

## Contents

| <i>Subject</i>  | <i>Page</i> |
|---|-------------|
| <i>Molecular visible spectrophotometry</i>  | 1           |
| <i>Experiment No. 1: Determination of iron (III)</i>                                    | 4           |
| <i>Experiment No. 2: Determination of nitrite (<math>\text{NO}_2^-</math>)</i>          | 6           |
| <i>Experiment No. 3: Determination of aspirin</i>                                       | 8           |
| <i>Photometric titrations</i>   | 9           |
| <i>Experiment No. 4: Determination of benzoic acid</i>                                  | 11          |
| <i>Experiment No. 5: Determination of zinc ion</i>                                      | 12          |
| <i>Flame photometric analysis</i>   | 14          |
| <i>Experiment No. 6: Determination of sodium, potassium and calcium</i>                 | 17          |
| <i>Nephelometric and turbidimetric analysis</i>   | 19          |
| <i>Experiment No. 7: Determination of sulphate</i>                                      | 21          |
| <i>Potentiometric titrations</i>  | 23          |
| <i>Experiment No. 8: Determination of a mixture of hydrochloric and phosphoric acid</i> | 25          |
| <i>Experiment No. 9: Determination of the % acetylsalicylic acid in aspirin</i>         | 27          |
| <i>Experiment No. 10: Determination of the % acetic acid in vinegar</i>                 | 28          |
| <i>Experiment No. 11: Determination of the % ascorbic acid in vitamin C tablets</i>     | 29          |
| <i>Atomic absorption spectrophotometry</i>  | 31          |
| <i>References</i>   | 32          |
