material Covered</b>
<b>Week 1</b>	Introduction of fundamental of organic compound and the study references.
<b>Week 2</b>	An authentic of identification, its definition, taxonomic status and importance.
<b>Week 3</b>	The physical and chemical properties can affected on organic compounds
<b>Week 4</b>	Features and structures used in directing shields and shells.
<b>Week 5</b>	Melting point and boiling point of organic compound
<b>Week 6</b>	Revising of Systematic identification of organic compounds
<b>Week 7</b>	Studying the element test and classification of organic compounds
<b>Week 8</b>	Classification the organic compounds according the solubility
<b>Week 9</b>	Assorting the compounds on groups alkane, alkene and alkyne
<b>Week 10</b>	Numen culture of hydrocarbons, alkane, alkene and alkyne
<b>Week 11</b>	Synthesis of alkanes.
<b>Week 12</b>	The reaction of alkanes
<b>Week 13</b>	Mid examination and quiz1
<b>Week 14</b>	Synthesis of alkenes and alkynes
<b>Week 15</b>	The reaction of alkenes and alkynes

### Delivery Plan (Weekly Lab. Syllabus)

المنهاج الاسبوعي للمختبر

	<b>Material Covered</b>
<b>Week 1</b>	Lab 1: General Lecture
<b>Week 2</b>	Lab 2: Physical constant A group of 4 students measured melting and boiling points of some unknown compounds using lab apparatus.
<b>Week 3</b>	Lab 3:: laboratory safety
<b>Week 4</b>	Lab 4: Glass ware, A group of 4 students identify presence or absence elements in some unknown compounds using organic solvents and reagents.
<b>Week 5</b>	Lab 5: Melting point
<b>Week 6</b>	Lab 6:Boiling point: A group of 4 students identify solubility of some unknown compounds using different organic compounds
<b>Week 7</b>	Lab 7: Simple distillation

<b>Week 8</b>	Lab 8: Fractional distillation, a group of 4 students identify presence or absence of functional groups of some unknown compounds using chemical solvents and reagents.
<b>Week 9</b>	Lab9: Steam distillation
<b>Week10</b>	Lab 10: Recrystallization
<b>Week 11</b>	Lab 11: Sublimation, Comparative between the Unknown and the theoretical organic compound in adiabatic literature
<b>Week 12</b>	Lab 12: Each student individually identifying an unknown based on the information and experience gained in the 1, 2, 3, 4, 5&6 training weeks. 6 weeks are specified to complete identifying with using organic chemistry literature.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	Students do study the following fields: 1. اعطاء توضيح عن مادة السلامة والامن البيولوجي والهدف من دراستها 2. توضيح اهمية دراسة السلامة والامن البيولوجي ودورها في الحياة اليومية 3. التطرق لبعض المخاطر البيولوجية المهمة المنتشرة في المجتمع وطرق السيطرة عليها ومنع حدوثها
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	1- ان يكون للطالب المام بهذه المادة واهميتها 2- ان تصبح للطالب قدرة وامكانية توصيل معلومات صحية وايصالها لأفراد اسرته ولمن حواليه 3- وقوف الطالب على الاساليب التي يجب التعامل من خلالها مع جميع مفردات تطبيق السلامة البيولوجية وتوضيحها لجميع شرائح المجتمع وخاصة العاملين في هذا المجال 4- معرفة بعض الحالات التي يتعرض لها الانسان واسباب حدوثها وكيفية التعامل معها في حالة حدوثها
<b>Indicative Contents</b> المحتويات الإرشادية	هذه المادة الدراسية لها دور كبير في تعليم الطالب اساسيات السلامة البيولوجية وامن المواد الخطرة بكل مواضيعها و يحقق خلفية علمية رصينة للطالب في علم البيولوجي ومواده واساسياته تمكنهم من اداء دورهم البناء في خدمة المجتمع من خلال التوعية والارشاد و معرفة آليات التعامل مع المواد البيولوجية و الاتفاقيات الخاصة بالسلامة البيولوجية

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials by Using appropriate teaching strategies and methods and teaching aids to develop thinking skills.
-------------------	--

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group</b> <b>(50 - 100)</b>	<b>A - Excellent</b>	امتياز	90 - 100	Outstanding Performance
	<b>B - Very Good</b>	جيد جدا	80 - 89	Above average with some errors
	<b>C - Good</b>	جيد	70 - 79	Sound work with notable errors
	<b>D - Satisfactory</b>	متوسط	60 - 69	Fair but with major shortcomings
	<b>E - Sufficient</b>	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group</b> <b>(0 – 49)</b>	<b>FX – Fail</b>	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F – Fail</b>	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b></p> <p>أهداف المادة الدراسية</p>	<p>This course aims to enable students to: -</p> <ol style="list-style-type: none"><li>1. Acquire the necessary mathematical concepts for everyday life, and for continuous learning mathematics and related disciplines.</li><li>2. Develop the necessary process skills for the acquisition and application of mathematical concepts and skills.</li><li>3. Developing the potential of the student to use mathematics in practical application and benefit from lessons in others.</li><li>4. Show the importance of calculus in science.</li><li>5. Provide the basic principles of calculus and its applications to improve the student's logical thinking and mathematical skills to solve mathematical problems.</li></ol>
<p><b>Module Learning Outcomes</b></p> <p>مخرجات التعلم للمادة الدراسية</p>	<p>Student will develop a conceptual understanding of limit, continuity, differentiation, and integration as well as a thorough background in techniques of calculus. The trainee will be able to do following:</p> <ol style="list-style-type: none"><li>1. To solve mathematics problems with trigonometric function.</li><li>2. Students will analysis relationships among quantities including functions, ways of representing mathematical relationships, and the analysis of change.</li><li>3. Drive and integrate functions.</li></ol>
<p><b>Indicative Contents</b></p> <p>المحتويات الإرشادية</p>	<ul style="list-style-type: none"><li>• Mathematics is often called the " Queen of Science " because an understanding of mathematics is essential to an understanding of all the other sciences.</li><li>• Calculus is the mathematics of change, of calculating problems that are continually evolving. There are two primary Branches of calculus: differential calculus and integral calculus.</li><li>• A broad overview of the subject, included primary for liberal art students. What do mathematicians do, and why do they do it?</li><li>• This course is vitally important as it has a plenty of applications in many fields.</li><li>• This course is much interconnected with other courses.</li><li>• The course covers major principal areas of mathematical.</li><li>• With studying this course, students get an enough knowledge which might enable them to deal with the most mathematical problems they may encounter during their teaching process as well as during the employment methods.</li></ul>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials by Using appropriate teaching strategies and methods and teaching aids to develop thinking skills.
-------------------	--

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	تعريف الطلاب بأساسيات اللغة العربية .كذلك كسر حاجز الخجل وزيادة ثقتهم داخل وخارج الفصل. هناك فرصة كبيرة لإشراكهم في مناقشات قصيرة حيث يمكنهم الكتابة أو التعبير عن أنفسهم شفهيًا. بالإضافة إلى ما سبق ، ستعمل المادة على تحسين مهاراتهم القرائية والكتابة والاستماع والتحدث كطلاب وتقوية ملكة الطلاب الأدبية لتذوق أساليب اللغة وإدراك مواطن الجمال فيها
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	1-خلق وعي كامل بالاستخدام الصحيح لقواعد اللغة العربية في الكتابة والمحادثة. 2- إدراك أهمية اللغة العربية داخل وخارج الحياة الجامعية. 3-سيحسن الطلاب قدرتهم على التحدث باللغة العربية من حيث الطلاقة والاستيعاب. 4-سيقوم الطلاب بمراجعة الأشكال النحوية للغة العربية واستخدام هذه الأشكال في سياقات تواصلية محددة ، والتي تشمل :الأنشطة الصفية ، والواجبات المنزلية ، وقراءة النصوص ، والكتابة. 5-سيعزز الطلاب قدرتهم على كتابة فقرات قصيرة وملخصات باستخدام نهج العملية.
<b>Indicative Contents</b> المحتويات الإرشادية	مقدمة عن الاتصال بشكل عام واللغة العربية بشكل خاص ، مع مقدمة عن فئات الكلمات (أجزاء الكلام) (في اللغة العربية) [ 4 ساعات]. شرح كل جزء من الكلام في اللغة العربية مثل الأسماء والضمائر والأفعال والصفات والظروف وحروف الجر وحروف العطف والاقتران [ 16 ساعة]. المهارات الأساسية في تعلم اللغة الإنجليزية: القراءة والكتابة يتم تقديمها بشكل تدريجي خلال الأسابيع الماضية [ 6 ساعات]. الجزء الأخير مخصص لبعض جلسات تصحيح الأخطاء وردود الفعل [ 2 ساعة]. -جعل الطلبة على دراية بالعلاقة بين أساليب التعلم وأساليب التدريس. -تشجيع الطلبة على "توسيع" أساليبهم

## Learning and Teaching Strategies

## Module Aims, Learning Outcomes and Indicative Contents

<b>Module Objectives</b>	This course is aimed to increase students' knowledge in terms of different vocabulary, phrases, clauses and medical physics-related terminology. It enables the learners to express what they would like to communicate while they are still studying at college or even when they get their potential jobs. Also, this course encourages the learners to read books, articles and browse department-related websites to search for information needed.
<b>Module Learning Outcomes</b>	<ul style="list-style-type: none"> <li>- Differentiating between general English communications and scientific English communication</li> <li>- Learning commonly-used terminology in the field of Medical Physics.</li> <li>- Understanding specific phrases &amp; expressions written or spoken.</li> <li>- Increasing learners' confidence in reading books and research conducted by scholars around the world.</li> <li>- Motivating learning strategies for learners and improving their autonomous skills.</li> <li>- Evaluating their language skills and benefitting from feedback given throughout the course.</li> </ul>
<b>Indicative Contents</b>	Introduction about communication in English language, followed by general English information. Also, explaining some strategies to follow by learners to progress in the subject [8hrs]. Clarifying the English language skills in general and moved to vocabulary and its importance in English language [6]. Differentiating between parts of speech and showing the difference between general English and scientific English [3]. Detailing the main skills; writing, listening, reading and speaking and doing some practice sessions with feedback sessions where needed [9]. Feedback and error corrections practices with some review over the whole course [4hrs].

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Engaging learners in the learning process is essential . Modern learning processes depend hugely on collaborative work by students. Also, focusing on some quick quizzes is seen as successful strategy though. Also, it is known that homework plays
-------------------	---

important roles in improving learners' academic records. Paying attention to the point that every class has mixed-ability learners.

### Student Workload (SWL)

الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	45	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	3
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	5	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	-----
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>50</b>		

### Module Evaluation

تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	4	20% (20)	2,3,5 and 6	LO #1, #2 and #5 and #6
	<b>Assignments</b>	4	10% (10)	2,4,7 and 8	LO #2, #3, #5 and #6
	<b>Projects / Lab.</b>				
	<b>Report</b>	4	10% (10)	3,4,6 and 8	LO #3, #4, #5 and #6
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)		
	<b>Final Exam</b>	3hr	50% (50)		
<b>Total assessment</b>					100% (100 Marks)

ملاحظة: في حالة كون المادة لا تحتوي على جانب عملي تضاف الدرجة الخاصة بها إلى أي محور آخر يختاره استاذ المادة من تفصيلات الدرجة اعلاه

### Delivery Plan (Weekly Syllabus)

المنهاج الأسبوعي النظري

Material Covered	
<b>Week 1</b>	An introduction on general English language

<b>Week 2</b>	Understanding communication in English language
<b>Week 3</b>	Delivering study strategies for learners throughout the whole course
<b>Week 4</b>	Methods of improving English language skills
<b>Week 5</b>	An introduction about vocabulary in English language in general
<b>Week 6</b>	Teaching some skills required to increase and improve learners' vocabulary in the course.
<b>Week 7</b>	Teaching learners different phrases, clauses and expressions commonly-used in the field.
<b>Week 8</b>	Doing useful class activity in order to encourage collaborative work between students.
<b>Week 9</b>	Teaching writing skills and focusing on writing short paragraphs correctly.
<b>Week 10</b>	Doing feedback sessions and focusing on error corrections
<b>Week 11</b>	Teaching listening skills and assigning homework individually and collaboratively.
<b>Week 12</b>	Teaching reading skills in general and focusing on necessary strategies required.
<b>Week 13</b>	Doing some reading practice inside classroom and giving some feedback and error correction.
<b>Week 14</b>	Teaching speaking skills and encouraging group sessions and course-related discussions
<b>Week 15</b>	Reviewing some main topics from the past weeks and doing quick re-capping for the course.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b></p> <p>أهداف المادة الدراسية</p>	<ol style="list-style-type: none"><li>1. Improved Communication: Fast communication can help increase productivity, allow for better business decisions and facilitate company expansion into new regions or countries. The movement of information within organizations or companies has become instantaneous. Employees can easily transfer data across departments without any interruption. Tools such as email, electronic fax, mobile phones, and text messages enhance the movement of information data between employees, customers, and business partners or suppliers, allowing for greater connectivity across internal and external structures.</li><li>2. Work: Streamlined workflow systems, shared storage, and collaborative workspaces can increase business efficiency and allow employees to process a greater level of work in a shorter period of time. Information technology systems can be used to automate routine tasks, to facilitate data analysis and to store data in a way that can be easily retrieved for future use. Technology can also be used to answer customer questions through email, in a real-time chat session, or through a phone routing system that connects the customer to an available customer service agent.</li><li>3. Cost Reduction and Economic Efficiency: Communication technology and social technology have made business promotion and product launch affordable. Many small businesses have found ways to use social technology to increase their brand awareness and get more customers for less. In business, factors such as operating cost play an important role in business development and growth. So when companies use information technology to reduce operating costs, the return on investment will increase, which will lead to business growth.</li></ol>
<p><b>Module Learning Outcomes</b></p> <p>مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"><li>1. Enhancing the ability of information technology to adapt and respond to the multiple, renewable and constantly changing needs of all parties benefiting from the outputs of the information system, especially the university leaders in the researched university, and thus enables information technology to carry out its work efficiently and effectively. Predicting the studied phenomenon in the future by means of Box-Jenkins model.</li><li>2. Employing information technologies in the axes of the educational process worked to build a bridge of vital communication between faculty members and all sources of the educational process, and this necessarily means facilitating the teacher's task in delivering information to the student within an interactive technical environment, and information technologies provide multiple sources in order to obtain information Whether it is from sources within the university or from the Internet and the educational technologies it contains.</li></ol>
<p><b>Indicative Contents</b></p>	<p>Although the information technology specialization is one of the most demanded fields currently in all global markets, some specializations range from stagnant to saturated</p>

المحتويات الإرشادية	<p>and required, so you should study the market well before choosing a specialization.</p> <p>But if you are looking for the best majors that have a future in the field of information technology, then they are as follows:</p> <p>Network security major in programming - software engineering - 3D printing - data science major - Artificial Intelligence - Computer Science - Aerospace Engineering</p>
---------------------	---

<b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم	
<b>Strategies</b>	<p>The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials by Using appropriate teaching strategies and methods and teaching aids to develop thinking skills.</p>

<b>Student Workload (SWL)</b> الحمل الدراسي للطالب محسوب لـ ١٥ أسبوعا			
<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	63	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	4.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	12	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	-----
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>75</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
Formative assessment	Quizzes	2	10% (10)	5 and 10	All
	Assignments	2	10% (10)	2 and 12	All
	Projects / Lab.	1	10% (10)	Continuous	All
	Report	1	10% (10)	13	All
Summative assessment	Midterm Exam	2hr	20% (10)	7	All
	Final Exam	3	50% (50)	16	All
Total assessment			100% (100 Marks)		

## Delivery Plan (Weekly Syllabus)

### المنهاج الاسبوعي النظري

	Material Covered
Week 1	Getting to know the computer and the history of its stages of development - indicating the types of computers - installing the computer - defining the physical parts
Week 2	Data entry units and data output units to the computer - The central processing unit and its tasks
Week 3	Primary and secondary memories - Types of displays
Week 4	Software
Week 5	Computer operating systems
Week 6	Low-level languages and high-level languages
Week 7	Service application software
Week 8	Getting to know the Word program - How to open or run the program - Transforming the Word program interface - Word program menus.

