

UI GreenMetric World University Rankings 2024

The 15th edition of our rankings showcases 1,477 institutions across 95 countries, making it the global university ranking system dedicated to assessing the sustainability performance of the institution.

Our rankings aim to present the results of an online survey on the current conditions and policies related to sustainability efforts and institutional improvements in universities all over the world. It is expected that by drawing the attention of university leaders and stakeholders, more attention will be given to global climate change, clean energy, water conservation, waste recycling, green transportation, and sustainability education and research. This will require increased awareness and a change in the behavior of many if we are to see it happen.

This year, we have introduced a new theme, "**Doing Sustainable Development Goals in Higher Education: The Story of Our Institution and Society**". We will continue to encourage greater participation from universities worldwide, fostering a collective commitment to building sustainable campuses for the future.
