The College of Pharmacy aims to qualify graduates specialized in pharmaceutical sciences who are capable of working in governmental institutions and applying their skills in the practical and applied aspects of the profession. Striving to prepare and		Program Description	وصف البرنامج

graduate distinguished scientific and leadership competencies in the field of pharmaceutical sciences, contributing to the advancement of knowledge and scientific research in service of the community at the local, regional, and international levels, with a focus on training students, refining their scientific and cognitive skills, promoting social and cultural values, and effectively responding to the needs of the local labor market.

Objectives:

1. Encouraging students to engage with modern pharmaceutical trends, such as using computers in drug-related applications and identifying drug interactions.
2. Qualifying pharmaceutical professionals and enhancing their knowledge and practical skills in applied aspects within their areas of specialization.
3. Focusing on the quality of educational outcomes to prepare a qualified generation of pharmacists capable of practicing in healthcare, academic, and industrial sectors.

4. Graduating competent individuals capable of creativity and innovation, and keeping pace with scientific and technological advancements in all fields of pharmaceutical sciences.

5. Supporting and enhancing applied research skills through the use of modern laboratory equipment, contributing to the development of student competencies in drug analysis, formulation of various pharmaceutical forms, extraction of active ingredients, and determination of chemical, physical, and biological properties of compounds.

6. Deepening understanding of the practical aspects of drug therapy, with an emphasis on integrating theoretical knowledge with clinical application to improve pharmaceutical care provided to patients.

Encouraging students to interact with emerging pharmaceutical trends, including the use of specialized software in pharmaceutical practice and drug interaction detection.