<b>Week 9</b>	Home Toolbar - Home Page Insert Menu - Toolbar - Insert Menu - Page Layout
<b>Week 10</b>	Microsoft Excel - the most common uses of the Excel program - opening the Excel program - closing the Excel program - an explanation of the main toolbar of the Excel program
<b>Week 11</b>	Entering data in Excel program - how to navigate in a worksheet - inserting a function from the ready-made functions into a cell - examples - shading cells - clearing cells
<b>Week 12</b>	The basics of building a POWER POINT presentation - entering the program and the program interface - creating a new presentation
<b>Week 13</b>	Open a presentation file - save a presentation - insert a new slide - add shapes to the slide - slide margins - slide design - add animations to the slide
<b>Week 14</b>	Internet - services provided by the Internet - keywords, comprehensive search engines
<b>Week 15</b>	Create an E-mail
<b>Week 16</b>	<b>Preparatory week before the final Exam</b>

### Delivery Plan (Weekly Lab. Syllabus)

المنهاج الاسبوعي للمختبر

	Material Covered
<b>Lab 1</b>	Word applications (1)
<b>Lab 2</b>	Word applications (2)
<b>Lab 3</b>	Applications on Excel (1)
<b>Lab4</b>	Applications on Excel (2)
<b>Lab 5</b>	Power Point applications (1)
<b>Lab 6</b>	Power Point applications (2)
<b>Lab 7</b>	E-mail applications

### Learning and Teaching Resources

مصادر التعلم والتدريس

	Text	Available in the Library?
<b>Required Texts</b>	Fundamentals of Information Technology	Yes
<b>Recommended Texts</b>	Glend Gay and Ronald B., "Information Technology", 3 rd Ed, CSEC,OUP Oxford ,2019.	Yes

<b>Websites</b>	<a href="http://itacademic.ir/upload/IT Fund.&amp;Infra-1.pdf">http://itacademic.ir/upload/IT Fund.&amp;Infra-1.pdf</a> <a href="http://www.oxfordsecondary.com/9780198437161">www.oxfordsecondary.com/9780198437161</a>	

<b>Grading Scheme</b>				
مخطط الدرجات				
Group	Grade	التقدير	Marks %	Definition
<b>Success Group</b> (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group</b> (0 – 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required
<p><b>Note:</b> Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.</p>

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b></p> <p>أهداف المادة الدراسية</p>	<ol style="list-style-type: none"><li>1. Data Summarization: Data tabulation can help increase productivity, allow for better business decisions and facilitate company expansion into new regions or countries. The movement of information within organizations or companies has become instantaneous. Employees can easily transfer data across departments without any interruption. Tools such as data analysis and forecasting improve the movement of information data between employees, customers, business partners or suppliers, allowing for greater communication across internal and external structures.</li><li>2. • Data analysis: Fast communication can help increase productivity, allow for better business decisions and facilitate company expansion into new regions or countries. The movement of information within organizations or companies has become instantaneous. Employees can easily transfer data across departments without any interruption. These tools improve the movement of information data between employees, customers, business partners or suppliers, allowing greater communication across internal and external structures.</li><li>3. Work: Streamlined workflow systems, shared storage, and collaborative workspaces can increase work efficiency and allow employees to process a greater level of work in a shorter period of time. Information technology systems can be used to automate routine tasks, to facilitate data analysis and to store data in a way that can be easily retrieved for future use. Technology can also be used to answer customer questions via email, in a real-time chat session, or through a phone routing system that connects the customer to an available customer service agent.</li><li>4. Cost reduction and economic efficiency: Communication technology and social technology have made business promotion and product launches accessible to everyone. Many small businesses have found ways to use data technology to increase their brand awareness and get more customers for less. In business, factors such as operating cost play an important role in business development and growth. So when companies use IT to reduce operating costs, the return on investment will increase, which will lead to business growth.</li></ol>
<p><b>Module Learning Outcomes</b></p> <p>مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"><li>1. Enhancing the ability of information technology to adapt and respond to the multiple, renewable and constantly changing needs of all parties benefiting from the outputs of the information system, especially the university leaders in the researched university, and thus enables information technology to carry out its work efficiently and effectively. Predicting the studied phenomenon in the future by means of Box-Jenkins model.</li><li>2. Employing information technologies in the axes of the educational process worked to build a bridge of vital communication between faculty members and</li></ol>

	all sources of the educational process, and this necessarily means facilitating the teacher's task in delivering information to the student within an interactive technical environment, and information technologies provide multiple sources in order to obtain information Whether it is from sources within the university or from the Internet and the educational technologies it contains.
<b>Indicative Contents</b> المحتويات الإرشادية	Although the information technology specialization is one of the most demanded fields currently in all global markets, some specializations range from stagnant to saturated and required, so you should study the market well before choosing a specialization.  But if you are looking for the best majors that have a future in the field of information technology,

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"><li>1. Enable the student to identify arthropods.</li><li>2. The most important people that it includes.</li><li>3. Expand with the insect class and identify the external and internal morphological characteristics of insects.</li><li>4. Know the taxonomic position of insects.</li><li>5. Classification methods using taxonomic records.</li></ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"><li>1. students learn how to distinguish an insect from other arthropoda</li><li>2. students get knowledge about the insect's body parts in detail for the head, thorax and abdomen</li><li>3. students learn the way of feeding insects by knowing the parts of their mouth parts with a microscope</li></ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction of insect and distinguish an insect from other arthropoda. The type of orientation on head , types of sutures, types of antenna (1). Antenna 2 , Mouth parts of grasshopper and cockroach . [15 hrs] Mouth parts of housefly + Mouth parts of horsefly and is table fly .Mouth parts. of mosquito. [10 hrs] Mouth parts. of honey bee Mouth parts of plant bug . Mouth parts of bed bug Mouth parts of butterfly .Types of legs , Types of wings[11 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Introduction of insect ,distinguish an insect from other arthropoda. The type of orientation on head , types of sutures + types of antenna (1) .Antenna 2,Mouth parts of grasshopper and cockroach, Mouth parts of housefly. [18 hrs] Mouth parts of horsefly and is table fly .Mouth parts of honey bee . Mouth parts of mosquito. Mouth parts of plant bug . Mouth parts of bed bug. Mouth parts of butterfly Types of legs Types of wings. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Various techniques were used such as showing any living and saved models and means of illustration and sometimes the use of projector. Study the characteristic of the insect class. Division the body of the insect into head – thorax – abdomen and study the appendages of the head and thorax and abdomen. Study the difference between insects and other arthropoda. Methods of preserving the insects. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Clarification of basic information about the basic vocabulary of the curriculum and how to use it in the anatomy of plants in practice.</li> <li>2. Teaching students how to prepare different plant tissue sections.</li> <li>3. Conducting histological comparisons between different aggregates.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. 1. Students became able to understand nature of higher plants tissues.</li> <li>2. 2. Helping students to identify plants tissues.</li> <li>3. 3. Encourage the students to improve skills of plant anatomy and proteins and understanding how to distinguish between amino acids</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Plant Anatomy, The important of studying plant anatomy .The cell wall, Formation of the cell wall. Plant Tissues, 1. Meristematic tissues, 2. Permanent tissues . Parenchyma tissue, collenchma tissues , Sclerenchyma tissues. [10 hrs] Dermal Tissues, The Periderm. The Epidermis. Stele Biology .Trichomes. The Xylem , Primary and secondary xylem. The Phloem, Primary and secondary phloem. [12 hrs] The Stem, stem in monocotyledon. stem in dicotyledon. stem in dicotyledon. The Root. root in monocotyledon, root in dicotyledon. Secondary growth.. [10 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> The plant cell, The cell wall, pits. Intercellular spaces, living & nonliving components. Plant Tissues , Meristematic Tissues .Apical M.T., Lateral M.T. Intercalary M.T. Permanent Tissues, Parenchyma tissues .Collenchyma Tissues. Sclerenchyma T. [18 hrs] Fibers, Sclerides. Dermal T. ,Epidermis, Stomata . Types & components , subsidiary cells. The Xylem. The phloem. Cross section in monocotyledon & dicotyledon root. Cross section in monocotyledon. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Various techniques were used such as. Data show , Microscope, Posters , Samples of plants keep in alcoholic solution . Students do study the following fields: Higher Plants structures. Anatomy procedures. Learning compositions of plant tissues. Comparison between monocots and dicots tissues. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.
-------------------	---

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	79	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	71	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	4.7
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>150</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Plant Anatomy, The important of studying plant anatomy.
Week 2	The cell wall, Formation of the cell wall.
Week 3	Plant Tissues, 1. Meristematic tissues, 2. Permanent tissues.
Week 4	Parenchyma tissue, collenchma tissues, Sclerenchyma tissues.
Week 5	Dermal Tissues, The Periderm.
Week 6	The Epidermis.
Week 7	Stele Biology.
Week 8	Trichomes.
Week 9	The Xylem, Primary and secondary xylem.
Week 10	The Phloem, Primary and secondary phloem.
Week 11	The Stem, stem in monocotyledon. stem in dicotyledon.
Week 12	stem in dicotyledon.
Week 13	The Root.
Week 14	root in monocotyledon, root in dicotyledon.
Week 15	Secondary growth.

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: The plant cell, The cell wall, pits.
Week 2	Lab 2: Intercellular spaces, living & nonliving components.
Week 3	Lab 3: Plant Tissues, Meristematic Tissues.
Week 4	Lab 4: Apical M.T., Lateral M.T. Intercalary M.T.
Week 5	Lab 5: Permanent Tissues, Parenchyma tissues.
Week 6	Lab 6: Collenchyma Tissues.
Week 7	Lab 7: Sclerenchyma T.
Week 8	Lab 8: Fibers, Sclerides.
Week 9	Lab 9: Dermal T., Epidermis, Stomata.

<b>Week10</b>	Lab 10: Types & components , subsidiary cells.
<b>Week 11</b>	Lab 11: The Xylem .
<b>Week 12</b>	Lab 12: The phloem.
<b>Week 13</b>	Lab 13: Cross section in monocotyledon & dicotyledon root.
<b>Week 14</b>	Lab 14: Cross section in monocotyledon.
<b>Week 15</b>	Lab 15: Cross section in dicotyledon stem.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Communicate biological information to students about the basic biological and molecular components of a cell .</li> <li>2. Methods of measuring and conducting laboratory chemical tests .</li> <li>3. Keeping up with the development that is happening in the world of laboratory materials and equipment.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Giving the student the most important basics of biochemistry and understanding the biological interactions that take place within the biological system</li> <li>2. The student's understanding of the most important biological components inside the body, such as sugars, proteins, fats, their components and their interactions</li> <li>3. Giving a clear picture of the most important metabolic reactions that occur to the biological components inside the body.</li> <li>4. Teaching students how to deal with laboratory tools correctly and safely and how to prevent them from damage</li> <li>5. The student practically understood how to detect the types of carbohydrates and the most important tests related to carbohydrates.</li> <li>6. 3-Detecting practically amino acids and proteins and understanding how to distinguish between amino acids</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Principle of biochemistry , water. Buffers and pH. Carbohydrates composition. Carbohydrates functions.[15 hrs] , Types of amino acids, their composition. Amino acids reactions. Proteins structures, types .Proteins reactions. Lipids classification. Lipids functions. Fatty acids, saturated. Unsaturated fatty acids [8 hrs] Metabolism reactions . Glycolysis reaction .Proteins metabolism.[18hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Quantitative test for carbohydrates, Molish's test. Benedict's test, Barfoed's. Selivanoff 's test, Bial's test. Hydrolysis of carbohydrates. Hydrolysis of disaccharides reactions. Hydrolysis of polysaccharides. [16hrs] Proteins have many functions and shapes. Types of proteins. Ninhydrin test, Hopkincole reaction or glyoxylic acid reaction. Millon test, Xanthoprotic test. Sakaguchi test, Lead acetate test. Biuret test, Proteins extraction . Spectrophotometric method, Biuret method, lowry (Folin) method. Lipids, Fatty acids, Lipids classification, Acroleine test, Unsaturated test, Acid value , Iodine number, Estimation of reducing sugar by nelson. [20 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Students do study the following fields: Principles of biochemistry. Water formula, reactions, and buffers. chemical composition of carbohydrates, and their reactions . Amino acids and proteins. lipids ,chemical composition and reactions. metabolism of carbohydrates and proteins. The most important tests adopted in the detection of sugars and their types. Study the tests used for detection of proteins and amino acids and their most important properties and how to differentiate between nucleic acids Amino acids and proteins. prepare the cellular extract and measuring the protein concentration in the extract metabolism of carbohydrates and proteins. detect fats in the laboratory and the most important tests related to fats. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims to: <ol style="list-style-type: none"> <li>1. Giving information to the student regarding the origins of microbiology.</li> <li>2. Defining the types of microorganisms.</li> <li>3. Studying the composition of internal and external microorganisms.</li> <li>4. Branches of microbiology.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Students were able to learn the latest information on microorganisms.</li> <li>2. The student should know the most important terms related to the subject.</li> <li>3. The student should understand the most important methods of isolating microorganisms.</li> <li>4. The student should know the important and distinctive characteristics of microorganisms.</li> <li>5. Identifying "bacteria" by studying the types of microscopes used and then examining them in their natural form under a light microscope. This is followed by the use of different staining methods to examine the cellular structures.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> General Introduction. Classification of microorganisms . Prokaryotes , Eukaryote . General characteristics and types of Prokaryotic and Eukaryotic microorganisms. The impact of microorganisms on humans. [8hrs] The prokaryotic cell: size, shape, and arrangement. Prokaryotic cell structure : External cell structures: Appendages- :Flagella, Function of Flagella - .Axial Filaments (Periplasmic Flagella -.(Archaeal Flagella. External cell structures: Appendages: Fimbriae , Function of Fimbriae .Pili, types of Pili , and function. The bacterial surface coating or glycocalyx. Specialized functions of the glycocalyx .Biofilm. [10 hrs] The Cell Envelope, The Cell Wall, The major functions of the cell wall are: Composition and Characteristics. Gram-Positive Cell Walls , Gram-Negative Cell Walls. Atypical Cell Walls: The cells have no walls, Acid-Fast Cell Walls . Archaeal Cell Walls . The Plasma (Cytoplasmic) Membrane. Functions of the Cell Membrane. The Movement of Materials across Membranes. Archaeal Plasma Membranes. [10 hrs] Cytoplasm. Inclusions. The Bacterial Cytoskeleton. Ribosomes . Chromosomes and Plasmids Endospores. Structure of the endospore. Chemical composition of endospores: Properties of endospores. Germination. [8 hrs] Revision problem classes [3 hrs]  <u>Part B – Practical labs</u>  Disadvantages of bacteria. Advantages of bacteria. Types of Microscopes. Introduction on Bacteria . Bacterial smear preparation. Bacterial smear preparation. Bacterial staining . Simple stain . Gram stain . [18 hrs] Capsule stain. Spore stain . Acid-Fast stain. Motility tests. Sterilization Methods. Part 1 Disinfection Methods. Part 1. Culture media. part 1. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents. Second grade students gradually become more interested in practical microbiology lab work . Once they learn the safety rules in microbiology they start to be cooperative and enjoy group work . Most of them have not seen or handle bacteria, this makes them ask and discuss the results in details. Videos and tutorials help a lot in staining methods and other lab experiments . Lecturers usually focus on sterilization ,disinfection and keeping the lab clean to avoid accidents . In some cases students are asked to prepare illustrated teaching aids in microbiology subjects. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>
-------------------	---

