	<p>Environmental engineering department was established in 2011. The department is offering only Bachelor of Science (B.Sc.) in environmental engineering. Since the inception of the program, it has an intention to help not only the university and surrounding community, but also the country by preparing innovative engineers to meet the challenges of sustainability in this competitive age of globalization. For this reason, the program has been launched for developing well-trained and –educated environmental engineers capable of designing, planning, operating, managing and maintaining public utilities and promoting a benign ecological environment to safeguard its valuable resources of water, air, soil and health.</p> <p>The most distinct feature of the program is its diverse specialized fields such as water and wastewater treatment, air and noise pollution and control, solid and hazardous waste management, biological and chemical issues on environmental remediation process with water resources management.</p> <p>The current curriculum has covered all subdivision environmental engineering discipline. This curriculum a reference for the Bachelor of Science in Envir engineering offered at the College of Engineering university. 	I.D.	Fees Currency:	العملة
	<p>The submission of new students is done electronically through the Ministry of Higher Education website, which will distribute students based on the grades they obtained in the exit exam administered by the Ministry of Education. After the announcement of student distribution from the ministry, students will be directed to their specified programs and can begin registration with a simple process. This channel is known as Public One and is free of charge. Another acceptance channel, called the parallel channel, allows students who are accepted through it to attend classes alongside day students. Their grades were below the day limit, but they must pay a fee of 2,500,000 I.D. per year.</p>	Price Information	معلومات الأجور
