First Year – Morning & Evening Classes

Course Duration: 15 weeks

----- Lecture Three -----

Respiratory System:

The respiratory system is defined as the organs involved in breathing, specifically the intake of oxygen and the expulsion of carbon dioxide. It includes the nose, mouth, throat, larynx, trachea, bronchi, and lungs, along with associated muscles and structures like the diaphragm and intercostal muscles.

	verb	Past Tense	Past Participle	Progressive	Reg x Irreg	Trans X Intra