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	47	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	3.1
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>125</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

## Delivery Plan (Weekly Syllabus)

### المنهاج الأسبوعي النظري

	Material Covered
<b>Week 1</b>	General Introduction. Classification of microorganisms.
<b>Week 2</b>	Prokaryotes , Eukaryotes. General characteristics and types of Prokaryotic and Eukaryotic microorganisms.
<b>Week 3</b>	The impact of microorganisms on humans. The prokaryotic cell: size, shape, and arrangement .
<b>Week 4</b>	Prokaryotic cell structure: External cell structures: Appendages: -Flagella, Function of Flagella. - Axial Filaments (Periplasmic Flagella). - Archaeal Flagella.
<b>Week 5</b>	External cell structures: - Appendages: - Fimbriae , Function of Fimbriae. - Pili, types of Pili , and function.
<b>Week 6</b>	The bacterial surface coating or glycocalyx. Specialized functions of the glycocalyx. Biofilm.
<b>Week 7</b>	The Cell Envelope - The Cell Wall The major functions of the cell wall are:
<b>Week 8</b>	Composition and Characteristics. Gram-Positive Cell Walls Gram-Negative Cell Walls
<b>Week 9</b>	Atypical Cell Walls: The cells have no walls, Acid-Fast Cell Walls. • Archaeal Cell Walls
<b>Week 10</b>	The Plasma (Cytoplasmic) Membrane. Functions of the Cell Membrane.
<b>Week 11</b>	The Movement of Materials across Membranes. Archaeal Plasma Membranes. Cytoplasm.
<b>Week 12</b>	Inclusions. The Bacterial Cytoskeleton. Ribosomes
<b>Week 13</b>	Chromosomes and Plasmids
<b>Week 14</b>	Endospores

	Structure of the endospore. Chemical composition of endospores:
<b>Week 15</b>	Properties of endospores. Germination.

### Delivery Plan (Weekly Lab. Syllabus)

المنهاج الاسبوعي للمختبر

	Material Covered
<b>Week 1</b>	Lab 1: Disadvantages of bacteria.
<b>Week 2</b>	Lab 2: Advantages of bacteria.
<b>Week 3</b>	Lab 3: Types of Microscopes.
<b>Week 4</b>	Lab 4: Introduction on Bacteria . Bacterial smear preparation.
<b>Week 5</b>	Lab 5: Bacterial smear preparation.
<b>Week 6</b>	Lab 6: Bacterial staining
<b>Week 7</b>	Lab 7: Simple stain
<b>Week 8</b>	Lab 8: Gram stain .
<b>Week 9</b>	Lab9: Capsule stain
<b>Week10</b>	Lab 10: Spore stain.
<b>Week 11</b>	Lab 11: Acid-Fast stain
<b>Week 12</b>	Lab 12: Motility tests.
<b>Week 13</b>	Lab 13: Sterilization Methods. Part 1
<b>Week 14</b>	Lab 14: Disinfection Methods. Part 1
<b>Week 15</b>	Lab 15: Culture media. part 1

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	72	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	4.8
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>150</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Introduction in Entomology.
Week 2	Structure of Nervous System part 1
Week 3	Structure of Nervous System part 2
Week 4	Endocrine System part 1
Week 5	Endocrine System part 2
Week 6	Morphogenesis part 1
Week 7	Morphogenesis part 2
Week 8	Molting part 1
Week 9	Molting part 2
Week 10	senses part 1
Week 11	senses part 2
Week 12	Communication part 1
Week 13	Communication part 2
Week 14	Taxonomy part 1
Week 15	Taxonomy part 2

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الأسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Abdominal appendages
Week 2	Lab 2: metamorphosis
Week 3	Lab 3: Classification of insect-thysanura
Week 4	Lab 4: collembola
Week 5	Lab 5: Odonata
Week 6	Lab 6: Dermaptera
Week 7	Lab 7: Dictyoptera
Week 8	Lab 8: Orthoptera
Week 9	Lab 9: Mallophage

<b>Week10</b>	Lab 10: anoplura
<b>Week11</b>	Lab11: Ephemeroptera
<b>Week 12</b>	Lab 12: hemiptera
<b>Week 13</b>	Lab 13: Homoptera + thysanoptera + isoptera
<b>Week 14</b>	Lab 14: Hymenoptera
<b>Week 15</b>	Lab 15: diptera + lepidoptera

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 - 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Introduce the student to the principles of modern plant taxonomy (Phylogentic classification) which based on a set of taxonomical evidence (comparative Morphology, comparative Anatomy, Cytological taxonomy, etc.)</li> <li>2. Demonstrate how to use the taxonomic evidence in designing taxonomical keys to distinguish between different plant taxa.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. <b>1. Students became able to understand nature of higher plants.</b></li> <li>2. <b>2.Helping students to identify plants.</b></li> <li>3. <b>3. Encourage the students to improve skills of sampling &amp; diagnosing of higher plants.</b></li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction to plant taxonomy; its characters and relation with other sciences. Basic principles, & Functions of the of taxonomy. [8 hrs] Types of taxonomy; Types of classification systems. Taxonomy of living organisms; taxonomy of Plant kingdom.Characters of scientific names; International Codes of Botanical Nomenclature & their principles; nomenclatural type . [10 hrs] The terms that used in the description of vegetative organs (Roots, Stems, & Leaves.( The typical flower ؛ Position of the ovary؛ Aestivation. Androecium؛ Gynoecium; Symmetry of flowers & Placentation:؛ [8 hrs] Inflorescence (component & types؛( floral Diagram.: Inflorescence (component & types( Floral Modifications And Inflorescences .The Fruits Types [10 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> General Terms used in plant Taxonomy .classification of plants depending on habit. classification of plants depending on environments. The Root in Plants , types of root , modification of roots. The stem in Plants , types of stem in plants ، modifications of stem in plants. The leaves in plants , simple & compound leaves ,types of leaves in plants ،modifications of leaves in plants.Flowers in plants. The Seeds (component & types); Pollen grain & pollination. [20 hrs] . Taxonomy of Plant kingdom; Characters of Seed plants. Gymnospermae (general characters, taxonomy, example family pinaceae.( Angyospermae (general characters, taxonomy, example.( Examples on monocotyledons families. Examples on dicotyledons families.[16 hrs

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Teaching Techniques: Powerpoint presentations, videos and tutorials. Students do study the following fields: Higher Plants structures. Taxonomic systems . Higher & Lower taxonomic levels . Studying of the most common plants families . This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims: 1. Communicate information about parasitology to students. 2. Focusing on important parasites, especially those that infect humans and economic animals. 3. How to diagnose parasites. 4. Methods of transmission to humans and prevention.
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	1. To enable students to understand the topic of parasites. 2. To familiarize the student with the terminology related to the subject of parasites. 3. The student learns how to diagnose parasites and ways to prevent them .
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction in Parasitology. Types of Animal associations Types of Parasite .Types of Hosts. Subkingdom- Protozoa. Phylum: Sarcomastigophora, Class: Sarcodina, Subphylum : Mastigophora. Class :Zoomastigophora, The Flagellate, Hemoflagellates, Genus :Trypanosoma. . [14hrs] Ph: ciliophora: Or :Trichomastida , Balantidium coli. Ph: Apicomplexa, Class: sporozoa ,Subcl: coccidian . Sub or: Haemosporina Genus : Plasmodium. [12hrs] Helminths – general ,Phylum :Platyhelminthes , Cl: Trematoda , Intestinal flukes, Or : Cyclophyllidea, Genus :Taenia , Hymenolepis, Somatic cestodes, Genus :Echinococcus (E.granulosus). [18 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Introduction of practical parasitology .Protozoa. Endolimax nana ,Iodamoeba butchlii. Entamoeba coli, Ciliophora. Intestinal flagellates ,Gardia lambli . Atrial flagellat,Trickomonas vaginalis. Blood and tissue flagellates.Leishmania ,Trypanosoma.[18 hrs] Sporozoa,Plasmodium,Platyhlminthes. Diphyllbothrium latum. Taenia saginata,Taenia solium .Echinococcus granulosus. Trematoda,Fasciola hepatica,Fasciolopsis buski Schistosomatidae..Nemathelminthes. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents. Various techniques were used such as. Data show , Microscope, Posters , Samples keep in alcoholic solution. Students do study the following fields: Instruction. Kingdom of protozoa .Platyhelmenthes .Types of Animal associations. Types of Parasite .Types of Hosts . Protozoa and Heleminths. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Communicate biological information to students about the basic biological and molecular components of a cell .</li> <li>2. Methods of measuring and conducting laboratory chemical tests .</li> <li>3. Keeping up with the development that is happening in the world of laboratory materials and equipment.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Students' understanding of the synthesis of nucleotides and how ribose sugar and purine or pyrimidine base are associated with the phosphate group</li> <li>2. The structure of DNA and RNA and its role in transferring genetic information and building proteins</li> <li>3. Understand the fundamentals of enzymes, their chemical structure and their role in stimulating chemical reactions within the body</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Nucleotides and their synthesis. Synthesis of Nucleotides. Chemistry of purines. Chemistry of pyrimidines. Nucleic acids. Nucleic acids components. Nucleotides Absorb Ultraviolet Light. DNA structure, DNA replication. [14 hrs] protein-synthesizing, Nucleic acids levels. Nucleotides serve divers physiological function. Cyclic nucleotide. [8 hrs] DNA Contains the Genetic Information. Used DNA to create proteins. RNA Synthesis. Messenger RNA (mRNA(. Transfer RNA (tRNA).[14hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Blood composition, Functions of blood. Centrifugation, Anticoagulant, Blood collection and handling, Calorimetric analysis, Spectrophotometer, Light intensity and Beer's law, The normal value. Determination of serum glucose, Insulin, Glucagon . Determination of Growth hormones (GH) and Adrenocortic trophic (ACTH), Hydrocortisone Hormone. Determination of total serum protein concentration, Blood proteins functions, The normal value of serum protein, Hyperproteinemia, Hypoproteinemia. Methods for determination of serum protein concentration. [18 hrs] Determination of serum cholesterol concentration .The source and metabolism of cholesterol as the following. How cholesterol is transported in the blood. The normal value of blood cholesterol. Determination of serum urea concentration. The normal value of blood urea. The removing of urea. Clinical significance of urea. Determination of serum creatinine concentration. The normal value of blood creatinine. Clinical Significance of Creatinine. Natural concentration of creatine. Determination of creatinine concentration in serum. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents. Students do study the following fields: Nucleotides and their chemical composition. DNA, RNA, structure, reactions and their role in transferring genetic information and building proteins. DNA replications and Translation and reproduction process. Basics of enzymes, their composition, types, and role in stimulating chemical reactions . Principles of Practical Clinical Chemistry .Blood components, and get blood serum . Study the natural biological components inside the body such as blood sugar, proteins, cholesterol, creatinine and others and know their natural concentrations inside the body and pathological conditions that result from the increase or decrease of these biological components. Study the most important practical tests adopted in estimating the percentage of different biological components. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	22	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	1.4
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>100</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

<b>Delivery Plan (Weekly Syllabus)</b> المنهاج الأسبوعي النظري	
	<b>Material Covered</b>
<b>Week 1</b>	Nucleotides and their synthesis.
<b>Week 2</b>	Synthesis of Nucleotides.
<b>Week 3</b>	Chemistry of purines.
<b>Week 4</b>	Chemistry of pyrimidines.
<b>Week 5</b>	Nucleic acids.
<b>Week 6</b>	Nucleic acids components.
<b>Week 7</b>	Nucleotides Absorb Ultraviolet Light
<b>Week 8</b>	DNA structure, DNA replication
<b>Week 9</b>	protein-synthesizing, Nucleic acids levels.
<b>Week 10</b>	Nucleotides serve divers physiological function
<b>Week 11</b>	Cyclic nucleotide
<b>Week 12</b>	DNA Contains the Genetic Information
<b>Week 13</b>	Used DNA to create proteins
<b>Week 14</b>	RNA Synthesis
<b>Week 15</b>	Messenger RNA (mRNA) Transfer RNA (tRNA)

<b>Delivery Plan (Weekly Lab. Syllabus)</b> المنهاج الاسبوعي للمختبر	
	<b>Material Covered</b>
<b>Week 1</b>	Lab 1: Blood composition, Functions of blood.
<b>Week 2</b>	Lab 2: Centrifugation, Anticoagulant, Blood collection and handling, Calorimetric analysis, Spectrophotometer, Light intensity and Beer's law, The normal value.
<b>Week 3</b>	Lab 3: Determination of serum glucose, Insulin, Glucagon .
<b>Week 4</b>	Lab 4: Determination of Growth hormones (GH) and Adrenocortic trophic(ACTH), Hydrocortisone Hormone.
<b>Week 5</b>	Lab 5: Determination of total serum protein concentration, Blood proteins functions, The normal value of serum protein, Hyperproteinemia, Hypoperteinemia.

