|  | This specialization focuses on applying principles and techniques of Forensic Evidence, preparing a staff in high scientific competence in the fields of Crime Investigation, fingerprinting, collecting evidence, dealing with it and analyzing it, which leads to the diagnosis of perpetrators on unquestionable grounds.  | Specialization      | الاختصاص                 |
|  | <p>The Forensic Evidence program at the University of Mosul's College of Science is all about combining Forensic Evidence with Crime Investigation to help improve State institutions (Defense, Interior, Health). Over four years, students learn the basics of Forensic Evidence, like how maintaining evidence at the crime scene, sampling from its location, documenting evidence, learning how to deal with modern equipment and technologies, and supporting courts and prosecutors for the facts.</p> <p>Students study fascinating topics such as "Forensic Sciences" that is mean use of scientific methods and technologies to investigate crimes and analyze evidence in order to assist law enforcement and judicial systems. Also, the important topics that students learn "Forensic Computer Applications" refers to the use of digital tools and techniques to collect, preserve, analyze, and present data from computers</p> | Program Description | وصف البرنامج             |

|--|--|-----------------------------|---------------------------|
|  | <p>and digital devices for legal investigations. The students also explore biology and understand how the human body functions, which is key to applying Forensic Evidence effectively.</p> <p>In this program students spend a lot of time in laboratories and working on projects that give them practical experience. By the time they graduate, students have the skills and knowledge to work in competent state departments, research centers or companies that develop technology for criminal detection making a real difference in the detection of future crimes and innovation.</p> |                             |                           |
