Master's degree in veterinary Clinical Pathology	Specialization	الاختصاص
The Department of Internal and Preventive Medicine offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases. The program aims to enable students to keep pace with international standards for the diagnosis and treatment of sick animals by teaching a high level of clinical skills and patient care skills, in addition to updating medical knowledge as well as clinical experience and competence in the field of gastroenterology, cardiovascular diseases, endocrinology, blood diseases, kidney diseases and neurology, in addition to dealing with emergency cases and enabling candidates to conduct scientific and accurate handling of these cases, diagnose and treat them, as well as develop scientific control programs in the event of an epidemic Graduates have a broad understanding of the mechanistic basis of	Program Description	وصف البرنامج

<p>disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals. 5- Mention the basic ethical and methodology principles that should be applied in practice and are relevant to internal medicine. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the Ph.D.. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.</p>