<b>Week 6</b>	Lab 6: Methods for determination of serum protein concentration.
<b>Week 7</b>	Lab 7: Determination of serum cholesterol concentration. - The source and metabolism of cholesterol as the following.
<b>Week 8</b>	Lab 8: How cholesterol is transported in the blood.
<b>Week 9</b>	Lab9: The normal value of blood cholesterol.
<b>Week10</b>	Lab 10: Determination of serum urea concentration.
<b>Week 11</b>	Lab 11: The normal value of blood urea. - The removing of urea.
<b>Week 12</b>	Lab 12: - Clinical significance of urea.
<b>Week 13</b>	Lab 13: Determination of serum creatinine concentration.
<b>Week 14</b>	Lab 14: The normal value of blood creatinine. Clinical Significance of Creatinine.
<b>Week 15</b>	Lab 15: Natural concentration of creatine. - Determination of creatinine concentration in serum.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 - 49)</b>	<b>FX</b> - Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> - Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims to: <ol style="list-style-type: none"> <li>1. Giving primary information to the student regarding methods of feeding microorganisms.</li> <li>2. The factors affecting its growth.</li> <li>3. Methods of controlling it, whether biological, chemical, physical or mechanical.</li> <li>4. In addition to giving the student preliminary information on the pathogenicity of bacteria.</li> <li>5. Giving the student preliminary information in immunity.</li> <li>6. Giving the student preliminary information in Biotechnology.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	From the study of this subject: <ol style="list-style-type: none"> <li>1. Students were able to learn the cell bacterial cycle.</li> <li>2. The student should know the most important terms related to the subject.</li> <li>3. By studying the student's immunity, he was able to understand the human immune system and the mechanisms of his work.</li> <li>4. Encouraging students to develop their scientific skills in the medical laboratories.</li> <li>5. Encourage students to discuss various problems about antibacterial drug resistances and how to deal with these bacterial strains.</li> <li>6. Develops the students own skills to deal with bacterial genetic material .</li> <li>7. Biotechnology.</li> <li>8. Studying many methods of sterilization and disinfection.</li> <li>9. Studying methods of counting bacteria cells (measuring the amount of growth) and conducting experiments on them.</li> <li>10. Studying the types of culture media, how to prepare them, and identifying ways to isolate and inoculate bacteria.</li> <li>11. Studying the types of biochemical tests and diagnosing bacteria.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Nutrition of Microorganisms. Nutritional types of microorganisms. Culture media Microbial Growth Cycle . Bacterial Cell Division .Cell Growth and Binary Fission. Population Growth. Essentials of Catabolism .Influence of environmental factors of growth , Temperature, Acidity and Alkalinity, Osmotic Effects, Oxygen, Pressure, Radiation.[10 hrs]  Microbial Growth Control. Physical Antimicrobial Control. Heat Sterilization, Radiation Sterilization, Filter Sterilization. Biological control of microorganisms. The use of mechanical methods in control: Chemical Growth Control, Antimicrobial Agents, General characteristics of antimicrobial drugs, Mechanisms of Antimicrobial Action. Antimicrobial Drug Resistance.[8 hrs]  Host – Parasite Relationships, Overview of bacterial pathogenesis, Virulence,

	<p>Toxigenicity, Immunity, Cells and Organs of the Immune System, Innate Immunity, Adaptive Immunity, Antibodies, Inflammation. Prevention of Infectious. Allergy, Hypersensitivity.[10 hrs]</p> <p>Molecular Biology of Bacteria, DNA Structure and Genetic, DNA Replication, RNA Synthesis: Transcription, Protein Structure and Synthesis. Biotechnology. [8 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>Sterilization Methods. Part 2. Quantitative measurements of bacterial growth. Turbidity measurements ( Spectrophotometer). McFarland’s Tubes. Total ( viable) count. Breed’s method, Hemocytometer. Types of culture media and their preparation. Anaerobic culture methods. Kirby-Bauer antimicrobial Sensitivity Test. Influence of environmental factors of growth. Temperature, - Osmotic Effects, - Oxygen. [20 hrs]</p> <p>Identification of bacteria: Biochemical tests: Sugar fermentation test. Basis of biochemical tests. IMViC. Phenylalanine deaminase test, Urease test. Oxidase, Catalase. Gelatin Hydrolysis Test. Nitrate, TSI slope. Starch hydrolysis test. coagulase.[16 hrs]</p>
--	---

<b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم	
<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents. Teaching Techniques: Powerpoint presentations, videos and tutorials. Students do study the following fields: Nutrition of Microorganisms .Bacterial Cell Division. Influence of environmental factors of growth. Microbial Growth Control. Antimicrobial Agents. Overview of bacterial pathogenesis . Immunity. Molecular Biology of Bacteria. Students are trained to perform experiments in bacterial cell counts, preparation and the purpose of many types of culture media, grow anaerobic incubation, antibiotics sensitivity testing, and routine biochemical testing for bacterial identification. Furthermore each lab results for the previous lab work are discussed. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Understand the basic concepts of cellular function.</li> <li>2. The ability to carefully analyze the scientific evidence contained in what is understood about cellular processes.</li> <li>3. Developing skills by understanding the mechanisms and hypotheses that regulate cell work.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. To enable students to understand the cell biology.</li> <li>2. Help the student to understand the organelles.</li> <li>3. Encourage the student to develop their study skills.</li> <li>4. The students must understand the structures and the types of the cells.</li> <li>5. The students must learn how the cell divides?</li> <li>6. The students must know the ways of feeding and drinking of the cells.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction to cell biology. cell theory. Prokaryotic cells . eukaryotic cells. [8 hrs] Cell membrane structure. Cell membrane function. Cell wall structure. Cell wall function. [10 hrs] Organelles : mitochondria ,plastids .nucleus. Ribosomes , lysosome , centrosome.. golgy complex, ER. [10 hrs] Cell cycle. Mitosis. Meiosis. [8 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> study the prokaryotic and eukaryotic cells. Measure the length of the cell . Study the cell wall. modification and functions of plasma membrane. Study the cytoplasmic organelles part 1. Study the cytoplasmic organelles part 2. [18 hrs] Study the cell division (mitosis). Study the cell division (meiosis) . Structures of chromosomes..number and types of chromosomes. karyotyping part 1, karyotyping part 2. DNA replication. Gene expression part 1. Gene expression part 2.[18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: The differences between prokaryotic and eukaryotic cells. Cell membrane and wall. The organelles of the cell. Cell cycle and the cell division. Gene expression. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. Provide the student with aspects of knowledge of the concepts, types and characteristics of environmental systems.</li> <li>2. Providing the student with knowledge that enables him to identify the importance of environmental systems and the problems they face.</li> <li>3. Enable the student to choose environmental models and use them in the study of environmental systems .</li> <li>4. Providing students with positive attitudes towards preserving and protecting environmental systems .</li> <li>5. Provide students with positive attitudes towards preserving and protecting environmental systems .</li> <li>6. Enable the student to choose environmental models and use them in the study of environmental systems.</li> <li>7. Providing students with aspects of knowledge of the concepts, types and characteristics of environmental systems.</li> <li>8. The student acquires practical and applied skills based on theoretical lessons.</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. Every student be able to knowledge about environment and how pollution it.</li> <li>2. Every student be able to chemical analysis water.</li> <li>3. The student should be able to collect and summarize useful information related to a study.</li> <li>4. The student proposes solutions to some environmental problems within the framework of protecting and preserving them.</li> <li>5 . That the student has the ability to work in a team.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction; Definition; Scope; Divisions. The Ecosystems (definition, characters, volume, structure). Food chains &amp; food webs. Ecological pyramids &amp; Energy flow; Ecological efficiency. The biogeochemical cycles. Incomplete ecosystems . [10 hrs]</p> <p>Liebig law of minimum; Shelford law of tolerance. The abiotic factors:1-The Soil . 2-The water .The components of natural water (anions, cations, salts). 2-The water .The components of natural water (gases &amp; organic matters(. Characters of the population.[10 hrs]</p> <p>The biological interactions. The communities (principals of bio-communities, Concept,. classification, dominancy, stratification.( Ecological succession. Biogeography; the major distributions of plants &amp; animals. [8 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p>

	<p>Identifying the laboratory ecology. The Science of meteorological -1.The Science of meteorological -2. Treatment of physical properties in the water. Treatment the concentration of oxygen in the water. Treatment of alkaline water. Treatment of acidic water.[18 hrs]</p> <p>Determination of productivity in a manner dissolved oxygen. Treatment the salinity of the water. Treatment of calcium and magnesium hardness in water. Treatment of total brackish water. Relations between organisms. Structure of society1. Structure of society1. Structure of the community. [18 hrs]</p>
--	---

### Learning and Teaching Strategies

#### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Student were active in our classes and interactive between them and us also. Teaching Techniques were Variety. Students do study the following fields: Introduction of ecology. Divisions of ecology. Ecosystems . Nutritional Relationships. Food Chains &amp; Food Webs. Ecological pyramid. Environmental Productivity. Introduction of Lab. ecology .Safety in the laboratory. Identify biotic and abiotic environmental factors. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>
-------------------	--

### Student Workload (SWL)

#### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	47	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	3.1
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>125</b>		

### Module Evaluation

#### تقييم المادة الدراسية

	Time/Number	Weight (Marks)	Week Due	Relevant Learning
--	-------------	----------------	----------	-------------------

					Outcome
Formative assessment	Quizzes	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	Assignments	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	Projects / Lab.	1	10% (10)	Continuous	All
	Report	1	10% (10)	13	LO #5, #8 and #10
Summative assessment	Midterm Exam	2hr	10% (10)	7	LO #1 - #7
	Final Exam	3hr	50% (50)	16	All
Total assessment			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Introduction; Definition; Scope; Divisions.
Week 2	The Ecosystems (definition, characters, volume, structure).
Week 3	Food chains & food webs.
Week 4	Ecological pyramids & Energy flow; Ecological efficiency.
Week 5	The biogeochemical cycles.
Week 6	Incomplete ecosystems
Week 7	Liebig law of minimum; Shelford law of tolerance.
Week 8	The abiotic factors:1-The Soil.
Week 9	2-The water The components of natural water (anions, cations, salts,)
Week 10	2-The water The components of natural water (gases & organic matters)
Week 11	Characters of the population.
Week 12	The biological interactions
Week 13	The communities (principals of bio-communities, Concept, classification, dominancy, stratification).
Week 14	Ecological succession.
Week 15	Biogeography; the major distributions of plants & animals.

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Identifying the laboratory ecology.
Week 2	Lab 2: The Science of meteorological -1.
Week 3	Lab 3: The Science of meteorological -2
Week 4	Lab 4: Treatment of physical properties in the water.
Week 5	Lab 5: Treatment the concentration of oxygen in the water.
Week 6	Lab 6: Treatment of alkaline water.
Week 7	Lab 7: Treatment of acidic water.
Week 8	Lab 8: Determination of productivity in a manner dissolved oxygen.
Week 9	Lab9: Treatment the salinity of the water.
Week10	Lab 10:Treatment of calcium and magnesium hardness in water.
Week 11	Lab 11: Treatment of total brackish water.
Week 12	Lab 12: Relations between organisms.
Week 13	Lab 13: Structure of society1.
Week 14	Lab 14: Structure of society1.
Week 15	Lab 15: Structure of the community.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. The student's knowledge of the concept of pollution, its causes, types, risks, and how to reduce pollution.</li> <li>2. Knowing the negative effects of pollutants on the environment and human health.</li> <li>3. Identify the harmful effects of pesticides, fertilizers, oil and others.</li> <li>4. Identify solid waste, its types, damages, and disposal methods.</li> <li>5. Identify the types of radiation and radioactive pollution, its sources and its biological damage.</li> <li>6. Learn about the concept of the ecosystem and its components.</li> <li>7. Introducing the concept of environmental pollution and the factors contributing to it.</li> <li>8. Clarify the dangers and consequences of environmental pollution.</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. How to deal with any environmental problem and control the problem within the limits of capabilities.</li> <li>2. Understanding and distinguishing the types of factors and substances that contribute to the pollution of the ecosystem.</li> <li>3. Every student be able to knowledge about environment and how pollution it.</li> <li>4. Every student be able to chemical analysis water.</li> <li>5. The student should be able to collect and summarize useful information related to a study.</li> <li>6. The student proposes solutions to some environmental problems within the framework of protecting and preserving them.</li> <li>7. That the student has the ability to work in a team.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>General introduction; definition. pollution types .Point sources &amp; non-point sources of pollution . Water pollution . Major pollutant. [16 hrs]</p> <p>Major pollutant: The hydrocarbons Agricultural pollution. The solid waste. Thermal pollution. Air pollution .[10 hrs]</p> <p>The greenhouse phenomenon. Acid rains. Thermal inversion. Noise pollution. Radiation pollution. Personal pollution. Visual Pollution. [12 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>Identifying the laboratory pollution.The Science of meteorological. Determination residual chlorine in the water. Determination chloride in the water. Determination</p>

	<p>BOD5 in the water. Determination COD. In the water. Determination nitrate in the water. [18 hrs]</p> <p>Determination phosphate in the water. Determination Sulphate in the water. Determination silica in the water. Relations between organisms. Field capacity of soil . Soil color. Soil Texture. Determination heavy metal in the water,1. Determination heavy metal in the water,2.. [18 hrs</p>
--	---

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents Students do study the following fields: Introduction of pollution. Types of pollution. The pollutants. Water Pollution. Soil Pollution. Noise Pollution. Introduction of Lab pollution. Identify the types of water pollutants. Able to physical and chemical analysis for water. Most students were active in our classes and interactive between them and us also. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>
-------------------	---

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	64	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	4.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	36	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	2.4
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>100</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	General introduction; definition. pollution types.
Week 2	Point sources & non-point sources of pollution
Week 3	Water pollution.
Week 4	Major pollutant. Major pollutant: The hydrocarbons
Week 5	Agricultural pollution.
Week 6	The solid waste.
Week 7	Thermal pollution.
Week 8	Air pollution
Week 9	The greenhouse phenomenon.
Week 10	Acid rains.
Week 11	Thermal inversion.
Week 12	Noise pollution.
Week 13	Radiation pollution.
Week 14	Personal pollution.
Week 15	Visual Pollution.

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Identifying the laboratory pollution.
Week 2	Lab 2: The Science of meteorological.
Week 3	Lab 3: Determination residual chlorine in the water.
Week 4	Lab 4: Determination chloride in the water.
Week 5	Lab 5: Determination BOD <sub>5</sub> in the water.
Week 6	Lab 6: Determination COD. In the water.
Week 7	Lab 7: Determination nitrate in the water.
Week 8	Lab 8: Determination phosphate in the water.

<b>Week 9</b>	Lab9: Determination Sulphate in the water.
<b>Week10</b>	Lab 10: Determination silica in the water.
<b>Week 11</b>	Lab 11: Relations between organisms.
<b>Week 12</b>	Lab 12: Field capacity of soil.
<b>Week 13</b>	Lab 13: Soil color. Soil Texture.
<b>Week 14</b>	Lab 14: Determination heavy metal in the water,1.
<b>Week 15</b>	Lab 15: Determination heavy metal in the water,2.

<b>Learning and Teaching Resources</b> مصادر التعلم والتدريس		
	Text	Available in the Library?
<b>Required Texts</b>	<b>STANDER METHODS FOR EXAMINATION OF WATER AND WASTEWATER. BY RODGER B. , ANDRRRREW D. AND EUGENE W. (2017).</b>	Yes
	<b>ENVIRONMENT ANALYSIS . BY PRADYOT PATNAIK .(2010)</b>	Yes
<b>Recommended Texts</b>	<b>Understanding Environmental Pollution. (2020).</b> <a href="#">Marquita K. Hill.</a>	No
<b>Websites</b>	<a href="https://www.britannica.com/science/pollution-environment">https://www.britannica.com/science/pollution-environment</a> <a href="https://www.eea.europa.eu/en/topics/in-depth/pollution">https://www.eea.europa.eu/en/topics/in-depth/pollution</a>	

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. Introduce the student to the science of genetics, its branches, and its importance.</li> <li>2. Introducing the student to the science of genetics, its branches, and its importance.</li> <li>3. Introduce the student to the cytological structure of the plant cell, with a focus on the cell nucleus, its genetic components and functions.</li> <li>4. Knowledge of Mendel laws and their applications.</li> <li>5. The student is familiar with the identification of genetic factors and the extent of their influence genetically.</li> <li>6. Giving the student the necessary experience and skills in the field of basics of genetics in general.</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. To enable students to understand the genetics</li> <li>2. Help the student to understand the law of genetics</li> <li>3. Encourage the student to develop their study skills.</li> <li>4. The students must know the traits of pea plant studied by Mendel.</li> <li>5. The students must understand the solution method of genetic problem.</li> <li>6. The students must learn the genetic disease.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction in Genetics. Basic Genetics , Genetic Terminology. The Physical Basis of Heredity. Effects of the Environment on genetics. [10 hrs]</p> <p>Mendel's Studies. allelic relationship. Determination of Sex. sex- linked inheritance. [8 hrs]</p> <p>Cytogenetic : Changes I Structure of Chromosomes. Changes in Chromosomes Number. [10 hrs]</p> <p>Gene mutation. Genes in Individuals. Linkage. Crossing Over. Mapping of Chromosomes. [8 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>The characters of the best organism for the genetic studies. The traits of pea plant. Mendels first law and solution of genetic problems. Mendels second law and solution of genetic problems. Punnet squares and solution of genetic problems. Part 1 Punnet squares and solution of genetic problems. part 2 . Mendel's characters in human, solution of genetic problems. the characters link with sex, solution of genetic problems. [18 hrs]</p> <p>Pedigree analysis, solution of genetic problems. Forked line method. solution of genetic problems. Diagnosis of genetic disease. solution of genetic problems. The corn plant Drosophila. [18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters,. Students do study the following fields: Genetic traits inherit from parents. Mendel's laws. The genetic diseases. Pedigree analysis. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1 . Clarify the terms related to tissues for students.</li> <li>2 . Explain the main types of tissues.</li> <li>3 . Study its composition.</li> <li>4 . Study their functions.</li> <li>5 . distinguish them from each other.</li> <li>6 . Identify the location of each tissue in the different organs of the body.</li> </ol> <p>Keeping pace with the development in the world of histology.</p>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1.The students could recognize the different tissue of each type</li> <li>2. The students They were able to diagnose all layers of the same tissue and identify the types of cells in them</li> <li>3. They could distinguish any slide of the basic tissue</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction in Histology , The cell . Epithelial Tissue .The types of epithelial tissue The simple epithelial tissue. Modification in surfaces of epithelial tissues Glandular epithelial tissue. Connective Tissue Matrix of C.T and repair it.[14 hrs]</p> <p>The types of connective tissue. Dense connective tissue. Cartilage. The bone (bone cells,The bone types and matrix). The bone histogenesis and repair it. Joints . The blood and its components Blood and Lymph forming organs Non-granular leukocytes, Blood Platlets. Haemopoiesis , Bone marrow.. [10 hrs]</p> <p>Muscular tissues, actin, myosin ,Myofilaments. Sarcoplasmic reticulum, Myoneural junction. Cardiac muscles,Smooth muscles . Nervous tissues,neurons. Peripheral nerves. Types of nerve fibers, Neuroglia, Ganglia. [14 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>The simple epithelial tissue part 1. The simple epithelial tissue part 2. Stratified epithelial tissue part 1. Stratified epithelial tissue part 2. Connective tissue( Cells, Fibers ). Connective tissue (Loose C. T.). Dense connective tissue. Blood. [18 hrs]</p> <p>Cartilage. Bone. Muscular tissue. Nerve system: the type of nerve cells. Peripheral nerve, motor end plate. nerve fiber ,spinal. Sympathetic ganglia.Cerebellum.. [18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: The epithelial tissue . The connective tissue. Special connective tissue. Nerve and vascular system. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Provide the student with aspects of knowledge of the concepts, types and characteristics of environmental systems.</li> <li>2. Providing the student with knowledge that enables him to identify the importance of environmental systems and the problems they face.</li> <li>3. Enable the student to choose environmental models and use them in the study of environmental systems .</li> <li>4. Providing students with positive attitudes towards preserving and protecting environmental systems .</li> <li>5. Provide students with positive attitudes towards preserving and protecting environmental systems .</li> <li>6. Enable the student to choose environmental models and use them in the study of environmental systems.</li> <li>7. Providing students with aspects of knowledge of the concepts, types and characteristics of environmental systems.</li> <li>8. The student acquires practical and applied skills based on theoretical lessons.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Every student be able to knowledge about environment and how pollution it.</li> <li>2. Every student be able to chemical analysis water.</li> <li>3. The student should be able to collect and summarize useful information related to a study.</li> <li>4. The student proposes solutions to some environmental problems within the framework of protecting and preserving them.</li> <li>5 . That the student has the ability to work in a team.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction; Definition; Scope; Divisions. The Ecosystems (definition, characters, volume, structure). Food chains & food webs. Ecological pyramids & Energy flow; Ecological efficiency. The biogeochemical cycles. Incomplete ecosystems . [10 hrs]  Liebig law of minimum; Shelford law of tolerance. The abiotic factors:1-The Soil . 2-The water .The components of natural water (anions, cations, salts). 2-The water .The components of natural water (gases & organic matters(. Characters of the population.[10 hrs]  The biological interactions. The communities (principals of bio-communities, Concept,. classification, dominancy, stratification.( Ecological succession. Biogeography; the major distributions of plants & animals. [8 hrs]  Revision problem classes [3 hrs]  <u>Part B – Practical labs</u>

	<p>Identifying the laboratory ecology. The Science of meteorological -1.The Science of meteorological -2. Treatment of physical properties in the water. Treatment the concentration of oxygen in the water. Treatment of alkaline water. Treatment of acidic water.[18 hrs]</p> <p>Determination of productivity in a manner dissolved oxygen. Treatment the salinity of the water. Treatment of calcium and magnesium hardness in water. Treatment of total brackish water. Relations between organisms. Structure of society1. Structure of society1. Structure of the community. [18 hrs]</p>

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Understand the basic concepts of cellular function.</li> <li>2. The ability to carefully analyze the scientific evidence contained in what is understood about cellular processes.</li> <li>3. Developing skills by understanding the mechanisms and hypotheses that regulate cell work.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. To enable students to understand the cell biology.</li> <li>2. Help the student to understand the organelles.</li> <li>3. Encourage the student to develop their study skills.</li> <li>4. The students must understand the structures and the types of the cells.</li> <li>5. The students must learn how the cell divides?</li> <li>6. The students must know the ways of feeding and drinking of the cells.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction to cell biology. cell theory. Prokaryotic cells . eukaryotic cells. [8 hrs] Cell membrane structure. Cell membrane function. Cell wall structure. Cell wall function. [10 hrs] Organelles : mitochondria ,plastids .nucleus. Ribosomes , lysosome , centrosome.. golgy complex, ER. [10 hrs] Cell cycle. Mitosis. Meiosis. [8 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> study the prokaryotic and eukaryotic cells. Measure the length of the cell . Study the cell wall. modification and functions of plasma membrane. Study the cytoplasmic organelles part 1. Study the cytoplasmic organelles part 2. [18 hrs] Study the cell division (mitosis). Study the cell division (meiosis) . Structures of chromosomes..number and types of chromosomes. karyotyping part 1, karyotyping part 2. DNA replication. Gene expression part 1. Gene expression part 2.[18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: The differences between prokaryotic and eukaryotic cells. Cell membrane and wall. The organelles of the cell. Cell cycle and the cell division. Gene expression. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Know the concepts of water microbiology.</li> <li>2. Studying the economic and environmental importance of water microbes.</li> <li>3. Knowing the effect of microorganisms on the environment and the interactive effect with higher organisms.</li> <li>4. Studying the role of water organisms in the formation and erosion of soil and the cycle of carbon and nitrogen.</li> <li>5. Discuss the vital relationships of water microbes.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Every student be able to isolation and identification microorganisms from several habitats.</li> <li>2. Every student have a knowledge about the effect of microorganisms on public health.</li> <li>3. Detect the water quality for sanitary using several practical techniques (MPN, MFT, Colilert system, etc.)</li> <li>4. By studying the student, he was able to understand the scientific subject</li> <li>5. Helping the student to master the conduct of scientific experiments and tests for the subject</li> <li>6. Encouraging him to develop his scientific skills.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> I Introduction of water . Distribution of microorganisms <sup>1</sup> in water. Bacteria in water. Virus in water, Algae in water. Parasite in water. [10 hrs] Soil borne pathogens <sup>1</sup> Minerals cycle 1 (Carbon( Minerals Cycle 2 (Nitrogen( . Bioremediation. [8 hrs] Water Is the Largest Microbial Habitat Aquatic Viruses: Mortality at Sea Algae: the major microbial biomass in freshwater systems Water Borne Pathogens (Virus, Parasites and Fungi.[10 hrs] Water Borne Pathogens (Bacteria( Water Quality and Public Health. Wastewater Treatment [8 hrs] Revision problem classes [3 hrs]  <u>Part B – Practical labs</u> Introduction in practical water Microbiology. Contact slide assay . microbial population count in water & soil. Bacteria and Actinomycetes . Fungi. Isolation of antibiotic producer from water. measuring CO <sub>2</sub> production. Algae enumeration. filament Fungi.. [18 hrs] Bacteriological examination of water, Coliform bacteria + E.coli.. Fecal Enterococcus. isolation the Shigella. isolation the Salmonella. isolation Vibrio cholera. isolation Pseudomonas . [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents .Students do study the following fields: Environmental microbiology : Water are the Largest Microbial Habitat properties of soil layers. Distribution of microorganisms . Bacteria in water. Virus in water .Algae in water. Parasite in water . water borne pathogens . Minerals cycles (Carbon, Nitrogen) .Aquatic Viruses: Mortality at S. Algae: the major microbial biomass in freshwater systems .Water Borne Pathogens .Virus .Bacteria . Parasites .Water Quality and Public Health .Collection of water samples for analysis .Wastewater Treatment. Bioremediation. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

## Delivery Plan (Weekly Syllabus)

### المنهاج الأسبوعي النظري

	Material Covered
<b>Week 1</b>	Introduction of water and Soil
<b>Week 2</b>	properties of soil layers.
<b>Week 3</b>	Distribution of microorganisms <sup>1</sup> in soil.
<b>Week 4</b>	Bacteria in soil. Virus in soil, Algae in soil. Parasite in soil.
<b>Week 5</b>	Soil borne pathogens <sup>1</sup>
<b>Week 6</b>	Minerals cycle 1 (Carbon)
<b>Week 7</b>	Minerals Cycle 2 (Nitrogen)
<b>Week 8</b>	Bioremediation
<b>Week 9</b>	Water Is the Largest Microbial Habitat
<b>Week 10</b>	Aquatic Viruses: Mortality at Sea
<b>Week 11</b>	Algae: the major microbial biomass in freshwater systems
<b>Week 12</b>	Water Borne Pathogens (Virus, Parasites and Fungi )
<b>Week 13</b>	Water Borne Pathogens (Bacteria)
<b>Week 14</b>	Water Quality and Public Health.
<b>Week 15</b>	Wastewater Treatment

## Delivery Plan (Weekly Lab. Syllabus)

### المنهاج الاسبوعي للمختبر

	Material Covered
<b>Week 1</b>	Lab 1: Introduction in practical water & Soil Microbiology.
<b>Week 2</b>	Lab 2: Contact slide assay.
<b>Week 3</b>	Lab 3: microbial population count in water & soil.
<b>Week 4</b>	Lab 4: Bacteria and Actinomycetes
<b>Week 5</b>	Lab 5: Fungi.
<b>Week 6</b>	Lab 6: Isolation of antibiotic producer from soil .
<b>Week 7</b>	Lab 7: measuring CO <sub>2</sub> production.
<b>Week 8</b>	Lab 8: Algae enumeration.
<b>Week 9</b>	Lab9: filament Fungi.
<b>Week10</b>	Lab 10: Bacteriological examination of water, Coliform bacteria + E.coli.

<b>Week 11</b>	Lab 11: Fecal Enterococcus.
<b>Week 12</b>	Lab 12: isolation the Shigella.
<b>Week 13</b>	Lab 13: isolation the Salmonella.
<b>Week 14</b>	Lab 14: isolation Vibrio cholera .
<b>Week 15</b>	Lab 15: isolation Pseudomonas .

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. The student's comprehension of the concept of the course and his ability to distinguish between it and other sciences.</li> <li>2. Addressing a comprehensive description of the various body systems, with a focus on ruminant field animals and poultry.</li> <li>3. Studying the vital processes that occur in the animal's body that transform the nutrients that the animal eats and turn them into animal products or other secondary waste.</li> <li>4. Basic and physiology of growth and reproduction.</li> <li>5. Keep up with the development that is happening in the world</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. The students understand different physiological mechanisms in the body.</li> <li>2. Help the students to master the interaction and relationships between body systems.</li> <li>3. The development of student's skills for going into relationship between the physiological and pathological disorders.</li> <li>4. The students understand mode of action each physiological test.</li> <li>5. Help the students to master the procedure of each physiological test.</li> <li>6. The development of student's skills for going into the laboratory work experience as specialist who has an excellent background on all physiological tests and their relationship to disease and not as technician operating advice.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction to Physiology. Cell physiology. The mechanisms of transports across the cell membrane. Phagocytosis mechanism. Pinocytosis mechanism. [10 hrs]</p> <p>Blood physiology. Physical Characteristics of blood. Plasma, Erythrocytes, Erythropoiesis. erythrocyte disorders. Types of anemia. Leukocytes. Functions of all types of Leukocytes. Platelets, Hemostasis mechanism, Fibrinolysis.[18hrs]</p> <p>Physiology of Digestion system. Functions of the Digestive System. Nervous Regulation of the Digestive System. Function of Stomach. Regulation of Gastric Secretion. Pancreas. Gall Bladder. Small Intestine. Large intestine [18hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>General safety instructions in the laboratory. Introduction Circulatory system. Fragility test 1. Fragility test 2. Total Red Blood Cell count. differential count. Estimation Hemoglobin. [18 hrs]</p> <p>PCV test. Platelets count. : ESR test. Bleeding time Test. Blood pressure. Physiological and pathological variation of Blood pressure. Blood groups. Respiratory test.[18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: An introduction to the study of Physiology of the body. Definition of body systems and understands how this system work under normal conditions. Definition of the techniques uses to estimation of body parameters. Study the disorders of this systems physiology and study the diseases results from disorders in homeostats. The relationships between the different body systems. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

<b>Week 12</b>	Functions of the Digestive System.
<b>Week 13</b>	Nervous Regulation of the Digestive System. Function of Stomach. Regulation of Gastric Secretion.
<b>Week 14</b>	Pancreas. Gall Bladder.
<b>Week 15</b>	Small Intestine. Large intestine.

<b>Delivery Plan (Weekly Lab. Syllabus)</b> المنهاج الاسبوعي للمختبر	
	<b>Material Covered</b>
<b>Week 1</b>	Lab 1: General safety instructions in the laboratory.
<b>Week 2</b>	Lab 2: Introduction Circulatory system.
<b>Week 3</b>	Lab 3: Fragility test 1.
<b>Week 4</b>	Lab 4: Fragility test 2.
<b>Week 5</b>	Lab 5: Total Red Blood Cell count.
<b>Week 6</b>	Lab 6: differential count.
<b>Week 7</b>	Lab 7: Estimation Hemoglobin.
<b>Week 8</b>	Lab 8: PCV test.
<b>Week 9</b>	Lab9: Platelets count.
<b>Week10</b>	Lab 10: ESR test.
<b>Week 11</b>	Lab 11: Bleeding time Test.
<b>Week 12</b>	Lab 12: Blood pressure.
<b>Week 13</b>	Lab 13: Physiological and pathological variation of Blood pressure.
<b>Week 14</b>	Lab 14: Blood groups.
<b>Week 15</b>	Lab 15: Respiratory test.

<b>Learning and Teaching Resources</b> مصادر التعلم والتدريس		
	<b>Text</b>	<b>Available in the Library?</b>
<b>Required Texts</b>	Guyton, A. and Hall, J.E. (2016). "Text book of physiology". 11 <sup>th</sup> ed. Elsevier Saunders. China.	Yes
	Barrett, K.; brooks, H.; Boitano, S. and Barman, S. (2010). "Ganong's view of Medical Physiology". 23 <sup>th</sup> edition. McGraw Hill Companies. New York	Yes
<b>Recommended Texts</b>	Ghia, CL. (2013). A Textbook of Practical Physiology. Jaypee Brothers Medical Publishers (P) Ltd.; 8th edition.	No
<b>Websites</b>	<a href="https://www.nature.com/subjects/animal-physiology">https://www.nature.com/subjects/animal-physiology</a> <a href="https://www.sciencedirect.com/topics/agricultural-and-biological-sciences/animal-physiology">https://www.sciencedirect.com/topics/agricultural-and-biological-sciences/animal-physiology</a>	

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. The student's knowledge of the concept of pollution, its causes, types, risks, and how to reduce pollution.</li> <li>2. Knowing the negative effects of pollutants on the environment and human health.</li> <li>3. Identify the harmful effects of pesticides, fertilizers, oil and others.</li> <li>4. Identify solid waste, its types, damages, and disposal methods.</li> <li>5. Identify the types of radiation and radioactive pollution, its sources and its biological damage.</li> <li>6. Learn about the concept of the ecosystem and its components.</li> <li>7. Introducing the concept of environmental pollution and the factors contributing to it.</li> <li>8. Clarify the dangers and consequences of environmental pollution.</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. How to deal with any environmental problem and control the problem within the limits of capabilities.</li> <li>2. Understanding and distinguishing the types of factors and substances that contribute to the pollution of the ecosystem.</li> <li>3. Every student be able to knowledge about environment and how pollution it.</li> <li>4. Every student be able to chemical analysis water.</li> <li>5. The student should be able to collect and summarize useful information related to a study.</li> <li>6. The student proposes solutions to some environmental problems within the framework of protecting and preserving them.</li> <li>7 . That the student has the ability to work in a team.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>General introduction; definition. pollution types .Point sources &amp; non-point sources of pollution . Water pollution . Major pollutant. [16 hrs]</p> <p>Major pollutant: The hydrocarbons Agricultural pollution. The solid waste. Thermal pollution. Air pollution .[10 hrs]</p> <p>The greenhouse phenomenon. Acid rains. Thermal inversion. Noise pollution. Radiation pollution. Personal pollution. Visual Pollution. [12 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>Identifying the laboratory pollution.The Science of meteorological. Determination residual chlorine in the water. Determination chloride in the water. Determination</p>

	<p>BOD5 in the water. Determination COD. In the water. Determination nitrate in the water. [18 hrs]</p> <p>Determination phosphate in the water. Determination Sulphate in the water. Determination silica in the water. Relations between organisms. Field capacity of soil . Soil color. Soil Texture. Determination heavy metal in the water,1. Determination heavy metal in the water,2.. [18 hrs</p>
--	---

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents Students do study the following fields: Introduction of pollution. Types of pollution. The pollutants. Water Pollution. Soil Pollution. Noise Pollution. Introduction of Lab pollution. Identify the types of water pollutants. Able to physical and chemical analysis for water. Most students were active in our classes and interactive between them and us also. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	64	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	4.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	36	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	2.4
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>100</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	General introduction; definition. pollution types.
Week 2	Point sources & non-point sources of pollution
Week 3	Water pollution.
Week 4	Major pollutant. Major pollutant: The hydrocarbons
Week 5	Agricultural pollution.
Week 6	The solid waste.
Week 7	Thermal pollution.
Week 8	Air pollution
Week 9	The greenhouse phenomenon.
Week 10	Acid rains.
Week 11	Thermal inversion.
Week 12	Noise pollution.
Week 13	Radiation pollution.
Week 14	Personal pollution.
Week 15	Visual Pollution.

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Identifying the laboratory pollution.
Week 2	Lab 2: The Science of meteorological.
Week 3	Lab 3: Determination residual chlorine in the water.
Week 4	Lab 4: Determination chloride in the water.
Week 5	Lab 5: Determination BOD <sub>5</sub> in the water.
Week 6	Lab 6: Determination COD. In the water.
Week 7	Lab 7: Determination nitrate in the water.
Week 8	Lab 8: Determination phosphate in the water.

<b>Week 9</b>	Lab9: Determination Sulphate in the water.
<b>Week10</b>	Lab 10: Determination silica in the water.
<b>Week 11</b>	Lab 11: Relations between organisms.
<b>Week 12</b>	Lab 12: Field capacity of soil.
<b>Week 13</b>	Lab 13: Soil color. Soil Texture.
<b>Week 14</b>	Lab 14: Determination heavy metal in the water,1.
<b>Week 15</b>	Lab 15: Determination heavy metal in the water,2.

<b>Learning and Teaching Resources</b> مصادر التعلم والتدريس

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. The student's comprehension of the concept of the course and his ability to distinguish between it and other sciences.</li> <li>2. Addressing a comprehensive description of the various body systems, with a focus on ruminant field animals and poultry.</li> <li>3. Studying the vital processes that occur in the animal's body that transform the nutrients that the animal eats and turn them into animal products or other secondary waste.</li> <li>4. Basic and physiology of growth and reproduction.</li> <li>5. Keep up with the development that is happening in the world</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. The students understand different physiological mechanisms in the body.</li> <li>2. Help the students to master the interaction and relationships between body systems.</li> <li>3. The development of student's skills for going into relationship between the physiological and pathological disorders.</li> <li>4. The students understand mode of action each physiological test.</li> <li>5. Help the students to master the procedure of each physiological test.</li> <li>6. The development of student's skills for going into the laboratory work experience as specialist who has an excellent background on all physiological tests and their relationship to disease and not as technician operating advice.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Introduction to Physiology. Cell physiology. The mechanisms of transports across the cell membrane. Phagocytosis mechanism. Pinocytosis mechanism. [10 hrs]</p> <p>Blood physiology. Physical Characteristics of blood. Plasma, Erythrocytes, Erythropoiesis. erythrocyte disorders. Types of anemia. Leukocytes. Functions of all types of Leukocytes. Platelets, Hemostasis mechanism, Fibrinolysis.[18hrs]</p> <p>Physiology of Digestion system. Functions of the Digestive System. Nervous Regulation of the Digestive System. Function of Stomach. Regulation of Gastric Secretion. Pancreas. Gall Bladder. Small Intestine. Large intestine [18hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>General safety instructions in the laboratory. Introduction Circulatory system. Fragility test 1. Fragility test 2. Total Red Blood Cell count. differential count. Estimation Hemoglobin. [18 hrs]</p> <p>PCV test. Platelets count. : ESR test. Bleeding time Test. Blood pressure. Physiological and pathological variation of Blood pressure. Blood groups. Respiratory test.[18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters . Students do study the following fields: An introduction to the study of Physiology of the body. Definition of body systems and understands how this system work under normal conditions. Definition of the techniques uses to estimation of body parameters. Study the disorders of this systems physiology and study the diseases results from disorders in homeostats. The relationships between the different body systems. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

<b>Week 6</b>	Physical Characteristics of blood. Plasma, Erythrocytes, Erythropoiesis.
<b>Week 7</b>	erythrocyte disorders.
<b>Week 8</b>	Types of anemia. Leukocytes.
<b>Week 9</b>	Functions of all types of Leukocytes.
<b>Week 10</b>	Platelets, Hemostasis mechanism, Fibrinolysis.
<b>Week 11</b>	Physiology of Digestion system.
<b>Week 12</b>	Functions of the Digestive System.
<b>Week 13</b>	Nervous Regulation of the Digestive System. Function of Stomach. Regulation of Gastric Secretion.
<b>Week 14</b>	Pancreas. Gall Bladder.
<b>Week 15</b>	Small Intestine. Large intestine.

<b>Delivery Plan (Weekly Lab. Syllabus)</b> المنهاج الاسبوعي للمختبر	
	<b>Material Covered</b>
<b>Week 1</b>	Lab 1: General safety instructions in the laboratory.
<b>Week 2</b>	Lab 2: Introduction Circulatory system.
<b>Week 3</b>	Lab 3: Fragility test 1.
<b>Week 4</b>	Lab 4: Fragility test 2.
<b>Week 5</b>	Lab 5: Total Red Blood Cell count.
<b>Week 6</b>	Lab 6: differential count.
<b>Week 7</b>	Lab 7: Estimation Hemoglobin.
<b>Week 8</b>	Lab 8: PCV test.
<b>Week 9</b>	Lab9: Platelets count.
<b>Week10</b>	Lab 10: ESR test.
<b>Week 11</b>	Lab 11: Bleeding time Test.
<b>Week 12</b>	Lab 12: Blood pressure.
<b>Week 13</b>	Lab 13: Physiological and pathological variation of Blood pressure.
<b>Week 14</b>	Lab 14: Blood groups.
<b>Week 15</b>	Lab 15: Respiratory test.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Definition of physiology.</li> <li>2. Studying plant cell structure and function of different cellular organelles.</li> <li>3. Study of water relations.</li> <li>4. Study the importance of mineral elements for plants.</li> <li>5. Brief study of structural and catabolic metabolism.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. He prepares samples of plant tissue to study the plant cell under a microscope.</li> <li>2. Study the properties of water.</li> <li>3. And how to prepare solutions and study the phenomenon of diffusion, osmosis and plasma.</li> <li>4. Prepare experiments to study how water and nutrients move.</li> <li>5. Discusses how each plant organ performs its different functions.</li> <li>6. The relationship of each part of the plant to the other.</li> <li>7. Explain the different ways of absorbing and transporting water in plants.</li> <li>8. And how plants sweat differentiate between plant needs of mineral elements.</li> <li>9. That the student be able to understand the different parts of the plant body and their relationship to the concept of physiology.</li> <li>10. Realizing the importance of water and distinguishing between the mechanism of uptake, transport and loss of water from plants.</li> <li>11. The ability to understand the mechanism of absorption of nutrients.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> I Introduction to plant physiology. Solutions Types. ◊ Solutions : properties. Solutions : Preparation. Plant Water relations. properties of water and its importance. [10 hrs] Diffusion, define, factors affecting on diffusion, importance. Imbibition, Conditions necessary for imbibition, Factors affecting on imbibition, Impotence of imbibition [8 hrs] Osmosis ,Conditions in Osmosis Water potential. components of water potential. Permeability, types of membrans, General rules of permeability. Impotence o permeability Water potential and their components. [10 hrs] Tranclocation, Pathway of water transport. Transpiration (types, mechanism ◊ theory, Guttation, Bleeding, [8 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u>

	<p>Study of Osmosis. Permeability. Permeability, define,factors affecting, rules for permeability, importance Osmosis, Conditions in Osmosis Water potential, components of water potential. Ways of solutes entry and transport through the plant cells membranes,simple and Facilitated diffusion, active transport . Transpiration.Types of transpiration Stomata, Structure of stomata, Number of Stomata (Stomatal Frequency). [18 hrs]</p> <p>Mechanism of transpiration, Stomatal movement, Role of transpiration. Phytohormones are chemical messengers that coordinate cellular activities. This lecture introduces the plant hormones (auxin, cytokinin, gibberellic acid, brassinosteroids, ethylene, abscisic acid, salicylic acid and jasmonic acid) through their roles, during the plants life, from seed-to-seed.Photosynthesis is the process by which plants use sunlight, water, and carbon dioxide to create oxygen and energy in the form of sugar. [18 hrs]</p>
--	---

<b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم	
<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents .Students do study the following fields: Solution, Types( True,colloidal,suspension,Eumlsion) . Colloidal systems, properties, Buffer solution. Plant water relationship,properties of water,Diffusion,define,factors affecting on diffusion, importance . Imbibition, define,factors affecting, Conditions necessary for imbibition, importance . Permeability, define,factors affecting, rules for permeability, importance Osmosis, Conditions in Osmosis Water potential, components of water potential. Ways of solutes entry and transport through the plant cells membranes,simple and Facilitated diffusion, active transport Relationship between plants and environment, Absorption of water and solutes by plants roots, Factors affecting water absorption by root . Water and minerals transport in plant(Translocation), Pathway of water transport Mechanisms (theory) of water and its solute transport, Root pressure, Transpiration pulls, Cohesion-Adhesion theory, Guttation, Bleeding . Transpiration.Types of transpiration Stomata, Structure of stomata, Number of Stomata (Stomatal Frequency). Mechanism of transpiration, Stomatal movement, Role of transpiration. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters Students do study the following fields: The characteristics of chordate animals.They understand the four subphylums of chordate. The classifications and characteristics of Psices.They study the subphylum of vertebrata. Taxonomy of chordates. Evolutionary relationship. Protochordates. Comparative anatomy of all systems in the vertebrate body. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students</p>
-------------------	---

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	79	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	71	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	4.7
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>150</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			100% (100 Marks)		

## Delivery Plan (Weekly Syllabus)

### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Introduction & historical overview, of chordates & vertebrates
Week 2	taxonomy of chordates & vertebrates
Week 3	Evolutionary relationship, protochordates
Week 4	Protochordates
Week 5	Comparative anatomy of integument of chordates, skin derivatives1.
Week 6	Comparative anatomy of integument of chordates, skin derivatives2.
Week 7	Comparative anatomy of integument of chordates, skin derivatives3.
Week 8	Comparative anatomy of integument of chordates, skin derivatives4.
Week 9	Comparative anatomy of digestive .
Week 10	Comparative anatomy respiratory system.
Week 11	Comparative anatomy of excretory system & types of kidneys1.
Week 12	Comparative anatomy of excretory system & types of kidneys2.
Week 13	Comparative anatomy of skeletal system.
Week 14	Comparative anatomy of nervous system.
Week 15	sense organs.

## Delivery Plan (Weekly Lab. Syllabus)

### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: The characteristics of chordate.
Week 2	Lab 2: subphylums of chordate,urochordata,.
Week 3	Lab 3: subphylums,hemichordate.
Week 4	Lab 4: r subphylums cephalochordate.
Week 5	Lab 5: The classes of fishes agnatha .
Week 6	Lab 6: .chondrichthyes.
Week 7	Lab 7: Osteochthyes .
Week 8	Lab 8: the beginning of tetrapoda.
Week 9	Lab9: The characteristics of class amphibian, and the orders of it1.

<b>Week10</b>	Lab 10: The characteristics of class amphibian, and the orders of it2.
<b>Week 11</b>	Lab 11: The characteristics of class Reptilia1.
<b>Week 12</b>	Lab 12: The characteristics of class Reptilia2.
<b>Week 13</b>	Lab 13: The characteristics of class Aves.
<b>Week 14</b>	Lab 14: The characteristics of class Mammlia1.
<b>Week 15</b>	Lab 15: The characteristics of class Mammlia2.

### Learning and Teaching Resources

#### مصادر التعلم والتدريس

	Text	Available in the Library?
<b>Required Texts</b>	Vertebrates: Comparative Anatomy, Function, Evolution 8th Edition . by <a href="#">Kenneth Kardong</a> .1998	Yes
<b>Recommended Texts</b>	Comparative Anatomy: Manual of Vertebrate Dissection, 3e 3rd Edition . by <a href="#">Dale W. Fishbeck</a> (Author), <a href="#">Aurora M. Sebastiani</a> . 2015	No
<b>Websites</b>	<a href="https://byjus.com/biology/comparative-anatomy/">https://byjus.com/biology/comparative-anatomy/</a> <a href="https://www.inspiritvr.com/general-bio/evolution/comparative-anatomy-study-guide">https://www.inspiritvr.com/general-bio/evolution/comparative-anatomy-study-guide</a>	

### Grading Scheme

#### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
Success Group	A - Excellent	امتياز	90 - 100	Outstanding Performance

<b>(50 - 100)</b>	<b>B - Very Good</b>	جيد جدا	80 - 89	Above average with some errors
	<b>C - Good</b>	جيد	70 - 79	Sound work with notable errors
	<b>D - Satisfactory</b>	متوسط	60 - 69	Fair but with major shortcomings
	<b>E - Sufficient</b>	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX – Fail</b>	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F – Fail</b>	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"><li>1. The student understood the basic concepts of immunology, the components of the immune system, its organs, cells, molecules and functions.</li><li>2. Learn about the mechanisms of immune response reactions, how they are regulated, and classify immune diseases</li><li>3. Learn about the importance of antibodies, their structure, types of antibodies, and the mechanism of interaction between antigens and antibodies.</li><li>4. Helping the student to understand how the immune system works in the normal physiological state and in the case of disease</li><li>5. Knowledge and understanding of clinical disorders associated with autoimmune diseases</li><li>6. The student understands the basic concepts of immunology, the components of the immune system, its organs, cells, molecules and functions</li><li>7. Learn about the mechanisms of immune response reactions, how they are regulated, and classify immune diseases</li><li>8. Learn about the importance of antibodies, their structure, the diversity of antibodies, and the mechanism of interaction between antigens and antibodies</li><li>9. Helping the student to understand how the immune system works in the normal physiological state and in the case of disease</li><li>10. Understanding the immunological basis for rejection of transplanted organs and the medical examinations required before organ transplantation</li><li>11. Knowledge and understanding of clinical disorders associated with autoimmune diseases</li><li>12. Learn about the mechanisms of immune response reactions, how they are regulated, and classify immune diseases</li></ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"><li>1. Understand how the immune system is used in prevention and treatment.</li><li>2. Learn about some laboratory immunological tests that are used in practice to detect the interactions of antibodies with antigens.</li><li>3. Familiarity with the importance of vaccinations.</li><li>4. The student's ability to distinguish between normal and abnormal immune response mechanisms.</li><li>5. The student realizes the impact of the surrounding environment, psychological state, and advanced age on the immune system and the increase in the incidence of cancerous tumors.</li><li>6. Introducing the importance of the basics of immunology and its relationship to other branches of science.</li><li>7. Study of the structure and anatomical description of the immune system, primary lymphoid tissue, secondary lymphoid tissue, bone marrow stem cells.</li></ol>

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Communicate pathogenic bacteria information to students</li> <li>2. Know their types and the diseases they cause</li> <li>3. and methods of diagnosis</li> <li>4. and treat it</li> <li>5. And keep pace with the development that is happening in the world</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Every student be able to isolation and identification pathogenic bacteria from different clinical sites</li> <li>2. Every student have a knowledge about antibiotic sensitivity test for each bacteria.</li> <li>3. The field of specialization is teaching pathological bacteria in detail.</li> <li>4- The students were able to understand the topic of pathogenic bacteria.</li> <li>5- The student should know the terminology related to the subject of pathogenic bacteria</li> <li>6- The student should understand the pathogenic mechanisms of bacteria and the types of bacteria that cause diseases</li> <li>7- The student should understand methods of diagnosing pathogenic bacteria</li> <li>8- The student should understand the methods of treating pathogenic bacteria</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction. Pathogenesis of Bacterial Infection .The Staphylococci. The Streptococci, Enterococci, and Related.[10 hrs] Enteric Gram-Negative Rods Enterobacteriaceae: E.coli. Salmonellae and Shigellae. Klebsiella and Proteus. Yersinia Species. [8 hrs] Pseudomonads and Vibrios. campylobacter and Haemophilus Species. Brucellae and Bordetellae. Spore-Forming Gram-Positive Bacilli: Bacillus. Clostridium Species.[10 hrs] Aerobic Non-Spore-Forming Gram-Positive Bacilli: Corynebacterium and Nocardia. Mycobacteria .Mycoplasmas and Cell Wall-Defective. Rickettsia and Related Genera. [8 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Introduction of biological lab. Safety.Methods for collection samples from patients1.. Methods for collection samples from patients2.Staphylococcus spp..Streptococcus spp.[18 hrs] Enterobacteriaceae 1.Enterobacteriaceae 2.Enterobacteriaceae 3.Enterobacteriaceae 4.Pseudomonas spp.Haemophilus spp.Bordetella spp.Lactobacillus spp.Vibrio spp.Clostridium. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters Students do study the following fields: Normal flora in human body and route of entry.Mechanisms of defense.Staphylococcus spp .Streptococcus spp .Enterobacteriaceae .Pseudomonas spp .Haemophilus spp .Bordetella spp .Lactobacillus sp Vibrio spp. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Conveying information to students about microorganisms that grow in food, causing spoilage and spoilage.</li> <li>2. growth conditions.</li> <li>3. control the health problems caused by such as diseases and food poisoning.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1- The field of specialization is teaching the growth of microorganisms in food and dairy and the spoilage it causes</li> <li>2- Teaching the microbial populations responsible for food poisoning and developing and implementing procedures related to combating food poisoning infection.</li> <li>3- Describe the controls that can be used to control microbial and enzymatic activity to reduce the rate of food spoilage and spoilage.</li> <li>4- Assessment of the burden of food contamination and foodborne diseases</li> <li>5- Describe how bacteria produce toxins and distinguish between exotoxins and endogenous toxins.</li> <li>6- Students were able to understand the principles of food microbiology</li> <li>7- Help students how to master the role of microorganisms in spoilage of food and study the environment factors effects on food spoilage</li> <li>8- Encouraging students to develop their skills and Give students homework</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> [Introduction. Microbial spoilage of food.. Factors affecting growth and survival of microorganisms in foods. Intrinsic factors. 10 hrs] Extrinsic factors. Principles of food preservation. And Food preservation by use of high temperatures. Food preservation by use of low temperature. [8 hrs] And Preservative by food additives. Food preservation by radiation.. Spoilage of milk and milk products. Microbiology of fruits and vegetables. [10 hrs] Microbiology of meat and meat products .Spoilage of meat and meat products. Bacterial causes of food poisoning. [8 hrs] Revision problem classes [3 hrs]  <u>Part B – Practical labs</u> History of m.o. in food. Laboratory safety. Enumeration of microorganisms. Microbiological examination of milk.: Microbial examination of dairy product. Microbial examination of cheese. Detection of coliform. [18 hrs] Microbial examination of milk cattle have mastitis. Microbial examination of flour and sugar. Microbial examination of fruit juice. Microbial examination of meat. Microbial examination of frozen foods. Microbial examination of poultry meat and fish. Microbial examination of eggs. Microbial examination of eggs and Microbial examination of canned foods. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters Students do study the following fields: Normal flora and pathogenic in food. Develop students' skills in terms of acquired and natural skills. The student was able to carry out the tasks of teaching pathogenic bacteria. The student was able to work in laboratories, hospitals and health institutions. The student was able to be aware of safety issues from diseases and their treatment in case of injury. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

<b>Fail Group (0 - 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

Cell disruption methods 2. Preparation of bacterial extract. Protease enzyme. Lipase enzyme. [18 hrs]</p> <p>Aspartate aminotransferase, Alanine aminotransferase. Decarboxylase enzyme .denitrification. Alkaline phosphatase.: Cytochrome oxidase.. catalase. Lecithinase .coagulase. of antibiotic: 3. Production of biogas (methan. Solution preparation 1. Solution preparation 2. [18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

#### Strategies

Teaching Techniques: The lectures are explained through audio files, videos and recording files of the lectures so that the student can refer to them whenever he wants that to avoid the problems of power outages and weak in internet. The lectures are also explained and communicating with students through the meeting by the Classroom for the purpose of agitation topics related to the scientific subject to be discussed in a scientific way. Students are given daily tests in order to keep the student in touch with the scientific material and to consolidate the information in the student's mind. Assigning students to answer intellectual questions about some topics and discussing them in the next lecture to develop the aims of scientific research and delve into the subtleties of the scientific material and study the various aspects of the subject in terms of its connection to other science and their applications.

Assigning students to write some reports related to the scientific subject and their interaction with the scientific material to set grades that fall within the student's scientific assessment . Taking into consideration the student's attendance in lectures and the extent of his ability to participate in the discussions presented during the lectures, and this is part of the student's assessment methods. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	22	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	1.4
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>100</b>		

Module Evaluation					
تقييم المادة الدراسية					
		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
Formative assessment	Quizzes	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	Assignments	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	Projects / Lab.	1	10% (10)	Continuous	All
	Report	1	10% (10)	13	LO #5, #8 and #10
Summative assessment	Midterm Exam	2hr	10% (10)	7	LO #1 - #7
	Final Exam	3hr	50% (50)	16	All
Total assessment			100% (100 Marks)		

Delivery Plan (Weekly Syllabus)	
المنهاج الأسبوعي النظري	
	Material Covered
Week 1	Introduction to enzymology .
Week 2	General review of protein.
Week 3	Nomenclature of enzyme .
Week 4	Activation energy.
Week 5	Mechanism of enzyme action .
Week 6	. Specificity of enzyme.
Week 7	Assay of enzyme and Units of enzyme activity.1.
Week 8	Assay of enzyme and Units of enzyme activity.2.
Week 9	Enzyme inhibition part 1 and 2.
Week 10	Enzyme inhibition part 1 and 2.
Week 11	Enzyme kinetics part 1 and 2.
Week 12	Enzyme kinetics part 1 and 2.
Week 13	Examples of enzyme inhibition.
Week 14	Clinical enzymology.
Week 15	Industrial enzymology.

## Delivery Plan (Weekly Lab. Syllabus)

المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Introductin to Enzymes.
Week 2	Lab 2: Preparing chemical solutions.
Week 3	Lab 3: Cell disruption methods1.
Week 4	Lab 4: Cell disruption methods2.
Week 5	Lab 5: Preparation of bacterial extract.
Week 6	Lab 6: Protease enzyme.
Week 7	Lab 7: Lipase enzyme.
Week 8	Lab 8: Aspartate aminotransferase,Alanine aminotransferase.
Week 9	Lab9: Decarboxylase enzyme .
Week10	Lab 10: denitrification.
Week 11	Lab 11: Alkaline phosphatase.
Week 12	Lab 12: Cytochrome oxidase.
Week 13	Lab 13: . catalase.
Week 14	Lab 14: Lecithinase .
Week 15	Lab 15: coagulase.

## Learning and Teaching Resources

مصادر التعلم والتدريس

	Text	Available in the Library?
Required Texts	1-Fundamentals of Biochemistry (2005 ) by Lehninger	Yes
	2-Enzyme Inhibition and Bioapplications (2012) by Rakesh Sharma	Yes
	3-Clinical chemistry and enzymology (2008) by Jaromir Kotyza and Radim Cerny.	yes
Recommended Texts	Murray, R. K., Bender, D.A., BothamEl, K.M., Kennelly, P.J., Rodwell, V.W., Weil, P.A. (2016). Harper,s Illustrated Biochemistry .29th edition. The Mc GRAW-Hill Companies, USA.	Yes

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1- The course aims to show that microorganisms, especially bacteria, possess a genetic apparatus, contrary to what was rumored that the phenotypic differences in bacteria are based on adaptation.</li> <li>2- This genetic system, in its molecular basis and in performing its various functions, does not differ from the genetic system of the rest of living organisms.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Enable students to understand the importance of mutations, if it is the source of genetic variation, or if the mutation is the source of many diseases and disorders.</li> <li>2. Understand plasmids, their role in bacteria, types of their replication, and the importance of the genes they carry.</li> <li>3. Understand how DNA is mobilized between bacteria either naturally or by genetic engineering.</li> <li>4. Encouraged the students to improve their skills in critical thinking in genetic engineering techniques.</li> <li>5. By studying this subject, student, could understand genetic microbiology.</li> <li>6. Helping the student to understand molecular genetic strategies like PCR basics.</li> <li>7. Encouraging student to develop their skills in laboratory tests.</li> <li>8. understanding molecular biological studies, the manipulation of eukaryotic organisms, and practical applications (biotechnology) in diverse areas of life sciences.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction. Mutations and their types.1. Mutations and their types.2. DNA repair1. DNA repair2. Selection of mutants Selection of mutants[18 hrs] Plasmids and copy number regulation1. Plasmids and copy number regulation2. Gene regulation part 1. Gene regulation part 2. Gene regulation part 3.[18hrs] Transformation and competence. Conjugation. transduction [8 hrs] Revision problem classes [3 hrs] <u>Part B – Practical labs</u> Introduction in genetic lab principles.Detection of spontaneous mutation.1.Detection of spontaneous mutation2.Detection of spontaneous mutation3.Detection of antibiotic resistance1.Detection of antibiotic resistance2. [18 hrs] Horizontal gene transfer: transformation1.Horizontal gene transfer: transformation2.Conjugation.PCR.electrophoresis.Plasmid isolation.Plasmid curing.Ames Test[18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents .Student Behavior in Class: were very good and polite.Teaching Techniques: Variety of methods: traditional and modern ways, like Online oral questions using Google meet ranging from easy to those that require critical thinking. Power-point presentations. Written tests. This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

<b>Learning and Teaching Strategies</b> استراتيجيات التعلم والتعليم	
<b>Strategies</b>	Expanding students' perceptions about this science and its contents .The viruses are too small to be seen with a light microscope. Their small size allows them to pass through filters that are used to retain back bacteria in contaminated fluids. Hence, they were first described as filterable agents. Viruses, like other microorganisms (e.g., bacteria, fungi, and parasites), are the infectious agents that are associated with disease in humans.The viruses unlike other infectious agents are obligate intracellular parasites, i.e., they absolutely require living host cells in order to multiply. In addition, viruses replicate by assembly of the individual components rather than by binary fission .This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students.

	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<p><b>Module Objectives</b> أهداف المادة الدراسية</p>	<p>This study aims</p> <ol style="list-style-type: none"> <li>1. Understand the principles of biology at the molecular level.</li> <li>2. Identifying the molecular structure of nucleic acids, their replication and their role in building protein</li> <li>3. Understanding methods of controlling the level of gene expression in living cells.</li> <li>4. Developing the student's perceptions by giving him an idea of recent trends in molecular biology.</li> <li>5. Learn about modern applications of molecular genetics in various fields of life</li> <li>6. Realizing the great progress in molecular genetics and its impact on human life.</li> </ol>
<p><b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية</p>	<ol style="list-style-type: none"> <li>1. Help the students to understand the genetic material nature and how it can be duplicated and transferred to the following off spring</li> <li>2. Develops the students own skills to deal with genetic material and the mechanisms of its extraction and diagnosis different damage</li> <li>3. Encourage students to discuss various problems and possible disease that occurred due to specific DNA Damages.</li> <li>4. The students learn what are the advantages of DNA and RNA extraction.</li> <li>5. The students know the types of cell disruption and distinguish between these types.</li> <li>6. The students can distinguish between molecular techniques and other technique.</li> </ol>
<p><b>Indicative Contents</b> المحتويات الإرشادية</p>	<p>Indicative content includes the following.</p> <p><u>Part A – Theoretical lectures</u></p> <p>Chemical structure. physical properties of Nucleic acids. DNA REPLICATION1. DNA REPLICATION2. Transcription of prokaryotic DNA1. Transcription of prokaryotic DNA2.[10 hrs]</p> <p>, prokaryotic transcription. eukaryotic transcription. Translation in prokaryotics1. Translation in prokaryotics2.[8 hrs]</p> <p>Main differences between pro and eukaryotic translation1. Main differences between pro and eukaryotic translation2. Pro and eukaryotic gene structure.[10 hrs]</p> <p>Gene expression.1. Gene expression2. [8 hrs]</p> <p>Revision problem classes [3 hrs]</p> <p><u>Part B – Practical labs</u></p> <p>Introduction of information about laboratory safety.Introduction of cell disruption.DNA extraction .RNA extraction.Detection RNA and DNA.1.Detection RNA and DNA2..Estimation of DNA concentration and purity1.Estimation of DNA concentration and purity2. [18 hrs]</p> <p>PCR technique1.PCR technique2.Gel electrophoresis1.Gel electrophoresis2.Molecular techniques.1.Molecular techniques2.Molecular techniques3. [18 hrs]</p>

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	Expanding students' perceptions about this science and its contents . Various techniques were used such as. Data show , Microscope, Posters Students do study the following fields: DNA Chemical structure and physical properties. Eukaryotic and Prokaryotic chromosome organization and packaging. Prokaryotic replication of DNA and eukaryotic differences. Protein synthesis , Transcription and Translation. Prokaryotic and eukaryotic gene structure.. Prokaryotic and eukaryotic gene expression (LAC Operon). This will be achieved through lectures, labs, and interactive tutorials and by types of practical diagnostic methods and involving some sampling activities that are interesting to the students
-------------------	---

## Student Workload (SWL)

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

<b>Structured SWL (h/sem)</b> الحمل الدراسي المنتظم للطالب خلال الفصل	78	<b>Structured SWL (h/w)</b> الحمل الدراسي المنتظم للطالب أسبوعيا	5.2
<b>Unstructured SWL (h/sem)</b> الحمل الدراسي غير المنتظم للطالب خلال الفصل	22	<b>Unstructured SWL (h/w)</b> الحمل الدراسي غير المنتظم للطالب أسبوعيا	1.4
<b>Total SWL (h/sem)</b> الحمل الدراسي الكلي للطالب خلال الفصل	<b>100</b>		

## Module Evaluation

### تقييم المادة الدراسية

		Time/Number	Weight (Marks)	Week Due	Relevant Learning Outcome
<b>Formative assessment</b>	<b>Quizzes</b>	2	10% (10)	5 and 10	LO #1, #2 and #10, #11
	<b>Assignments</b>	2	10% (10)	2 and 12	LO #3, #4 and #6, #7
	<b>Projects / Lab.</b>	1	10% (10)	Continuous	All
	<b>Report</b>	1	10% (10)	13	LO #5, #8 and #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 - #7
	<b>Final Exam</b>	3hr	50% (50)	16	All
<b>Total assessment</b>			<b>100% (100 Marks)</b>		

<b>Delivery Plan (Weekly Syllabus)</b> المنهاج الأسبوعي النظري	
	<b>Material Covered</b>
<b>Week 1</b>	Chemical structure .
<b>Week 2</b>	physical properties of Nucleic acids.
<b>Week 3</b>	DNA REPLICATION1.
<b>Week 4</b>	DNA REPLICATION2.
<b>Week 5</b>	Transcription of prokaryotic DNA1.
<b>Week 6</b>	Transcription of prokaryotic DNA2.
<b>Week 7</b>	prokaryotic transcription.
<b>Week 8</b>	eukaryotic transcription.
<b>Week 9</b>	Translation in prokaryotics1.
<b>Week 10</b>	Translation in prokaryotics2.
<b>Week 11</b>	Main differences between pro and eukaryotic translation1.
<b>Week 12</b>	Main differences between pro and eukaryotic translation2.
<b>Week 13</b>	Pro and eukaryotic gene structure.
<b>Week 14</b>	Gene expression.1.
<b>Week 15</b>	Gene expression2.

<b>Delivery Plan (Weekly Lab. Syllabus)</b> المنهاج الاسبوعي للمختبر	
	<b>Material Covered</b>
<b>Week 1</b>	Lab 1: Introduction of information about laboratory safety.
<b>Week 2</b>	Lab 2: Introduction of cell disruption.
<b>Week 3</b>	Lab 3: DNA extraction.
<b>Week 4</b>	Lab 4: RNA extraction.
<b>Week 5</b>	Lab 5: Detection RNA and DNA.1.
<b>Week 6</b>	Lab 6: Detection RNA and DNA2..
<b>Week 7</b>	Lab 7: Estimation of DNA concentration and purity1.
<b>Week 8</b>	Lab 8:. Estimation of DNA concentration and purity2.

<b>Week 9</b>	Lab9: PCR technique1.
<b>Week10</b>	Lab 10: PCR technique2.
<b>Week 11</b>	Lab 11: Gel electrophoresis1.
<b>Week 12</b>	Lab 12: Gel electrophoresis2.
<b>Week 13</b>	Lab 13: Molecular techniques.1.
<b>Week 14</b>	Lab 14: Molecular techniques2.
<b>Week 15</b>	Lab 15: Molecular techniques3.

<b>Learning and Teaching Resources</b> مصادر التعلم والتدريس		
	Text	Available in the Library?
<b>Required Texts</b>	1- Vennison, S. J.(2009). Laboratory Manual for Genetic Engineering.	Yes
	2- O'Grady,S. et.al., (2011).Molecular Biology Techniques Laboratory Manual..	No
	3- Harish, P.(1992).Association for biology Education.	Yes
	4-Nucleic acid detection, ultrasensitive fluorescent, gel stains and quantitation reagents.	NO
	5- Amin-ul Mannan, M. ; Sharma, S. and Ganesan , K. (2009). Total RNA isolation from recalcitrant yeast cells. Analytical Biochemistry, 389: 77-79.	Yes
<b>Recommended Texts</b>	6- Maniatis, T.; Fritsch, E.F. and Sambrook, J. (1982). Molecular Cloning: A Laboratory Manual, Cold Spring Harbor Laboratory, Cold Springs Harbor, NY.	Yes

## Grading Scheme

### مخطط الدرجات

Group	Grade	التقدير	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	امتياز	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	جيد جدا	80 - 89	Above average with some errors
	<b>C</b> - Good	جيد	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	مقبول	50 - 59	Work meets minimum criteria
<b>Fail Group (0 - 49)</b>	<b>FX</b> – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	راسب	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Module Aims, Learning Outcomes and Indicative Contents

أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

<b>Module Objectives</b> أهداف المادة الدراسية	This study aims <ol style="list-style-type: none"> <li>1. Convey information to the student about the microorganisms used in the industry.</li> <li>2. To produce organic acids.</li> <li>3. Vaccines.</li> <li>4. fermented food</li> <li>5. Antibiotics.</li> </ol>
<b>Module Learning Outcomes</b> مخرجات التعلم للمادة الدراسية	<ol style="list-style-type: none"> <li>1. Students were able to understand the principles of industrial microbiology</li> <li>2. Help students how to master the role of microorganisms in industry</li> <li>3. Encouraging students to develop their skills and the application mechanisms of microbial industry and how to exploit them in the market</li> <li>4- By studying this subject, the student could understand industrial microbiology and the importance of it .</li> <li>5. Helping the student to perfection the experiment of industrial microbiology</li> <li>6. Encouraging student to develop his skills in laboratory .</li> <li>7. Give students homework</li> <li>8. the lecture includes the principle of explanation, clarification, , discussion, practical aspects, etc.</li> </ol>
<b>Indicative Contents</b> المحتويات الإرشادية	Indicative content includes the following. <u>Part A – Theoretical lectures</u> Introduction. Industrial microbiology and Fermentation. Fermentation. Industrial microorganisms and its nutritional requirements. . fermentation media ;Extraction and purification of products. Fermenters ,metabolites, fermentation conditions. microbial production of enzymes. [18 hrs] SCP production. bakery yeast production. Organic acid production: Vitamins production. [10 hrs] Fatty acids production; Ethanol and other solvents production. Antibiotic production. Beer production. Wine production. [18 hrs] Revision problem classes [3 hrs]  <u>Part B – Practical labs</u> Requirement for industrial fermentation Production of ethanol and vinegar .Production of ethanol and vinegar. Production of lactic acid and glutamic acid by fermentation. Production of lactic acid and glutamic acid by fermentation. Industrial production of citric acid. Industrial production of citric acid. [18 hrs]  Single cell protein. Production of antibiotic: penicillin. Production of antibiotic: 2. Production of antibiotic: 3. Production of biogas (methan. Solution preparation 1. Solution preparation 2. [18 hrs]

## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

<b>Strategies</b>	<p>Expanding students' perceptions about this science and its contents . Various techniques were used such as. ### Delivery Plan (Weekly Syllabus)

#### المنهاج الأسبوعي النظري

	Material Covered
Week 1	Introduction.
Week 2	Industrial microbiology and Fermentation.
Week 3	Fermentation.
Week 4	Industrial microorganisms and its nutritional requirements ,.
Week 5	,fermentation media ;Extraction and purification of products.
Week 6	Fermenters ,metabolites,fermentation conditions.
Week 7	microbial production of enzymes.
Week 8	SCP production.
Week 9	bakery yeast production.
Week 10	Organic acid production;
Week 11	Vitamins production.
Week 12	Fatty acids production;Ethanol and other solvents production.
Week 13	Antibiotic production.
Week 14	Beer production.
Week 15	Wine production.

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

	Material Covered
Week 1	Lab 1: Requirement for industrial fermentation
Week 2	Lab 2: Production of ethanol and vinegar .
Week 3	Lab 3: Production of ethanol and vinegar .
Week 4	Lab 4: Production of lactic acid and glutamic acid by fermentation.
Week 5	Lab 5: Production of lactic acid and glutamic acid by fermentation.
Week 6	Lab 6: Industrial production of citric acid.
Week 7	Lab 7: Industrial production of citric acid.

<b>Week 8</b>	Lab 8: Single cell protein.
<b>Week 9</b>	Lab9: Single cell protein.
<b>Week10</b>	Lab 10: Production of antibiotic:penicillin.
<b>Week 11</b>	Lab 11: Production of antibiotic:2.
<b>Week 12</b>	Lab 12: Production of antibiotic:3.
<b>Week 13</b>	Lab 13: Production of biogas(methan.
<b>Week 14</b>	Lab 14: Solution preparation1.
<b>Week 15</b>	Lab 15: Solution preparation2.
